Description:

The Information Systems Security Program (ISSP) mission focuses on delivering Department of Defense (DoD) enterprise solutions to Combatant Commands, Services, and Defense-wide agencies to ensure critical mission execution in the face of cyber attacks. The ISSP ensures that, "the network, the computing centers, and core enterprise services will evolve to better support a joint information assurance model that has common enterprise-scale perimeter defenses and will support a broad range of sharing policies from completely unclassified to tightly-held within a classified community." The ISSP provides solutions to harden the network by: (1) reducing the exposed attack surface and gaps that potential adversaries can exploit to disrupt communications; (2) providing vital situational awareness to senior decision-makers and network defenders to enable attack detection and diagnosis; (3) supporting safe sharing of information with allies and mission partners; (4) publishing security guidelines and assessing compliance; (5) providing training to the DoD community; and (6) implementing Software Defined Networking to enable network agility for faster response times to mission need and improved deterrence against cyber attacks. The Sharkseer Program enables the Department of Defense the capability for (1) boundary defense and protection, (2) remote accessible malware analysis, (3) automated cyber threat intelligence sharing, and (4) cyber readiness services.

<p>*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.</p> <p>Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.</p>										
<p>Justification:</p> <p>FY 2019: (\$31.590) Procured the necessary hardware for reducing the attack surface of the DoD Network, preventing the exploitation by hackers and adversaries to disrupt missions, and improve the warfighter's ability to safely share information across DoD's classified and unclassified networks. DISA acquired the following capabilities:</p> <ul style="list-style-type: none"> • Perimeter Defense - (\$13.028) Procured hardware/software (HW/SW) to tech refresh the suite of systems that serve as the defense layer between the commercial internet and Non-classified Internet Protocol (IP) Router Network (NIPRNet). Specifically, acquired outbound Uniform Resource Locator (URL) filtering and inbound spyware, malware, anti-virus and vulnerability filtering equipment; Splunk logging system; Procured equipment to support the NIPRNet Federated Gateway capability in Outside Continental United States (OCONUS) and firewall capability at specific IAP network locations; and tech refresh of the sensing appliance capabilities at Internet Access Points (IAPs). • Cyber Information Sharing Systems - (\$1.781) Procured tech refresh servers for security information manager coop environments that enable network defenders at the Defense Information System Network (DISN) perimeter and endpoints. • Cross Domain Enterprise Services (CDES) - (\$2.780) Procured tech refresh, guard solutions, enterprise file sharing, and email solution between users and devices residing on different networks. • Public Key Infrastructure (PKI) - (\$1.930) Procured Non-Person Entity (NPE) hardware and software detection capabilities for encrypting and decrypting the associated user's identity within authorized DoD Networks. • Cyber Security Range - (\$2.071) Procured HW/SW upgrades for the Cyber Security Range to emulate the new network infrastructure. • Sharkseer - (\$10.000) Supported procurement and accelerated the Sharkseer National Defense Authorization Act (NDAA) requirements. Specifically, the Joint DISA/National Security Agency (NSA) Program Management Office (PMO) identified efficiencies and integrate perimeter-endpoint defenses. Additionally, the Joint PMO developed DoD enterprise Sand-box-as-a-Service for a internet facing forensic environment and Enhanced Endpoint Analytics to track mitigations across multiple cyber defense platforms. <p>FY 2020: (\$4.718) Continue to procure software licenses and hardware/software upgrades necessary hardware for reducing the attack surface of the DoD Network, preventing the exploitation by hackers and adversaries to disrupt missions, and improve the warfighter's ability to safely share information across DoD's classified and unclassified networks. DISA will acquire the following capabilities:</p> <ul style="list-style-type: none"> • Network Management and Cyber Information Sharing Systems (formerly Cyber Information Sharing Systems) - (\$1.201) Will procure software licenses as a component of a security orchestration automation and response capability in support of the Security Information and Event Management (SIEM) system. • Cyber Security Range - (\$2.117) Will procure HW/SW upgrades for the Cyber Security Range to emulate the new network infrastructure. • Sharkseer - (\$1.400) Will fund the enhancement of the lab environment to allow for more rigorous testing prior to deployment in production.

Exhibit P-40, Budget Line Item Justification: PB 2021 Defense Information Systems Agency		Date: February 2020
Appropriation / Budget Activity / Budget Sub Activity: 0300D: Procurement, Defense-Wide / BA 01: Major Equipment / BSA 5: Major Equipment, DISA		P-1 Line Item Number / Title: 09 / Information Systems Security Program
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: 0303140K	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
<p>Explanation of Change from FY 2019 to FY 2020: The decrease of -\$26.872 is due to completing the installation of FEDERAL Demilitarized Zone (DMZ) web proxies (-\$0.425), FED DMZ server and router upgrades (-\$1.200), and Web Content Filtering load balancers (-\$5.500), integration completion of Security Information Event Manager (SIEM) next gen hardware (-\$0.580), and transition of Perimeter Defense capabilities to Capacity as a Service (-\$4.358). Completion of Sharkseer accelerated transition, integration of sand-box-as-a-service, and migration of Enhanced Endpoint Analytics (-\$8.600). Fund transfer to DISA Defense Working Capital Fund (DWCF) to establish a DISN Capital Investment Program (CIP) for Cybersecurity (-\$6.209). Web Content Filtering, NIPRNET Federated Gateway, Zero Day Network Defense Email, and Test Lab equipment Refresh programs were eliminated.</p> <p>FY 2021: (\$17.211) Continue to procure software licenses and hardware/software upgrades necessary for reducing the attack surface of the DoD Network, preventing the exploitation by hackers and adversaries to disrupt missions, and improve the warfighter's ability to safely share information across DoD's classified and unclassified networks. DISA will acquire the following capabilities:</p> <ul style="list-style-type: none">• Sharksheer - (\$1.998) Will provide for Continental United States (CONUS) IAP/Sharkseer upgrades to increase bandwidth throughput from 18G to 25G.• User Activity Monitoring (UAM) - (\$6.994) Will conduct Tech Refresh for seven Combatant Commands (COCOMs) (US African Command (AFRICOM), US Central Command (CENTCOM), US European Command (EUCOM), US Southern Command (SOUTHCOM), US Special Operations Command (SOCOM), US Strategic Command (STRATCOM), and US Northern Command (NORTHCOM)) to help counter the insider threat.• Enterprise Collaborative Operational Sensors (ECOS) - (\$1.224) Will tech refresh End-of-Life ECOS sensors to provide Network Operations Analysts with data needed to protect the Defense Information System Network (DISN).• NIPRNet DoD Demilitarized Zone (NIPR DMZ) - (\$5.995) Will tech refresh Break and Inspect (B&I) at 3 IAPs.• Cross Domain Enterprise Services (CDES) - (\$1.000) Will procure Voice and Video Cross-Domain Solution (V2CDS) HW/SW to provide CDES expansion to INDOPACOM AOR to provide cross domain Voice/Video capability. <p>Explanation of Change from FY 2020 to FY 2021: The increase of +\$12.493 is due to Sharkseer upgrades to 6 CONUS IAPs (+\$0.598) to increase bandwidth from 18G to 25G; tech refresh of User Activity Monitoring (UAM) End-of-Life HW at 7 COCOMs (+\$6.994) to help counter the Insider Threat; continued tech refresh of End-of-Life ECOS sensors used to gather data used by Network Operations Analysts to protect the DISN (+\$0.066); purchase of HW/SW to tech refresh B&I at 3 IAPs (+\$5.995), and an increase due to the CDES expansion to INDOPACOM AOR (+\$1.000). This is DWR offset by a decrease of -\$2.160 in Cybersecurity Range to avoid duplication of effort with CyberCom Range that is currently under development.</p>		
Performance Metrics:		
1. Maintain ECOS MAC III sensor availability to 98.6%; sensor recovery should be within 5 days of failure		
FY 2019 Planned 98.6% / Actual 99%		
FY 2020 Planned 98.6%		
FY 2021 Planned 98.6%		
2. Tech refresh of existing CDES systems supporting NIPR-SIPR email and file sharing in CONUS and OCONUS.		
FY 2019 Planned 1 system / Actual 0		
FY 2021 Planned 1 system

Description:
FY 2019 funding totals include \$3.800 appropriated for Overseas Contingency Operations.

FY 2020 funding totals include \$25.103 for Base and \$3.800 for Overseas Contingency Operations (OCO), of which \$3.800 was realigned as part of the OCO for Enduring Requirements funding realignment in accordance with the Department's compliance with the Budget Control Act of 2011.

Department of Defense (DoD) Teleport system is a satellite communications (SATCOM) gateway that links the deployed warfighter to the Department of Defense Information Network (DODIN). The Teleport program has fielded system capabilities incrementally using a multi-generational approach with Generation 1 and 2 Full Deployment authorized by DoD Chief Information Officer on February 18, 2011 and the DISA Component Acquisition Executive on June 7, 2012. Teleport Generation 3 consists of three phases, all of which are in the Production and Deployment acquisition phase. Each Teleport investment increases the warfighter's ability to communicate with a world-wide, net-centric set of information capabilities, which is vital for the DoD to maintain a persistent presence among its adversaries.

Currently, the Teleport system operates as an upgrade of satellite communication capabilities at selected DoD satellite communications gateways. This system provides deployed warfighters with seamless worldwide multi-band SATCOM connectivity to the Defense Information System Network (DISN) Service Delivery Nodes and legacy tactical command, control, communications, computers, and intelligence systems. It also provides centralized integration capabilities, contingency capacity, and common interfaces to access the DISN.

Teleport's goal is to provide secure, seamless, interoperable, and economical upgrades to DoD SATCOM Gateways and meet the growing throughput requirements of the deployed warfighter.

The primary beneficiaries of the Teleport investment are the DoD Combatant Commanders, Military Departments, Defense Agencies, and the warfighter. Teleport Generation 3 is designed to meet the growing demands of the warfighter through the execution of the following phases:

Phase 1: Gateway Advanced Extremely High Frequency (AEHF) [Extended Data Rate (XDR)] terminals provides tactical users with a 350% bandwidth increase in survivable, anti-jam communications through all peacetime and combat operations by installing Navy Multiband Terminals (NMT) at select Teleport sites. In addition to enhanced throughput, the NMT maintains compatibility with legacy waveforms and current tactical terminals.

UNCLASSIFIED

Exhibit P-40, Budget Line Item Justification: PB 2021 Defense Information Systems Agency		Date: February 2020
Appropriation / Budget Activity / Budget Sub Activity: 0300D: Procurement, Defense-Wide / BA 01: Major Equipment / BSA 5: Major Equipment, DISA		P-1 Line Item Number / Title: 14 / Teleport
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: 1203610K	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
<p>Phase 2: Gateway Wideband Global SATCOM (WGS) X/Ka-band terminals provides enhanced WGS X/Ka capability to warfighters worldwide by installing terminals from the Modernization of Enterprise Terminal (MET) program at Teleport and other gateway sites. This gateway enhancement allows Teleport to replace end of life (EOL) Defense Satellite Communications System (DSCS) terminals while remaining interoperable with tactical WGS X/Ka-band users. The MET enhancement provides a 300% Ka-band capacity increase and an 1100% X-band capacity increase to current enterprise terminal X/Ka capabilities. Additionally, it enables the Teleport system to maintain operational availability consistent with Generation 2 requirements and reduce the overall life-cycle cost of X/Ka capabilities across the DoD.</p> <p>Phase 3: Mobile User Objective System (MUOS) to Legacy ultra high frequency (UHF) systems interoperability will provide interoperability between MUOS users and Legacy UHF users by installing MUOS-to-Legacy UHF SATCOM Gateway Component (MLGC) suites of equipment at Teleport sites. MUOS is the next generation DoD UHF SATCOM system that will provide the warfighter with modern worldwide mobile communication services, utilizing the Wideband Code Division Multiple Access waveform for use in the military UHF SATCOM band. MLGC suites will provide critical continuity and interoperability as DoD tactical satellite users transition from legacy waveforms and radios to the Joint Tactical Radio System.</p> <p>Standardized Tactical Entry Point (STEP)</p> <p>The STEP investment is driven by Combatant Command (COCOM) operational requirements validated by the Joint Chiefs of Staff and is linked with Defense Information Systems Agency (DISA) core strategic goals. STEP capabilities directly support DoD's transformational initiatives and goals by: (1) enabling effective communications for the warfighter through early implementation of Net-Centric capability; (2) enhancing the capability and survivability of space systems and supporting infrastructure; and (3) continuing to develop joint interoperable Networks and Information Integration (NII) architecture.</p> <p>The STEP program is integral for SATCOM Gateway evolution and sustainment activities in support to the deployed forces. STEP sustains the network by replacing EOL Transmission Security (TRANSEC), Communication Security (COMSEC), switches, routers, and baseband equipment. Further, DISA is able to leverage the network and equipment at these sites to support world-wide operations for Expeditionary Forces and Overseas Contingency Operations. Additionally, the STEP program supports the COCOMs Command and Control (C2) and Command, Control, Communications, Computers, Intelligence, Surveillance, and Reconnaissance (C4ISR) SATCOM requirements. Finally, STEP resources support the converged Gateway Architecture to ensure the network is able to keep pace with the user community requirements and capabilities as they migrate and adopt emerging technology to accommodate their respective mission needs keeping synchronized and at pace with the evolving Teleport technology architecture.</p> <p>High Speed Terminal:</p> <p>The program is performing classified work. Classified details are not included in the submission due to the level of security classification and necessity of special security clearances. Detailed information for this program is submitted separately in classified Department of Defense exhibits.</p> <p>Enterprise SATCOM Gateway System:</p> <p>The SATCOM Gateway is an enterprise system that will adhere to the Joint Information Environment (JIE) architecture, and support all DoD satellite communications requirements, to include Strategic (Presidential, Secretary of Defense (SECDEF), Secretary of State (SECSTATE), Chairman Joint Chiefs of Staff, Missile Defense Agency (MDA)) and Tactical (combatant command/services/agencies) users over satellite trunks through the DoD Information Network (DODIN). The SATCOM Gateway program will begin fielding upgrades and leverage existing SATCOM systems, which include the DSCS terminals, the Teleport and STEP tactical system capabilities. Initial efforts will define a two phase approach, with the first phase (FY16-19) upgrading 12 facilities to a converged Internet Protocol (IP) transport suites that supports the full range of Strategic and Tactical users; the second phase (FY16-23) will address the remaining 34 sites that support mainly Strategic user requirements. Each investment increases the Department's ability to communicate with a world-wide, net-centric set of information capabilities, which is vital for the DoD to maintain a persistent presence among its Strategic and coalition adversaries. This upgrade will standardize satellite communication capabilities at all DoD satellite communications gateways. This system provides Strategic National leaders and deployed warfighters with seamless worldwide multi-band SATCOM connectivity to the DISN Service Delivery Nodes, legacy tactical command, control, communications, computers, intelligence systems and transport to specific special user enclaves.</p> <p>Our Nation's Senior Leaders, Combatant Commanders, Military Departments, Defense Agencies, and other special users will all benefit from this SATCOM Gateway.</p> <p>Integrate Waveform (IW):</p>

<p>Justification:</p> <p>FY 2019: (\$17.211) Teleport GEN 1/2: DoD Teleport replaced EOL equipment and field enhancement at Teleport SATCOM sites. This funding was also used to address performance, cyber, and maintainability issues for fielded Teleport Systems by installing, integrating, and fielding next generation technologies.</p> <p>FY 2020: (\$13.324): Teleport GEN 1/2: DoD Teleport will replace EOL equipment and field enhancement at Teleport SATCOM sites. This funding will also be used to support integration, maintenance, and security test activities for fielded enhancements.</p> <p>Explanation of change from FY 2019 to FY 2020: The decrease of -\$3.887 between FY 2019 and FY 2020 is due to a reduced number of baseband devices/equipment planned to be replaced as part of component life cycle replacement.</p> <p>FY 2021: (\$0.000): Teleport GEN 1/2:</p> <p>Explanation of change from FY 2020 to FY 2021: The decrease of -\$13.324 between FY 2020 and FY 2021 is due to the realignment of funding to a consolidated DoD Teleport Technology Refresh/Technology Insertion line item starting in FY 2021 to support all Generations of the DoD Teleport Program.</p> <p>Performance Metrics:</p> <p>Generation 1/2 Metric</p> <p>Percentage of Teleport and Gateway critical end of life/end of service issues mitigated.</p> <p>FY 2019 100% Planned / 100% Actual</p> <p>FY 2020 40% Planned</p> <p>Percentage of system changes resulting in interoperability certification</p> <p>FY 2019 100% Planned / 100% Actual</p>

<p>FY 2020 100% Planned</p> <p>Generation 3 Cost and Schedule Performance Metrics:</p> <p>Teleport manages and tracks its cost and schedule performance parameters using a tailored Earned Value Management System (EVMS) process, integrating the program plan, the program schedule, Work Breakdown Structure (WBS), and financial data. Progress is monitored/documented monthly showing percentages complete for schedule and cost. Formal updates with changes to the schedule are documented against the program baseline.</p> <p>FY 2019: (\$2.991): Teleport Generation 3: DoD Teleport completed the installation of a Modernization Enterprise Terminal (MET) in the CENTCOM AOR and procured Generation Three Phase 2 baseband equipment for additional capabilities in the PACOM AOR.</p> <p>FY 2020: (\$0.000): Teleport Generation 3:</p> <p>Explanation of change from FY 2019 to FY 2020: The decrease of -\$2.991 between FY 2019 and FY 2020 is due to completion of Generation Three Phase 2 Modernization Enterprise Terminal (MET) installations and baseband equipment procurement.</p> <p>Generation 3 Program Metrics:</p> <p>Across appropriations, performance metrics have been established in four measurement areas: 1) customer results, 2) mission and business results, 3) processes and activities, and 4) technology. Specific measurement indicators and units of measure vary by measurement area, and metrics in each of the aforementioned areas are measured annually. Teleport will use the same measurement areas for performance metrics in FY 2019.</p> <p>Generation 3 Metric Generation 3 Phase 1 operationally capable NMT terminals FY 2019 18 Operational/18 Total Planned; 18 Actual</p> <p>Number of Generation 3 Phase 2 operationally capable MET terminals FY 2019 11 Operational/13 Total Planned; 10 Actual</p> <p>Number of Generation 3 Phase 3 Teleport with operationally capable MLGC systems FY 2019 0 Operational/5 Total Planned; 0 Actual</p> <p>DoD Teleport Technology Refresh/Technology Insertion</p> <p>FY 2021: (\$14.193): DoD Teleport Technology Refresh/Technology Insertion: DoD Teleport will replace end-of-life (EOL) equipment and field enhancement at Teleport SATCOM sites. Major efforts include the replacement of EOL Hub Line Cards. This funding will also address performance, cyber, and maintainability issues for fielded Teleport Systems by installing, integrating, and fielding next generation technologies.</p> <p>Explanation of change from FY 2020 to FY 2021: The increase of +\$14.193 between FY 2020 and FY 2021 represents the realignment of funding from Generation 1/2 starting in FY 2021. The increase in funding (+\$0.869) will be used to address performance, cyber, and maintainability issues for fielded Teleport Systems by installing, integrating, and fielding next generation technologies.</p> <p>DoD Teleport Technology Refresh/Technology Insertion Performance Metrics:</p>

<p>Percentage of Teleport and Gateway critical end of life/end of service issues mitigated FY 2021 65% Planned</p> <p>Percentage of system changes resulting in interoperability certification FY 2021 100% Planned</p> <p>STEP</p> <p>FY 2019: (\$1.388) Provided technology enhancements to meet IP requirements at 4 DoD Gateways in support of the Enhanced SATCOM Gateway Architecture.</p> <p>FY 2020: (\$1.146) Will continue technology enhancements of the SATCOM Gateways to meet increased IP mission requirements at 3 DoD SATCOM Gateways.</p> <p>Explanation of change from FY 2019 to FY 2020: The decrease of -\$0.242 between FY 2019 and FY 2020 is due to a 50% reduction (from 16 to 8) in the number of spare remote modems required to support IP training at Ft Gordon.</p> <p>FY 2021: (\$1.173) Will continue technology enhancements of the SATCOM Gateways to meet increased IP mission requirements at 2 DoD SATCOM Gateways.</p> <p>Explanation of change from FY 2020 to FY 2021: The increase of +\$0.027 between FY 2020 and FY 2021 is due to additional cost for spares supporting the deployed terminals, tech refresh (including spares) of earlier deployed equipment, and additional cost for equipment to support the 10 gigabits per second (GBS) throughput for DODIN.</p> <p>FY 2019 OCO: (\$3.800) Provided technology enhancements to meet IP requirements and the implementation of IP routers at 1 DoD Gateway.</p> <p>FY 2020 OCO: (\$3.800) Will continue technology enhancements to meet IP requirements and the implementation of IP routers at 1 DoD Gateway.</p> <p>Explanation of change from FY 2019 to FY 2020: There is no change.</p> <p>FY 2021 OCO: (\$0.000)</p> <p>Explanation of change from FY 2020 to FY 2021: The decrease of -\$3.800 between FY 2020 and FY 2021 is due to reduction of engineering and installation support for the SATCOM Gateways.</p> <p>STEP Performance Metrics:</p> <p>Schedule, performance, and customer satisfaction measures are compiled as a real-time barometer to measure how well STEP is satisfying the needs of present customers, and to predict success in meeting future STEP objectives. The nature of this compiled data permits objective assessments and predictions on the quality and reliability of STEP support to its customers (e.g., availability and reliability of the STEP system). Availability: Probability that STEP resources are operable or usable to perform its designated or required function (ratio of time the system is functional). No more than 8 hours, 45 minutes, and 36 seconds of downtime or service interruptions per site per year. Reliability: Probability that STEP will accurately perform its specified task under stated environmental conditions (ability of the system to perform consistently to its design). Standard: No more than 8 hours, 45 minutes, and 36 seconds of system downtime or service interruptions per site per year.</p> <p>Specific Performance Metrics:</p>

Integrated Waveform (IW) FY 2020: (\$9.000): Will procure and install software updates for Ultra High Frequency (UHF) IW radios for six operational gateways.		
Explanation of change from FY 2019 to FY 2020: The increase of +\$9.000 is attributed to the initial procurement and installation of software updates to UHF IW radios at six operational gateways.		
FY 2021: (\$12.440): Will complete IW software upgrades of the existing UHF systems at 6 SATCOM gateways. Procure UHF SATCOM hardware for a new gateway site currently without UHF capabilities and begin site preparations. Procure 8 MLGC suites for allied support and expansion of US-only capabilities.		
Explanation of change from FY 2020 to FY 2021: The increase of +\$3.440 is due to the procurement of 8 U.S. Expansion and Allied MLGC suites (+\$4.190). This increase is partially offset by the realignment of - \$0.750 from UHF Integrated Waveform and Allied MLGC/MUOS Voice Gateway (MVG) procurement to fund operational and sustainment requirements.		
IW Performance Metrics:		
UHF IW-Capable Sites FY 2020 3 Operational / 3 Total Planned FY 2021 6 Operational / 7 Total Planned

<p>Description:</p> <p>JFHQ-DODIN's mission is to exercise command and control (C2) of DODIN Operations and Defensive Cyberspace Operations – Internal Defensive Measures (DCO-IDM) globally in order to synchronize the protection of DoD components' capabilities to enable power projection and freedom of action across all warfighting domains. The full mission scope of the JFHQ-DODIN includes: the critical daily requirement to protect the DODIN, C2 of all DoD cyber entities, a mature joint headquarters, management of requirements for global engagement, and the capability to assess the readiness of the DODIN against mission critical Combatant Command requirements.</p> <p>JFHQ-DODIN provides unity of command between United States Cyber Command (USCYBERCOM) and subordinate headquarters and unity of effort with all other DoD Components in order to ensure the DODIN is available and secure for Joint missions, to include effects delivered in and through cyberspace, and to ensure that the readiness posture of the DODIN is known.</p> <p>Justification:</p> <p>FY 2021: (\$3.091) - Will procure Cyber Threat emulation system and tools for DODIN inspections across 43 Areas of Operation (AOs), and JFHQ-DODIN Operations Center technology enhancements (Joint Worldwide Intelligence Communications System (JWICS), Non-classified Internet Protocol Router Network (NIPR) and Secret Internet Protocol Router Network (SIPR) systems) for 24/7 DODIN Operations and Defensive Cyber operations-Internal Defensive Measures. Joint Defense Operations Center (JDOC) functions enabled real-time situation monitoring of ongoing operations across the DODIN Joint Operations Area (JOA) and a unity of command between USCYBERCOM, subordinate headquarters and mission partners..</p> <p>Explanation of Change from FY 2020 to FY 2021: The increase of +\$3.091 between FY 2020 and FY 2021 is for the initial procurement of servers, storage space, network equipment, workstations, operating software and threat emulation tools to establish an initial isolated Threat emulation testing system to develop and test informed threat packages for utilization of DODIN inspection, as well procurement of workstations, communication devices, network devices and collaboration capabilities for JFHQ-DODIN 24/7 Operations Center.</p> <p>Performance Metrics:</p> <p>Continuity of Operations (COOP): Transportable Communications Capability (TCC)</p> <p>FY 2021: 75% of mission critical functions restored within 12 hours (Federally mandated time frame) (Planned)</p>

<p>Description: White House Situation Support Staff (WHSSS):</p> <p>WHSSS provides classified communications, computer, and intelligence for the White House Situation Room, the National Security Staff, and other White House offices. WHSSS delivers the ability to meet and maintain a rate of 99.99% reliable telecommunications and information services through state-of-the-art equipment and technology, at the best possible price to the public.</p> <p>FY 2019: (\$8.810) Upgraded and secured critical systems that support classified voice, data and video used in the White House Situation Room and throughout the National Security Council (NSC) for the President, Vice President, White House Senior Staff, Executive Office of the President and the inter-agency as directed by the Assistant to the President for National Security Affairs. These systems are also used at White House Continuity of Operations (COOP) and Continuity of Government (COG) locations, Trip Sites and residences. Also, funding supported costs associated with increased NSC mission requirements related to the Presidential Information Technology Community (PITC) initiative.</p> <p>FY 2020: (\$9.081) Will continue to upgrade and secure critical systems that support classified voice, data and video used in the White House Situation Room and throughout the NSC for the President, Vice President, White House Senior Staff, Executive Office of the President and the inter-agency as directed by the Assistant to the President for National Security Affairs. These systems are also used at White House COOP and COG locations, Trip Sites and residences. Also, funding will continue to support costs associated with increased NSC mission requirements related to the Presidential Information Technology Community (PITC) initiative.</p> <p>Explanation of change from FY 2019 to FY 2020: The increase of +0.271 from FY 2019 to FY 2020 is due to anticipated increase in cost for equipment supporting PITC IT network infrastructure requirements.</p> <p>FY 2021: (\$8.427) Will continue to upgrade the White House secure critical IT systems infrastructure that supports the classified voice, data, and video networks supporting the President, Vice President, White House Senior Staff, Executive Office of the President and the inter-agencies as directed by the Assistant to the President of National Security Affairs. These systems are also used at White House COOP and COG locations, trip sites, and residences.</p> <p>Explanation of change from FY 2020 to FY 2021: The decrease of -\$0.654 from FY 2020 to FY 2021 is due to realignment of funds to Operations and Maintenance (O&M) to provide sustainment to procured classified IT Network infrastructure.</p>

<p>Description:</p> <p>DISA provides a portfolio of services that includes legacy capabilities delivered by the Net-Centric Enterprise Services (NCES) Program supporting a resilient and flexible infrastructure that enables a collaborative environment for secure information sharing across the Department of Defense (DoD). These critical warfighter, Business, and Intelligence Mission Area services enable more than two million authorized DoD users to collaborate across the Combatant Commands (COCOMs)/Services/Joint Staff/Agency/Mission Partners using a suite of web-accessible services. The portfolio also includes the DoD Visitor service that transitioned from a Government developed service to a Commercial-Off-the-Shelf annual right-to-use licensed service operating on domain controllers throughout the DoD. This service allows personnel to "go anywhere within the DoD, login, and be productive". It includes the privilege management Authentication Gateway Services (AGS) and the DoD Enterprise Portal Service. The AGS is integrated with the Identity and Access Management services supporting brokered Public Key Infrastructure (PKI) authentication for DoD applications without a native PKI authentication capability. The DoD Enterprise Portal Service provides users with a flexible web-based hosting solution to create and manage mission, community, organization, and user focused sites. The individual suite of capabilities within the portfolio of services provides the user with the flexibility to couple the services in varying ways to support their mission needs. This flexibility provides unprecedented secure access to web and application content, critical imagery, intelligence and warfighter information from anywhere, at any time, on any DoD authorized device. The portfolio of enterprise services delivers tangible benefits to the Department by providing capabilities that are applied by the US Forces, Coalition forces, and Allied forces to support full spectrum joint and expeditionary campaign operations. These enabling benefits include the ability to:</p> <ul style="list-style-type: none"> • Enhance collaborative decision-making processes • Improve information sharing and integrated situational awareness • Share and exchange knowledge and services between enterprise units and commands • Share and exchange information between previously unreachable and unconnected sources • Schedule and coordinate meetings with people across the DoD Components • "Go anywhere in the DoD, login, and be productive" • Create and manage mission, community, organization, and user-focused sites from global locations • Exchange knowledge to enable situational awareness, determine the effects desired, select a course of action, the forces to execute it, and accurately assess the effects of that action <p>The portfolio contains capabilities that are also key enablers to the Defense Information Systems Agency's (DISA) mission of providing a global net-centric enterprise infrastructure in direct support of joint Warfighter, National level leaders, and other mission and coalition partners across the full spectrum of operations.</p>

<p>Description:</p> <p>FY 2020 funding totals include \$17.574 for Base and \$12.000 for Overseas Contingency Operations (OCO), of which \$12.000 was realigned as part of the OCO for Enduring Requirements funding realignment in accordance with the Department's compliance with the Budget Control Act of 2011.</p> <p>FY 2021 funding totals include \$26.978 for Base and \$6.120 for Overseas Contingency Operations (OCO), of which \$6.120 was realigned as part of the OCO for Enduring Requirements funding realignment in accordance with the Department's compliance with the Budget Control Act of 2011.</p> <p>Defense Information Systems Network (DISN) is the Department of Defense's (DoD's) consolidated worldwide telecommunications infrastructure that provides end-to-end information transport for DoD operations to the warfighters and the Combatant Commanders with a robust Command, Control, Communications, Computers and Intelligence information long-haul transport infrastructure. The DISN, seamlessly spanning full spectrum from terrestrial to space and strategic to tactical domains, provides the interoperable telecommunications connectivity and value-added services required to plan, implement, and support all operational missions, anytime, and anywhere pushing DISN services to the edge of the communications network. The DISN delivers an integrated platform consisting of DoD's core communications, computing, and information services as well as integrating terrestrial, wireless, and satellite communications into a network cloud that is survivable and dynamically scalable. Procurement funding primarily supports the Technology Refreshment (TR); Joint Worldwide Intelligence Communications System (JWICS); National Emergency Action Decision Network (NEADN)/Presidential and National Voice Conferencing (PNVC); the Enhanced Pentagon Capability (EPC)/Survivable Emergency Conferencing Network (SECN); DoD Mobility; and a significant satellite communications extension of the DISN. The procurement funding enables the DISN to remain technologically up-to date and capable by achieving the best possible balance between network performance and network cost through a process known as network optimization.</p>

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:

FY 2019 (\$160.100)

JWICS: (\$5.614) - Supported deployment of JWICS transport core-lite nodes worldwide to assure delivery of JWICS transport core services to JWICS edge users in multiple Areas Of Responsibility (AORs) globally. Also, supported retirement of legacy JWICS core capabilities at locations in Continental United States (CONUS), US European Command (EUCOM) and US Pacific (PACOM) AORs as services migrated over to transport core. Included the continuation of engineering efforts to ensure delivery of service to edge locations via Joint Information Environment (JIE) and retirement of legacy Time-Division Multiplexing (TDM) paths to realize programmatic cost savings provided by Carrier Ethernet / Converged IP transport. The hardware that was procured to satisfy these efforts were a combination of Cisco and Juniper products along with various model lines of COMSEC products.

Tech Refresh: (\$150.017) - Purchased and installed End-of-Life (EOL) replacement and upgrades throughout the DISN. Convergence activities at multiple layers eliminating the need for a one-to-one TR of all components but rather TR at service and capability layers. Investment goals included IP Optimization, Legacy technology elimination and DISN enhancements to ensure a survivable infrastructure. The key efforts included: Timing & Synchronization of the Packet based IP networks and OPTICAL/Transport Network (OTN) systems, Internet Access Point (IAP), Next Generation Optical (formerly known as Packet Optical Transport Network (P/OTN) Layer), Operations Support System (OSS) Refresh, Multi-Protocol Label Switching (MPLS), Voice Internet Service Provider (ISP), Warehouse Support (formerly known as Logistics Support), SIPRNet Access Migration (formerly known as Communication Security (COMSEC Refresh)), Transmission Security (TRANSEC) (formerly known as COMSEC Refresh), and Next Generation Access Transport (formerly Optical Refresh Multi-service Provisioning Platform (MSPP)), SIPRNET Refresh (Endpoint Security Solutions (ESS), Advanced Crypto Compliant (ACC) Compliance) (formerly known as COMSEC Refresh), Software Defined Networking (formerly Rapid Provisioning), Combatant Command (COCOM) Infrastructure Resiliency and DISN Service Delivery Node Resiliency.

EPC/SECN: (\$1.455) - Procured additional equipment to complete SECN digitization, for Advanced Extremely High Frequency (AEHF) Satellite Communication (SATCOM) interfaces implementation, and upgrades for EOL conferencing operator consoles. SECN Digitization was designed to improve voice quality and facilitate the transition from Military Strategic, Tactical & Relay (MILSTAR) to AEHF SATCOM by allowing the transition of SECN to PNVC-developed Baseband Interface Group (BIG) in advance of full PNVC implementation. The specialized operator consoles used to initiate and control the secure voice conference of EPC, SECN and eventually PNVC, are PC-based and require periodic hardware and software tech refresh. New conferencing operator consoles were procured and installed at EPC/SECN sites.

PNVC: (\$1.386) - Installation of PNVC equipment suites at the fixed sites continues according to a prioritized order. Spares of each equipment type were purchased to ensure the correct quantities maintain the fielded equipment. PNVC baseband suites and the required High Altitude Electromagnetic Pulse (HEMP) hardened Base Band Kit (BBK) enclosures were purchased for fourteen special users.

Exhibit P-40, Budget Line Item Justification: PB 2021 Defense Information Systems Agency		Date: February 2020
Appropriation / Budget Activity / Budget Sub Activity: 0300D: Procurement, Defense-Wide / BA 01: Major Equipment / BSA 5: Major Equipment, DISA		P-1 Line Item Number / Title: 18 / Defense Information System Network
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: 0303126K	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
<p>ISR Transport Services: (\$1.628) - Installed the Ku-band Spread Spectrum (KuSS) multi-band hub at selected SATCOM sites based on selected prioritized list. Spares were purchased and stored on-site to preclude delays in shipping and to ensure high mission availability. Training, at the time of installation and prior to hub and terminal activation, was provided.</p> <p>FY 2020 (\$29.574)</p> <p>JWICS: (\$6.464) - Will continue to support the deployment of JWICS transport edge nodes worldwide to assure delivery of JWICS enterprise services in multiple AORs globally. Also will support retirement of legacy JWICS core capabilities at locations in CONUS, EUCOM and PACOM AORs as services migrate over to the new infrastructure. Includes the continuation of engineering efforts to ensure delivery of service to edge locations via JIE and retirement of legacy TDM paths to realize programmatic cost savings provided by Carrier Ethernet/Converged IP transport.</p> <p>Tech Refresh: (\$3.000) - Will continue to purchase and install EOL replacement and upgrades throughout the DISN for DRSN and DNS related efforts. Convergence activities will continue at multiple layers eliminating the need for a one to one TR of all components but rather TR at service and capability layers. Investment goals include IP Optimization, Legacy technology elimination and DISN enhancements to ensure a survivable infrastructure.</p> <p>EPC/SECN: (\$1.590) - Will procure additional equipment to complete SECN digitization, for (AEHF) SATCOM interfaces implementation, and upgrades for EOL conferencing operator consoles. SECN Digitization is designed to improve voice quality and facilitate the transition from Military Strategic, Tactical & Relay (MILSTAR) to AEHF SATCOM by allowing the transition of SECN to PNVC-developed Baseband Interface Group (BIG) in advance of full PNVC implementation. The specialized operator consoles used to initiate and control the secure voice conference of EPC, SECN and eventually PNVC, are PC-based and require periodic hardware and software tech refresh. New conferencing operator consoles will be procured and installed at EPC/SECN sites.</p> <p>ISR Transport Services: (\$6.520) - Will continue the installation of the KuSS multi-band hub at selected SATCOM sites based on selected prioritized list. Spares will also be purchased and stored on-site to preclude delays in shipping and to ensure high mission availability. Training, at the time of installation and prior to hub and terminal activation, will also be provided. Also, funds will procure and field UVDS platform for PACOM support.</p> <p>ISR Transport Services OCO: (\$12.000) - Will procure and install equipment (modems/terminals) to support the enhanced Airborne Intelligence, Surveillance, and Reconnaissance (AISR) data transport for operational and tactical users.</p> <p>Explanation of Change from FY 2019 to FY 2020: The decrease of -\$130.526 from FY 2019 to FY 2020 is due to the functional transfer to DISA Defense Working Capital Fund (DWCF) to establish a DISN Capital Investment (CIP) for DISN investment (-\$130.728), DISN Survivable Networking and DISN IP Optimization resulting from the completion of installation activities addressing network resiliency at two COCOMs (-\$5.384), decrease in PNVC due to the transfer to the Air Force (-\$1.386) and a decrease due to the completion of UVDS platform (-\$1.628) . Also, decrease is due to the reduction in hardware required to replace end of support hardware that is currently online (-\$0.629), additional decreases in ISR Transport is attributed to reduced equipment costs (-\$0.108), and decrease in one-time funding for TR of Continuity of Operations Plan (COOP) equipment (-\$3.648). The decrease is offset by an increase in JWICS due to the continuing growth of technical debt caused by the aging of network equipment including routers, switches, and encryption devices and the need to replace these devices (+\$0.850), an increase in EPC/SECN for additional spare Secure Voice Conferencing Equipment to support SECN digitization (+ \$0.135), and an increase of ISR Transport Services OCO (+\$12.000) as part of the OCO for Enduring Requirements funding realignment in accordance with the Department's compliance with the Budget Control Act of 2011. This funding transferred from Line Item Number DISN (DISN OCO).</p> <p>FY 2021 (\$33.098)</p> <p>JWICS: (\$7.941) - Will procure and install capabilities in support 7.0 rollout, which includes crypto and routing hardware upgrades.</p> <p>Tech Refresh: (\$2.998) - Will continue to purchase and install EOL replacement and upgrades throughout the DISN for DRSN and DNS related efforts. Convergence activities will continue at multiple layers eliminating the need for a one to one TR of all components but rather TR at service and capability layers. Investment goals include IP Optimization, Legacy technology elimination and DISN enhancements to ensure a survivable infrastructure.</p>

<p>Description:</p> <p>The White House Communication Agency (WHCA) provides assured voice, video, and data information services to the President of the United States (POTUS), Vice President of the United States (VPOTUS), White House Staff, National Security Staff (NSS), US Secret Service (USSS), and others as directed by the White House Military Office (WHMO). The WHMO also directs the WHCA to serve as the Information Technology (IT) provider to the WHMO enterprise of customers, to include Presidential Airlift Group/Air Force One, Marine One, Camp David, White House Transportation Agency, White House Presidential Mess, White House Medical Unit, military aides, and others within WHMO. WHCA must balance the integration of innovative and customer-desired technologies with the ability to operate on-demand within any environment from normal to emergency conditions. WHCA will continue to provide command and control capabilities to the President and senior national leaders while integrating technology and innovation to transform the President's multiple communication capabilities and information sharing domains into one integrated, seamless environment of unified capabilities.</p> <p>Along with supporting all POTUS/VPOTUS/First Lady of the United States (FLOTUS) travel both within the continental United States and overseas, WHCA maintains a physical communications infrastructure at the White House, the Naval Observatory, Camp David, Presidential and Vice Presidential Second Residences, and numerous classified facilities. WHCA operates and maintains a radio infrastructure in the National Capital Region, from Camp David to Quantico, providing network coverage for the USSS, Presidential Helicopter Squadron, and the Presidential Airlift Group.</p>

Justification:

FY 2019 (\$94.201). WHCA's Presidential Service Strategy 2022 (PSS 2022) updated WHCA's Presidential Communications Vision 2020 (PCV 2020) to reflect capability achievements made in mobility, cybersecurity, retirement of legacy technologies, and other modernization efforts to improve the White House's ability to develop and implement national level policy on a day to day basis and during crisis using the National Leadership Command Capabilities (NLCC) infrastructure. Efforts included strategic enterprise level initiatives required by the White House Director of Information Technology (D/WHIT) for unified services enabled by converging network and service infrastructures and business practices. Some of WHCA's portfolios have changed to better represent service capabilities, improve mission alignment, and identify traceability of initiatives to new modernization efforts advanced in WHCA's Presidential Service Strategy. WHCA's PSS 2022 was the central theme of WHCA's Strategic Plan and approach for transformational modernization and innovation to ensure POTUS and VPOTUS can communicate anywhere, anytime, by any means with anyone in the world. PSS 2022 was WHCA's means to achieve targeted architectures comprised of mobile IP solutions enabling unified capabilities and seamless services for information sharing and communications including: Presidential Travel Services Modernization; Senior Leader Communications, Command and Control; Mobility; Cyber Resilience; Network Infrastructure Convergence; Next Generation Networking; High Definition Broadcast Services; and, enterprise collaboration capabilities for personnel supporting Presidential events. WHCA strategically managed IT capabilities within five service portfolios: Senior Leader Communications, Enterprise IT, Broadcast and Audio Visual, Transport, and Deployable Services. The PSS was organized around these service portfolios to align WHCA's strategy, vision, and future capabilities with planned initiatives to ensure future success.

Broadcast and Audio Visual Services: (\$5.437) Evolved broadcast studio capabilities and strategies for unified communications, increased bandwidth, on-demand services, enhanced use of multi-media as a communications medium, and Broadcast capabilities. Implemented Next Generation broadcast event production and support systems; leveraged smart tagging techniques for global access and search; modernized and automated the Master Control storage area network system (MC SAN) and Presidential Records Archiving and Accessibility to support Presidential post productions storage, reporting, and public dissemination and use. Provided multimedia services and production products to government, news, and other organizations for recording events, providing historical records, and custom broadcast products and services of the POTUS, VPOTUS, and other leaders as designated. Services and focus areas within this portfolio are Audio Visual System Support, Broadcast Production, Presidential Broadcast Archive, and Multi-Media Production. Embraced mobile commercial technologies for high definition audiovisual and high quality sound solutions. Modernization continued to fulfill capability gaps in providing continuity of mission operations (COOP) and adopt emerging digital media technologies.

Transport Services: (\$6.661) Leveraged and acquired emerging network transport and satellite communication (SATCOM) technologies to build out a MLS backbone supporting secure unified communications and high speed assured transport; and evaluated DoD/DISA and commercial SATCOM service solutions (e.g., FirstNet, Mobile User Objective system, Free Space Optics, 5G, and Iridium). Deployed the Presidential Transport Network (PTN) as its primary Travel Transport Network supporting Senior Leader Communications, Broadcast and Audio Visual services, and extending Presidential Information Technology Community (PITC) Enterprise IT services to customers. Adopted emerging network transport technologies to build out a Multiple Level Secure backbone enabling assured, high speed transport to its support global missions and continued to evaluate DoD/DISA transport service offerings and emerging commercial capabilities for Next Generation transport solutions.

Senior Leader Communications: (\$28.630) Applied a multi-phased data cloud solution, incorporated DISA Enterprise Services where possible, that supported the PITC and mobile users during Presidential events. Evolved and consolidated WHCA's on-demand network backbone infrastructure and unify IP services; and next generation network services. Continued to provide storage, virtualization, and collaborative tools to WHMO/WHCA. Adopted DoD Senior National Leadership Command and Control Communications recommendations for assured communications that met WHCA's Primary Alternate Contingency Emergency communications requirements including CONOPS, and COG. Provided reliable, secure, and modern Senior Leader Communication capabilities that enabled timely, critically protected information to the POTUS, VPOTUS and their associated support and protection teams, regardless of location to effect national policy and participate in the NLCC infrastructure. Provided national level classified conferencing and continuity of support for the President whether in a permanent or temporary location, using ground transportation, or while aboard fixed-wing and rotary-wing aircraft. Leveraged new commercial solutions

<p>for new or enhanced capabilities including PUMC that linked key vehicles in the Motorcade into a mobile Voice Video, and Visualization, Virtual Personal Assistant, post Zero Day recovery, and next generation networking. Provided replacement of motorcade communication vehicles that provided 24/7 Command and Control (C2) communications to the POTUS when not on White House grounds (UHF SATCOM), VHF line of Sight to the Limo, and transport infrastructure for classified mobile devices for Senior Level POTUS officials and the Military Aid. Established of a Mobile Ad-Hoc Network (MANET) that provided lightweight and robust mobile networking capabilities that can be deployed as a temporary service for the POTUS and VPOTUS within any forward deployed environment. MANET included the use of emerging government solutions including PUMA, PITC Trip Kit, and Presidential Transport Network, employing service bonding and persistence technologies riding SATCOM, Government or Commercial services.</p>		
<p>Enterprise IT (EIT): (\$44.761) Refined defense solutions, personnel, techniques, and best practices to defend, detect, and mitigate cyber-based threats throughout the PITC infrastructure via a PDSA "Zero Trust" that enabled WHCA critical systems to defend against modern, large scale, remote attacks. Replaced end-of-life encryption equipment and software for existing operations of all voice, video, data and transport systems. Delivered reliable, secure, and modern digital services architecture and mobile information sharing environment that employed best-in-class security and innovative business applications. Upgraded WHCA's telecommunications infrastructure to support multiple WHMO/WHCA facilities to include Camp David. Supported the WHMO/WHCA's consolidation of infrastructure and communications capabilities that provided unified operations and seamless SA, COP and C2 capabilities. Implemented IT Service Delivery best practices that met or exceeded service levels agreements; and, postured the PITC network to enable WHCA customers to serve effectively by frequently introducing new digital capabilities and anticipating future data and bandwidth demands. Transitioned to Cloud Services providing a single, consolidated network service infrastructure for all members of the PITC including: Long-term storage; phased migration and synchronization capability for infrastructure, accounts, and software; High availability and gaunt tolerance within the same site and across data centers; and, service resilience and disaster recovery.</p>		
<p>Deployable Services: (\$8.712) Evolved field smart, secure mobile, wireless devices and technologies that provided mobile users with next generation portable communication capabilities and platforms. Conducted technology and engineering assessments with the intent of integrating best of breed COTS products that supported the implementation of on-demand service delivery options for all mobile and airborne platforms. Provided rapidly configurable travel systems and mobile vehicle capabilities for the White House, and others as directed. These capabilities mirrored high end commercially available solutions that met customers' requirements for security and high availability of services. Provided a modular system that managed the lifecycle of systems, equipment, and devices and tracks their deployment to mission locations and replenish equipment and service devices.</p>		
FY 2020 (\$45.079)		
<p>Broadcast and Audio Visual Services: (\$5.546) Will continue to evolve broadcast studio capabilities and strategies for unified communications, increased bandwidth, on-demand services, enhanced use of multi-media as a communications medium, and Broadcast capabilities. Will continue to implement Next Generation broadcast event production and support systems; will continue to leverage smart tagging techniques for global access and search; modernize and automate the Master Control storage area network system (MC SAN) and Presidential Records Archiving and Accessibility to support Presidential post productions storage, reporting, and public dissemination and use. Will provide multimedia services and production products to government, news, and other organizations for recording events, providing historical records, and custom broadcast products and services of the POTUS, VPOTUS, and other leaders as designated. Services and focus areas within this portfolio are Audio Visual System Support, Broadcast Production, Presidential Broadcast Archive, and Multi-Media Production. Will continue to embrace mobile commercial technologies for high definition audiovisual and high quality sound solutions. Modernization will continue to fulfil capability gaps in providing continuity of mission operations (COOP) and adopt emerging digital media technologies.</p>		
<p>Transport Services: (\$6.794) Will continue to leverage and acquire emerging network transport and SATCOM technologies to build out a MLS backbone supporting secure unified communications and high speed assured transport; and evaluate DoD/DISA and commercial SATCOM service solutions (e.g., FirstNet, Mobile User Objective system, Free Space Optics, 5G, and Iridium). Will deploy the PTN as its primary Travel Transport Network supporting Senior Leader Communications, Broadcast and Audio Visual services, and extending PITC Enterprise IT services to customers. Will adopt emerging network transport technologies to build out a Multiple Level Secure backbone enabling assured, high speed transport to its support global missions and continues to evaluate DoD/DISA transport service offerings and emerging commercial capabilities for Next Generation transport solutions.</p>		
<p>Senior Leader Communications: (\$11.892) Will continue to apply a multi phased data cloud solution, incorporating DISA Enterprise Services where possible, that supports the PITC and mobile users during Presidential events. Will continue to evolve and consolidate WHCA's on-demand network backbone infrastructure and unify IP services; and next generation network services. Continues to provide storage, virtualization, and collaborative tools to WHMO/WHCA. Continues to adopt DoD Senior National Leadership Command and Control Communications recommendations for assured communications that meet WHCA's Primary Alternate Contingency Emergency communications requirements including CONOPS, and COG. Will provide reliable, secure, and modern Senior Leader Communication capabilities that enable timely, critically protected information to the POTUS, VPOTUS and their associated support and protection teams, regardless of location to effect national policy and participate in the NLCC infrastructure.</p>

Will provide a modular system that manages the lifecycle of systems, equipment, and devices and tracks their deployment to mission locations and replenish equipment and service devices.</p> <p>Change from FY 2019 to FY 2020: The decrease of -\$49.122 from FY 2019 to FY 2020 is due to completion of motorcade communication vehicles replacements (-\$4.220) that provide around the clock command and control communications to the POTUS when not on White House grounds, VHF line of Sight to the Limo, and transport infrastructure for classified mobile devices for Senior Level POTUS officials and the Military Aid within the Senior Leader Communications portfolio; Completion of outside plant cabling and supporting infrastructure modernization efforts at Camp David, providing future expansion capabilities and proper user accessibility and support by installing the latest supportable cable/conduit infrastructure between facilities (-\$7.983) within the Enterprise IT portfolio; and, Completion of the PITC transition to more secure private data cloud services providing network infrastructure upgrades, increased security, reliability, and adaptabilities to support growing mission requirements and consolidation of PITC services (-\$38.000) within both the Senior Leader Communication and Enterprise IT Portfolios. Decreases are offset by an increase of +\$1.081 due to modernization of systems, equipment, and devices fulfilling capability gaps and providing next generation solutions.</p> <p>FY 2021 (\$44.161)</p> <p>Broadcast and Audio Visual Services: (\$5.657) WHCA will provide the voice, video and visualization for the President, Vice President, and other leaders as designated. It will serve as the communications interface to the American people and the International Press and ensures our National leader's ability to communicate with the world anywhere, anytime, utilizing any broadcast media. WHCA will continue to evolve broadcast studio capabilities and strategies for unified communications, increased bandwidth, On-demand services, enhanced use of multi-media as a communications medium, and Broadcast capabilities. Continue to modernize broadcast event production and support systems; continues to leverage smart tagging techniques for global access and search; modernize and automate the Master Control Storage Area Network system (MC SAN) and Presidential Records Archiving and Accessibility to support Presidential post productions storage, reporting, and public dissemination and use. Provides multimedia services and production products to government, news, and other organizations for recording events, providing historical records, and custom broadcast products and services of the POTUS, VPOTUS, and other leaders as designated. Services and focus areas within this portfolio are Audio Visual System Support, Broadcast Production, Presidential Broadcast Archive, and Multi-Media Production. Continues to embrace mobile commercial technologies for high definition audiovisual and high quality sound solutions. Broadcast Archive, and Multi-Media Production. Continues to embrace mobile commercial technologies for high definition audiovisual and high quality sound solutions. Modernization will continue to fulfill capability gaps in providing continuity of mission operations (COOP) and adopt emerging digital media technologies.		
Transport Services: (\$6.929) Transport services will provide global, point-to-point connectivity between broadly located mission partners over a choice of technologies: Satellite or Synchronous Optical Network (SONET) Wide Area Network (WAN). This service is a mix of government-owned and commercially-leased, secure and highly available enclave of circuits or satellite systems for the purpose of supporting Senior National Leadership for day-to-day and Emergency Actions. Leverage and acquire emerging network transport and SATCOM technologies to build out a MLS backbone supporting secure unified communications and high speed assured transport; and evaluate DoD/DISA and commercial SATCOM service solutions (e.g., FirstNet, Mobile User Objective system, Free Space Optics, 5G, and Iridium). Will deploy the PTN as its primary Travel Transport Network supporting Senior Leader Communications, Broadcast and Audio Visual services, and extending PITC Enterprise IT services to customers. Adopt emerging network transport technologies to build out a Multiple Level Secure backbone enabling assured, high speed transport to its support global missions and continues to evaluate DoD/DISA transport service offerings and emerging commercial capabilities for Next Generation transport solutions.		
Senior Leader Communications: (\$10.310) WHCA will provide telecommunication, Command and Control, and messaging services to the President, Vice President, and NSS, WHMO leadership, USSS and other designated senior national leaders. In support, WHCA will operate three 24-7 customer support and call centers that provide secure teleconferencing, videoconferencing, radio communications, and customer support using assured, dedicated, and independent infrastructure and systems. Will continue to apply enhancements to provide a secure private data cloud solution, while looking for opportunities to incorporate DISA Enterprise and commercial cloud services that supports the PITC and mobile users with assured, secure and resilient Presidential infrastructure and events in a fixed and mobile environments. Continue to evolve and consolidate WHCA's on-demand network backbone infrastructure and unify IP services; and next generation network services. Continue to provide storage, virtualization, and collaborative tools to WHMO/WHCA. Continue to adopt DoD Senior National Leadership Command and Control Communications recommendations for assured communications that meet WHCA's Primary Alternate Contingency Emergency communications requirements including CONOPS, and COG. Provide reliable, secure, and modern Senior Leader Communication capabilities that enable timely, critically protected information to the POTUS, VPOTUS and their associated support and protection teams, regardless of location to effect national policy and participate in the NLCC infrastructure. Will provide national level classified conferencing and continuity of support for the President whether in a permanent or temporary location, using ground transportation, or while aboard fixed-wing and rotary-wing aircraft. Leverage new commercial solutions for new or enhanced capabilities including PUMC that will link key vehicles in the Motorcade into a mobile Voice Video, and Visualization, Virtual Personal Assistant, post Zero Day recovery, and next generation networking. Provide replacement of motorcade communication vehicles that provide 24/7 C2 communications to the POTUS when not on White House grounds (UHF SATCOM), VHF line of sight to the Limo, and transport infrastructure for classified mobile devices for Senior Level POTUS officials and the Military Aid, Senior Leader Conferencing voice, video, and visualization, Commercial Solutions for Classified (CSfC), Type-1 Encryption on a Chip, Multi-Level Security in Mobile Devices, voice, visualization and video teleconferencing, Motorcade as a Network with seamless wireless/wired transitions, Virtual Personal Assistants, Motorcade Bandwidth Expansion, First Net, MUOS, 5G, Free Space Optics, AEHF Satellite Communications, Red Switch IP Modernization, Multi-Level Security in Mobile Devices, Land Mobile Radio (LMR), UHF over Long-Term Evolution (LTE), Commercial and MIL satellite systems, Radio over IP Technologies, and Head of State expansion, contraction and technical enhancements.		
Enterprise IT (EIT): (\$12.201) The WHCA Enterprise IT Services will deliver a reliable, secure, and modern network infrastructure and digital services ecosystem to enable a responsive and mobile PITC environment by employing modern best-in-class security and innovative business applications that enhance our customers' ability to serve the American public. The WHCA will evolve the PITC through continuance enhancements and implementation of common network services, operational rules, standardize its customer desktop and mobile products, evaluate and consolidate software applications. The PITC will continuously improve its customer service and executive support services as it strives to deliver more efficient converged unclassified digital services. As the PITC customer digital services footprint expands, WHCA will ensure the highest state of readiness and availability of those services. WHCA will continue to evolve and implement a Digital Services Assurance strategy that integrates PITC operation centers into a single cohesive entity that detects, analyzes and responds to network events and incidents. WHCA will also provide the cyber resiliency necessary to effectively withstand attacks and efficiently recover from a post cyber network incident environment.		
Deployable Services: (\$9.064) The WHCA Deployable Services will provide rapidly configurable travel systems and mobile vehicle services for our PITC and Senior Leader customers that mirror high-end commercially available solutions and meet our customer security and high availability needs by continuously evaluating and interactively deploying executive support industry capability advances. This portfolio converges the other four into a travel service portfolio. Services and focus areas within this portfolio include Presidential travel missions, support within secondary residences, support in temporary locations and events, and support coverage while on the move. Evolves field smart, secure mobile, wireless devices and technologies to provide mobile users with next generation portable communication capabilities and platforms. Conduct technology and engineering assessments with the intent of integrating best of breed COTS products to support the implementation of on-demand service delivery options for all mobile and airborne platforms. Provide rapidly configurable travel systems and mobile vehicle capabilities for the White House, and others as directed. These capabilities mirror high-end commercially available solutions

that meet customers' requirements for security and high availability of services. Provide a modular system that manages the lifecycle of systems, equipment, and devices and tracks their deployment to mission locations and replenish equipment and service devices.		
Change from FY 2020 to FY 2021: The decrease of -\$0.918 from FY 2020 to FY 2021 is due to completion of White House Voice Network audio conferencing bridge capabilities that replaced end-of-life systems to a redundant, robust IP-based system within the Senior Leader Communications portfolio (-\$1.582). Decreases are offset by an increase of +\$0.664 due to modernization of systems, equipment, and devices fulfilling capability gaps providing next generation solutions.		
Performance Metrics:		
Broadcast and Audio Visual (BAV) Services Portfolio goal (FY 2019 - FY 2021): Provide broadcast quality video documentation and live streaming of all official activities of the POTUS for National Archives at a 99.99% success rate.		
• Master Control COOP - Optimize Master Control COOP and storage capabilities FY19 Target: 99.99% (Met) FY20 Target: 99.99% FY21 Target: 99.99%		
• 18 Acre Event Production - Optimize Quality and Delivery of Event Production on the White House 18 Acre Complexes FY20 Target: 45.93% FY21 Target: 75%		
• Encoding, Streaming, Virtual Reality - Continue to expand Streaming TV and other broadcast services to rapidly expanding national and global, commercial and public markets FY19 Target: 99.99% (Met) FY20 Target: 99.99%		
• Multi-media (MM) Center Services - MM Services provide full on-demand access to POTUS and Senior Staff to high-quality multimedia broadcast information with a 99.99% success rate FY19 Target: 99.99% begin to evolve MM products and live streaming to 4K High Definition (Met) FY20 Target: 99.99% continue to enhance MM products and live streaming to 4K High Definition FY21 Target: 99.99%		
• Broadcast Travel Equipment (included in PDS /Mobile Event Equipment) FY19 Target: 99.99% BAV Travel Equipment logistics for POTUS, VPOTUS, and FLOTUS WH/Travel Events Schedule (PTN sustainment and event use). (Met) FY20 Target: 99.99% BAV Travel Equipment logistics for POTUS, VPOTUS, and FLOTUS WH/Travel Events Schedule (PTN sustainment and event use). FY21 Target: 99.99% BAV Travel Equipment logistics for POTUS, VPOTUS, and FLOTUS WH/Travel Events Schedule (PTN sustainment and event use).		
Deployable Services Portfolio goal (FY 2019 - FY 2021): Deploy integrated, mobile systems and platforms that provide mobile communications and information service capabilities in multiple environments.		
• Deployed Trip Site Services FY19 Target: 99.99% of scheduled delivery (NextGen MCV Fleet, sustainment) (Met) FY20 Target: 99.99% of scheduled delivery (NextGen MCV Fleet, sustainment) FY21 Target: 99.99% of scheduled delivery (NextGen MCV and ECV Fleet, sustainment)

Description:

The Joint Regional Security Stacks (JRSS) are a joint DoD security architecture comprised of complementary defensive security solutions that remove redundant Information Assurance (IA) protections; leverages enterprise defensive capabilities with standardized security suites; protects the enclaves after the separation of server and user assets; and provides the tool sets necessary to monitor and control all security mechanisms throughout DoD's Joint Information Environment.

<p>Justification:</p> <p>FY 2019: (\$133.836) Procured hardware/software to support JRSS 1.5 and DoD Cyber Situational Awareness Analytic Capabilities tech refresh and enhancements, enabling the ability to collect, aggregate, and review syslog and security event data, perform automated and manual correlation for both cyber defense and application performance monitoring, and perform troubleshooting to support migrations to JRSS. Continued the upgrade of Multiprotocol Label Switching (MPLS) connectivity to support integration with JRSS. DISA procured the following capabilities:</p> <ul style="list-style-type: none"> • JRSS and Joint Management Systems (JMS) Tech Refresh - (\$104.936) Procured hardware and software to support technology refresh enhancements of end-of-life/end-of-support JRSS hubs/spokes in order to keep current with evolving threats. DISA procured the following capabilities: Security and Information Event Management, data brokering, pre-migration discovery, routers, load balancing, Intrusion Prevention System, and Intrusion Detection System. • Cyber Situational Awareness Analytic Cloud (CSAAC) - (\$6.000) Funded procurement, engineering, test, integration, and implementation of analytics supporting JRSS, as well as hardware/software tech refresh/enhancement of associated JRSS capabilities. • Multiprotocol Label Switching (MPLS) - (\$22.900) Upgraded existing connections to provide additional bandwidth and streamlined management in order to support integration with JRSS and handle the additional traffic associated with enhanced cyber SA. <p>FY 2020: (\$88.000) Will procure hardware/software to support JRSS 1.5 and DoD Cyber Situational Awareness Analytic Capabilities tech refresh and enhancements, enabling the ability to collect, aggregate, and review syslog and security event data, perform automated and manual correlation for both cyber defense and application performance monitoring, and perform troubleshooting to support migrations to JRSS. DISA will procure the following capabilities: Security and Information Event Management, firewalls, anti-malware, core switches, and performance monitoring. DISA will procure the following capabilities:</p> <ul style="list-style-type: none"> • JRSS and JMS Tech Refresh - (\$83.000) Will continue to procure hardware and software to support technology refresh enhancements of end-of-life/end-of-support JRSS hubs/spokes in order to keep current with evolving threats. • Cyber Situational Awareness Analytic Cloud (CSAAC) - (\$5.000) Funds procurement, engineering, test, integration, and implementation of analytics supporting JRSS, as well as hardware/software tech refresh/enhancement of associated JRSS capabilities. <p>Explanation of Change from FY 2019 to FY 2020: The decrease of -\$45.836 between FY 2019 and FY 2020 is due to the completion of JRSS 2.0 capabilities in FY19 and reduced hardware/software tech refresh requirements for JRSS/JMS in FY20 based on FY19 upgrades (-\$22.936), and the completion of MPLS acceleration activates in support of Joint Information Environment (JIE) (-\$22.900).</p> <p>FY 2021: (\$88.741) Will procure hardware/software to support JRSS 2.0 tech refresh, enhancements, optimization, and virtual training environment. This will enable the ability to collect, aggregate, and review syslog and security event data, perform automated and manual correlation for both cyber defense and application performance monitoring, and perform troubleshooting to support migrations to JRSS. Cyber Situational Awareness Analytic Capabilities have been integrated into JRSS SIEM. DISA will procure the following capabilities: tech refresh / insertion, performance monitoring expansion, SIEM expansion, firewalls, and virtual training environment support.</p>

Description:

Joint Service Provider (JSP) mission focuses on providing timely, trustworthy, and dependable information technology (IT) services for Pentagon and National Capital Region (NCR) customers. JSP provides the full range of information technology equipment, services, solutions, and customer support to 45,000 customers across the Office of the Secretary of Defense, Headquarters Department of the Army, the Joint Staff, Defense Security Cooperation Agency, and Defense Technology Security Agency to meet mission and business requirements. It enables missions and business processes through secure, robust, reliable state-of-the-art information technology and services.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.										
<p>Justification: FY 2019: (\$99.982)</p> <p>Voice, Data, and Video Infrastructure: (\$1.678) - Provided support of Pentagon/NCR Voice, Data, and Video Infrastructure life-cycle refresh, modernization, and other approved project and initiatives. This included life-cycle refresh (LCR) and modernization of the 3 Pentagon unclassified and classified voice switches, the life-cycle refresh and modernization of Audio Visual (AV) and Video-Teleconference (VTC) hardware and software in the Mark Center Conference Center, Pentagon Conference Center, and the Pentagon Emergency Operations Center. Procured hardware/software for lifecycle replacement for all IT equipment, software, and installation services. JSP provided IT support services for the Office of Secretary of Defense (OSD), Joint Staff, Washington Headquarters Service (WHS), Pentagon Force Protection Agency (PFPA), Consolidated Adjudication Facility (CAF), and other WHS-supported users and communities supported within the Pentagon Reservation and other areas in the National Capitol Region.</p> <p>Server, Compute, and Storage Infrastructure: (\$45.142) - Provided network transport for all Services and Agencies in the Pentagon at all security classification levels. This program included comprehensive network security, computer network defense, and intrusion detection at the DoD Information Networks Pentagon edge. It provided the Pentagon IPN with full spectrum computing and data management, data storage, replication, recovery, and back-up. This program also provided the organizational messaging node for DoD and replaces existing firewalls with the joint computer network defense architecture for the Pentagon node. The program also funded Life Cycle Replacement and Modernization of the Pentagon's core network infrastructure minimizing the risk for increased occurrences/ durations of widespread network outages and higher maintenance costs. The program also provided the capacity needed to meet the Joint Information Environment bandwidth requirements based on the virtualization and continuing alignment of Enterprise services at DoD Core Data Centers.</p> <p>End User Services: (\$39.194) - Provided modernization and life-cycle refresh of office automation and IT end-user infrastructure requirements for the WHS/OSD, the Joint Staff, the DoD CAF, White House Military Office (WHMO), the US Court of Appeals for the Armed Forces, and 14 organizational components of the OSD. Procured approximately 30 office automation, application development, and classified and unclassified end user device support. Provided the back-end server and data storage to support the virtualized desktop as a service infrastructure. This converged and virtualized platform enabled JSP to avoid costly maintenance of individual desktops by deploying a reduced number of disparate user images directly from the server for better management of security patching, improved software license and version control, and ability of JSP-supported staff to work from geographically-dispersed locations.</p> <p>High-Availability (HA) Architecture – Secretary of Defense Communications (SDCs): (\$2.178) - Provided funding for critical business operations, high-availability architecture, and core infrastructure support, at all classification levels, for the immediate Office of the Secretary of Defense.</p> <p>Consolidated Adjudication Facility (CAF) Infrastructure: (\$1.649) - Provided continued support of the DoD CAF, a consolidation to promote and enhance greater consistency, standardization, and efficiency throughout the adjudicative process. The program funded Continuity of Operations IT requirements that supported the sustainment of critical business operations in the event of an emergency.</p> <p>Information Technology (IT) Service Management (ITSM): (\$4.621) - Provided for investments in ITSM tools (hardware, software) required for the management of core classified and unclassified Pentagon/NCR network and cyber operations.</p>										

UNCLASSIFIED

Exhibit P-40, Budget Line Item Justification: PB 2021 Defense Information Systems Agency		Date: February 2020
Appropriation / Budget Activity / Budget Sub Activity: 0300D: Procurement, Defense-Wide / BA 01: Major Equipment / BSA 5: Major Equipment, DISA		P-1 Line Item Number / Title: 97 / Joint Service Provider (JSP)
ID Code (A=Service Ready, B=Not Service Ready):	Program Elements for Code B Items: 0903235K	Other Related Program Elements: N/A
Line Item MDAP/MAIS Code: N/A		
Acquisition, Technology, and Logistics (AT&L) Mission Application Environment Infrastructure: (\$0.520) - Provided funding for hardware and software required for management of the AT&L Mission Application Environment infrastructure.		
4th Estate IT Migration Planning: (\$5.000) - Purchased Network infrastructure and server equipment for DISA Headquarters (HQ) and Defense Technical Information Center (DTIC) HQ to build the backbone of Department of Defense Network (DoDNET).		
FY 2020: (\$107.907)		
Pentagon/National Capital Region (NCR) Information Technology (IT) Modernization (\$104.589) - Will enable modernization and replacement of outdated technologies and capabilities in support of Pentagon/NCR Common IT operations. JSP Modernization efforts covers voice, data, video, messaging, server, storage, cyber security, and end-user computing enhancements in support of the Office of the Secretary of Defense, the Joint Staff, Headquarters Department of the Army, on-boarded 4th Estate IT organizations, as well as tenants in the Pentagon, Mark Center, and other supported leased-facilities across the NCR. Major lines of effort covered under this activity include:		
· Voice, Data, and Video Infrastructure Modernization/Replacement - Will provide modernization/life-cycle refresh of Audio Visual (AV) and Video-Teleconference (VTC) hardware and software in the Mark Center Conference Center, Pentagon Conference Center, and the Pentagon Emergency Operations Center.		
· Communications, Workloads, Compute, and Storage Infrastructure Modernization/Life-cycle Replacement - Will provide for the replacement of end-of life (EOL) legacy IT hardware network devices to strengthen and support comprehensive network security, computer network defense, and intrusion detection at the DoD Information Networks Pentagon edge. Will also implement new technologies in support of the Pentagon/Mark Center Installation Processing Node (IPN) with full spectrum computing and data management, data storage, replication, recovery, and back-up. Will allow information to become more secure, process faster and provide for a more stable and standardized environment. Will procure Life Cycle Replacement and Modernization of end of service IT equipment supporting the Pentagon's core communications network infrastructure and Metropolitan Area Network (MAN), at all three classification levels.		
· End-User Device Modernization - Will provide modernization and life-cycle refresh of end user IT equipment and systems, to include virtualized desktop infrastructure and end-points, workstations (desktops, laptops, tablets, and thin-clients), print/copy/scan hardware, and peripherals and software.		
Secretary of Defense Communications (SDC) Critical Infrastructure Modernization (formally known as High-Availability (HA) Architecture) (\$1.636) - Includes the procurement and purchasing of critical IT equipment (end-user, mobility, software tools, crypto, routers and switches) that will provide critical business operations, high-availability architecture, and core infrastructure support to the Office of the Secretary of Defense (SECDEF). Will ensure critical, dedicated, and secure access to multi-path, resilient, and highly reliable communications capabilities, consistent with the mandated National Leadership Command Capability (NLCC) responsibilities.		
Central Adjudication Facility (CAF) (\$1.682) - Will implement new technologies that will allow information to be more secure, process faster, and promote a work environment that is more stable, standardized, and consistent to meet increasing CAF IT mission needs. Remaining procurement of servers, routers and switches and virtualized software as well as the installation and configuration of the network hardware will be completed in support of the CAF Hyper-Converged Infrastructure in support of 1000 users. This project also includes updating Cyber Security measures that include firewalls, intrusion prevention systems and software defined networking to ensure a secure operating environment.		
Explanation of Change from FY 2019 to FY 2020: The increase of +\$7.925 between FY 2019 and FY 2020 is due to an increase of +\$13.434 to procure IT hardware in support of modernization efforts for Pentagon and National Capital Region supported locations and includes modernization efforts covering voice, data, video, messaging, server, storage, cyber security, and end-user computing enhancements. Modernization of major IT systems and infrastructure and procurement of hardware ensures common commodity baselines to reduce spare parts in order to lower sustainment costs. Additionally, an increase in the Central Adjudication Facility cost (+\$0.033) is attributed to the purchasing of additional network hardware and virtualized software. This is offset by a decrease of -\$0.542 is due to reduction in purchasing critical IT equipment (end-user, routers, and switches) and a decrease of -\$5.000 due to one-time funding for 4th Estate IT Migration Planning used to initiate the program. It will be moved into its own procurement line for FY21 and beyond.

Description:

Fourth Estate Network Optimization (4ENO) is a consolidation effort directed by the Deputy Secretary of Defense in the memorandum, "Fourth Estate Network Optimization Execution Guidance" on 15 August 2019. As part of the Department's ongoing IT Reform efforts, DISA has been designated as the Department's Single Service Provider (SSP) for 4ENO which will consolidate the commodity IT local area networks and service desks associated with 14 Defense Agencies and Field Activities (DAFAs) over the next 5 years. Once completed, the consolidation will collapse 28 unclassified and classified commodity IT networks to a single unclassified and classified network infrastructure. Similarly, components will transition to a consolidated Global Service Desk (GSD) provided by DISA over the next 2 years. Adoption of the Single Service Provider construct is intended to achieve significant gains in the cyber security posture of the Fourth Estate while also driving uniform adoption of enterprise services. Investment funding supports the refresh and/or build-out of local area network infrastructure in support of this effort.

<p>Justification:</p> <p>Defense Enclave Services (DES) Equipment: (\$42.084) - Will acquire network infrastructure hardware (HW) to tech refresh outdated equipment at multiple 4th Estate site locations. Modernized infrastructure includes equipment by number of sites, site size, cabling/integration, migration costs to survey, design, and install all new network equipment. Procured hardware will be used to support the initial build out of DoDNet architecture across DISA, Defense POW/MIA Accounting Agency (DPAA), Defense Technical Information Center (DTIC), Defense Media Activity (DMA), and Defense MicroElectronics Agency (DMEA). Upon deployment and integration, this effort will consolidate multiple networks into a single central managed network. Will tech refresh outdated, end-of-life equipment and provide enhancements to standardize network infrastructure, improve cyber security posture of networks, and strengthen network resiliency across the 4th Estate environment. Hardware will also support network monitoring capabilities critical to perform network discovery and network operation service performance. These capabilities are necessary to quickly identify and mitigate service issues down to the LAN environment. Deployment of hardware and network monitoring capabilities will provide the ability to adjust quickly to changes in DOD/Agency priorities and needs as well as reduce the proliferation of redundant information technology systems and increase visibility of all network connected devices.</p> <p>- DODNet (\$20.702) - Will procure HW replacement of equipment at DMA, DPAA, and DMEA sites which have reached or exceeded end-of-life. Network HW includes the routers, switches, firewalls, intrusion detection systems. File, print, and DNS server equipment will also be replaced in order to standardize to a single common architecture. Standardized equipment enables central management of the network, reducing network operational complexity and increases operational efficiencies</p> <p>- Global Service Desk (GSD) Sites - Secret Internet Protocol Router Network (SIPR) (\$1.696) - Will procure the core network infrastructure necessary to support the global service desk technicians for the SIPRNet environment. Network equipment includes the routers, switches, firewalls, & intrusion detection system. Infrastructure deployed will support global service desk operations in support of DISA, DPAA, DMEA, DMA, and DTIC.</p> <p>- Lifecycle Replacement (\$19.686) - Will procure HW equipment (i.g. firewalls, routers, and switches) for DISA Mechanicsburg, Annapolis Junction, Site R, Annapolis, Chambersburg, Camp Smith, Ford Island, Fort Meade, Montgomery, Wiesbaden, and Yokota locations. Procured hardware will replace equipment which has reached end-of-life. Hardware purchased will be standardized and integrated into the DoDNet environment.</p> <p>Explanation of Change from FY 2020 to FY 2021: The increase of +\$42.084 between FY 2020 and FY 2021 is due to DWR and the initial acquisition of phase 1 equipment to support DoDNet 1st Generation and replace equipment that has reached end-of-life.</p> <p>Performance Metrics:</p> <p>1. Number of Non-classified Internet Protocol Router Network (NIPR) sites equipment purchased FY 2021 - 30 Planned</p> <p>2. Number of SIPR sites equipment purchased FY 2021 - 5 Planned</p>

<p>Description: FY 2019 funding totals include \$12.000 appropriated for Overseas Contingency Operations.</p> <p>Defense Information Systems Network (DISN) is the Department of Defense's (DoD's) consolidated worldwide telecommunications infrastructure that provides end-to-end information transport for DoD operations to the warfighters and the Combatant Commanders with a robust Command, Control, Communications, Computers and Intelligence information long-haul transport infrastructure. The DISN, seamlessly spanning full spectrum from terrestrial to space and strategic to tactical domains, provides the interoperable telecommunications connectivity and value-added services required to plan, implement, and support all operational missions, anytime, and anywhere pushing DISN services to the edge of the communications network. The DISN delivers an integrated platform consisting of DoD's core communications, computing, and information services as well as integrating terrestrial, wireless, and satellite communications into a network cloud that is survivable and dynamically scalable. Procurement funding primarily supports the Technology Refreshment (TR); Joint Worldwide Intelligence Communications System (JWICS); National Emergency Action Decision Network (NEADN)/Presidential and National Voice Conferencing (PNVC); the Enhanced Pentagon Capability (EPC)/Survivable Emergency Conferencing Network (SECN); DoD Mobility; and a significant satellite communications extension of the DISN. The procurement funding enables the DISN to remain technologically up-to date and capable by achieving the best possible balance between network performance and network cost through a process known as network optimization.</p>												
<p>Justification: FY 2019 Overseas Contingency Operations (OCO): Global Broadcast Service (GBS): (\$12.000) Procured and installed equipment to support the Enhanced AISR data transport for operational and tactical users.</p> <p>FY 2020 OCO: Global Broadcast Service (GBS): (\$0.000)</p> <p>Explanation of Change from FY 2019 to FY 2020: The decrease of -\$12.000 from FY19 to FY20 is part of the OCO for Enduring Requirements funding realignment in accordance with the Department's compliance with the Budget Control Act of 2011. This funding transferred to Line Item Number 18 (DISN).</p> <p>Performance Metrics:</p> <p>Number of Terminals:</p>
