Note

Defense Innovation Unit Experimental (DIUx) transfer from OSD (PE 0602230D8Z) to WHS - (Non-Management Headquarters)

The U.S. Department of Defense (DoD) relies on innovation to maintain our nation's ability to deter, and if need be, prevail in conflict. Defense Innovation Unit Experimental (DIUx) increases the Department's access to leading-edge technologies and talent that reside in the commercial sector, with the ultimate goal of accelerating innovation into the hands of the warfighter. Working across the country, and in collaboration with allied international partners, DIUx is developing new ways of doing business, growing our defense industrial base to include "non-traditional" companies that never imagined the military as a potential customer, working with traditional vendors in novel ways to increase efficiency, and challenging innovators to share their tremendous talents on the vital and difficult mission of our nation's defense.

A. Mission Description and Budget Item Justification

Defense Innovation Unit Experimental (DIUx) was established in April 2015 and DIUx 2.0 in May 2016.

DIUx mission is to accelerate innovation the majority of which resides in the commercially- focused technology sector to the warfighter. Initially, DIUx was managed by the Under Secretary of Defense Acquisition, Technology and Logistics, (USD, AT&L) when it was established in July 2015. In May 2016, DIUx was placed under the operational control of the Secretary of Defense and administratively managed by Washington Headquarters Services (WHS) with a functional realignment of \$148.8 million across the FYDP to WHS.

DIUx funds the acquisition and/or prototyping of leading-edge technologies from commercially-focused companies (i.e., "non-traditionals") from Silicon Valley, Boston, Austin, and across the country; as well as from traditional defense contractors that either partner with non-traditionals or offer one-third in cost sharing. DIUx acquires and/or prototypes these commercially viable technologies solutions, in direct response to particular capability gaps faced by our nation's warfighters. As such, solution proposals are assessed to ensure alignment with DoD's strategic objectives to increase and strengthen our nation's security.

A. Mission Description and Budget Item Justification												
DIUx mission is to accelerate innovation to the warfighter by leveraging commercial technology innovations. Initially, this program was managed by the Under Secretary of Defense Acquisition, Technology, and Logistics, (USD, AT&L) with functional realignment of \$148.8 million across the FYDP to Washington Headquarters Services (WHS) beginning in FY 2018. The DIUx program will fund the development of novel leading-edge technologies emerging from high-tech companies that are not traditional defense contractors. An objective of this program is to obtain innovative ideas from industry that have low technology readiness and are of high priority to DoD leadership. Incoming proposals will be assessed to ensure alignment with the DoD's strategic objectives to increase and strengthen our nation's security.												
B. Accomplishments/Planned Programs (\$ in Millions)										FY 2016	FY 2017	FY 2018
Title: Defense Innovation Unit - Experimental (DIUx)										-	-	29.594
FY 2018 Plans:												
The U.S. Department of Defense relies on innovation to maintain our nation's ability to deter, and if need be, prevail in conflict. With outposts in the heart of Silicon Valley and Boston, Defense Innovation Unit Experimental (DIUx) serves as a bridge between those in the U.S. military executing on some of our nation's toughest security challenges and companies operating at the cutting edge of technology. DIUx is an experiment that continuously repeat how best to identify, contract, and prototype novel innovations through sources traditionally not available to the Department of Defense, with the ultimate goal of accelerating technology into the hands of warfighters and keep them on the cutting edge of technology.

Change Summary Explanation

The FY 2016 program will develop, test, pilot, and deploy new integrated business tools that will enhance human resource management, acquisition, and executive services business processes that support Washington Headquarters Services (WHS)/Office of the Secretary of Defense (OSD). Funds will also be used for developing and testing tools that will improve the delivery of IT services and capabilities for all WHS/OSD users.

1. Joint Service Provider (JSP) IT FY 2016 - \$878K.

To develop, test, pilot, and deploy new integrated business tools that will enhance human resource management, acquisition, and executive services business processes that support WHS/OSD. WHS/OSD continues to expand the Engineering, Test and Development networks for NIPRnet and SIPRnet to provide and maintain a centrally managed, "State-of-the-Art", Virtual Environment for OSD, and WHS.

2. Secure Mobile Computing FY 2016 - \$97K

• Joint Service Provider transfer to DISA	0.000	0.000	0.000	0.000	0.000

Change Summary Explanation

The JSP Program will transfer to DISA in FY 2018.

Decrease results from functional transfer of resources as the Defense Information System Agency (DISA) assumes operational control of the Joint Information Service Provider (JSP) in accordance with Deputy Secretary of Defense Directive Memorandum, Consolidation of Pentagon Information Technology Operations, 1 May 2015.

The FY 2017 funding will remain with WHS and executed by JSPs.
