**Description:**

This vehicle group consists of pickup trucks, trailers, semi-trailers, tractors, vans, utility trucks, maintenance and facility vehicles essential to base and flying operations. Assets are critical to the Air Force mission and are essential to flight line operations (aircraft maintenance), depot maintenance, component routing to depot back shops and airfield maintenance, and Air Base Civil Engineers performing base housing maintenance and repairs. These items are critical across the spectrum of functional users throughout the Air Force and provide multi-purpose capabilities. These vehicles also support mission needs for light to heavy cargo transport, as well as transportation for air/flight crew personnel. Cargo utility vehicles also provide heavy cargo movement for civil engineering and construction projects. Without the procurement of these replacement vehicles, the Air Force will not have the ability to support broad spectrum Air Force operations.

In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

Program elements associated with this P-1 Line are: 0202834F, 0207597F, 028028F, 0401221F, 0402834F, 0502834F, 0502844F, 0702831F, 0802834F.

**Remarks:**

FY15 UNIT COSTS ARE SUBJECT TO CHANGE.

**FY15 PMA Justification:**

Funds from PMA will be used for TDY to attend the GSA Federal Fleet training and conference specifications review to interface with GSA and vendor personnel to ensure specifications for the Air Force vehicle fleet are adhered to. Funds from PMA will also be used for TDY to the Con Expo conference which showcases the latest equipment, products, services and technologies available to the Air Force. Finally, funds from PMA will also be used for TDY to the annual Vehicle Transformation Acquisition Council to discuss requirements and issues within the Air Force fleet with the Vehicle Equipment & Management Support Office (VEMSO) and MAJCOM representatives.

**Description:**

This vehicle group consist of various vehicles for flightline, maintenance, and facility operations used for a variety of purposes. Examples of these vehicles include the IW 40 tractor, six- and ten- passenger over-the-snow-carriers, an assortment of wreckers and refuse trucks, and water distribution trucks. The IW 40 tractor is a small farm tractor used primarily to pull a mower and for other light tasks; the snow carriers are tracked vehicles which move personnel in snowy conditions and are used in search and rescue missions; the wreckers are used to move disabled vehicles, haul vehicles or to deploy a heavy duty winch. The refuse trucks in this group include one which tilts and dumps a payload and one which compacts refuse prior to discharge. Water distribution trucks are used primarily to wet down and control dust at a construction site.

In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

Program elements associated with this P-1 line are: 0202834F, 0207597F, 0401221F, 0402834F, 0502834F, 0502844F, 0702831F, 0802834F.

**Remarks:**

FY15 unit prices are subject to change.

FY15 PMA Justification:

-- Large Capacity Refueling Vehicle (LCRV)- PMA is required to perform hands-on inspection and familiarization of the LCRV.

-- R-11 Refueling Truck, Buy, Critical Design Review (CDR). CDR is vital to ensure proper design of vehicle before production. Additionally, we must ensure all specific military operational requirements will be met.

-- R-11 Refueling Truck, Buy, First Production Test. Perform inspection and operational test of first production unit of initially produced R-11 to ensure operational, safety, and sustainment requirements are met before full rate production ensues.

-- R-12 Refueling Truck, Buy, Preliminary Design Review (PDR). The R-12 facilitates transfer of hundreds of gallons of fuel per minute between aircraft and in-ground tanks, above-ground tanks, and other refueling vehicles.

-- R-12 Refueling Truck, Buy, First Production Test. Perform inspection and operational test of first production unit of new R-12 to ensure operational, safety, and sustainment requirements are met before full rate production ensues.

**Description:**

This program includes various material handling vehicles with an individual item procurement value of less than \$5M. These vehicles consist of lifting trucks, sequencing trucks, and other warehouse equipment critical to depot and base supply operations.

In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

Program elements associated with this P-1 Line are: 0202834F, 0207597F, 0208028F, 0401221F, 0402834F, 0502834F, 0702831F, 0802834F.

**Description:**

This program procures snow removal vehicles and commercial sweepers used on all airfield surfaces to remove snow and help prevent foreign object damage (FOD) to aircraft engines and tires. Snow removal equipment includes front mounted brooms, multi-purpose blowers, and plows. These vehicles provide critical mission support to airfield operations because fighter aircraft cannot land or take off with ice on the runway. Multi-purpose vacuum sweepers maintain airfields, roads, and grounds. Vacuum sweepers provide equally important support at all air bases due to the high cost of FOD and the potential for loss in FOD-related engine accidents.

These assets are critical to the Air Force mission. They are the primary equipment used for snow, ice, and debris removal from runways and taxiways year round. The vital functions of these vehicles prevent the closing of airfields due to debris and/or snow and ice buildup.

In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

Program elements associated with this P-1 line are: 0202834F, 0208028F, 0402834F, 0502834F, 0502844F, 0702831F, 0802834F.

\*For Items, Title represents the Item Number / Title [DODIC].

Note: Totals in this Exhibit P-40 set may not be exact or add due to rounding.

**Justification:**

FY15 Procurement dollars in the amount of \$10.212M will procure, but not be limited to, 32 vehicles/items in support of installation and unit mission requirements for Air Force personnel. The items contained in this P-1 line are critical due to their direct support of the flying mission at Air Force bases worldwide.

FY15 Overseas Contingency Operations (OCO) dollars in the amount of \$1.734M will procure a 45K Reversible Snow Plow (1ea) and Snow Broom & Blower (1ea) in support of Air Mobility Command (AMC) requirements and the following Airfield Damage Repair requirements: Vacuum Sweepers(4ea) and Rapid Runway Repair Dirt Sweeper (2ea).

**Remarks:**

Unit costs for FY15 are subject to change.

**FY15 PMA JUSTIFICATION:**

-- Funds from PMA will be used for TDYs to the American Public Works Association Western Snow and Ice Meetings. By attending these expos and meetings, AF personnel can write specifications that are generic in nature with the different manufacturers and thus develop a more competitive supplier environment that will reduce costs and still meet the needs of our customers.

**Description:**

This vehicle group consist of maintenance/test vans, water distribution trucks and heavy construction equipment (dozers, large cranes, large dump trucks, rock crushers, motorized scrapers, well-drilling vehicles, compactors, wheel loaders, graders, cement mixers, paving machines, excavators, sewer trucks, refuse trucks, trenches and backhoes). The assets are critical to the Air Force mission and are crucial to keeping many sortie generation/sortie sustainment missions supported and operational. The types of items contained in this P-1 line are critical (deployed) assets used in direct support of Air Force units engaged in contingency operations.

In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and provision of military support to civil authorities.

Program elements associated with this P-1 line are: 0202834F, 0207227F, 0208028F, 0401221F, 0402834F, 0502834F, 0502844F, 0702831F, 0702834F, 0802834F.

**Remarks:**

UNIT COSTS FOR FY15 ARE SUBJECT TO CHANGE.

**FY15 PMA JUSTIFICATION**

Funds from PMA will be used for TDY to the Vehicle Transformation and Acquisition Council (VTAC) and the GSA Federal Fleet conference. Robins AFB personnel can learn from the face-to-face discussions concerning Air Force requirements, sustainment, and future plans. By attending these expos and conferences, AF personnel can write specifications that are generic in nature with the different manufacturers and thus develop a more competitive supplier environment that will reduce costs and still meet the needs of our customers.

**Description:**

General information technologies are a critical part of the Air Force (AF) vision to provide widespread, secure, robust, physically diverse terrestrial, airborne, and space based transmission paths and information services between our fixed and deployed operating locations. These capabilities, when coupled with the AF's fixed-based transport and network operations infrastructure from the Combat Information Transport System, the expeditionary base theater deployable communications program, and via connections through teleport gateways, allow warfighters to exchange unprecedented levels of information. This program provides for commercially available Information Technology (IT) acquisitions and equipment additions to government-owned computer systems. Items to be purchased include, but are not limited to network servers, network infrastructure, specialized systems directly supporting operational mission requirements, and Storage Area Network (SAN) and Local Area Network (LAN) hardware and software replacement of equipment. Programs support and enhance warfighting capability and all enhance productivity in support of AF weapon systems and personnel.

PE 0201110F SERVICE SUPPORT TO USNORTHCOM ACTIVITIES

CIVIL RESPONDER COMMUNICATIONS (CRC) INTEROPERABILITY: The Civil Responder Communications capability provisions interoperable communications between a deployed Joint Task Force and federal, state, and local disaster response personnel. USNORTHCOM will use these funds to procure communications technologies that enable direct communications between military and civil command counterparts at all echelons. The collaborative requirements that this task satisfies includes shared common operational picture (COP), desktop collaboration, military and civil radio interoperability that includes encryption, and the extension of public internet and telephone service by military communications systems to the civil responders being supported. (Formerly Emergency Response Communications System (ERCS))

PE 0201130F US NORTHERN COMMAND COMMUNICATIONS:

a. NORAD AND NORTHCOM INTEROPERABLE COMMUNICATIONS: This includes mission specific communications enhancements to support extension of Public Switched Telephone Network (PSTN) and Public Internet to Civil Authorities from the DOD Satellite Teleports either directly to the Civil Authorities' communications systems or through DOD communications systems. This program combines the Interoperable Communications and Joint Tactical Radio System (JTRS) compliant radio handsets to enable the Defense support of Civil authorities mission.

b. DEPLOYABLE COMMUNICATION CAPABILITY SYSTEM LIFE CYCLE MANAGEMENT: The USNORTHCOM Deployable Communication Fleet consists of Emergency Response Vehicles (ERVs) Mobile Communications Platforms (MCPs), and fly-away communications systems, small enough to be flown on commercial airlines to a nationally declared disaster. (NC J6 DCCS combined the previously approved and funded Cellular System Technical Refresh and Emergency Response Communications System into one consolidated effort) This effort is funded in PE 0201130F and PE 0201110F.

<p>c. EARLY WARNING RADAR (EWR) COMMUNICATIONS EQUIPMENT: The AVTEC NexGen panels are used to support the Hawaii Regional Air Operations Center (HIRAOC). The NORAD EWR Communications Equipment provide equipment to facilitate dual operation cutovers, secure/non-secure communications for a single communications network allowing clear and secure, real-time, line of sight and beyond line of sight NORAD wide command and control of airborne and ground elements.</p> <p>PE 0207277F ISR INNOVATIONS</p> <p>Family of systems providing high impact, quick reaction capabilities to warfighters for mission planning, rehearsal, visualization, and intelligence gathering purposes. Program components include: Eagle Vision, DoD's only worldwide deployable commercial imagery ground station capability, and ISR innovations, rapid prototyping, operational evaluation and fielding of short notice, high payoff capabilities addressing immediate gaps and/or shortfalls identified by warfighting activities. Eagle Vision provides direct downlink commercial imagery to operational commanders for mission support purposes.</p> <p>PE 0207603F (CAF) EXERCISES AND READINESS TRAINING:</p> <p>COMBAT AIR FORCE (CAF) EXERCISES AND READINESS TRAINING: Procures part task trainers for ACC and other CAF air crews to perform selected ground training tasks in conjunction with other air operations training activities as they train to become combat ready for worldwide air expeditionary force missions.</p> <p>PE 0207605F WARGAMING AND SIMULATION CENTERS:</p> <p>WARRIOR PREPARATION CENTER (WPC): The Warrior Preparation Center conducts and supports integrated and distributed Live, Virtual, and Constructive (LVC) warfighter training for Joint and Combined partners in the European and African theaters. Specifically, WPC activity delivers integrated warfighter training for USEUCOM, USAFRICOM, other US Components and our NATO and Coalition partners, and also provides year-round continuation training for Air and Space Operations Center exercises and the certification training for Air Force (Component) Forces (AFFOR) and Joint Task Force staffs. These systems also support EUCOM Integrated Air and Missile Defense (IAMD) training and education events.</p> <p>PE 0207697F DISTRIBUTED TRAINING AND EXERCISES:</p> <p>AIR FORCE DISTRICT WASHINGTON: Wargaming and analysis suites, hardware, and software in direct support of the wargaming informational environment, which is distributed across the National Capitol Region, United States Air Force, and Combatant Commands worldwide.</p> <p>PE 0208087F AF OFFENSIVE CYBERSPACE OPERATIONS</p> <p>Procures student mission training systems (hardware, software, infrastructure, and facility modifications) supporting Information &amp; Cyber Operations training needs of approximately 700 students per year.</p> <p>PE 0303112F AIR FORCE COMMUNICATIONS (AIRCOM)</p> <p>AIRBORNE NETWORKING INTEGRATION (ANI): The Airborne Networking Global Information Grid (GIG) Interface (ANGI) is an initiative that provides airborne communications network connectivity to the terrestrial and space layers. It supports Air Force and Joint efforts for integration of airborne, terrestrial and space layer networks. The initiative establishes ANGI sites that support deployed assets by extending the AFNet to the aerial layer.</p> <p>PE 0305105F DoD Cyber Crime Center:</p> <p>DC3 provides digital and multimedia (D/MM) forensics, cyber investigative training; research, development, test and evaluation, cyber analytics to DoD computer network defense (CND), and cyber investigative and operational support to DoD customers. Funds will provide the replacement of equipment to detect, enhance or recover digital media, to include audio and video, computer investigative and incident response training, and test &amp; evaluation of all software/hardware before use in a forensic process.</p> <p>PE 0305128F SECURITY AND INVESTIGATIVE ACTIVITIES</p>

<p>The AFOSI Directorate of Warfighting Integration is responsible for centralized management of sensitive information. It accomplishes this mission through the management and oversight of personnel, products and systems associated with unclassified, Secret, special access, and Top Secret/SCI computers and information management systems, voice systems, long-haul communications circuits, official records, Privacy Act, Freedom of Information Act, publications and forms, and official mail to achieve the command's operational objectives in support of the AF and Office of the Secretary of Defense as well as to achieve Executive mandates to improve information sharing within and between the law enforcement and intelligence communities. Funds provide for the operations and maintenance of these programs as well as replacement and refresh of vital computer equipment to include servers, workstations, network and mass storage devices. This will enable AFOSI to meet the requirements of the Clinger-Cohen Act and stay current in IT technology supporting 3,000 worldwide personnel to effectively process, track, and disseminate perishable investigative information to AF commanders and national-level customers.</p> <p>PE 0305173 SPACE AND MISSILE TEST AND EVAL CENTER</p> <p>RESEARCH AND DEVELOPMENT SPACE AND MISSILE OPERATIONS (RDSMO) PROGRAM:</p> <p>Develops and acquires systems to: operate experimental, demonstration, and operational satellites; operate a fixed and deployable satellite ground system enterprise; perform satellite compatibility testing; act as the focal point and center of expertise for DoD experimental and demonstration space and missile operations; support space and missile R&amp;D; and conduct/support experimental/demonstration space and missile Developmental Test and Evaluation (DT&amp;E) and Initial Operational Test and Evaluation (IOT&amp;E) activities. RDSMO consists of the Space Test and Operations organization at Kirtland AFB which is the focal point for (1) the Multi-Mission Satellite Operations Center (MMSOC) installed in the RDT&amp;E Support Complex (RSC) at Kirtland AFB, NM which operates R&amp;D satellites, and the at Satellite Operations Center 11 (SOC 11) at Schriever AFB, CO which operates operational satellites; (2) satellite ground system enterprise development and integration and (3) deployable test systems which deploy mobile antennas worldwide to support space RDT&amp;E activities.</p> <p>PE 0305174F SPACE INNOV INTG AND RAPID TECH DEV</p> <p>Located at Peterson AFB, Colorado, the Space Innovation, Integration and Rapid Technology Development (SIIRTD) program develops and modifies modeling and simulation tools that Air Force Space Command's Space Analysis Center uses for operations research, military utility analyses, tradeoff studies, and other evaluations of space mission areas to guide planning, programming, requirements generation, analyses of alternatives, and other activities. Development activities incorporate changes in fielded and projected space operational capabilities, as well as technical improvements, into the group's software tools to ensure their data and technology remain current. Its innovation, education, and training activities foster solutions to operational deficiencies and enhance the integration of space systems into Air Force operations, thereby enabling service and joint warfighters to realized the full potential of existing and planned space capabilities.</p> <p>DISTRIBUTED COMMUNICATIONS ARCHITECTURE: This SIIRTD-operated system provides a network based communications capability enabling dispersed space personnel to participate in space exercises and wargames and to assist in development, testing, and validation of SIIRTD innovation projects supporting the Combat Air Forces. It can also support limited command and control capabilities for space operations.</p> <p>SPACE ANALYSIS CENTER: Air Force Space Command's Space Analysis Center uses modeling and simulation tools to conduct operations research, military utility analyses, tradeoff studies, and other evaluations of space mission areas to guide planing, programming, requirements generation, analyses of alternatives, and other activities. Related modeling and simulation tool development is funded in RDT&amp;E, AF, PE 0305174F, Space Innovation, Integration and Rapid Technology Development.</p> <p>PE 0408020F SERVICE SUPPORT TO USTRANSCOM</p> <p>COALITION MOBILITY SYSTEM JCTD: enables the machine-to-machine exchange of air and sealift schedules to support Coalition Task Force operations.</p> <p>PE 0604281F TACTICAL DATA LINK NETWORKS ENTERPRISE (TDNE)</p> <p>Other Gateways: supports the machine-to-machine interface used for the near real time sharing of a common operational picture among air, land, and sea forces. TDNE procures the ground based component of this network in the "General Information Technology" P1 line. The Air Force procures the aerial components of TDNE.</p>

<p>PE 0702806F: ACQUISITION AND MANAGEMENT SUPPORT</p> <p>PE 0708012F: LOGISTICS SUPPORT ACTIVITIES</p> <p>GUNTER AIR FORCE BASE NETWORK SERVICES: Funds provide unique local area network (LAN) hardware to the population at Maxwell Air Force (MAFB)-Gunter Annex, AL including equipment for web access, file storage backup, information security, and application testing for AF programs worldwide hosted at MAFB-Gunter Annex, AL. LAN equipment enables MAFB-Gunter Annex to manage/support 122 programs and systems worldwide. MAFB-Gunter Annex exceeds the standard Base Information Transport Infrastructure (BITI) environment, therefore no funding is provided by BITI.</p> <p>PE 0708074F: JOINT LOGISTICS PROGRAM - TOTAL ASSET VISIBILITY</p> <p>AUTOMATIC IDENTIFICATION TECHNOLOGY (AIT): A collection of enabling technologies including linear and two-dimensional bar codes, radio frequency identification, smart cards, memory cards, laser cards, touch memory, and voice and biometrics identification. These technologies provide timely and accurate automatic capture, aggregation, and transfer of data to management information systems with minimal human involvement. By capitalizing on advances in technology the Air Force is able to gain efficiencies in the logistical supply chain and asset visibility throughout an item's life cycle. Project funding enables compatibility of Air Force and industry standards in the core areas of supply, transportation, and maintenance, as well as weaving commercial AIT business practices and standards into the Air Force's logistics infrastructure.</p> <p>PE 0801711F RECRUITING ACTIVITIES</p> <p>Air Force Recruiting and Information Support System - Legacy (AFRISS-L): AFRISS-L is a web-enabled automated information system, accessible via the Internet, used by recruiters and management personnel world-wide to gather information on prospective recruits and process them into the Air Force. It supports all Active Duty and Air Guard recruiting efforts.</p> <p>PE 0804711F RECRUIT TRAINING UNITS</p> <p>BASIC MILITARY TRAINING (BMT) SURVEILLANCE SECURITY SYSTEM: Due to allegations of misconduct by Military Training Instructors (MTIs) at BMT, AETC/CC directed an investigation to identify issues that place Airmen at risk in their training environment. This investigation was led by AF/CVS and revealed weaknesses in existing detection measures. SECAF/CSAF support findings and actions AETC is taking to prevent misconduct from reoccurring.</p> <p>The purpose of the camera surveillance effort is to deter, monitor, and act upon the misconduct of Basic Trainees and/or Military Training Instructors. The goal is the surveillance of all common areas throughout all BMT facilities to include Airman Training Complexes (ATC) and Dining/Classroom Facilities (DCF). The surveillance system monitors personnel within all training facilities and provides a central storage solution expandable to maintain three years of video data.</p> <p>PE 0804721F SERVICE ACADEMIES</p> <p>US AIR FORCE ACADEMY (USAF):</p> <p>a. AIR FORCE ACADEMY COMPUTER SUPPORT: Air Force Academy uses two separate networks for day-to-day operations. Approximately 75% of the support is provided to USAFAEDU (academic network), providing the Academy's interface for mission elements, the cadet wing, direct reporting unit (DRU) and direct mission support organizations to DoD/AF military sites, commercial internet, other colleges and universities. The remaining support is provided to USAFAMIL, the interface with the AF's military only networks (NIPRNET and SIPRNET).</p> <p>b. CADET ADMINISTRATION MANAGEMENT INFORMATION SYSTEM (CAMIS): CAMIS is a cradle-to-grave system supporting all facets of student management including admissions, registrar, preparatory, academic, athletic, military training data from the candidate's initial application to graduation &amp; commissioning and continuing through the military career of each cadet.</p> <p>PE 0804731F GENERAL SKILL TRAINING</p>

Exhibit P-40, Budget Line Item Justification: PB Amended 2015 Air Force							Date: June 2014			
Appropriation / Budget Activity / Budget Sub Activity: 3080F: Other Procurement, Air Force / BA 03: Electronics and Telecommunications Equip / BSA 4: Spcl Comm-Electronics Projects					P-1 Line Item Number / Title: 834010 / General Information Technology					
ID Code (A=Service Ready, B=Not Service Ready) : A			Program Elements for Code B Items:			Other Related Program Elements:				
<p>General information technologies are a critical part of the Air Force (AF) vision to provide widespread, secure, robust, physically diverse terrestrial, airborne, and space based transmission paths and information services between our fixed and deployed operating locations. These capabilities, when coupled with the AF's fixed-based transport and network operations infrastructure from the Combat Information Transport System, the expeditionary base theater deployable communications program, and via connections through teleport gateways, allow warfighters to exchange unprecedented levels of information. This program provides for commercially available Information Technology (IT) acquisitions and equipment additions to government-owned computer systems. Items to be purchased include, but are not limited to network servers, network infrastructure, specialized systems directly supporting operational mission requirements, and Storage Area Network (SAN) and Local Area Network (LAN) hardware and software technical refresh. Programs support enhance warfighting capability and all enhance productivity in support of AF weapon systems and personnel.</p> <p>PE 0804752F OTHER PROFESSIONAL EDUCATION</p> <p>Accreditation of AFIT's engineering programs is directly related to both the existence of the well-equipped and maintained laboratories and an institutional commitment to fund equipment and maintenance. To serve the research needs of the USAF/DoD, students have up-to-date equipment to make tangible contributions to AF research needs. Existing equipment has reached the age where the cost to maintain it is impractical.</p> <p>PE 0804771F SUPPORT OF THE TRAINING ESTABLISHMENT</p> <p>Air University (AU) Education Technology (ET) Program funds the cradle-to-grave lifecycle management of IT systems, services, and resources that comprise AU Enterprise ET/IT portfolio. The primary systems under AU IT are CDSAR, STARS, AUSIS, AUSRIS, AUREPM, and AUSMS. This portfolio provides enrollment, content delivery, and student administration capabilities critical to all AU resident and non-resident courses. At the Air Force level, A6 provides the system of record capability for all AF PME/PCE; a system crucial to ensuring a fully prepared (trained and educated) expeditionary force. As AU aggressively pursues the enhancement of processes by which educational products are delivered to students, ET/IT demands will increase in frequency and complexity. Quickly revising software and inserting technology into those processes in a timeframe adequate to realize return on investment dollars or educational benefits requires an appropriately resourced A6 organization.</p> <p>PE 0901279F FACILITIES OPERATION - ADMINISTRATIVE</p> <p>CIVIL ENGINEER'S (CE) IT TRANSFORMATION: CE IT Transformation program's mission is to transform CE's business processes to better serve the CE customers and meet AF Transformational Goals. The plan is to leverage industry best practices, optimize core business processes, and replace existing outdated IT capabilities with a set of commercial off-the-shelf (COTS) software solutions and a service provider to deploy and maintain the system. This COTS solution will provide a robust, enterprise-wide CE capability and will consist of an integrated set of embedded / configurable best business practices and capabilities to support the following CE missions: Real Property Management; Work &amp; Supply Management, Project Management, Energy Management, Housing Management, Financial Management, Environmental Management, Planning, Emergency Services, Fire Operations and EOD.</p> <p>PE 0901299F AF A1 SYSTEMS</p> <p>Provides funding for the sustainment and operation of hardware and software supporting AFPC IT systems, network applications and infrastructure. These systems include items such as client servers, computer hardware and software, LANs, web and relational database management technologies and associated equipment to support all phases of the personnel life cycle, including accession, training, assignment, promotion, retirement, and death.</p>

**Justification:**

PE 0201110F SERVICE SUPPORT TO USNORTHCOM ACTIVITIES

CIVIL RESPONDER COMMUNICATIONS INTEROPERABILITY: FY15 funding will resource the Civil Responder Communications Interoperability communications capabilities that enable voice, video, and data communications between DOD and civil government responders as directed by the President. These communications abilities include land mobile radio systems, Radio over IP (ROIP) systems, and extending Public Internet and Public Switched Telephone Network (PSTN) to DOD forces supporting civil government responders. (Formerly Emergency Response Communications System (ERCS))

PE 0201130F US NORTHERN COMMAND COMMUNICATIONS:

a. NORAD AND NORTHCOM INTEROPERABLE COMMUNICATIONS: FY15 funding procures equipment and associated support that provide deployable, interoperable commercial communications capability to NORAD - USNORTHCOM Headquarters; USNORTHCOM Domestic Operations (DOMOPS), and Subordinate Commands. The system consists of deployable communications base stations, Infrastructure and Joint Tactical Radio System handsets to enable the Defense Support of Civil Authorities mission.

b. DEPLOYABLE COMMUNICATION CAPABILITY SYSTEM LIFE CYCLE MANAGEMENT: FY15 funding ensures system life cycle support of the Deployable Communications Fleet, as well as, the lifecycle maintenance of these USNORTHCOM deployable communication systems. A centralized managed construct to enable the configuration management of deployable communication systems. (NC J6 DCCS combined the previously approved and funded Cellular System Technical Refresh and Emergency Response Communications System efforts into one consolidated project). This effort is funded in PE 0201130F and PE 0201110F.

c. EARLY WARNING RADAR (EWR) COMMUNICATIONS EQUIPMENT: No FY15 funds are requested.

<b>Appropriation / Budget Activity / Budget Sub Activity:</b> 3080F: Other Procurement, Air Force / BA 03: Electronics and Telecommunications Equip / BSA 4: Spcl Comm-Electronics Projects		<b>P-1 Line Item Number / Title:</b> 834010 / General Information Technology
<b>ID Code</b> (A=Service Ready, B=Not Service Ready) : A	<b>Program Elements for Code B Items:</b>	<b>Other Related Program Elements:</b>
<p>PE 0804721F SERVICE ACADEMIES</p> <p>US AIR FORCE ACADEMY (USAFA): AIR FORCE ACADEMY COMPUTER SUPPORT: FY15 funds procure IT to upgrade performance, security, and availability of USAFA.MIL and USAFA.EDU to comply with AF Enterprise Architecture standards in order to support the AF Academy mission. FY15 funds procure IT integral to the operation of each network in support of the Air Force Academy mission.</p> <p>CADET ADMINISTRATION MANAGEMENT INFORMATION SYSTEM (CAMIS): FY15 funds also continue the modernization of CAMIS, which resides on the USAFAEDU domain. CAMIS is a cradle-to-grave system supporting all facets of student management including admissions, registrar, preparatory, academic, athletic, military training data from the candidate's initial application to graduation &amp; commissioning and continuing through the military career of each cadet.</p> <p>PE 0804731F GENERAL SKILL TRAINING</p> <p>TECHNICAL TRAINING MANAGEMENT SYSTEM (TTMS): TTMS provides AETC organizations with a world class commercial-off-the-shelf (COTS) learning management system which supports six functions: course design and development; student evaluation; instructor management; student management; data analysis; and resource administration. TTMS is a web-based system which provides productivity enhancements and higher degree of efficiency to AETC. The primary requirement objectives currently under development are: 1) eBMT will provide scheduling and Student Management for the Basic Training facility. 2) FY14-16 funds will be used to Virtualize and Continuity of Operations Plan (COOP) eBMT into the AF AFNetOps.</p> <p>PE 0804752F OTHER PROFESSIONAL EDUCATION</p> <p>AFIT Lab Equipment: Laboratory Equipment procurement funding provides for: Satellite Communication Ground Stations, Cube Sat Flight Hardware, Space Thruster Measurement System, UHF High Frequency Stages, Time Resolved Particle Image Velocimetry System, Digiscan CL3 System for the AFIT clean room, Space Chromotomography Equipment, Space Electronics Laboratory, Laser Steering Mirror System, CTEx Phantom Camera, Low Temp Flow System for EPR, Microwave Cavity B-field Sensor, Sample Load Lock System, Point Probe with ITO Reference Sample, Micro Thermal Imaging System, Circuit Failure Analysis Digital Microscope System, Pioneer Power-Bot AGV Robot, GPS Receivers, IMU and accessories, Dual-Output Programmable Power Supplies, and Scanning Electron Microscope equipment to support graduate student thesis and dissertations research.</p> <p>PE 0804771F SUPPORT OF THE TRAINING ESTABLISHMENT</p> <p>FY15 funds procure IT systems, services, and resources that comprise AU Enterprise ET/IT portfolio. The primary systems under AU IT are CDSAR, STARS, AUSIS, AUSRIS, AUREPM, and AUSMS. This portfolio provides enrollment, content delivery, and student administration capabilities critical to all AU resident and non-resident courses. At the Air Force level, A6 provides the system of record capability for all AF PME/PCE; a system crucial to ensuring a fully prepared (trained and educated) expeditionary force.</p> <p>PE 0901279F FACILITIES OPERATION - ADMINISTRATIVE</p> <p>CIVIL ENGINEER'S (CE) IT TRANSFORMATION: FY15 funds will be used to purchase software licenses for NexGen IT Capability Groups 1.0 and 2.0, 3.0, and 4.0. The plan is to leverage industry best practices, optimize core business processes, and replace existing outdated IT capabilities with a set of commercial off-the-shelf (COTS) software solutions and a service provider to deploy and maintain the system. This COTS solution will provide a robust, enterprise-wide CE capability and will consist of an integrated set of embedded / configurable best business practices and capabilities to support the following CE missions: Real Property Management; Work &amp; Supply Management, Project Management, Energy Management, Housing Management, Financial Management, Environmental Management, Planning, Emergency Services, Fire Operations and EOD.</p> <p>PE 0901299F AF A1 SYSTEMS</p>

<b>Appropriation / Budget Activity / Budget Sub Activity:</b> 3080F: Other Procurement, Air Force / BA 03: Electronics and Telecommunications Equip / BSA 4: Spcl Comm-Electronics Projects		<b>P-1 Line Item Number / Title:</b> 834010 / General Information Technology
<b>ID Code</b> (A=Service Ready, B=Not Service Ready) : A	<b>Program Elements for Code B Items:</b>	<b>Other Related Program Elements:</b>
<p>a. MILITARY PERSONNEL DATA SYSTEM: FY15 funding provides for the operation/sustainment of AFPC IT infrastructure. Specifically, funding provides for upgrades, continuing stabilization, and sustainment of the current core communications and computer facilities supporting AFPC. The system employs client server, web, and relational database management technologies to support all phases of the personnel life cycle, including accession, training, assignment, promotion, retirement, and death.</p> <p>b. REGIONALIZATION OF CIVILIAN PERSONNEL SUPPORT: FY15 funding continues to support the regionalization and modernization of 95 worldwide AF Civilian Personnel Operations sites, including the Regional Service Center at Randolph AFB, TX. The hardware associated with the regionalization implementation and the subsequent technology refresh support a variety of AF personnel network applications such as: Defense Civilian Personnel Data System, Personnel Automated Records Information System, Employee Benefits and Information System, Interactive Voice Response System, and Business Objects.</p> <p>c. PERSONNEL SERVICE DELIVERY (PSD): FY15 funds procure replacement hardware and upgrades central personnel computing systems and network architecture. It supports the Air Force Director, Plans and Integration initiative, creating integrated personnel/pay functionality, using web self-service capability and a central contact center. It supports the preparation, migration and deployment of the Defense Integrated Military Human Resource System to the USAF.</p> <p>FY15 OVERSEAS CONTINGENCY OPERATIONS (OCO) REQUEST</p> <p>PE 0303112F AIR FORCE COMMUNICATIONS (AIRCOM)</p> <p>AIRBORNE NETWORKING INTEGRATION (ANI):</p> <p>FY15 OCO funds will engineer and field one deployable airborne communications GIG entry point.</p>

<p><b>Description:</b>  PE 0207439F ELECTRONIC WARFARE INTEGRATED REPROGRAMMING (EWIR)</p> <p>ELECTRONIC WARFARE INTEGRATED REPROGRAMMING (EWIR): The 453d Electronic Warfare Squadron (453 EWS) conducts DISTRIBUTED MISSION OPERATIONS (DMO) and THREAT CHANGE ANALYSIS (TCA) to provide analytical capabilities and reachback support for DoD acquisition, planning and mission execution activities. These capabilities ensure electronic warfare (EW) systems and integrated combat platforms correctly recognize and respond to enemy, friendly and noncombatant systems operating within the electromagnetic environment. Funds used to procure specialized information technology systems used to identify electromagnetic spectrum emitter changes that impact combat defensive and electronic warfare systems and to conduct detailed analyses in support of operational mission planning, tactics, techniques and procedures (TTP) development, acquisition and test and evaluation. These analyses provide the means to understand the performance of their systems in hostile environments, directly impacting the survivability of combat-coded USAF aircraft and aircrews.</p> <p>AIR FORCE INTEL ANALYSIS AGENCY (AFIAA): AFIAA provides tailored substantive intelligence assessments and imagery products for SecAF, CSAF and staffs. Directs and manages all overhead imagery requirements for civil air analysis, global Tactics Analysis, effects based characterizations for operational course of action development. AFIAA was previously under AIA and is now a component of the Intelligence Directorate at the Air Staff (HAF/A2).</p> <p>PE 0208087F AF OFFENSIVE CYBERSPACE OPERATIONS</p> <p>OFFENSIVE CYBER OPERATIONS (INFORMATION OPERATIONS (IO) SUPPORT): U.S. Military forces operate in an information age where the need for precise, instantaneous intelligence and operational capabilities to increase and expand across the entire spectrum of military operations.</p> <p>PE 0208288F INTEL DATA APPLICATIONS</p> <p>GLOBAL HARVEST integrates multi-source intelligence and other related information for DoD and Internal-Air Force customers. GLOBAL HARVEST creates integrated target assessment to operationalize intelligence for Course of Action (CoA) development. GLOBAL HARVEST provides those assessments to decision makers in support of national security objectives. Current GLOBAL HARVEST assessments are categorized as Counterterror or Threat Financial Intelligence. Legacy assessments are available for Cyber Intelligence, Regional Threats and Human Factors Analysis.</p> <p>PE 03058881 RAPID CYBER ACQUISITION</p>

Rapid Cyber Acquisition (RCA): provides combatant commanders (CCDRs) with the ability to rapidly respond to emerging cyber needs. RCA provides rapid fielding of capabilities in three areas: defend the Air Force portion of the DoD Global Information Grid (GIG) in response to new and emerging threats; network attack and cyber exploit capabilities through all phases of warfare; and new cyber operations capabilities that address gaps to support evolving missions.

Note: Totals in this Exhibit P-40 set may not be exact or add due to rounding.

**Justification:**

PE 0207439F ELECTRONIC WARFARE INTEGRATED REPROGRAMMING (EWIR)

ELECTRONIC WARFARE INTEGRATED REPROGRAMMING (EWIR): The FY15 funds will be used to upgrade the electronic warfare (EW) Threat Change Analysis infrastructure and databases.

INFORMATION OPERATIONS INITIATIVE: No FY15 funding requested.

AIR FORCE INTEL ANALYSIS AGENCY (AFIAA): No FY15 funding requested.

<b>Appropriation / Budget Activity / Budget Sub Activity:</b> 3080F: Other Procurement, Air Force / BA 03: Electronics and Telecommunications Equip / BSA 4: Spcl Comm-Electronics Projects		<b>P-1 Line Item Number / Title:</b> 834320 / C3 Countermeasures
<b>ID Code</b> (A=Service Ready, B=Not Service Ready) : A	<b>Program Elements for Code B Items:</b>	<b>Other Related Program Elements:</b>
<p>PE 0208087F AF OFFENSIVE CYBERSPACE OPERATIONS</p> <p>OFFENSIVE CYBER OPERATIONS (INFORMATION OPERATIONS (IO) SUPPORT): FY15 funding procures computer, computer related memory storage, local and long-haul communications, infrastructure, and unique intelligence and analysis equipment.</p> <p>PE 0208288F INTEL DATA APPLICATIONS</p> <p>SENSOR HARVEST: FY15 funding provides upgrades of critical computers, processing systems and infrastructure to support holistic IO and nodal analysis in support of unique aspects of targeting that enable the shift from conventional to IO/C2W targeting.</p> <p>PE 03058881 RAPID CYBER ACQUISITION</p> <p>Rapid Cyber Acquisition (RCA): Rapid Cyber Acquisition delivers cyber capabilities to 24th Air Force (24 AF) warfighters in mission-relevant timeframes. RCA provides capabilities in support of US national security interests, to counter current and future cyber threats, and to enhance the nation's ability to operate in cyberspace. It expedites cyber development and modifications of USAF and DoD cyber capabilities. RCA provides solution sets for cyberspace operations: attack, defense, command and control/situational awareness, exploitation, critical infrastructure support, and combat support. RCA provides integration and technical support to other Services and Government Agency activities to leverage select Air Force-developed technologies and/or operational capabilities. Congress will be notified when all projects have been approved by the end of the fiscal year via Congressional Notification Letters.</p> <p>OVERSEAS CONTINGENCY OPERATIONS REQUEST</p> <p>PE 0208088F Defensive Cyberspace Operations (DCO)</p> <p>FY15 OCO will procure deployable weapons system components such as portable sensors and virtualized servers/storage area network to execute cyber vulnerability assessments that assess damage to OEF ops, eradicate vulnerabilities, manage mission reports, create and incorporate lessons learned, train and certify Cyber Hunter team personnel to perform cyber assessments, and validate operator's ability to use new tools/techniques prior to field use.</p>

**Description:**  
PE 0303601F MILSATCOM TERMINALS

MILITARY SATELLITE COMMUNICATIONS (MILSATCOM) joint-service systems collectively provide a broad range of satellite communication capabilities, including secure, jam-resistant, 24-hour worldwide communications to meet essential strategic, tactical and general-purpose operational requirements. MILSATCOM terminals support communications requirements for the President and Secretary of Defense, unified and specified combatant commanders, uniformed services and defense agencies. Procurement funding is in program element (PE) 0303601F, MILSATCOM Terminals, except where otherwise noted. There are also research and development efforts related to some of these efforts, and that RDT&E AF funding is also in PE 0303601F.

PE 0303601F MILSATCOM TERMINALS

# UNCLASSIFIED

Exhibit P-40, Budget Line Item Justification: PB Amended 2015 Air Force			Date: June 2014
Appropriation / Budget Activity / Budget Sub Activity: 3080F: Other Procurement, Air Force / BA 03: Electronics and Telecommunications Equip / BSA 6: Space Programs		P-1 Line Item Number / Title: 836780 / Milsatcom Space	
ID Code (A=Service Ready, B=Not Service Ready) : A		Program Elements for Code B Items:	Other Related Program Elements: 0303605F, 0303600F
Line Item MDAP/MAIS Code: 199	Item MDAP/MAIS Code(s):		
SECURE MOBILE ANTI-JAM RELIABLE TACTICAL TERMINALS (SMART-T) UPGRADE: SMART-T is a ground fixed and mobile extremely high frequency (EHF) terminal providing survivable, jam-resistant, worldwide, continuous secure communications to tactical warfighters. Currently, SMART-T terminals interoperate with the Milstar satellite constellation in low data rate (LDR) mode at 2.4 Kbps and medium data rate (MDR) mode at 1.5 Mbps. The Air Force leveraged an Army contract to upgrade the SMART-T Terminals to be compatible with the AEHF satellite system. No FY15 funding requested.			
AIR FORCE WIDEBAND ENTERPRISE TERMINALS (AFWET): AFWET terminals form the Military Satellite Communications (MILSATCOM) backbone of the DoD Information Network (DoDIN), operating over Wideband Global SATCOM (WGS), Defense Satellite Communications System (DSCS), commercial and allied satellites. These enterprise terminals support the command and control requirements of Combatant Commanders worldwide and the communication requirements of the President, Secretary of Defense, State Department, US strategic and tactical forces, and the North Atlantic Treaty Organization (NATO). The AF is responsible for sustaining facilities and terminal equipment. AFWET upgrades include modifications and life exections to baseband equipment, interconnect facilities, radomes, and antennas for selected locations that form part of the enterprise terminal ground segment. AFWET funding includes program management administration (PMA), Product Support, and other related activities worldwide to ensure operational viability in accordance with the Joint Staff and Defense Information Systems Agency (DISA) directives. In FY15, the Air Force will procure and install major modernization kits as Government-Off-The-Shelf (GOTS) via the Army's Modernization of Enterprise Terminals (MET) program and conduct numerous targeted sustainment actions to extend the life of the system and maintain high interoperability with Army, Navy, AF, and State Department terminals. Procurement includes ground terminal modernization, baseband equipment, installation and integration, site preparation, and facilities. Life extension and modernization efforts also provide incidental increases in capability, allowing for full utilization of WGS capabilities, compliance with OSD directives on the usage of Internet Protocol (IP), adherence to Unified Capabilities Requirements, compliance with NSA directives on cryptographic equipment, and more efficient and effective usage of satellite resources for jam-resistant, secure,and anti-scintillation wideband links.			
GLOBAL BROADCAST SERVICE (GBS): This AF-led joint program implements a worldwide high-capacity satellite broadcast information system to provide a continuous, one-way, high-speed, high-volume flow of classified and unclassified data and imagery to garrisoned, deployed or moving forces. GBS provides DoD some relief from reliance on leased commercial satellite communications. GBS Receive Suites provide lower-echelon AF users with efficient high-data-rate in-theater to many distributed information sources via satellite-hosted GBS packages. In addition to Prime Mission Equipment, FY15 funds will fund training, integration and installation, technical manual updates, spares, systems engineering, test, PMA, upgrades, and other related activities.			
a. GBS RECEIVE SUITES: The receive suites link users to information sources via GBS, offering worldwide service.			
b. JOINT Internet Protocol (IP) MODEM:			
c. GBS RUCKSACK/SUITCASE TERMINALS: These are man portable and suitcase variants of the GBS terminals required by Special Operations Forces in forward operating areas. FY15 OCO funding will procure GBS rucksacks to support Force Protection Forces in deployed operations areas.			
d. GBS Broadcast Manager Upgrade: This is to upgrade two AF Transportable Satellite Broadcast Manager systems to provide a transmission security capability and ensure interoperability with the joint IP modem enabled GBS receive suites.			
GROUND MULTIBAND TERMINAL (GMT): GMT terminals support warfighter tactical communications requirements utilizing WGS, DSCS and commercial satellite systems. GMT provides flexible, lightweight, modular, scalable, and integrated tactical quad-band SATCOM terminals which operate in X, C, Ku and military Ka frequency bands. The GMT replaces ground mobile force terminals that are reaching end of life. No FY15 funding requested.			
MILSATCOM SUSTAINMENT MODIFICATIONS: Provides minor modifications for MILSATCOM systems currently in sustainment and those currently fielding. Funding FY15 continues sustainment for MPE 0303605F SATELLITE COMMUNICATIONS (SATCOM) O&M			
FAMILY OF ADVANCED BEYOND LINE OF SIGHT TERMINALS (FAB-T) program will provide Extremely High Frequency (EHF) voice and data MILSATCOM for nuclear and conventional forces as well as airborne and ground command posts with connectivity to Milstar, AEHF, and Enhanced Polar System (EPS) satellites. FAB-T terminals will also support the command and control (C2) of Milstar, AEHF, and EPS satellites. Funding in FY15 will continue program office support and production activities including low rate initial production. Quantities, unit cost, and To Complete estimate are not available due to ongoing source selection activities. Information will be available after the downselect decision scheduled for 2QFY14 and completion of the OSD Cost Assessment and Program Evaluation (CAPE) Independent Cost Estimate (ICE).

<p>HIGH DATA RATE-RADIO FREQUENCY (HDR-RF): The ground terminal program will provide the high data rate SATCOM needed to support the Intelligence, Surveillance, and Reconnaissance (ISR) community with high bandwidth and high throughput capability. HDR-RF ground terminals will be used for command &amp; control ISR, and will support the full spectrum of operation from humanitarian support/ disaster relief to a major theater war. HDR-RF terminals will be interoperable with WGS satellites to support air intelligence, surveillance, and reconnaissance data rates up to 274 Mbps. HDR-RF ground terminals will provide quad-band C-, X-, Ku-, and Ka Band SATCOM. HDR-RF ground terminals will be interoperable with legacy tactical terminals and operate worldwide with existing military and commercial spacecraft. The user of HDR-RF ground terminals is to support ISR missions. No FY15 funding requested</p> <p><b>Footnotes:</b></p> <p>(1) System engineering, program and training support in FY 13+ support both GBS Receive Suites, Rucksack Terminals, and Broadcast Manager Upgrades.</p> <p>(2) Funding is procuring 3 GMT Terminals to support the HDR-RF program</p>

<p><b>Description:</b></p> <p>The Base Communications Infrastructure (BCI) program enables timely and assured delivery of data and voice communications supporting a wide range of Air Force organizations and decision makers. This program provides Air Force (AF) Major Commands (MAJCOMs), the Air Reserve Component (ARC), including the Air National Guard (ANG) and the Air Force Reserve (AFR), with effective Command and Control (C2) of information systems by procuring robust base communications infrastructure that every worker, office, and organization depends on to perform their mission. BCI supports upward-generated communications requirements from the MAJCOM and ARC respective bases. BCI funding supports life cycle management of network servers, routers, ductwork, cables, Local Area Networks (LANs), voice and data switches, Land Mobile Radio (LMR) systems, and end building node hardware in order to maintain consistent, compatible, and interoperable infrastructure and architecture. MAJCOM and ARC bases require their own communications infrastructure funds to tailor the base communications environment to specific operational missions supported by the base. Funds are also needed at MAJCOM and base level to provide communications infrastructure to meet evolving mission requirements, support military construction projects and handle the multitude of smaller, individual communications, computer, air traffic control and weather instrumentation connectivity needs, and OCONUS postal operations support. The ANG funds their entire base communications procurement requirement within the BCI program line. While BCI funds upward-generated requirements, AF-wide downward-directed efforts which provide base-wide fiber optic networks, support enterprise network management systems, and procure digital voice/data/video systems are funded under the "Base Information Transport Infrastructure" and "Air Force Network" budget lines.</p> <p>PE 0207138F F-22A SQUADRONS</p> <p>F-22 Deployable Debrief Facility(DDF) Communications Equipment: DDFs are an essential part of F-22 deployments. F-22 units procured by Air Combat Command (ACC) require secure, mobile communications facilities for conducting special access work away from home station. DDF communications equipment support F-22 mission planning and debriefing for both operations and maintenance personnel. DDFs support the special access workload of the F-22s. 1st and 2nd Generation DDFs are wearing out from nearly continuous deployments over the last nine years. This is a continuing requirement and was previously justified in the FY14 PB BCI exhibit under Program Justification, Section 6. This is not a New Start.</p> <p>PE 0207425F AF NETWORK OPERATIONS AND COMMAND COMMUNICATIONS</p> <p>AF Network Operations (AFNETOPS): AFNETOPS with Air Force Space Command (AFSPC) oversight provides the AF with operations and security functions, central management of core Information Technology (IT) services, enterprise trouble desk support, and network control. This is a continuing requirement and was previously justified in the FY14 PB BCI exhibit under Program Justification, Section 11. This is not a New Start.</p> <p>PE 0207436F ENGINEERING AND INSTALLATION (E&amp;I) SUPPORT</p>

Exhibit P-40, Budget Line Item Justification: PB Amended 2015 Air Force		Date: June 2014
Appropriation / Budget Activity / Budget Sub Activity: 3080F: Other Procurement, Air Force / BA 03: Electronics and Telecommunications Equip / BSA 7: Organization and Base		P-1 Line Item Number / Title: 837300 / Base Comm Infrastructure
ID Code (A=Service Ready, B=Not Service Ready) : A	Program Elements for Code B Items:	Other Related Program Elements:
AFSPC Lead Command Base Communications Infrastructure: HQ USAF PAD 07-08 (C-3) designated AFSPC as "the lead AF MAJCOM responsible for organizing, training and equipping, Air Forces capable of conducting prompt and sustained cyberspace operations." E&I supports enterprise network capability and life cycle replacement of common user communications systems, AF Network Defensive capabilities, as well as Installation Emergency Management (IEM) infrastructure. E&I funds support communications availability and reliability, providing consistent, compatible, and interoperable capability through advanced technology and architecture. Installations include network communications infrastructure, fiber optic and copper cabling, and associated manhole duct systems for cable projects. This is a continuing requirement and was previously justified in the FY14 PB BCI exhibit under Program Justification, Section 11. This is not a New Start.		
PE 0208059F, CYBER COMMAND ACTIVITES		
USCYBERCOM Communications Infrastructure: USCYBERCOM responsibilities include planning and coordinating Computer Network Operations (CNO) capabilities; operational and tactical level planning and day-to-day employment of assigned and attached Offensive Cyber Operations (OCO) forces; and planning and coordination of cyber capabilities that have trans-regional effects or that directly support national objectives; and providing OCO/DCO support for assigned missions. Base communications infrastructure (e.g., servers, routers, Local Area Networks (LANs), End Building Node (EBN) hardware) supports ongoing USCYBERCOM activities. This is a new requirement with funding currently scheduled to begin in FY16.		
PE 0208550F IT SERVICES MANAGEMENT, TACTICAL AIR FORCES		
a. AIR FORCE SPECIAL OPERATIONS COMMAND (AFSOC) Base Communications Infrastructure Equipment: This equipment supports more than 18,000 AFSOC active-duty, Air Force Reserve, Air National Guard and civilian personnel and allow AFSOC to meet the mission of presenting combat ready forces to conduct and support global special operations missions. This is a continuing requirement and was previously justified in the FY14 PB BCI exhibit under Program Justification, Section 8. This is not a New Start.		
b. PACIFIC AIR FORCES (PACAF) Base Communications Infrastructure Equipment: PACAF network equipment and life cycle replacement of base information technology systems supports base operations, command-wide connectivity, and transformation efforts. The large geographic separation throughout PACAF significantly raises the importance of a robust communications infrastructure to ensure war fighter access to secure voice, data, and video systems. This is a continuing requirement and was previously justified in the FY14 PB BCI exhibit under Program Justification, Section 5. This is not a New Start.		
c. ACC Base Communications Infrastructure Equipment: ACC base communications funds support life cycle management of network servers, routers, ductwork, cables, LANs, voice and data switches, LMR systems, and end building node hardware. This infrastructure meets the requirements of ACC's 83,000 active-duty members and civilians at 14 major bases throughout the United States. This is a continuing requirement and was previously justified in the FY14 PB BCI exhibit under Program Justification, Section 6. This is not a New Start.		
d. UNITED STATES AIR FORCE EUROPE (USAFE) Base Communications Infrastructure Equipment: USAFE base communications funding supports the acquisition, and installation of base network infrastructures, especially C2 communications, located at USAFE Main Operating Bases (MOBs) and Geographically Separated Units (GSUs) consisting of a HQ, one numbered Air Force, seven MOBs and 137 GSUs. Specific critical base communications infrastructure provide support for Headquarters, Warfighting Numbered Air Force and Operational wings, flight support, emergency actions, and intelligence operations. This is a continuing requirement and was previously justified in the FY14 PB BCI exhibit under Program Justification, Section 3. This is not a New Start.		
PE 0303126F LONG HAUL COMMUNICATIONS		
USAFE Technical Control Facility Program Equipment: This USAFE program replaces circuit distribution systems in technical control facilities and throughout base communications infrastructure. This capability addresses USAFE distribution of circuits from the long haul point of presence to the on base circuit termination point. Distribution equipment using copper cable is being replaced by fiber optic equipment to meet specifications required to connect Defense Information Systems Agency (DISA) long haul circuit equipment to base facilities. This is a continuing requirement and was previously justified in the FY14 PB BCI exhibit under Program Justification, Section 2. This is not a New Start.		
PE 0305155F THEATER NUCLEAR WEAPON STORAGE AND SECURITY SYSTEM

<p>Theater Nuclear Weapon Storage and Security System (WS3) Communications Infrastructure Equipment: Funds support the procurement of communications equipment and buried cable and alarm equipment. These efforts directly impact WS3 weapon storage containers to be installed in theater strike aircraft shelters to allow co-storage of nuclear weapons and strike aircraft. This is a new requirement with funding currently scheduled to begin in FY16.</p> <p>PE 0305550F IT SERVICES MANAGEMENT, OTHER</p> <p>a. AIR FORCE DISTRICT OF WASHINGTON (AFDW) Base Communications Infrastructure Equipment: Funds support the procurement of network infrastructure replacements, and support of AFDW's classified and unclassified networks. These efforts directly impact accomplishment of the AF mission at all levels such as strategic decision making, execution of operations, and support to US senior leadership including the POTUS, SECDEF, CJCS, and the CSAF. This is a continuing requirement and was previously justified in the FY14 PB BCI exhibit under Program Justification, Section 9. This is not a New Start.</p> <p>b. AFSPC Base Communications Infrastructure Equipment: Procurements ensure base-level network access for more than 40,000 AFSPC professionals including military, civilians and contractors. Funding support base operations by providing required AFSPC-wide hardware and software purchases, ensuring the deployment of consistent, compatible, and interoperable communications technology. This is a continuing requirement and was previously justified in the FY14 PB BCI exhibit under Program Justification, Section 11. This is not a New Start.</p> <p>PE 0408550F IT SERVICES MANAGEMENT, MOBILITY</p> <p>a. Air Mobility Command (AMC) Base Communications Infrastructure Equipment: Funds support the procurement of network infrastructure replacements in support of mobility operations. This is a continuing requirement and was previously justified in the FY14 PB BCI exhibit under Program Justification, Section 7. This is not a New Start.</p> <p>b. AFDW Base Communications Infrastructure Equipment: Funds support network infrastructure replacements and AFDW's classified and unclassified networks. These efforts directly support strategic decision making, execution of operations, and support to US senior leadership including the POTUS, SECDEF, CJCS, and the CSAF. This is a continuing requirement and was previously justified in the FY14 PB BCI exhibit under Program Justification, Section 9. This is not a New Start.</p> <p>PE 0505550F IT SERVICES MANAGEMENT, AF RESERVE</p> <p>AFRC Base Communications Infrastructure Equipment: Funds provide for recapitalization, and support of base communications infrastructure at AFRC, an AF MAJCOM consisting of a HQ, three Numbered Air Forces (NAFs), 45 flying wings/groups and more than 40 Geographically Separated Units; Air Reserve Personnel Center (ARPC) and the Major Command Coordinating Center (MCCC). Funding supports AFR-wide programs providing base communications infrastructure consistency. Funding provides AFR-wide hardware and software purchases, thus ensuring the deployment of consistent, compatible, and interoperable technology and architecture. This is a continuing requirement and was previously justified in the FY14 PB BCI exhibit under Program Justification, Section 10. This is not a New Start. In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.</p> <p>PE 0508550F IT SERVICES MANAGEMENT, AIR NATIONAL GUARD (ANG)</p> <p>ANG Base Communications Infrastructure Equipment: Funds provide for life cycle support of base communications infrastructure at 89 ANG flying wings and more than 106 GSUs, including the ANG Network Operations and Security Center (NOSC). Funds support ANG-wide base communications infrastructure projects consistent with AF IT standards and for compatibility of the ANG enterprise with the AF and the Department of Defense (DoD) centralized networks. This is a continuing requirement and was previously justified in the FY14 PB BCI exhibit under Program Justification, Section 1. This is not a New Start. PY funding totals include \$0.554M for Overseas Contingency Operations (OCO). In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), this item is necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.</p> <p>PE 0708550F IT SERVICES MANAGEMENT, LOGISTICS</p>

---	---	--

AFMC Network Equipment: This program supports procurement of LMR trunking systems at AFMC locations in direct support for emergency responders participating in base, local, civil, and federal disaster response as well as Battle Staff and Crisis Action Team (CAT) operations. This is a continuing requirement and was previously justified in the FY14 PB BCI exhibit under Program Justification, Section 4. This is not a New Start.

PE 0808550F IT SERVICES MANAGEMENT, TRAINING

AIR EDUCATION AND TRAINING COMMAND (AETC) Base Communications Infrastructure Equipment: Funds support base-approved and MAJCOM-validated communications requirements as identified in base communications blueprints. These support the flying and technical training, education, recruiting, and accession mission, command and control, as well as first responder services at all 11 AETC bases. This is a continuing requirement and was previously justified in the FY14 PB BCI exhibit under Program Justification, Section 3. This is not a New Start.

PE 0908550F IT SERVICES MANAGEMENT, ADMINISTRATIVE

AFDW Base Communications Infrastructure Equipment: Funds support the procurement of network infrastructure replacements for AFDW's classified and unclassified networks. These efforts directly support strategic decision making, execution of operations, and support to US senior leadership including the POTUS, SECDEF, CJCS, and the CSAF. This is a continuing requirement and was previously justified in the FY14 PB BCI exhibit under Program Justification, Section 9. This is not a New Start.

In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), these items are necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and providing military support to civil authorities.

**Justification:**

PE 0207138F F-22A SQUADRONS

F-22 DDF Communications Equipment: FY15 funds will be used by ACC to buy a 3rd Generation shelter including communications equipment to replace older Generation shelters purchased for early F-22 squadrons. Additionally, communications infrastructure requirements in support of F-22 aircraft will be funded in FY15.

PE 0207425F AF NETWORK OPERATIONS AND COMMAND COMMUNICATIONS

AF Network Operations (AFNETOPS): FY15 funds procure network control equipment and monitoring tools for AFSPC to provide enterprise network operations and cyber security in support of AFNETOPS. Equipment monitors network equipment and checks circuits for traffic volumes, infrastructure degradation, and security anomalies enabling adjustment of network parameters as needed.

PE 0207436F ENGINEERING AND INSTALLATION (E&I) SUPPORT

AFSPC Lead Command Base Communications Infrastructure: FY15 E&I funds ensure life cycle support to keep base communications infrastructure on pace with current technological developments. FY15 funds base communications infrastructure support to include LMR system replacement, communications cable reutilization and redistribution, and base telephone switch replacement.

PE 0208059F, CYBER COMMAND ACTIVITES

USCYBERCOM Communications Infrastructure: No FY15 funding requested.

PE 0208550F IT SERVICES MANAGEMENT, TACTICAL AIR FORCES

a. AFSOC Base Communications Infrastructure Equipment: FY15 funds will be used by AFSOC to recapitalize data, voice, and video equipment supporting AFSOC forces organized under three active-duty wings, one reserve wing, one National Guard wing, two overseas groups, and several direct reporting units.

b. PACAF Base Communications Infrastructure Equipment: FY15 funding supports PACAF's acquisition and installation of Unified Capabilities (UC) at remote and Geographically Separated Unit (GSU) locations. Procurements include Voice over IP (VoIP) solutions at Suwon, Taegu, and Kimhae Air Bases Republic of Korea (ROK). Replacing the obsolete telephone switches at these locations with VoIP will ensure vital C2 voice is available for deploying squadrons at these (flex base) locations. This capability directly supports COMPACAF's flexible basing strategy for the Pacific region.

c. ACC Base Communications Infrastructure Equipment: FY15 funds continue life cycle support of base communications infrastructure at ACC bases and replaces outdated network voice and data equipment hardware to meet mission requirements of ACC's C2 and mission support users.

d. USAFE Base Communications Infrastructure Equipment: FY15 funds replace USAFE's outdated Land Mobile Radio distribution systems between intrabase communication networks/nodes thereby eliminating bottlenecks in Trunking Systems across USAFE MOBs and GSUs. Base network infrastructure procurements meet network communications requirements for USAFE users at MOBS and GSUs.

ID Code (A=Service Ready, B=Not Service Ready) : A	Program Elements for Code B Items:	Other Related Program Elements:
PE 0303126F LONG HAUL COMMUNICATIONS		
USAFE Technical Control Facility Program Equipment: FY15 funding continues the Technical Control Facility Program life cycle replacement of outdated data transfer/distribution systems between intrabase communication networks and which eliminates bottlenecks in base data distribution systems.		
PE 0305155F THEATER NUCLEAR WEAPON STORAGE AND SECURITY SYSTEM		
Theater Nuclear Weapon Storage and Security System (WS3) Communications Infrastructure Equipment: No FY15 funding requested.		
PE 0305550F IT SERVICES MANAGEMENT, OTHER		
a. AFDW Base Communications Infrastructure Equipment: FY15 funds procure wide and local area network hardware (i.e., servers, routers, hubs and network systems) at Joint Base Anacostia-Bolling, Joint Base Andrews, and Headquarters Air Force. This program invests in office automation systems and computer networks in order to procure high-quality, high-speed connections to both public and classified network, and equipment required to react to emerging and emergency mission requirements in the National Capital Region (NCR).		
b. AFSPC Base Communications Infrastructure Equipment: FY15 funds provide life cycle support for base communications equipment at AFSPC installations including the Joint Space Operations Center at 30SW, Vandenberg AFB.		
PE 0408550F IT SERVICES MANAGEMENT, MOBILITY		
a. Air Mobility Command (AMC) Base Communications Infrastructure Equipment: No FY15 funding requested.		
b. AFDW Base Communications Infrastructure Equipment: FY15 funds procure wide and local area network at Joint Base Anacostia-Bolling, Joint Base Andrews, and Headquarters Air Force. This program invests in office automation systems and computer networks investments support high-quality, high-speed connections to public and classified networks in support of NCR mission requirements.		
PE 0505550F IT SERVICES MANAGEMENT, AF RESERVE		
AFRC Base Communications Infrastructure Equipment: FY15 funds support data, voice, and video projects to promote compatibility with the AF "Active" component architectures. In addition to funding AFR-wide programs. Funds also acquire equipment for life cycle support of critical base-level communications infrastructure requirements.		
PE 0508550F IT SERVICES MANAGEMENT, AIR NATIONAL GUARD (ANG)		
ANG Base Communications Infrastructure Equipment: FY15 funds continue to support installation of command purchased information technology and software to maintain a consistent, compatible, and interoperable infrastructure and architecture. This functionality ensures compatibility of ANG networks with the AF Enterprise.		
PE 0708550F IT SERVICES MANAGEMENT, LOGISTICS		
AFMC Network Equipment: FY15 funds provide continued capital equipment replacement of LMR systems across AFMC locations. These efforts are necessary to ensure network equipment vulnerabilities will continue to be addressed and so that system maintainability and availability requirements are met.		
PE 0808550F IT SERVICES MANAGEMENT, TRAINING

<p><b>Description:</b></p> <p>Modern warfare resulted in an increase in airborne combat under the cover of darkness. Night missions include ground operations, preparation of the aircraft for take-off and landings in complete darkness, lights-off air refueling, and visual identification of enemy targets hidden under the night sky. Consequently, ground personnel and aircrew require the capability to see in very low visibility conditions at night and high ambient light conditions such as full moon or heavily lighted residential areas. The use of Night Vision Goggles (NVG) is critical for combat rescue, special operations, and homeland security missions.</p> <p>A lack of night vision capability would significantly decrease combat effectiveness in night operations, risk flight safety, and increase the probability of fratricide. Aircraft such as HH-60 helicopters, HC-130s, F-16s, and special mission C-130s primarily operate in low altitude environments during covert night operations. Hence, NVGs are vital to the success of these missions, providing a dramatic increase in safety, situational awareness, and survivability during the execution of near daytime tactics, including visual formation criteria. Furthermore, the proliferation of NVG-equipped adversaries underscores the urgent need to supply ground and air forces with night vision equipment.</p> <p>Funding for this exhibit contained in Program Elements (PEs) 0702833F, 0207227F, and 0202834F.</p> <p>Ground crew Goggles:</p> <p>AN/PVS-14 Ground crew Goggle: This monocular night vision device is a hand-held, head-mounted, helmet-mounted, or weapon-mounted night vision system, which enables walking, weapon firing, short-range surveillance, map reading, vehicle maintenance, and first-aid administration during moonlight and starlight conditions. The AN/PVS-14 supports a vast spectrum of ground and air operations to include aircraft maintenance, civil engineering, emergency response, security, and other missions.</p> <p>AN/PVS-15 Ground crew Goggle: This binocular NVG is a helmet-mounted or hand-held night vision system, which is primarily used by Special Forces during night drop operations. The AN/PVS-15 can be used for all nighttime ground operations. An added benefit of this particular binocular goggle is the back-up capability in the event one of the two tubes fails.</p> <p>Fusion Goggle - Enhanced (FGE): The FGE is a helmet mounted dual waveband goggle which will increase identification and discrimination of combatants in most battlefield conditions and light levels through the use of image intensification fused with thermal imagery.</p> <p>Aircrew Goggles:</p>

<b>Exhibit P-40, Budget Line Item Justification:</b> PB Amended 2015 Air Force					<b>Date:</b> June 2014				
<b>Appropriation / Budget Activity / Budget Sub Activity:</b> 3080F: Other Procurement, Air Force / BA 04: Other Base Maintenance and Support Equip / BSA 2: Personal Safety & Rescue Equip					<b>P-1 Line Item Number / Title:</b> 842140 / Night Vision Goggles				
<b>ID Code</b> (A=Service Ready, B=Not Service Ready) : A			<b>Program Elements for Code B Items:</b>			<b>Other Related Program Elements:</b>			

AN/AVS-9 (F4949G-TG) Aircrew Goggle: This night vision goggle provides aircraft and ground personnel with the capability to see the horizon, terrain features and enemy ground fire, thereby reducing the potential for air-to-ground fratricide and mid-air collisions during night operations. The AN/AVS-9 (F4949-TG) is a light-weight, helmet-mounted goggle equipped with pinnacle tube technology that mitigates effects of sudden bright light exposure.

**Test Sets:**

ANV-20/20 Test Set, Infinity Focus: The ANV-20/20 is a portable instrument, which allows quick and accurate evaluation and adjustment of all goggle parameters. All NVGs require operational checkout.

ANV-126A Test Set, Infrared Viewer: The ANV-126A is a commercial upgrade to the ANV-126, which is suitable for field operational checks and depot level NVG maintenance. This test set provides accurate checks for NVG resolution, gain, power drain, binocular goggle collimation, image quality, and image distortion. The ANV-126A uses state of the art technology and provides enhanced capabilities to the user.

ANV-126A-UGF Test Set, Time Compliance Technical Order (TCTO) Kit: The ANV-126A-UGF is a commercial TCTO kit that converts the ANV-126 to the ANV-126A Test Set.

In accordance with Section 1815 of the FY 2008 National Defense Authorization Act (P.L. 110-181), capabilities under this line item are necessary for use by the active and reserve components of the Armed Forces for homeland defense missions, domestic emergency responses, and military support to civil authorities. Projected allocations for reserve component requirements are subject to total force demand priorities.

<p><b>Description:</b> Base Procured Equipment:</p> <p>Organizations throughout the Air Force acquire authorized investment equipment from the General Services Administration, Defense Logistics Agency, and commercial sources when these items exceed \$250,000 in cost or are unavailable through Air Force central procurement. Examples of equipment in this P-1 line typically include equipment and/or specialized tools for road and ground maintenance; vehicle maintenance; vehicle corrosion control; civil engineering maintenance; electrical and carpentry shops; specialized laboratories; kitchen and dining facilities; printing plants; microfilm, graphics support facilities; training ranges; and to satisfy air conditioning and heating requirements; physiological trainers to include, but are not limited to Barney Chairs, Altitude Chambers, Spatial Disorientation Trainers, Hypoxia Familiarization Trainers and Part Task Trainers, Reduced Oxygen Breathing Devices, Terrain Boards, Parachuting Trainers, Aircrew Exercise Equipment.</p> <p>Power Conditioning &amp; Continuation Interfacing Equipment (PCCIE):</p> <p>The PCCIE Program Office procures, replaces and modernizes uninterruptible power supply (UPS) systems to meet Air Force requirements. Many of these systems have exceeded the life expectancy of 12-15 years. The PCCIE program is structured into small projects (less than 125 kilovolt amps (kva)) and large projects (greater than 125 kva) and includes associated ancillary equipment.</p> <p>PEs associated with this P-1 Line are: 0202834F, 0205219F, 0208534F, 0305534F, 0402834F, 0502834F, 0502844F, 0702834F, 0802834F, 0804721F, 0804731F, 0804743F, 0804752F, 0808534F, 0901212F</p> <p>Projected allocations for Reserve Component Requirements (subject to Total Force demand and priority).</p>

<p><b>Justification:</b> Base Procured Equipment:</p> <p>The equipment described above is needed for day-to-day maintenance and operation of bases, and for indirect support of weapon systems assigned to Active, Air National Guard, and Air Force Reserve forces. The program supports organizations at multiple major commands. Requirements and priorities are affected by assignment and conversion of new equipment; beddown of new weapon systems; reorganizations; natural disasters; new operational methods to increase efficiency and safety; and energy conservation initiatives.</p> <p>Power Conditioning &amp; Continuation Interfacing Equipment (PCCIE):</p> <p>The new systems collectively satisfy critical user requirements and will:</p> <ol style="list-style-type: none"> <li>1. Reduce overall footprint and weight by 50-60%.</li> <li>2. Reduce operating and sustainment costs by 30%-50%.</li> <li>3. Reduce acquisition costs as it applies to installation since many newer systems consist of more internal pre-wiring.</li> <li>4. Lower parts count dramatically improves reliability by reducing the potential points of failure within the system.</li> <li>5. Produce greater energy savings and higher operating efficiency in all configurations, typically between 92% and 93.5%; with all types of loads.</li> </ol> <p>The Uninterruptible Power Supply (UPS) systems protect sensitive electronic equipment/systems such as command and control centers, intelligence missions, radars, etc.</p> <p>FY15 OVERSEAS CONTINGENCY OPERATIONS (OCO) funding in the amount of \$1.700 will procure three (3)Tension Fabric Shelters (TFS) to reset shelters utilized by deployed forces during operations at Diego Garcia. \$.330M FY15 OCO funding will extend fiber optic cable to Diego Garcia ammo areas for improved communications capability and install an IDS"</p>

**Description:**

FY13 funding totals include \$43.2M appropriated for Overseas Contingency Operations.

FY14 funding totals include \$60.6M requested for Overseas Contingency Operations.

Program elements associated with this P-1 Line are: 0208028F (Contingency Operations) and 0204424F (Explosive Ordnance Disposal Forces)

Contingency Operations, is part of the Agile Combat Support framework and provides integrated capabilities to support aircraft deployment, launch, recovery, and regeneration at air bases worldwide. Contingency operations and Air Force Civil Engineering Readiness' top priorities are to safely perform reconnaissance, locate and neutralize unexploded ordnance, and accomplish damage assessment. The Airfield Damage Repair (ADR) program provides civil engineers specialized airfield damage repair equipment/materials to rapidly repair and recover airfields after attack. Protection capabilities, including explosive ordnance disposal (EOD) operations, are increasingly vital in protecting personnel, aircraft, and other critical resources both at home and abroad. In addition to wartime operations, EOD supports global contingencies for force protection, relief efforts, and special operations. Capabilities provided by robotics programs are crucial in reducing time and danger when investigating and eliminating explosive hazards. The Navy is the Single Service Manager for EOD.

<b>Exhibit P-40, Budget Line Item Justification:</b> PB Amended 2015 Air Force		<b>Date:</b> June 2014
<b>Appropriation / Budget Activity / Budget Sub Activity:</b> 3080F: Other Procurement, Air Force / BA 04: Other Base Maintenance and Support Equip / BSA 5: Base Support Equipment		<b>P-1 Line Item Number / Title:</b> 845100 / Contingency Operations
<b>ID Code</b> (A=Service Ready, B=Not Service Ready) : A	<b>Program Elements for Code B Items:</b>	<b>Other Related Program Elements:</b>
<p><b>Justification:</b> FY15 baseline procurement dollars procures Future Radiographic Systems, Total Containment Vessels, Base Emergency Response Transports, and Airfield Damage Repair Kits.</p> <p>-FY15 funding (\$7.516M) will procure ninety four (94) units of a compact Radiographic Systems: Explosive Ordnance Disposal (EOD) teams use radiographic systems to diagnose, identify, and help determine neutralization procedures during explosive related incidents, which present a threat to operations, installations, personnel or materiel. Current EOD counter-improvised explosive device x-ray equipment is becoming obsolete. Film and processors are no longer manufactured for use with current systems which forces the team to rely on aging digital imaging systems. Current systems are bulky, inflexible and do not take advantage of current technologies. Increment 1 is a joint service requirement that is validated through the EOD Military Technical Acceptance Board (MTAB), a joint service entity with oversight by the Dept of the Navy (Single Service Manager for EOD Training and Technology). The Decision Support System (DSS) provides the computing resource to operate the radiographic system. Increment 2 will provide a compact version of the system for dismount and dispersed operations.</p> <p>-FY15 funding (\$3.250M) will procure ten (10) units. The Total Containment Vessel (TCV) is a Self-contained bomb containment system capable of repeatedly containing the overpressure and fragmentation (within the vessel) associated with the detonation of high explosives (HE) and or improvised explosive devices (IED).</p> <p>-FY15 funding (\$3.500M) will procure ten (10) Base Support Emergency Response Units. It provides EOD Flights a command standardized means to transport specialized EOD equipment and personnel in response to explosive emergencies and incidents involving IED/WMD's, aircraft (flight line), conventional munitions and aircraft mishaps. Also provides C2 capability for incident command and team leader operations.</p> <p>-FY15 baseline funding (\$2.5M) will procure increased crater repair capability for five PACOM locations. The FY15 monies will provide an initial Airfield Damage Repair (ADR) capability to provide semi-permanent repairs for dozens of craters and supporting multiple airframe types. The Air Field Damage Repair Kits were previously described as R-1, R-2, R-3 Kits. The new configuration will consist of several components: training kit, basic/small kit, medium kit, large kit, and very large kit. The Basic/Small kit is used to provide basic repair equipment/materials in order to repair approximately 18 small (10 ft diameter) craters or three, 25 diameter craters in 6.5 hours. Additional airfield damage can be repaired based on the availability of time and materials. Basic/Small kits will also be used at training locations. Medium, Large and Very Large kits are building block kits that when combined, provide a scalable capability. A Medium Kit repairs 54 small or three large (50 ft dia.) craters in 6.5 hours, Large Kit 96 small or six large craters in 6.5 hours, or Very Large Kit 120 small or 12 large craters in 6.5 hours. This capability can be prepositioned or forward deployed to support recovery after attack or a single/multiple kits can be deployed to a forward operating base to repair varying degrees of airfield damage at a main operating base.</p> <p>FY15 OVERSEAS CONTINGENCY OPERATIONS (OCO) REQUEST:</p> <p>-FY15 OCO funding of \$63.340M will procure Counter Radio-Controlled Improvised Explosive Device Electronic Warfare (CREW) systems; CREW Test Sets; and CREW Refurbishment Kits in the following quantities: 180 Dismounted CREW systems; 129 Mounted CREW systems; 18 Fixed Site CREW systems; 101 CREW Universal Test Sets; and 1081 kits to refurbish CREW Vehicle Receiver/Jammers (CVRJ). CREW devices are self-protection systems critical to Mine Resistant, Ambush Protected (MRAP) vehicle mounted, EOD dismounted and Entry Control Point operations.</p> <p>-FY15 OCO of \$750K purchases equipment to modernize (3) ADR equipment sets enabling airfield recovery from anti-access/area-denial attacks and provides semi-permanent repairs that are suitable for all aircraft types.</p> <p>-The FY15 OCO funding of \$35.5M will procure fourteen (14) Recovery of Airbase Denied by Ordnance (RABO) systems. The RADBO systems provide the capability to rapidly assess and remove/neutralize unexploded ordnance (UXO) on damaged airfields while protecting the occupants from the hazardous efforts of explosives. Also procures specialized tools and equipment for integration on existing vehicle platforms to provide combatant commanders this capability.</p>

Description: FY14 funding total includes \$68M received for Overseas Contingency Operations.												
This program funds procurement of Basic Expeditionary Airfield Resources (BEAR). It includes equipment to support the bed down of deployed forces (personnel, aircraft and support equipment) at austere and semi-austere locations. BEAR assets are a critical Agile Combat Support enabler for the Expeditionary Air Force. BEAR is composed of five types of air base capability packages: housekeeping, feeding, hygiene, power generation and flight line. Flight line packages consist of airfield lighting, aircraft hangars, fire stations, and numerous additional systems to support airfield operations. The program provides funding to procure new and replacement equipment items required to support BEAR training facilities at Silver Flag Sites, Regional Training Sites, Technical Schools, Technical Certification Centers, Services Combat Center Training, 49MMG, and Eagle Flag. Costs include inventory reconstitution, spares and consumables, repairs, and procurement of new equipment for upgrades or full UTC's replacement. BEAR demonstrated its critical role in support of Operations Enduring Freedom and other operations worldwide.												
Program element associated with this P-1 Line is: 0401135F.												
The AF continues to modernize major BEAR components to replace obsolete and inefficient items (e.g. Power Generation, Hygiene, Refrigeration, Shelters, and Feeding):												
Force Module Water System: Water System takes non-potable water and converts it into potable water. The system is modular and scalable in design and consists of Source Run, Water Production, Reverse Osmosis Water Purification Unit (ROWPU), Initial, Follow-on, and Industrial Operations, Flight line Extension, freeze protection, grey water recovery, pumping, piping, and storage equipment; applicable fittings; and other components such as fluid control valves.												
Power System: Consists of prime and secondary power equipment which provides the capability to generate and distribute power to billeting, feeding, flight line and industrial operations at forward deployed sites. The primary power source for BEAR bed down locations is the BEAR Power Unit (BPU). The BPU is an 800 kilowatt (kW) Tier II compliant diesel generator. The power from the BPU is distributed through buried high voltage cabling and stepped down to facility power through the Secondary Distribution Center (SDC). The SDC is a 150 kilovolt-ampere (KVA) transformer capable of supporting twelve (12) billeting shelters via the Primary Distribution Panels (PDP).

Expeditionary Airfield Lighting System (EALS): Light Emitting Diode (LED) and incandescent runway lighting system designed to be rapidly installed at contingency airfields and at other locations that need temporary airfield lighting. The lighting kit for runways includes runway edge and threshold lights, precision approach path indicator (PAPI), and strobe approach lights, distance to go marker lamps, taxi way lamps and battery-operated obstruction lights. The EALS also includes the generators, cables, control cables, transformers and regulators. The entire system is packaged on six (6) mobile trailers.																			
Mobile Aircraft Arresting System: This air transportable barrier arresting Bak-12 mounted on a mobile trailer to accommodate the recovery of fighter aircraft returning to battle damaged airfield.																			
Hygiene: Hygiene includes Shower, Shave and Latrine, and Self Help Laundry system which provides personal hygiene facilities in support of BEAR bases.																			
Hygiene Shelters: Hygiene Shelters are designed to be used as changing rooms connecting to the BEAR Hygiene System. The shelters support personnel utilizing BEAR Hygiene Systems.																			
Refrigeration: Refrigeration units designed for the carriage of deep frozen, frozen, chilled and general cargo by road, rail, air, and sea (above or below deck), suitable for austere environmental conditions. It is used to support the BEAR services, feeding and mortuary operations.																			
Shelters: Shelters vary in sizes and are needed for billeting, kitchen, hygiene, and aircraft and equipment maintenance. Includes lighting, electrical equipment, environmental control units, remote area lighting, Shelter Flies, Shelter Flooring/matting for various shelter sizes, Shelter liners.																			
Shelter Flooring: Shelter flooring varies in size for small and large shelters (ACH, LAMS, Mortuary).																			
Feeding: BEAR Feeding includes kitchen and all applicable equipment. BEAR Feeding system provides the capability to prepare, and then serve, 500 meals over a two hour serving period, twice per day (24 hour period). The Feeding system is worldwide deployable and supports numerous basing options. This system supports initial mission requirements and follow-on high mobility feeding requirements for rapidly deployable mobility packages and other contingencies in all theaters of operation.																			
Training/Multi-Media Training - Provides BEAR and items for all training sites and funds for all required BEAR multi-media training requirements.

**Description:**

This program provides a wide variety of base support items with worldwide application, to include but not limited to: aircraft arresting systems; electronic test stations; expandable and nonexpandable shelters; non-deployable and deployable shelters; pipe bending machines; electronic test set groups; Fuels Support Equipment (FSE)and Fuels Operational Readiness Capability Equipment (FORCE); and heat treating furnaces. This equipment provides prime support for all base missions. Lack of funding for these equipment items limits maintenance capabilities, testing functions, anti-terrorism/security missions, communications capabilities, flight operations, and the ability of Air Force units to meet deployment requirements.

Program elements associated with this P-1 Line are: 0202834F, 0207142F, 0208031F 0402834F, 0502834F, 0502844F, 0702834F, 0802834F.

**Remarks:**

Unit Costs for FY15 are assumed and are subject to change.

F-35 Air System security backbone requires three separate, linkable deployable facilities per squadron. Provides support to operations in a deployed environment, used as follows: one each for - Operations (brief/Debrief), Maintenance (classified parts storage), and ALIS (physical ALIS servers).

FY15 OCO in the amount of \$10.975 procures Fuels Support Equipment (FSE)and Fuels Operational Readiness Capability Equipment (FORCE)consisting of 43 fuel bladders, 2 aerial bulk fuel delivery systems, 2 cryogenics storage tanks, 21 R-18 pumping units, 17 R-19 filter separators, 13 R-20 multi-aircraft servicing platforms, 12 R-21 plumbing assemblies, and 1 PMU-27M pump in support of installation and unit mission requirements for Air Force personnel.
