**Description:**

The Information Systems Security Program (ISSP) mission focuses on delivering Department of Defense (DoD) enterprise solutions to Combatant Commands, Services, and Defense-wide agencies to ensure critical mission execution in the face of cyber attacks. The ISSP ensures that, "the network, the computing centers, and core enterprise services will evolve to better support a joint information assurance model that has common enterprise-scale perimeter defenses and will support a broad range of sharing policies from completely unclassified to tightly-held within a classified community." The ISSP provides solutions to harden the network by: (1) reducing the exposed attack surface and gaps that potential adversaries can exploit to disrupt communications; (2) providing vital situational awareness to senior decision-makers and network defenders to enable attack detection and diagnosis; (3) supporting safe sharing of information with allies and mission partners; (4) publishing security guidelines and assessing compliance; (5) providing training to the DoD community; and (6) Implementing Software Defined Networking to enable network agility for faster response times to mission need and improved deterrence against cyber attacks.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.										
Justification: 2017: (\$32.113) Continued to procure the necessary hardware for reducing the attack surface of the DoD Network, preventing the exploitation by hackers and adversaries to disrupt missions, and improve the warfighter's ability to safely share information across DoD's classified and unclassified networks. DISA will procure the following capabilities: • Database Security Gateway Tool (DMZ) - (\$2.288) Eliminates the need for most DoD assets to directly connect with the public Internet and reduces the DODIN surface and exposure to attacks. Leverages DMZ technology refresh requirements to enable transition to commercial cloud providers. These cloud access points are a security gateway that protect the DODIN from possible attacks by way of external Cloud Service Provider traffic headed inbound for the DODIN. • NIPRNet Internet Access Points (IAPs) formerly NIPRNet De-Militarized Zone (DMZ) - (\$18.105) Break and inspect software and hardware procurement; implemented a new certification authorization and evaluation process with certifications tied to the DoD root; installation, integration, test, maintenance and technology refresh for monitoring the unclassified domain at the Internet Access Points (IAPs), De-Militarized Zone (DMZ), web applications, and Enterprise Email Security Gateway (EEMSG). • Defense Information Systems Network (DISN) Cyber Technology Refresh (\$0.035) Initiated procurement of HW/SW to support the cyber tech refresh of modernized web content filter equipment suites at specific Internet Access Points and security information event manager equipment enabling network defenders at the DISN perimeter and endpoints. Funding was reprioritized for break and inspect software and hardware procurement; installation, integration, test, maintenance and technology refresh for monitoring the unclassified domain at the Internet Access Points (IAPs), De-Militarized Zone (DMZ), web applications, and Enterprise Email Security Gateway (EEMSG). • Cross Domain Enterprise Services (CDES) - (\$0.018) Continued to purchase and implement a multi-mission enterprise solution for file sharing and enterprise email between users and devices residing on different networks (e.g. – NIPRNet and SIPRNet). Funding was reprioritized for break and inspect software and hardware procurement; installation, integration, test, maintenance and technology refresh for monitoring the unclassified domain at the Internet Access Points (IAPs), De-Militarized Zone (DMZ), web applications, and Enterprise Email Security Gateway (EEMSG). • Public Key Infrastructure (PKI) - (\$0.867) Tech refreshed current infrastructure including acquisition of replacement certificate authorities. • Perimeter Zero-Day Network Defense (P-ZND/Sharkseer) - (\$4.300) Identifies malicious attachments and links in Enterprise Email Security Gateway (EEMSG) emails coming from the public internet to DoD users and enables improved detection, analysis, and mitigation. Procured HW/SW to support ZND detection and response capabilities for EEMSG emails to eliminate the need for most DoD assets to directly connect with the public Internet and reduces the DODIN surface and exposure to attacks. • Big Data Platform - (\$6.500) The Big Data Platform (BDP) is the central, searchable, repository for network and computing data sets. The correlated information is used to validate threats, identity intrusions and measure effectiveness of blocks. It is Cyber Google for critical sensor data across the DODIN. Procured hardware supports the failover of a HOT Big Data Platform solution at an additional DECC location, providing COOP capabilities and 24x7 analytic support.  FY 2018: (\$24.805) Continue to procure the necessary HW/SW for reducing the attack surface of the DoD network, preventing exploitation by hackers and adversaries to disrupt missions, and improve the warfighter's ability to safely share information across DoD's classified and unclassified networks. DISA will procure the following capabilities: • Defense Information Systems Network (DISN) Cyber Technology Refresh (\$14.679) Will procure HW/SW to support the cyber tech refresh of modernized web content filter equipment suites at specific Internet Access Points and security information event manager equipment enabling network defenders at the DISN perimeter and endpoints. • Database Security Gateway Tool (DMZ) (\$3.560) Will procure HW/SW to support the NIPRNet Federated Gateway capability at specific Internet Access Point (IAP) network locations, expanding boundary locations, and database firewall acquisitions. • Enterprise Collaborative Operational Sensors (ECOS) (\$1.199) Will procure hardware to support tech refresh of the ECOS full packet capture capabilities at ten Internet Access Points (IAPs).

Line Item MDAP/MAIS Code: N/A		
<ul style="list-style-type: none"><li>• Cross Domain Enterprise Services (CDES) (\$1.734) Purchase and implement a multi-mission enterprise solution for file sharing and enterprise email between users and devices residing on different networks. Will also procure hardware to support tech refresh of High Speed Guards for enterprise file transfer and enterprise email.</li><li>• Public Key Infrastructure (PKI) (\$1.930) Will procure Non-Person Entity (NPE) hardware and software detection capabilities for encrypting and decrypting the associated user's identity within authorized DoD Networks.</li><li>• Endpoint Security Modernization (\$1.212) Purchase and implement secure host baseline containment/visibility licenses to modernize high-end security on DoD Networks. This will provide the ability to restrict high-risk applications and investigate security incidents on DoD Networks.</li><li>• Cyber Security Range (\$.491) Cyber Security Range is required to emulate NIPR and SIPR capabilities. Will procure HW/SW upgrades for the Cyber Security Range to emulate the new network infrastructure to aid in the training of our network operators to successfully train and prevent the exploitation by hackers and adversaries to disrupt missions, and improve the warfighter's ability to safely share information across DoD's classified and unclassified networks.</li></ul> <p>Explanation of Change from FY 2017 to FY 2018: The decrease of -\$7.308 between FY 2017 and FY 2018 is primarily attributable to the decrease one-time funding received in FY 2017 for Break and Inspect software and hardware procurement (-\$18.105), and one-time funding for P-ZND/Sharksheer (-\$4.300) and Big Data Platform (-\$6.500). This is partially offset by procurement of hardware to support tech refresh of sensor full packet capture capabilities at ten Internet Access Points (IAPs) (+\$1.199), procurement of HW/SW to support the DISN cyber tech refresh (+\$14.644), an increase for tech refresh of NIPRNet hardening HW at the NIPRNet/Internet Gateways (+\$1.272), acquisition of PKI certification authority based hardware (+\$1.063), additional enterprise high speed cross domain guards HW (+\$1.716), the purchase of secure licenses to modernize high-end security on DoD Networks (+\$1.212) and a funding increase to support the CNCI purchase of virtualized equipment (commodity HW, network and storage automation, switch ports, chassis, servers, etc.) to virtualize the DoD Cybersecurity Range (+\$0.491).</p> <p>FY 2019: (\$21.590) Continue to procure the necessary hardware for reducing the attack surface of the DoD Network, preventing the exploitation by hackers and adversaries to disrupt missions, and improve the warfighter's ability to safely share information across DoD's classified and unclassified networks. DISA will acquire the following capabilities:</p> <ul style="list-style-type: none"><li>• Perimeter Defense - (\$13.028) Will procure HW/SW to tech refresh the suite of systems that serve as the defense layer between the commercial internet and NIPRNet. Specifically acquire outbound URL filtering and inbound spyware, malware, anti-virus and vulnerability filtering equipment; Splunk logging system; Procure equipment to support the NIPRNet Federated Gateway capability in OCONUS and firewall capability at specific IAP network locations; and tech refresh of the sensing appliance capabilities at IAPs.</li><li>• Cyber Information Sharing Systems - (\$1.781) Will procure Tech refresh servers for security information manager coop environments that enable network defenders at the DISN perimeter and endpoints.</li><li>• Cross Domain Enterprise Services (CDES) - (\$2.780) Will procure tech refresh the guard solutions the enterprise file sharing and email solution between users and devices residing on different networks.</li><li>• Public Key Infrastructure (PKI) - (\$1.930) Will procure NPE hardware and software detection capabilities for encrypting and decrypting the associated user's identity within authorized DoD Networks.</li><li>• Cyber Security Range - (\$2.071) Will procure HW/SW upgrades for the Cyber Security Range to emulate the new network infrastructure.</li></ul> <p>Explanation of Change from FY 2018 to FY 2019: The decrease of -\$3.215 between FY 2018 and FY 2019 is primarily due to the completion of the tech refresh of the rate limiting capability that enables throttle traffic load going into the DoDIN and Firewalls at the IAPs, offset by the purchase of equipment to upgrade the web application firewall to identify non-compliant application and servers and additional HW for enterprise high speed cross domain guards.</p> <p>Performance Metrics:</p> <p>1. Tech refresh 2 Cloud Access Points through FY 2018</p> <p>FY 2017 Planned 1 Suite Install / Actual 1 milcloud 1.0 Install FY 2018 Planned 1 Suite Install</p> <p>2. Maintain ECOS MAC III sensor availability to 98.6%; sensor recovery should be within 5 days of failure</p> <p>FY 2017 Planned 98.6% / Actual average: 99.5%, minimum: 96% FY 2018 Planned 30%</p>

**Description:**

Department of Defense (DoD) Teleport system is a satellite communications (SATCOM) gateway that links the deployed warfighter to the Department of Defense Information Network (DODIN). The Teleport program has fielded system capabilities incrementally using a multi-generational approach with Generation 1 and 2 Full Deployment authorized by DoD Chief Information Officer on February 18, 2011 and the DISA Component Acquisition Executive on June 7, 2012. Teleport Generation 3 consists of three phases; Phases 1 and 2 are in Production and Deployment while the Phase 3 is in Engineering & Manufacturing Development. Each Teleport investment increases the warfighter's ability to communicate with a world-wide, net-centric set of information capabilities, which is vital for the DoD to maintain a persistent presence among its adversaries.

Currently, the Teleport system operates as an upgrade of satellite communication capabilities at selected DoD satellite communications gateways. This system provides deployed warfighters with seamless worldwide multi-band SATCOM connectivity to the Defense Information System Network (DISN) Service Delivery Nodes and legacy tactical command, control, communications, computers, and intelligence systems. It also provides centralized integration capabilities, contingency capacity, and common interfaces to access the DISN.

Teleport's goal is to provide secure, seamless, interoperable, and economical upgrades to DoD SATCOM Gateways and meet the growing throughput requirements of the deployed warfighter.

The primary beneficiaries of the Teleport investment are the DoD Combatant Commanders, Military Departments, Defense Agencies, and the warfighter. Teleport Generation 3 is designed to meet the growing demands of the warfighter through the execution of the following phases:

Phase 1: Gateway Advanced Extremely High Frequency (AEHF) [Extended Data Rate (XDR)] terminals provides tactical users with a 350% bandwidth increase in survivable, anti-jam communications through all peacetime and combat operations by installing Navy Multiband Terminals (NMT) at select Teleport sites. In addition to enhanced throughput, the NMT maintains compatibility with legacy waveforms and current tactical terminals.

Phase 2: Gateway Wideband Global SATCOM (WGS) X/Ka-band terminals provides enhanced WGS X/Ka capability to warfighters worldwide by installing terminals from the Modernization of Enterprise Terminal (MET) program at Teleport and other gateway sites. This gateway enhancement allows Teleport to replace end of life (EOL) Defense Satellite Communications System (DSCS) terminals while remaining interoperable with tactical WGS X/Ka-band users. The MET enhancement provides a 300% Ka-band capacity increase and an 1100% X-band capacity increase to current enterprise terminal X/Ka capabilities. Additionally, it enables the Teleport system to maintain operational availability consistent with Generation 2 requirements and reduce the overall life-cycle cost of X/Ka capabilities across the DoD.

<b>Exhibit P-40, Budget Line Item Justification:</b> PB 2019 Defense Information Systems Agency		<b>Date:</b> February 2018
<b>Appropriation / Budget Activity / Budget Sub Activity:</b> 0300D: Procurement, Defense-Wide / BA 01: Major Equipment / BSA 5: Major Equipment, DISA		<b>P-1 Line Item Number / Title:</b> 14 / Teleport
<b>ID Code</b> (A=Service Ready, B=Not Service Ready):	<b>Program Elements for Code B Items:</b> 0303610K, 1203610K	<b>Other Related Program Elements:</b> N/A
<b>Line Item MDAP/MAIS Code:</b> N/A		
<p>Phase 3: Mobile User Objective System (MUOS) to Legacy ultra high frequency (UHF) systems interoperability will provide interoperability between MUOS users and Legacy UHF users by installing MUOS-to-Legacy UHF SATCOM Gateway Component (MLGC) suites of equipment at Teleport sites. MUOS is the next generation DoD UHF SATCOM system that will provide the warfighter with modern worldwide mobile communication services, utilizing the Wideband Code Division Multiple Access waveform for use in the military UHF SATCOM band. MLGC suites will provide critical continuity and interoperability as DoD tactical satellite users transition from legacy waveforms and radios to the Joint Tactical Radio System.</p> <p>Standardized Tactical Entry Point (STEP)</p> <p>The STEP investment is driven by Combatant Command (COCOM) operational requirements validated by the Joint Chiefs of Staff and is linked with Defense Information Systems Agency (DISA) core strategic goals. STEP capabilities directly support DoD's transformational initiatives and goals by: (1) enabling effective communications for the warfighter through early implementation of Net-Centric capability; (2) enhancing the capability and survivability of space systems and supporting infrastructure; and (3) continuing to develop joint interoperable Networks and Information Integration (NII) architecture.</p> <p>The STEP program is integral for SATCOM Gateway evolution and sustainment activities in support to the deployed forces. STEP sustains the network by replacing EOL Transmission Security (TRANSEC), Communication Security (COMSEC), switches, routers, and baseband equipment. Further, DISA is able to leverage the network and equipment at these sites to support world-wide operations for Expeditionary Forces and Overseas Contingency Operations. Additionally, the STEP program supports the COCOMs Command and Control (C2) and Command, Control, Communications, Computers, Intelligence, Surveillance, and Reconnaissance (C4ISR) SATCOM requirements. Finally, STEP resources support the converged Gateway Architecture to ensure the network is able to keep pace with the user community requirements and capabilities as they migrate and adopt emerging technology to accommodate their respective mission needs keeping synchronized and at pace with the evolving Teleport technology architecture.</p> <p>High Speed Terminal:</p> <p>The program is performing classified work. Classified details are not included in the submission due to the level of security classification and necessity of special security clearances. Detailed information for this program is submitted separately in classified Department of Defense exhibits.</p> <p>Enterprise SATCOM Gateway System:</p> <p>The SATCOM Gateway is an enterprise system that will adhere to the Joint Information Environment (JIE) architecture, and support all DoD satellite communications requirements, to include Strategic (Presidential, SECDEF, SECSTATE, Chairman Joint Chiefs of Staff, MDA) and Tactical (C/S/A) users over satellite trunks through the DoD Information Network (DODIN). The SATCOM Gateway program will begin fielding upgrades and leverage existing SATCOM systems, which include the DSCS terminals, the Teleport and STEP tactical system capabilities. Initial efforts will define a two phase approach, with the first phase (FY16-19) upgrading 12 facilities to a converged IP transport suites that supports the full range of Strategic and Tactical users; the second phase (FY16-23) will address the remaining 34 sites that support mainly Strategic user requirements. Each investment increases the Department's ability to communicate with a world-wide, net-centric set of information capabilities, which is vital for the DoD to maintain a persistent presence among its Strategic and coalition adversaries. This upgrade will standardize satellite communication capabilities at all DoD satellite communications gateways. This system provides Strategic National leaders and deployed warfighters with seamless worldwide multi-band SATCOM connectivity to the DISN Service Delivery Nodes, legacy tactical command, control, communications, computers, intelligence systems and transport to specific special user enclaves.</p> <p>Our Nation's Senior Leaders, Combatant Commanders, Military Departments, Defense Agencies, and other special users will all benefit from this SATCOM Gateway.</p>

<p><b>Justification:</b></p> <p>FY 2017: (\$23.316) DoD Teleport Technology Refresh/Technology Insertion: DoD Teleport replaced EOL equipment and field enhancement at Teleport SATCOM sites. Major efforts included fielding of Advanced Time Division Multiple Access (TDMA) Interface Processor (A-TIP) for additional sites and unclassified solutions for Generic Discovery Server (GDS). The program office used funding to support integration, maintenance, and security test activities for fielded enhancements.</p> <p>Generation 3: The DoD Teleport Program completed Generation 3 Phase 2, the Modernization Enterprise Terminal (MET) installation activities for one terminal each in the PACOM, NORTHCOM, and EUCOM AORs and continue installation activities for two additional terminals, one terminal each in the EUCOM and NORTHCOM AORs. The program implemented the Generation 3 Phase 3 subsystem in the PACOM AOR and continued installation of an additional subsystem in PACOM AOR.</p> <p>FY 2018: (\$22.634) DoD Teleport Technology Refresh/Technology Insertion: DoD Teleport will replace EOL equipment and field enhancement at Teleport SATCOM sites. Major efforts include fielding of Advanced Time Division Multiple Access (TDMA) Interface Processor (A-TIP) for additional sites and unclassified solutions for Generic Discovery Server (GDS). The program office will also use this funding to support integration, maintenance, and security test activities for fielded enhancements.</p> <p>Generation 3: Program will complete Generation 3 Phase 2 (Modernization Enterprise Terminal (MET)) installation activities for one terminal in each of NORTHCOM, EUCOM, and CENTCOM and continue installation activities for 1 additional terminal. Will implement the Generation 3 Phase 3 subsystem at locations in the EUCOM and NORTHCOM AORs.</p> <p>Explanation of change from FY 2017 to FY 2018: The decrease of -\$0.682 between FY 2017 and FY 2018 is primarily due to the completion of installation activities for five METs in FY 2017.</p> <p>FY 2019: (\$21.112) DoD Teleport Technology Refresh/Technology Insertion: DoD Teleport will replace EOL equipment and field enhancement at Teleport SATCOM sites. Major efforts include refresh of iDirect Hub line cards. The program office will also use this funding to support integration, maintenance, and security test activities for fielded enhancements.</p> <p>Explanation of change from FY 2018 to FY 2019: The decrease of -\$1.522 between FY 2018 and FY 2019 is primarily due to the completion of installation activities for all G3P3 MLGC production suites in FY18.</p> <p>Performance Metrics:</p> <p>Generation 1/2 Metric</p> <p>Percentage of Teleport and Gateway critical end of life/end of service issues mitigated.</p>

Exhibit P-40, Budget Line Item Justification: PB 2019 Defense Information Systems Agency		Date: February 2018
Appropriation / Budget Activity / Budget Sub Activity: 0300D: Procurement, Defense-Wide / BA 01: Major Equipment / BSA 5: Major Equipment, DISA		P-1 Line Item Number / Title: 14 / Teleport
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: 0303610K, 1203610K	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
Explanation of change from FY 2017 to FY 2018: The increase of +\$0.143 between FY 2017 and FY 2018 is due to the increase in contract costs to procure modem line cards.		
FY 2019: (\$1.388) Will continue technology enhancements to meet IP requirements at 4 DoD Gateways in support of the Enhanced SATCOM Gateway Architecture.		
Explanation of change from FY 2018 to FY 2019: The increase of +\$0.010 between FY 2018 and FY 2019 is due to the increase in contract costs to procure modem line cards.		
FY 2017 OCO: (\$9.900) Procured IP Modems for select SATCOM Gateways (Bahrain, Lago, Croughton, Landstuhl) to support IP mission surge.		
FY 2018 OCO: (\$1.979) Will provide technology enhancements to meet IP requirements and the implementation of IP routers at 1 DoD Gateways in support of the Enhanced SATCOM Gateway Architecture.		
Explanation of change from FY 2017 to FY 2018: The decrease of -\$7.921 due to partial elimination of IP router requirements at 1 DoD Gateway and the completion of the site prep at Kadena.		
FY 2019 OCO: (\$3.800) Will provide technology enhancements to meet IP requirements and the implementation of IP routers at 6 DoD Gateways.		
Explanation of change from FY 2018 to FY 2019: The increase of +\$1.821 is due to additional IP router requirements at 6 DoD Gateways.		
STEP Performance Metrics:		
Schedule, performance, and customer satisfaction measures are compiled as a real-time barometer to measure how well STEP is satisfying the needs of present customers, and to predict success in meeting future STEP objectives. The nature of this compiled data permits objective assessments and predictions on the quality and reliability of STEP support to its customers (e.g., availability and reliability of the STEP system). Availability: Probability that STEP resources are operable or usable to perform its designated or required function (ratio of time the system is functional). No more than 8 hours, 45 minutes, and 36 seconds of downtime or service interruptions per site per year. Reliability: Probability that STEP will accurately perform its specified task under stated environmental conditions (ability of the system to perform consistently to its design). Standard: No more than 8 hours, 45 minutes, and 36 seconds of system downtime or service interruptions per site per year.		
Specific Performance Metrics:		
Number of DISN TE Systems		
FY 2017 N/A		
FY 2018 N/A		
Number of sites Converged Architecture		
FY 2017 4 Planned / 4 Completed		
FY 2018 4 Planned		
FY 2019 4 Planned		
Systems procured for JIPM Purchase		
FY 2017 N/A		
FY 2018 N/A		
Reliability		
FY 2017 98.0 % Threshold; 99.8% Objective (16) Planned; 16 Completed		
FY 2018 98.0 % Threshold; 99.8% Objective (16) Planned

<p><b>Description:</b> Multinational Information Sharing (MNIS):</p> <p>MNIS is a portfolio of three coalition information sharing capabilities (Combined Enterprise Regional Information Exchange System (CENTRIXS), Pegasus, and the Combined Federated Battle Laboratory Network (CFBLNet) designed to enable and improve sharing of operational and intelligence among United States (US) forces and multinational partners. This program directly supports five combatant commands and is critical because US forces no longer fight and win independently but rely on close coordination and collaboration with allies and other mission partners. MNIS increases overall combat effectiveness by leveraging capabilities and information from all partners and reducing the possibility of fratricide.</p> <ul style="list-style-type: none"> <li>• CENTRIXS consists of multiple, isolated Communities of Interest (COI) that support multinational efforts including Overseas Contingency Operations and counter-narcotics operations. Common Mission Network Transport (CMNT) provides the backbone that enables Network Operations (NETOPS) centers to manage individual networks more efficiently. CMNT provides a common transport for encrypted traffic to meet mission partner communication requirements and facilitate the movement of Virtual Private Network traffic between segments. This capability supports Department of Defense (DoD) Instruction 8110.1 guidance to integrate CENTRIXS and other operational networks into existing DoD general service communications infrastructure as a separate network servicing all DoD MNIS requirements.</li> <li>• Pegasus interconnects the National Command and Control (C2) systems of Australia, Canada, New Zealand, United Kingdom and the United States using Cross Domain Solutions to enable information sharing in facilitating situational awareness and strategic planning as well as operational execution.</li> <li>• CFBLNet provides a controlled Research, Development, Trials and Assessment coalition information sharing sandbox is used to evaluate new technologies and to develop tactics, techniques, and procedures that facilitate the transition of promising technologies and capabilities into operational multinational information sharing capability enhancements.</li> </ul> <p>FY 2017: (\$0.623) Procured NSA encryptor hardware to support classified networks on two Service Delivery Node (SDN) locations.</p> <p>FY 2018: (\$0.708) Will perform technical refresh of NSA cryptographic equipment at two coalition node locations that support cryptographically isolated network data traffic for Coalition Allies and Mission Partners.</p>

Exhibit P-40, Budget Line Item Justification: PB 2019 Defense Information Systems Agency		Date: February 2018
Appropriation / Budget Activity / Budget Sub Activity: 0300D: Procurement, Defense-Wide / BA 01: Major Equipment / BSA 5: Major Equipment, DISA		P-1 Line Item Number / Title: 16 / Items Less Than \$5 Million
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: 0301144K, 0303122K, 0701113K, 0303149K, 0303134K	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
Explanation of Change from FY 2017 to FY 2018: The increase of +\$0.085 between FY 2017 and FY 2018 is to support additional cryptographic COMSEC hardware devices from NSA that support coalition information sharing at infrastructure node locations		
FY 2019: (\$0.000)		
Explanation of Change from FY 2018 to FY 2019: The decrease of -\$0.708 between FY 2018 and FY 2019 is due to the functional transfer of the MNIS program to the Air Force beginning in FY 2019.		
Performance Metrics:		
- System provides 99.99% data integrity for authorized users sharing information cross COI.		
FY17 (Planned): N/A		
- Maintain 99.99% Confidentiality for users, by Nation between COIs.		
FY17 (Estimated): N/A		
- Direct traffic with 99.99% accuracy for chat, email, VoIP, file transfer, data storage and web service.		
FY17 (Estimated): N/A		
Performance Metric:		
- Deny 98.5% of unauthorized user attempts		
FY17 (Estimated): N/A		
Performance Metric:		
- Audit log captured 99.99% of any unauthorized user activity		
FY17 (Estimated): N/A		
Performance Metric:		
- 2 sites receiving cryptographic tech refresh and/or hardware replaced prior to End of Life (EOL) per FY.		
FY17: 2 Planned / 2 Actual		
FY18: 2 Planned		
White House Situation Support Staff (WHSSS):		
WHSSS provides classified communications, computer, and intelligence for the White House Situation Room, the National Security Staff, and other White House offices. WHSSS delivers the ability to meet and maintain a rate of 99.99% reliable telecommunications and information services through state-of-the-art equipment and technology, at the best possible price to the public.		
FY 2017: (\$8.329) Continued to upgrade and secure critical systems that support classified voice, data and video used in the White House Situation Room and throughout the NSC for the President, Vice President, White House Senior Staff, Executive Office of the President and the inter-agency as directed by the Assistant to the President for National Security Affairs. These systems are also used at White House COOP and COG locations, Trip Sites and residences. Funding also supported costs associated with increased NSC mission requirements related to the Presidential Information Technology Community (PITC) initiative requiring WHSSS to support additional EOP classified IT network infrastructure including ~1700 new classified accounts, 400 classified workstations, increase server capacities, COOP/COG tech refresh, SIPR VTC refresh infrastructure and 10 geographically separated units.

<b>Line Item MDAP/MAIS Code:</b> N/A		
<p>FY 2018: (\$8.750) Will continue to upgrade and secure critical systems that support classified voice, data and video used in the White House Situation Room and throughout the NSC for the President, Vice President, White House Senior Staff, Executive Office of the President and the inter-agency as directed by the Assistant to the President for National Security Affairs. These systems are also used at White House COOP and COG locations, Trip Sites and residences. Also, funding will continue to support costs associated with increased NSC mission requirements related to the Presidential Information Technology Community (PITC) initiative.</p> <p>Explanation of change from FY 2017 to FY 2018: The increase of +\$0.421 will procure additional equipment to support the EOP classified IT infrastructure and capabilities.</p> <p>FY 2019: (\$8.900) Will continue to upgrade and secure critical systems that support classified voice, data and video used in the White House Situation Room and throughout the NSC for the President, Vice President, White House Senior Staff, Executive Office of the President and the inter-agency as directed by the Assistant to the President for National Security Affairs. These systems are also used at White House COOP and COG locations, Trip Sites and residences. Also, funding will continue to support costs associated with increased NSC mission requirements related to the Presidential Information Technology Community (PITC) initiative.</p> <p>Explanation of change from FY 2018 to FY 2019: The increase of +\$0.150 from FY 2018 to FY 2019 is due to an increase in PITC IT network infrastructure requirements.</p> <p>Performance Metrics: Conducts quarterly Independent Process Reviews to maximize performance. Status is electronically monitored for outages to ensure 99.99% reliable classified telecommunications and information services.</p> <p>FY17 (Met): 99.99% FY18 (Target): 99.99% FY19 (Target): 99.99%</p> <p>Crisis Management System (CMS) and National Leadership Communications:</p> <p>The CMS is a high performance network that provides classified multi-media teleconferencing for the President, Cabinet Secretaries, designated agency directors, and their staff. CMS provides near perfect reliability and communications survivability expected by national decision makers. The expansion of the Executive Voice over Secure IP (VoSIP) telephone network will continue at Presidential locations and other key CMS sites.</p> <p>FY 2017: (\$6.377) Continued replacement of router, switch, and codec replacement of equipment reaching EOL to enhance system reliability, availability, and security. Replaced system call manager reaching EOL. Continued phases of CMS installation at Western Watch Center as directed by National Security Council. Upgraded CMS equipment and capabilities for systems security. Deployed next generation TEMPEST executive travel kit for use by executive principals and staff. Supported implementation of CMS aboard executive aircraft. Complete change of administration tasks required by Executive Office of the President (EOP).</p> <p>FY 2018: (\$6.025) Will continue replacement of router, switch, and codec replacement of equipment reaching EOL to enhance system reliability, availability, and security. Will continue phases of CMS installation at Western Watch Center as directed by National Security Council.</p> <p>Explanation of Change from FY 2017 to FY 2018: The decrease of -\$0.352 from FY 2017 to FY 2018 is due to the procurement of equipment required for system security upgrades to meet accreditations as well as perform necessary security upgrades and improvements requested by Program Stakeholders and Mission Partners.</p> <p>FY 2019: (\$9.949) Will continue replacement of router, switch, and codec replacement of equipment reaching EOL to enhance system reliability, availability, and security. Will continue phases of CMS installation at Western Watch Center as directed by National Security Council.</p>

## Description:

DISA provides a portfolio of services that includes legacy capabilities delivered by the Net-Centric Enterprise Services (NCES) Program supporting a resilient and flexible infrastructure that enables a collaborative environment for secure information sharing across the Department of Defense (DoD). These critical warfighter, Business, and Intelligence Mission Area services enable more than two million authorized DoD users to collaborate across the Combatant Commands (COCOMs)/Services/Joint Staff/Agency/Mission Partners using a suite of web-accessible services. The portfolio also includes the DoD Visitor service that transitioned from a Government developed service to a Commercial-Off-the-Shelf annual right-to-use licensed service operating on domain controllers throughout the DoD. This service allows personnel to "go anywhere within the DoD, login, and be productive". It includes the privilege management Authentication Gateway Services (AGS) and the DoD Enterprise Portal Service. The AGS is integrated with the Identity and Access Management services supporting brokered Public Key Infrastructure (PKI) authentication for DoD applications without a native PKI authentication capability. The DoD Enterprise Portal Service provides users with a flexible web-based hosting solution to create and manage mission, community, organization, and user focused sites. The individual suite of capabilities within the portfolio of services provides the user with the flexibility to couple the services in varying ways to support their mission needs. This flexibility provides unprecedented secure access to web and application content, critical imagery, intelligence and warfighter information from anywhere, at any time, on any DoD authorized device. The portfolio of enterprise services delivers tangible benefits to the Department by providing capabilities that are applied by the US Forces, Coalition forces, and Allied forces to support full spectrum joint and expeditionary campaign operations. These enabling benefits include the ability to:

- Enhance collaborative decision-making processes
- Improve information sharing and integrated situational awareness
- Share and exchange knowledge and services between enterprise units and commands
- Share and exchange information between previously unreachable and unconnected sources
- Schedule and coordinate meetings with people across the DoD Components
- "Go anywhere in the DoD, login, and be productive"
- Create and manage mission, community, organization, and user-focused sites from global locations
- Exchange knowledge to enable situational awareness, determine the effects desired, select a course of action, the forces to execute it, and accurately assess the effects of that action

The portfolio contains capabilities that are also key enablers to the Defense Information Systems Agency's (DISA) mission of providing a global net-centric enterprise infrastructure in direct support of joint Warfighter, National level leaders, and other mission and coalition partners across the full spectrum of operations.

## Justification:

**UNCLASSIFIED**

Exhibit P-40, Budget Line Item Justification: PB 2019 Defense Information Systems Agency		Date: February 2018
Appropriation / Budget Activity / Budget Sub Activity: 0300D: Procurement, Defense-Wide / BA 01: Major Equipment / BSA 5: Major Equipment, DISA		P-1 Line Item Number / Title: 17 / Net Centric Enterprise Services (NCES)
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: 0303170K	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
FY 2017: (\$1.634) Procured the annual right-to-use license for DoD Visitor that is provided for use on domain controllers throughout the Department and supports the users ability to go anywhere within the DoD, login, and be productive on the Classified and Unclassified networks.		
FY 2018: (\$1.161) Will procure the annual right-to-use license for DoD Visitor that is provided for use on domain controllers throughout the Department and supports the users ability to go anywhere within the DoD, login, and be productive on the Classified and Unclassified networks.		
Explanation of Change from FY 2017 to FY 2018: The decrease of -\$0.473 between FY 2017 and FY 2018 is attributable to completing the transition to the COTS solution on the Classified and Unclassified Networks and projected reduction in license costs as the contract is recompeted.		
FY 2019: (\$1.017) Will procure the annual right-to-use license for DoD Visitor that is provided for use on domain controllers throughout the Department and supports the users ability to go anywhere within the DoD, login, and be productive on the Classified and Unclassified networks.		
Explanation of Change from FY 2018 to FY 2019: The decrease of -\$0.144 between FY 2018 and FY 2019 is attributable to projected changes in the cost of the Right-to-Use license contract.		
Performance Metrics: Usage - Transition all domain controllers using the DoD Visitor Government-Off-the-Shelf DoD Visitor software solution throughout the Department to the commercial solution, Pro-V, without impacting the users ability to go anywhere in the DoD, get access to the local network, and access services from their home station using a web browser.		
FY 2017 (Planned); FY2017 (Completed): Transition of DoD Visitor software on the Classified and Unclassified Networks.		
FY 2018 (Planned): Monitor the DoD Visitor team site for the identification of needed enhancements and the collection of those requirements by the contractor; ensure the enhancements are delivered on the 6-month schedule and that they meet the customer's requirements and cybersecurity expectations.		
FY 2019 (Estimated): Monitor the DoD Visitor team site for the identification of needed enhancements and the collection of those requirements by the contractor; ensure the enhancements are delivered on the 6-month schedule and that they meet the customer's requirements and cybersecurity expectations.		
FY 2019 (Estimated): Deployment of software enhancements for DoD Visitor - Target 2

<b>Description:</b> Defense Information Systems Network (DISN) is the Department of Defense's (DoD's) consolidated worldwide telecommunications infrastructure that provides end-to-end information transport for DoD operations to the warfighters and the Combatant Commanders with a robust Command, Control, Communications, Computers and Intelligence information long-haul transport infrastructure. The DISN, seamlessly spanning full spectrum from terrestrial to space and strategic to tactical domains, provides the interoperable telecommunications connectivity and value-added services required to plan, implement, and support all operational missions, anytime, and anywhere pushing DISN services to the edge of the communications network. The DISN delivers an integrated platform consisting of DoD's core communications, computing, and information services as well as integrating terrestrial, wireless, and satellite communications into a network cloud that is survivable and dynamically scalable. Procurement funding primarily supports the Technology Refreshment (TR); Joint Worldwide Intelligence Communications System (JWICS); National Emergency Action Decision Network (NEADN)/Presidential and National Voice Conferencing (PNVC); the Enhanced Pentagon Capability (EPC)/Survivable Emergency Conferencing Network (SECN); DoD Mobility; and a significant satellite communications extension of the DISN. The procurement funding enables the DISN to remain technologically up-to date and capable by achieving the best possible balance between network performance and network cost through a process known as network optimization.

<p><b>Justification:</b> FY 2017 (\$87.235)</p> <p>JWICS: (\$6.325) - Upgraded four JWICS node sites and decommissioned legacy Core equipment at five sites, as JWICS continued its migration to the optical transport infrastructure. Provided joint engineering and expansion efforts ensuring delivery of service to the edge locations through Joint Information Environment (JIE), and retired legacy TDM paths to maximize both operational and cost efficiencies.</p> <p>Tech Refresh: (\$71.864) - Performed optical transport upgrades throughout the DISN, in support the Next Generation Optical Network. Supported the transition to the Internet Protocol (IP) based network through replacement of legacy Provider Edge (PE) routers with the Multiprotocol Label Switching (MPLS) technology at the DISN node sites. Supported the SIPRNet Access migration, DISN Red Switch Network (DRSN) transport transition, as well as replacement of legacy Voice and Video equipment in support of the Unified Capabilities.</p> <p>EPC/SECN: (\$1.210) - Continued procurement of equipment to support modernization of non-SATCOM interswitch backbone connectivity for sites supporting EPC/SECN and PNVC, to include support of day to day system monitoring and telemetry, as well as conference management. Funding also supported purchases of equipment to maintain test lab equipment configurations to support testing and troubleshooting for system sustainment and performance.</p> <p>PNVC: (\$1.119) - Continued to field PNVC equipment suites (7 sites) and purchased depot spares to support baseband kit users.</p> <p>Intelligence, Surveillance, and Reconnaissance (ISR) Transport Services: (\$6.717) - Continued the installation of the KuSS multi-band hub at selected SATCOM based on selected prioritized list. Purchased and stored spares on-site to preclude delays in shipping and ensure high mission availability. Training, at the time of installation and prior to hub and terminal activation, was also provided.</p> <p>FY 2018 (\$126.345)</p> <p>JWICS: (\$7.150) - Will continue to support deployment of JWICS transport core-lite nodes worldwide to assure delivery of JWICS transport core services to JWICS edge users in multiple Areas Of Responsibility (AOR's) globally. Also will support retirement of legacy JWICS core capabilities at locations in Continental United States (CONUS), U.S. European Command (EUCOM) and U.S. Pacific Command (PACOM) AOR's as services migrate over to transport core. Includes the continuation of engineering efforts to ensure delivery of service to edge locations via JIE and retirement of legacy TDM paths to realize programmatic cost savings provided by Carrier Ethernet/Converged IP transport.</p>

Exhibit P-40, Budget Line Item Justification: PB 2019 Defense Information Systems Agency		Date: February 2018
Appropriation / Budget Activity / Budget Sub Activity: 0300D: Procurement, Defense-Wide / BA 01: Major Equipment / BSA 5: Major Equipment, DISA		P-1 Line Item Number / Title: 18 / Defense Information System Network
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: 0303126K	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
<p>Tech Refresh: (\$114.957) - Will continue to purchase and install end-of-life (EOL) replacement and upgrades throughout the DISN. The key projects include: Timing &amp; Synchronization of the Packet based IP networks and OPTICAL/Transport Network (OTN) systems, Internet Access Point (IAP) Router Replacement, Next Generation Optical (formerly known as P/OTN Layer), Operations Support System (OSS) Refresh, Multi-Protocol Label Switching (MPLS), Domain Name System (DNS), Voice Internet Service Provider (ISP), Enterprise Classified VoIP (formerly known as Voice over Internet Protocol (VoIP) Enterprise Session Controllers), Warehouse Support (formerly known as Logistics Support), SIPRNet Access Migration (formerly known as COMSEC Refresh), Last-Promina Elimination (formerly known as TDM to IP Transition), DRSN Transport Transition, TRANSEC (formerly known as COMSEC Refresh), and Next Generation Access Transport (formerly Optical Refresh MSPP), SIPRNET Refresh (ESS, ACC Compliance) (formerly known as COMSEC Refresh), and Software Defined Networking (formerly Rapid Provisioning).</p> <p>EPC/SECN (\$1.307) - Procure additional equipment to complete SECN digitization, for Advanced Extremely High Frequency (AEHF) SATCOM interfaces implementation, and upgrades for EOL conferencing operator consoles. SECN Digitization is designed to improve voice quality and facilitate the transition from Military Strategic, Tactical &amp; Relay (MILSTAR) to AEHF SATCOM by allowing the transition of SECN to PNVC-developed Baseband Interface Group (BIG) in advance of full PNVC implementation. The specialized operator consoles used to initiate and control the secure voice conference of EPC, SECN and eventually PNVC, are PC-based and require periodic hardware and software tech refresh. New conferencing operator consoles will be procured and installed at EPC/SECN sites.</p> <p>PNVC: (\$1.261) - Installation of PNVC equipment suites at the fixed sites continues according to a prioritized order. Spares of each equipment type will also be purchased to ensure the correct quantities maintain the fielded equipment. PNVC baseband suites and the required High altitude Electromagnetic Pulse (HEMP) hardened Base Band Kit (BBK) enclosures will be purchased for fourteen special users.</p> <p>ISR Transport Services: (\$1.670) - Purchase and stores spares on-site to preclude delays in shipping and ensure high mission availability.</p> <p>Explanation of Change from FY 2017 to FY 2018: The increase of +\$39.110 from FY 2017 to FY 2018 is due to the increase in Tech Refresh (+\$43.093) which supports the Department's continued effort to accelerate MPLS and Optical capabilities. The increase also includes refreshing end of life encryption devices and updating the DISN with Next Generation Transport capabilities. Also, an increase in EPC/ SECN (+\$0.097) and PNVC (+\$0.142) reflects additional requirements for audio conferencing equipment purchases to fully equip the configurations at EPC/SECN and PNVC sites and variations in unit prices. Additionally, the increase in JWICS (+\$0.825) is due to the procurement of additional network equipment including routers, switches, and encryption devices that will be installed at JWICS node locations. The increase is offset by a decrease in ISR (-\$5.047) due to the completion of installation activities for KuSS multi-band hubs at 2 SATCOM sites.</p> <p>FY 2019 (\$150.674)</p> <p>JWICS: (\$7.093) - Will continue to support deployment of JWICS transport core-lite nodes worldwide to assure delivery of JWICS transport core services to JWICS edge users in multiple Areas Of Responsibility (AOR's) globally. Also will support retirement of legacy JWICS core capabilities at locations in CONUS, EUCOM and PACOM AOR's as services migrate over to transport core. Includes the continuation of engineering efforts to ensure delivery of service to edge locations via JIE and retirement of legacy TDM paths to realize programmatic cost savings provided by Carrier Ethernet/Converged IP transport.</p> <p>Tech Refresh: (\$139.112) - Will continue to purchase and install EOL replacement and upgrades throughout the DISN. Convergence activities will continue at multiple layers eliminating the need for a one to one TR of all components but rather TR at service and capability layers. Investment goals include IP Optimization, Legacy technology elimination and DISN enhancements to ensure a survivable infrastructure. The key efforts include: Timing &amp; Synchronization of the Packet based IP networks and OTN systems, IAP, Next Generation Optical (formerly known as P/OTN Layer), OSS Refresh, MPLS, Voice ISP, Warehouse Support (formerly known as Logistics Support), SIPRNet Access Migration (formerly known as COMSEC Refresh), TRANSEC (formerly known as COMSEC Refresh), and Next Generation Access Transport (formerly Optical Refresh MSPP), SIPRNET Refresh (ESS, ACC Compliance) (formerly known as COMSEC Refresh), Software Defined Networking (formerly Rapid Provisioning), COCOM Infrastructure Resiliency and DISN Service Delivery Node Resiliency.</p> <p>EPC/SECN (\$1.455) - Procure additional equipment to complete SECN digitization, for (AEHF) SATCOM interfaces implementation, and upgrades for EOL conferencing operator consoles. SECN Digitization is designed to improve voice quality and facilitate the transition from Military Strategic, Tactical &amp; Relay (MILSTAR) to AEHF SATCOM by allowing the transition of SECN to PNVC-developed Baseband Interface Group (BIG) in advance of full PNVC implementation. The specialized operator consoles used to initiate and control the secure voice conference of EPC, SECN and eventually PNVC, are PC-based and require periodic hardware and software tech refresh. New conferencing operator consoles will be procured and installed at EPC/SECN sites.</p>

Exhibit P-40, Budget Line Item Justification: PB 2019 Defense Information Systems Agency		Date: February 2018
Appropriation / Budget Activity / Budget Sub Activity: 0300D: Procurement, Defense-Wide / BA 01: Major Equipment / BSA 5: Major Equipment, DISA		P-1 Line Item Number / Title: 18 / Defense Information System Network
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: 0303126K	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
PNVC: (\$1.386) - Installation of PNVC equipment suites at the fixed sites continues according to a prioritized order. Spares of each equipment type will also be purchased to ensure the correct quantities maintain the fielded equipment. PNVC baseband suites and the required High altitude Electromagnetic Pulse (HEMP) hardened Base Band Kit (BBK) enclosures will be purchased for fourteen special users.		
ISR Transport Services: (\$1.628) - Continue the installation of the KuSS multi-band hub at selected SATCOM sites based on selected prioritized list. Spares will also be purchased and stored on-site to preclude delays in shipping and to ensure high mission availability. Training, at the time of installation and prior to hub and terminal activation, will also be provided.		
Explanation of Change from FY 2018 to FY 2019: The increase of +\$24.329 from FY 2018 to FY 2019 is due to the increase in Tech Refresh (+\$24.155) which supports the Department's continued effort to accelerate MPLS and Optical capabilities as well as enhancing resiliency at limited COCOM and DISN Service Delivery locations. The increase also includes refreshing end of life encryption devices and updating the DISN with Next Generation Transport capabilities. Also, an increase in EPC/SECN (+\$0.148) and PNVC (+\$0.125) reflects additional Secure Voice Conferencing Equipment purchases to support rotatable pool stock for logistics supportability. PNVC will procure additional Secure Voice Conferencing Equipment purchases to support final stages of PNVC fielding and testing. The increase is offset by decreases in JWICS (-\$0.057) due to a reduction of network equipment including routers, switches, and encryption devices that will be installed at JWICS node locations; and an ISR (-\$0.042) reduction attributed to reduced spare parts requirements for Mission Support System due to the completion of installation activities for KuSS multi-band hubs at 1 SATCOM Site.

**Description:**

The White House Communication Agency (WHCA) provides assured voice, video, and data information services to the President of the United States (POTUS), Vice President of the United States (VPOTUS), White House Staff, National Security Staff (NSS), US Secret Service (USSS), and others as directed by the White House Military Office (WHMO). The WHMO also directs the WHCA to serve as the IT provider to the WHMO enterprise of customers, to include Presidential Airlift Group/Air Force One, Marine One, Camp David, White House Transportation Agency, White House Presidential Mess, White House Medical Unit, military aides, and others within WHMO. WHCA must balance the integration of innovative and customer-desired technologies with the ability to operate on-demand within any environment from normal to emergency conditions. WHCA will continue to provide command and control capabilities to the President and senior national leaders while integrating technology and innovation to transform the President's multiple communication capabilities and information sharing domains into one integrated, seamless environment of unified capabilities.

Along with supporting all POTUS/VPOTUS/First Lady of the United States (FLOTUS) travel both within the continental United States and overseas, WHCA maintains a physical communications infrastructure at the White House, the Naval Observatory, Camp David, Presidential and Vice Presidential Second Residences, and numerous classified facilities. WHCA operates and maintains a radio infrastructure in the National Capital Region, from Camp David to Quantico, providing network coverage for the USSS, Presidential Helicopter Squadron, and the Presidential Airlift Group.

**Justification:**

FY 2017: (\$35.977)

Broadcast: (\$2.842) Continued to evolve broadcast studio capabilities and strategies for unified communications, increased bandwidth, On-demand services, enhanced use of multi-media as a communications medium, and Broadcast capabilities. Implemented Next Generation broadcast event production and support systems; continued to leverage smart tagging techniques for global access and search; modernized and automated the Master Control storage area network system (MC SAN) and Presidential Records Archiving and Accessibility to support Presidential post productions storage, reporting, and public dissemination and use.

System of Systems: (\$6.185) Continued to evolve field smart, secure mobile, wireless devices and technologies to provide mobile users with next generation portable communication capabilities and platforms. Continued to conduct technology and engineering assessments with the intent of integrating best of breed COTS products to support the implementation of on-demand service delivery options for all mobile and airborne platforms.

System Assurance: (\$2.235) Refined defense solutions, personnel, techniques, and best practices to defend, detect, and mitigate cyber-based threats throughout the WHMO/WHCA infrastructure. Continued to replace end of life encryption equipment and software for existing operations of all voice, video, data and transport systems.

Network and Data: (\$7.976) Continued to apply a multi phased data cloud solution, incorporating DISA Enterprise Services where possible, that supports the Presidential Information Technology Community ((PITC) formerly PCI)) and mobile users during Presidential events. Continued to evolve and consolidate WHCA's on-demand network backbone infrastructure and unify IP services; next generation network services, operations and management and support to mature WHCA mobile communications and computing. Provided storage, virtualization, and collaborative tools to WHMO/WHCA. Adopted DoD Senior National Leadership Command and Control Communications recommendations for assured communications that meet WHCA's Primary Alternate Contingency Emergency (P.A.C.E) communications requirements including Continuity of Operations (CONOPS), and Continuity of Government (COG).

Facilities and Infrastructure: (\$1.979) Continued to upgrade WHCA's telecommunications infrastructure to support multiple WHMO/WHCA facilities. Supported the WHMO/WHCA's consolidation of infrastructure and communications capabilities that will provide unified operations and seamless Situational Awareness (SA), Common Operational Picture (COP) and Command and Control (C2) capabilities. Continued to upgrade infrastructure for White House East Wing/West Wing renovations upon execution, Camp David Facilities, and other locations supporting on-the-move and trip site communication needs.

Transport: (\$6.465) Continued to leverage and acquire emerging network transport technologies to build out a Multiple Level Secure (MLS) backbone supporting secure unified communications and high speed assured transport; and evaluated DoD/DISA and commercial SATCOM service solutions (e.g., Wideband Global SATCOM, Mobile User Objective system (MUOS), and Iridium).

Voice and Video Teleconferencing: (\$7.000) Refined federated switchboard solution including WHCA's POTUS VoIP/VoSIP solution. Continued to migrate to an enterprise on-demand, MLS voice and video collaborative capability, and on-line virtual work space. Completed integration of Voice, Video, and Data information from multiple systems, multiple networks, and multiple WHMO/WHCA entities.

**UNCLASSIFIED**

Exhibit P-40, Budget Line Item Justification: PB 2019 Defense Information Systems Agency		Date: February 2018
Appropriation / Budget Activity / Budget Sub Activity: 0300D: Procurement, Defense-Wide / BA 01: Major Equipment / BSA 5: Major Equipment, DISA		P-1 Line Item Number / Title: 90 / White House Communication Agency
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: 0303134K	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
Technology Insertion: (\$1.295) Continued to support associated communications and technology improvements that provide critical operational support capabilities to the POTUS, VPOTUS, Senior Staff and the DNLCC.		
FY 2018 (\$45.243). WHCA's Presidential Service Strategy 2022 (PSS 2022) updates WHCA's Presidential Communications Vision 2020 (PCV 2020) to reflect capability achievements made in mobility, cybersecurity, retirement of legacy technologies, and other modernization efforts to improve the White House's ability to develop and implement national level policy on a day to day basis and during crisis using the National Leadership Command Capability (NLCC) infrastructure. Efforts include strategic enterprise level initiatives required by the White House Director of Information Technology (D/WHIT) for unified services enabled by converging network and service infrastructures and business practices. For FY18, some of WHCA's portfolios have changed to better represent service capabilities, improve mission alignment, and identify traceability of initiatives to new modernization efforts advanced in WHCA's Presidential Service Strategy. WHCA's PSS 2022 is the central theme of WHCA's Strategic Plan and approach for transformational modernization and innovation to ensure POTUS and VPOTUS can communicate anywhere, anytime, by any means with anyone in the world. PSS 2022 is WHCA's means to achieve targeted architectures comprised of mobile IP solutions enabling unified capabilities and seamless services for information sharing and communications including: Presidential Travel Services Modernization; Senior Leader Communications, Command and Control; Mobility; Cyber Resilience; Network Infrastructure Convergence; Next Generation Networking; High Definition Broadcast Services; and, enterprise collaboration capabilities for personnel supporting Presidential events. WHCA strategically manages IT capabilities within five service portfolios: Senior Leader Communications, Enterprise IT, Broadcast and Audio Visual, Transport, and Deployable Services. The PSS is organized around these service portfolios to align WHCA's strategy, vision, and future capabilities with planned initiatives to ensure future success.		
Broadcast and Audio Visual Services: (\$5.330) Continues to evolve broadcast studio capabilities and strategies for unified communications, increased bandwidth, On-demand services, enhanced use of multi-media as a communications medium, and Broadcast capabilities. Continue to implement Next Generation broadcast event production and support systems; continue to leverage smart tagging techniques for global access and search; modernize and automate the Master Control storage area network system (MC SAN) and Presidential Records Archiving and Accessibility to support Presidential post productions storage, reporting, and public dissemination and use. Provide multimedia services and production products to government, news, and other organizations for recording events, providing historical records, and custom broadcast products and services of the POTUS, VPOTUS, and other leaders as designated. Services and focus areas within this portfolio are Audio Visual System Support, Broadcast Production, Presidential Broadcast Archive, and Multi-Media Production. Continues to embrace mobile commercial technologies for high definition audiovisual and high quality sound solutions. Modernization will continue to fulfil capability gaps in providing continuity of mission operations (COOP) and adopt emerging digital media technologies.		
Transport Services: (\$6.530) Continue to leverage and acquire emerging network transport and SATCOM technologies to build out a Multiple Level Secure (MLS) backbone supporting secure unified communications and high speed assured transport; and evaluate DoD/DISA and commercial SATCOM service solutions (e.g., FirstNet, Mobile User Objective system, Free Space Optics, 5G, and Iridium). Deploys the Presidential Transport Network (PTN) as its primary Travel Transport Network supporting Senior Leader Communications, Broadcast and Audio Visual services, and extending PITC Enterprise IT services to customers. Adopt emerging network transport technologies to build out a Multiple Level Secure backbone enabling assured, high speed transport to its support global missions and continue to evaluate DoD/DISA transport service offerings and emerging commercial capabilities for Next Generation transport solutions.		
Senior Leader Communications (Formerly Network and Data and partially Voice and Video Teleconferencing Portfolios (\$5.000)): (\$13.345) Continue to apply a multi phased data cloud solution, incorporating DISA Enterprise Services where possible, that supports the PITC and mobile users during Presidential events. Will continue to evolve and consolidate WHCA's on-demand network backbone infrastructure and unify IP services; and next generation network services. Will provide storage, virtualization, and collaborative tools to WHMO/WHCA. Adopt DoD Senior National Leadership Command and Control Communications recommendations for assured communications that meet WHCA's Primary Alternate Contingency Emergency communications requirements including Continuity of Operations (CONOPS), and Continuity of Government (COG). Provide reliable, secure, and modern Senior Leader Communication capabilities that enable timely, critically protected information to the POTUS, VPOTUS and their associated support and protection teams, regardless of location to effect national policy and participate in the National Leadership Command Capability (NLCC) infrastructure. Provide national level classified conferencing and continuity of support for the President whether in a permanent or temporary location, using ground transportation, or while aboard fixed-wing and rotary-wing aircraft. Leverages new commercial solutions for new or enhanced capabilities including Presidential Universal Mobile Access (PUMA) classified voice services (up to TS/SCI), Presidential Unified Motorcade Communications (PUMC) that will link key vehicles in the Motorcade into a mobile ad-hoc network, Voice Video, and Visualization, Virtual Personal Assistant, post Zero Day recovery, and next generation networking.		
Enterprise IT (EIT) (Formerly System Assurance, partially Voice and Video Teleconferencing (\$1.700), and Facilities and Infrastructure Portfolios): (\$11.497) Continues to refine defense solutions, personnel, techniques, and best practices to defend, detect, and mitigate cyber-based threats throughout the WHMO/WHCA infrastructure via a Presidential Digital Services Assurance (PDSA) "Zero Trust" that enable WHCA critical systems to defend against modern, large scale, remote attacks. Continue to replace end of life encryption equipment and software for existing operations of all voice, video, data and transport systems. Delivers reliable, secure, and modern digital services architecture and mobile information sharing environment that employs best-in-class security and innovative business applications. Continue to

Line Item MDAP/MAIS Code: N/A		
<p>upgrade WHCA's telecommunications infrastructure to support multiple WHMO/WHCA facilities. Supports the WHMO/WHCA's consolidation of infrastructure and communications capabilities that will provide unified operations and seamless Situational Awareness (SA), Common Operational Picture (COP) and Command and Control (C2) capabilities. Implements IT Service Delivery best practices to meet or exceed service levels agreements; and, postures the PITC network to enable WHCA customers to serve effectively by frequently introducing new digital capabilities and anticipating future data and bandwidth demands.</p> <p>Deployable Services (Formerly System of Systems and Technology Insertion Portfolios): (\$8.541) Will continue to evolve field smart, secure mobile, wireless devices and technologies to provide mobile users with next generation portable communication capabilities and platforms. Continue to conduct technology and engineering assessments with the intent of integrating best of breed COTS products to support the implementation of on-demand service delivery options for all mobile and airborne platforms. Provide rapidly configurable travel systems and mobile vehicle capabilities for the White House, and others as directed. These capabilities mirror high end commercially available solutions that meet customers' requirements for security and high availability of services. Provide a modular system that manages the lifecycle of systems, equipment, and devices and tracks their deployment to mission locations and replenish equipment and service devices.</p> <p>Explanation of Change from FY 2017 to FY 2018: The increase of +\$9.266 from FY 2017 to FY 2018 is attributable to new capabilities required to fulfill two capability gaps, the Presidential Unified Motorcade Communications (PUMC) and the Presidential Digital Services Assurance (PDSA). The PUMC is an interconnected and interoperable motorcade with expanded capabilities and services that work coherently with each other. The PDSA requires upgrades to ensure mission services meet or exceed technical specifications, insider threat reduction and security mandates, as well as POTUS social media archival requirements throughout the White House Military Office (WHMO) IT enterprise for both the Senior Leader Communications, Enterprise IT, and Broadcast and Audio Visual Services portfolios.</p> <p>FY 2019 (\$94.610). WHCA's Presidential Service Strategy 2022 (PSS 2022) updates WHCA's Presidential Communications Vision 2020 (PCV 2020) to reflect capability achievements made in mobility, cybersecurity, retirement of legacy technologies, and other modernization efforts to improve the White House's ability to develop and implement national level policy on a day to day basis and during crisis using the NLCC infrastructure. Efforts include strategic enterprise level initiatives required by the White House Director of Information Technology (D/WHIT) for unified services enabled by converging network and service infrastructures and business practices. For FY18, some of WHCA's portfolios have changed to better represent service capabilities, improve mission alignment, and identify traceability of initiatives to new modernization efforts advanced in WHCA's Presidential Service Strategy. WHCA's PSS 2022 is the central theme of WHCA's Strategic Plan and approach for transformational modernization and innovation to ensure POTUS and VPOTUS can communicate anywhere, anytime, by any means with anyone in the world. PSS 2022 is WHCA's means to achieve targeted architectures comprised of mobile IP solutions enabling unified capabilities and seamless services for information sharing and communications including: Presidential Travel Services Modernization; Senior Leader Communications, Command and Control; Mobility; Cyber Resilience; Network Infrastructure Convergence; Next Generation Networking; High Definition Broadcast Services; and, enterprise collaboration capabilities for personnel supporting Presidential events. WHCA strategically manages IT capabilities within five service portfolios: Senior Leader Communications, Enterprise IT, Broadcast and Audio Visual, Transport, and Deployable Services. The PSS is organized around these service portfolios to align WHCA's strategy, vision, and future capabilities with planned initiatives to ensure future success.</p> <p>Broadcast and Audio Visual Services: (\$5.437) Will continue to evolve broadcast studio capabilities and strategies for unified communications, increased bandwidth, On-demand services, enhanced use of multi-media as a communications medium, and Broadcast capabilities. Will continue to implement Next Generation broadcast event production and support systems; continues to leverage smart tagging techniques for global access and search; modernize and automate the Master Control storage area network system (MC SAN) and Presidential Records Archiving and Accessibility to support Presidential post productions storage, reporting, and public dissemination and use. Provides multimedia services and production products to government, news, and other organizations for recording events, providing historical records, and custom broadcast products and services of the POTUS, VPOTUS, and other leaders as designated. Services and focus areas within this portfolio are Audio Visual System Support, Broadcast Production, Presidential Broadcast Archive, and Multi-Media Production. Will continue to embrace mobile commercial technologies for high definition audiovisual and high quality sound solutions. Modernization will continue to fulfil capability gaps in providing continuity of mission operations (COOP) and adopt emerging digital media technologies.</p> <p>Transport Services: (\$6.661) Will continue to leverage and acquire emerging network transport and SATCOM technologies to build out a MLS backbone supporting secure unified communications and high speed assured transport; and evaluates DoD/DISA and commercial SATCOM service solutions (e.g., FirstNet, Mobile User Objective system, Free Space Optics, 5G, and Iridium). Deploys the PTN as its primary Travel Transport Network supporting Senior Leader Communications, Broadcast and Audio Visual services, and extending PITC Enterprise IT services to customers. Adopts emerging network transport technologies to build out a Multiple Level Secure backbone enabling assured, high speed transport to its support global missions and continues to evaluate DoD/DISA transport service offerings and emerging commercial capabilities for Next Generation transport solutions.</p> <p>Senior Leader Communications: (\$29.039) Will continue to apply a multi phased data cloud solution, incorporating DISA Enterprise Services where possible, that supports the PITC and mobile users during Presidential events. Continues to evolve and consolidate WHCA's on-demand network backbone infrastructure and unify IP services; and next generation network services. Continue to provide storage,</p>

<p>virtualization, and collaborative tools to WHMO/WHCA. Continue to adopt DoD Senior National Leadership Command and Control Communications recommendations for assured communications that meet WHCA's Primary Alternate Contingency Emergency communications requirements including CONOPS, and COG. Provide reliable, secure, and modern Senior Leader Communication capabilities that enable timely, critically protected information to the POTUS, VPOTUS and their associated support and protection teams, regardless of location to effect national policy and participate in the NLCC infrastructure. Provide national level classified conferencing and continuity of support for the President whether in a permanent or temporary location, using ground transportation, or while aboard fixed-wing and rotary-wing aircraft. Will continue leveraging new commercial solutions for new or enhanced capabilities including PUMC that will link key vehicles in the Motorcade into a mobile Voice Video, and Visualization, Virtual Personal Assistant, post Zero Day recovery, and next generation networking. Provide replacement of motorcade communication vehicles that provide 24/7 C2C communications to the POTUS when not on White House grounds (UHF SATCOM), VHF line of Sight to the Limo, and transport infrastructure for classified mobile devices for Senior Level POTUS officials and the Military Aid. Establishment of a Mobile Ad-Hoc Network (MANET) providing lightweight and robust mobile networking capabilities that can be deployed as a temporary service for the POTUS and VPOTUS within any forward deployed environment. MANET will include the use of emerging government solutions including PUMA, PITC Trip Kit, and Presidential Transport Network, employing service bonding and persistence technologies riding SATCOM, Government or Commercial services.</p> <p>Enterprise IT (EIT): (\$44.761) Will continue to refine defense solutions, personnel, techniques, and best practices to defend, detect, and mitigate cyber-based threats throughout the PITC infrastructure via a PDSA "Zero Trust" that enable WHCA critical systems to defend against modern, large scale, remote attacks. Will continue to replace end of life encryption equipment and software for existing operations of all voice, video, data and transport systems. Will deliver reliable, secure, and modern digital services architecture and mobile information sharing environment that employs best-in-class security and innovative business applications. Will continue to upgrade WHCA's telecommunications infrastructure to support multiple WHMO/WHCA facilities to include Camp David. Supports the WHMO/WHCA's consolidation of infrastructure and communications capabilities that will provide unified operations and seamless SA, COP and C2 capabilities. Implements IT Service Delivery best practices to meet or exceed service levels agreements; and, postures the PITC network to enable WHCA customers to serve effectively by frequently introducing new digital capabilities and anticipating future data and bandwidth demands. Transitions to Cloud Services providing a single, consolidated network service infrastructure for all members of the PITC including: Long-term storage; phased migration and synchronization capability for infrastructure, accounts, and software; High availability and gault tolerance within the same site and across data centers; and, service resilience and disaster recovery.</p> <p>Deployable Services: (\$8.712) Will continue to evolve field smart, secure mobile, wireless devices and technologies to provide mobile users with next generation portable communication capabilities and platforms. Will continue to conduct technology and engineering assessments with the intent of integrating best of breed COTS products to support the implementation of on-demand service delivery options for all mobile and airborne platforms. Provide rapidly configurable travel systems and mobile vehicle capabilities for the White House, and others as directed. These capabilities mirror high end commercially available solutions that meet customers' requirements for security and high availability of services. Provide a modular system that manages the lifecycle of systems, equipment, and devices and tracks their deployment to mission locations and replenish equipment and service devices.</p> <p>Change from FY 2018 to FY 2019: The increase of +\$49.367 from FY 2018 to FY 2019 is attributable to a one-time increase (\$4.000) for Mobile At-Hoc network modernization efforts providing assured and secure communication services globally to the President and Vice President while traveling in the motorcade and a one-time increase (+\$4.220) for due to the replacement of motorcade communication vehicles that provide around the clock command and control communications to the POTUS when not on White House grounds, VHF line of Sight to the Limo, and transport infrastructure for classified mobile devices for Senior Level POTUS officials and the Military Aid within the Senior Leader Communications portfolio; one-time increase (+\$7.983) for outside plant cabling and supporting infrastructure modernization efforts at Camp David, providing future expansion capabilities and proper user accessibility and support by installing the latest supportable cable/conduit infrastructure between facilities within the Enterprise IT portfolio; and, one-time increase (+\$38.000) the PITC transition to cloud services providing network infrastructure upgrades, increased security, reliability, and adaptabilities to support growing mission requirements and consolidation of PITC services within both the Senior Leader Communication and Enterprise IT Portfolios. Increases are offset by a decrease of -\$4.836 due to completing communication infrastructure installation requirements at POTUS second residences.</p> <p>Performance Metrics:</p> <p>Broadcast and Audio Visual Services Portfolio goal (FY 2017 and FY 2018): Improve the President's and Senior Staff's access to and storage of high-quality multimedia broadcast information for both incoming and outgoing communication needs. Enables COOP to maintain essential Broadcast functions and next generation Broadcast services including High Definition Services for Streaming and Virtualization.</p> <ul style="list-style-type: none"><li>• Broadcast studio construction progress (Met);</li><li>• Customer satisfaction for new studio services;</li><li>• Broadcast services delivered;</li></ul>

FY19 Target: 99.99% recapitalize the Greenfield data center		
Senior Leader Communication Services Portfolio goal (FY 2017 and FY 2018): Transition from legacy communications standards to high-bandwidth technologies and protocols that provide accredited, fault-tolerant, secure and non-secure network, and data services (SLC Portfolio consolidates the Network and Data portfolio).		
•SLC services delivered;		
•SLC service quality;		
•Customer satisfaction during migration;		
•Wi-Fi location-specific availability and capacity;		
•West Wing modernization progress;		
•Customer satisfaction with Wi-Fi services.		
Senior Leader Communication Services Portfolio goal (FY 2019): Provide POTUS/VPOTUS/FLOTUS C2C voice (Classified and Unclassified) conferencing capabilities for Senior Leader Conferencing, Command and Control Voice and Video, Head of State Communications, and DoD Records Messaging with a minimum 99.99% response rate.		
• Classified Mobility. Senior Leader/NLCC comms; Classified Mobility;		
FY19 Target: 99.99% PUMA integrated into the limousine fleet; perform Mobile Ad-hoc Network (MANET) installations		
• Presidential Unified Motorcade Communications (PUMC, Motorcade As A Network (MCAAN))		
FY19 Target: 99.99% MCAAN integrated into the NextGen MCV fleet and operational Washington Area System (WAS) Upgrade.		
• IP Technology refresh of the WAS; and customer migration to the new MUOS waveform		
FY19 Target: 99.99% Land Mobile Radio (LMR) evolution (e.g., continue procurements for robustness, redundancy, and resilience)		
• Head of State (HOS) Modernization. Head of State secure voice communications, Portable Infrastructure Trip Kit (PITK) Tempest Upgrade		
FY19 Target: 99.99% sustainment of PITK equipment		
• LAV Transfer/Sustainment from WHMO.		
FY19 Target: 99.99% recapitalize the older fleet vehicles		
Transport Services Portfolio goal (FY 2017 and FY 2018): provides long haul connectivity and global access to network services for WHCA organizations and with distributed mission partners and encompasses a mix of government-owned and commercially-leased services.		
•PTN (formerly BCN) availability, reliability, and capacity;		
•Network Congestion		
•Data/Packet Loss		
Transport Services Portfolio goal (FY 2019):		
•WHCA Wideband Global SATCOM (WGS). WHCA-120 fleet has reached its end of life and are being replaced with .95M Tampa Microwave and 1.2M L3 Hawkeye lites.		
FY19 Target: 99.99%: sustain WGS equipment		
•PAGCN		
FY19 Target: 99.99%

**Description:**

The Joint Regional Security Stacks (JRSS) are a joint DoD security architecture comprised of complementary defensive security solutions that remove redundant Information Assurance (IA) protections; leverages enterprise defensive capabilities with standardized security suites; protects the enclaves after the separation of server and user assets; and provides the tool sets necessary to monitor and control all security mechanisms throughout DoD's Joint Information Environment.

## Justification:

FY 2017: (\$149.623) Procured hardware/software to enhance the DoD Cyber Situational Awareness Analytic Cloud (CSAAC) to incorporate Joint Regional Security Stacks/Joint Management Systems (JRSS/JMS) analytics data and correlation capabilities at JRSS locations; tech refresh enhancements to JRSS 1.5 capabilities; and began procurement of JRSS 2.0 capabilities required to meet functionality at the Department of Navy (DoN) Gateways. Once completed, it enabled the ability to collect, aggregate and review syslog and security event data, and perform automated and manual correlation for both cyber defense and application performance monitoring and troubleshooting and enable DoN to begin migrating behind JRSS. DISA procured the following capabilities:

- JRSS and JMS 1.5 Tech Refresh - (\$76.599) Procured hardware to support technology refresh enhancements to JRSS and JMS 1.5 active stack capabilities. Tech refresh acceleration of Load Balancer, SSL decryption, and SIM will enable 2.0 capabilities. DISA will pursue multi-year warranties of refreshed items, which will support 40 major HW/SW end items & 400+ racks of equipment.
- Web Security Gateway - (\$35.846) Supported fine grain content filtering of assembled pages, proxy and native SSL and provides Web Content (Malware/Policy Based) filtering; Integrated with SSL break and inspect capability; and Provided inline antivirus for web-based file scans.
- Break and Inspect (B&I) (client to server, SSL/TLS only) - (\$29.706) Ability to break encrypted traffic, open attachments and segment off threat traffic. Complemented but did not replace DoD DMZ or other CDC/IPN/ISN B&I capabilities. Primary JRSS break and inspect use-case is outbound SSL from DoD users to Internet.
- Cyber Situational Awareness Analytic Cloud (CSAAC) - (\$7.472) Built-out the CSAAC requirements to enhance JRSS/JMS 1.5 ArcSight and Splunk log analytics and correlation capabilities utilizing existing Data Orchestrator for event aggregation, enrichment and forwarding providing enhanced cyber SA for COCOMS, Services and Agencies.

FY 2018: (\$188.483) Will procure hardware/software to enhance the DoD Cyber Situational Awareness Analytic Cloud (CSAAC) to incorporate Joint Regional Security Stacks/Joint Management Systems (JRSS/JMS) analytics data and correlation capabilities at JRSS locations; upgrade Multiprotocol Label Switching (MPLS) connectivity to support integration with JRSS, and tech refresh/enhance JRSS/JMS to provide continued support for JRSS 1.5 capabilities and procure JRSS 2.0 capabilities. Once complete, will enable ability to collect, aggregate and review syslog and security event data, and perform automated and manual correlation for both cyber defense and application performance monitoring and troubleshooting and enable DoN to migrate behind JRSS. DISA will procure the following capabilities:

- JRSS 2.0 Capabilities - (\$104.703) Will purchase new hardware/software to deploy JRSS 2.0 Capabilities for Web Content Filtering (\$12.000), Endpoint Licenses (\$19.300), Inline Intrusion Protections System (\$34.863), Break and Inspect (\$31.565) capabilities that will be deployed on NIPR and SIPR and the associated engineering support (\$6.975).
- JRSS and JMS 1.5 Tech Refresh - (\$49.670) Will continue to procure hardware and software to support technology refresh enhancements of end of life enterprise JRSS hubs/spokes (\$11.820), tech refresh of end of life enterprise JRSS 1.5 and JMS 1.5 equipment (\$14.500); engineering support (\$4.650), license renewals (\$5.600), and a new global condensed stack to support the enterprise solution (\$13.100).
- Cyber Situational Awareness Analytic Cloud (CSAAC) - (\$11.210) Will acquire hardware/software to support the installation and integration of three NIPR and SIPR Hub Sites to perform Big Data Platform and CSAAC capabilities to enhance JRSS/JMS 1.5 ArcSight and Splunk log analytics and correlation capabilities, which include aggregation, enrichment, forwarding, and enhanced cyber situational awareness for the COCOMs Services and Agencies.

Exhibit P-40, Budget Line Item Justification: PB 2019 Defense Information Systems Agency		Date: February 2018
Appropriation / Budget Activity / Budget Sub Activity: 0300D: Procurement, Defense-Wide / BA 01: Major Equipment / BSA 5: Major Equipment, DISA		P-1 Line Item Number / Title: 96 / Joint Regional Security Stacks
ID Code (A=Service Ready, B=Not Service Ready): A	Program Elements for Code B Items: 0303228K	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
<p>• Multiprotocol Label Switching (MPLS, formerly part of JRSS and JMS 1.5 Tech Refresh (\$9.400)) - (\$22.900) Will upgrade existing connections to provide additional bandwidth and streamlined management in order to support integration with JRSS and handle the additional traffic associated with enhanced cyber SA.</p> <p>Explanation of Change from FY 2017 to FY 2018: The increase of +\$38.860 between FY 2017 and FY 2018 is due to the upgrade of additional connections with MPLS routers at an estimated 23 locations (+ \$13.500) and the upgrade of additional connections with MPLS routers at an estimated 23 locations and acquisition of new hardware/software to support fielding of new JRSS 2.0 Capabilities (i.e. Break and Inspect - SIPR and Inline IPS) (+\$39.749). This is partially offset by a decrease in the acquisition of analytic hubs (-\$4.090) and JRSS/JMS 1.5 tech refresh enhancements within CONUS (-\$10.299).</p> <p>FY 2019: (\$140.338) Will procure hardware/software to support JRSS 1.5 and DoD Cyber Situational Awareness Analytic Capabilities tech refresh and enhancements. Will continue the upgrade of MPLS connectivity to support integration with JRSS. Once complete, this will enable the ability to collect, aggregate, and review syslog and security event data, perform automated and manual correlation for both cyber defense and application performance monitoring, and troubleshooting to support migrations to JRSS. DISA will procure the following capabilities:</p> <p>• JRSS and JMS Tech Refresh - (\$111.438) Will continue to procure hardware and software to support technology refresh enhancements of end-of-life/end-of-support JRSS hubs/spokes in order to keep current with evolving threats.</p> <p>• Cyber Situational Awareness Analytic Cloud (CSAAC) - (\$6.000) Funds procurement, engineering, test, integration, and implementation of analytics supporting JRSS. Supports the hardware/software tech refresh/enhancement of CSAAC capabilities.</p> <p>• Multiprotocol Label Switching (MPLS) - (\$22.900) Will continue to upgrade existing connections to provide additional bandwidth and streamlined management in order to support integration with JRSS and handle the additional traffic associated with enhanced cyber SA.</p> <p>Explanation of Change from FY 2018 to FY 2019: The decrease of -\$48.145 between FY 2018 and FY 2019 is due to the completion of the JRSS 2.0 capabilities in FY18 (Break and Inspect and Inline IPS), acquisition of CSAAC hub HW/SW upgrades and reduced hardware/software tech refresh requirements for JRSS/JMS in FY19.</p> <p>Performance Metrics:</p> <p>1. Implement JMS CSAAC analytic capability at 6 JRSS locations in FY 2017, 6 additional JRSS locations in FY 2018, and 1 location in FY 2019. FY 2017 6 / Actual 0 FY 2018 6 FY 2019 1</p> <p>2. Procure Web Security Gateway capabilities for 75% of the JRSS sites and Break and Inspect capabilities for 67% of the JRSS sites in FY 2017. Procure 10% of the required Web Security Gateway capabilities for the remaining 25% of the JRSS sites in FY 2018. FY 2017 80% JRSS / 67% B&amp;I / Actual 55% JRSS Web security Gateway / 0% B&amp;I FY 2018 10% FY 2019 67% B&amp;I planned</p> <p>3. MPLS enabled sites: FY17 Estimate: 9 Sites / Actual 9 FY18 Estimate: 23 Sites FY19 Estimate: 23 Sites</p>

**Description:**

Joint Service Provider (JSP) mission focuses on providing timely, trustworthy, and dependable information technology (IT) services for Pentagon and National Capital Region (NCR) customers. JSP provides the full range of information technology equipment, services, solutions, and customer support to the Office of the Secretary of Defense, the Office of the Deputy Chief Management Officer, and WHS to meet mission and business requirements. It enables missions and business processes through secure, robust, reliable state-of-the-art information technology and services.

<p><b>Justification:</b></p> <p>FY 2017: (\$0.000)</p> <p>FY 2018: (\$100.783)</p> <p>Voice, Data, and Video Infrastructure: (\$1.744) - Will provide support of Pentagon/NCR Voice, Data, and Video Infrastructure life-cycle refresh, modernization, and other approved project and initiatives. This includes life-cycle refresh and modernization of the 3 Pentagon unclassified and classified voice switches, the life-cycle refresh and modernization of Audio Visual (AV) and Video-Teleconference (VTC) hardware and software in the Mark Center Conference Center, Pentagon Conference Center, and the Pentagon Emergency Operations Center. Will procure hardware/software for lifecycle replacement for all IT equipment, software, and installation services. JSP provides IT support services for the Office of the Secretary of Defense (OSD), Joint Staff, Washington Headquarters Service (WHS), Pentagon Force Protection Agency (PFPA), Consolidated Adjudication Facility (CAF), and other WHS-supported users and communities supported within the Pentagon Reservation and other areas in the National Capitol Region.</p> <p>Server, Compute, and Storage Infrastructure: (\$56.606) - Will provide network transport for all Services and Agencies in the Pentagon at all security classification levels. This program includes comprehensive network security, computer network defense, and intrusion detection at the DoD Information Networks Pentagon edge. It also provides the Pentagon IPN with full spectrum computing and data management, data storage, replication, recovery, and back-up. This program also provides the organizational messaging node for DoD and replaces existing firewalls with the joint computer network defense architecture for the Pentagon node. The program also funds Life Cycle Replacement and Modernization of the Pentagon's core network infrastructure minimizing the risk for increased occurrences/ durations of widespread network outages and higher maintenance costs. The program also provides the capacity needed to meet the Joint Information Environment bandwidth requirements based on the virtualization and continuing alignment of Enterprise services at DoD Core Data Centers.</p> <p>End User Services: (\$33.823) - Will provide modernization and life-cycle refresh of office automation and IT end-user infrastructure requirements for the WHS/OSD, the Joint Staff, the DoD CAF, WHMO, the US Court of Appeals for the Armed Forces, and 14 organizational components of the OSD. Will procure approximately 30 office automation, application development, and classified and unclassified end user device support. Will provide the back-end server and data storage to support the virtualized desktop as a service infrastructure. This converged and virtualized platform enables JSP to avoid costly maintenance of individual desktops by deploying a reduced number of disparate user images directly from the server for better management of security patching, improved software license and version control, and ability of JSP-supported staff to work from geographically-dispersed locations.</p> <p>High-Availability (HA) Architecture – Secretary of Defense Communications (SDCs): (\$1.676) - Will provide funding for critical business operations, high-availability architecture, and core infrastructure support, at all classification levels, for the immediate Office of the Secretary of Defense.</p> <p>Consolidated Adjudication Facility (CAF) Infrastructure: (\$1.618) - Will provide continued support of the DoD CAF, a consolidation to promote and enhance greater consistency, standardization, and efficiency throughout the adjudicative process. The program also funds Continuity of Operations IT requirements that support the sustainment of critical business operations in the event of an emergency.</p> <p>Information Technology (IT) Service Management: (\$4.806) - Will provide for investments in ITSM tools (hardware, software) required for the management of core classified and unclassified Pentagon/NCR network and cyber operations.</p>

**Description:**

Defense Information Systems Network (DISN) is the Department of Defense's (DoD's) consolidated worldwide telecommunications infrastructure that provides end-to-end information transport for DoD operations to the warfighters and the Combatant Commanders with a robust Command, Control, Communications, Computers and Intelligence information long-haul transport infrastructure. The DISN, seamlessly spanning full spectrum from terrestrial to space and strategic to tactical domains, provides the interoperable telecommunications connectivity and value-added services required to plan, implement, and support all operational missions, anytime, and anywhere pushing DISN services to the edge of the communications network. The DISN delivers an integrated platform consisting of DoD's core communications, computing, and information services as well as integrating terrestrial, wireless, and satellite communications into a network cloud that is survivable and dynamically scalable. Procurement funding primarily supports the Technology Refreshment (TR); Joint Worldwide Intelligence Communications System (JWICS); National Emergency Action Decision Network (NEADN)/Presidential and National Voice Conferencing (PNVC); the Enhanced Pentagon Capability (EPC)/Survivable Emergency Conferencing Network (SECN); DoD Mobility; and a significant satellite communications extension of the DISN. The procurement funding enables the DISN to remain technologically up-to date and capable by achieving the best possible balance between network performance and network cost through a process known as network optimization.

**Justification:**  
FY 2017 OCO:  
Global Broadcast Service (GBS): (\$5.500) Procured and installed equipment to support Airborne Intelligence Surveillance, and Reconnaissance (AISR) data transport for operational and tactical users.

FY 2018 OCO:  
Global Broadcast Service (GBS): (\$12.000) Will continue to procure and install equipment to support the Enhanced AISR data transport for operational and tactical users.

Explanation of Change from FY 2017 to FY 2018: Increase of +\$6.500 from FY 2017 to FY 2018 is due to increased AISR mission requirements of the operational and tactical users.

FY 2019 OCO:  
Global Broadcast Service (GBS): (\$12.000) Will continue to procure and install equipment to support the Enhanced AISR data transport for operational and tactical users.

Explanation of Change from FY 2018 to FY 2019: There is no change from FY 2018 to FY 2019.

Performance Metrics:

Number of Terminals:  
FY 2017 - 1 Planned / 1 Completed  
FY 2018 - 4 Planned  
FY 2019 - 4 Planned
