# **Department of Defense Fiscal Year (FY) 2021 Budget Estimates**

February 2020

**Navy**

*Justification Book Volume 1 of 1*

***Procurement of Ammo, Navy & MC***

UNCLASSIFIED

The estimated cost of this report for the Department of the Navy (DON) is \$41,661.

The estimated total cost for supporting the DON budget justification material is approximately \$2,970,459 for the 2020 fiscal year. This includes \$82,977 in supplies and \$2,887,482 in labor.

## **Department of Defense Appropriations Act, 2021**

---

### **Procurement of Ammunition, Navy and Marine Corps**

For construction, procurement, production, and modification of ammunition, and accessories therefor; specialized equipment and training devices; expansion of public and private plants, including ammunition facilities, authorized by section 2854 of title 10, United States Code, and the land necessary therefor, for the foregoing purposes, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway; and other expenses necessary for the foregoing purposes, \$979,544,000 to remain available for obligation until September 30, 2023.

---

FY 2021 Overseas Contingency Operations funding can be separated into the following categories:

- OCO for Direct War Costs (\$95,942,000): Direct War costs are those combat or direct combat support costs that will not continue to be expended once combat operations end at major contingency locations.
- OCO for Enduring Requirements (\$0): OCO for Enduring Requirements are enduring in-theater and in-CONUS costs that will likely remain after combat operations cease, and have previously been funded in OCO.
- OCO for Base Requirements (\$0): OCO for Base Requirements is OCO funding for base budget requirements in support of the National Defense Strategy. The Budget requests these funds in OCO to comply with the base budget defense caps included in the Budget Control Act of 2011.

<b>Description:</b>													
The General Purpose (GP) bombs budget sustains munition component inventory levels as defined in the Navy Munitions Requirement Process (NMRP) model. This model produces inventory requirements based on fleet operational scenarios and the number of weapons required to engage defined target sets. The budget also procures on-going technology integration to optimize the production and capability of products within the Direct Attack Weapons (DAW) portfolio. Inventory levels fluctuate year to year based on changes to the model as tactical targets are reassessed and weapons are expended in tactical operations and training. This variable requirement is assessed and a mean average is used to buffer out the most extreme changes.													
The GP Bombs Budget procures several different categories of munition components. The bomb bodies procured vary in size, construction and explosive fill to provide the desired effect when employed against their targets. The fuzes, aero components, sensors and guidance kits procured provide a variety of detonation options for optimal lethality and flight control options to deliver the weapon to its intended target. A family of fuzes, when installed into the weapon, provides a controlled initiation of the explosive fill when commanded through impact with a target or at a predetermined time. This predetermined time may occur above the ground for a detonation above the target or below the ground after impact to engage deeply buried hardened targets. A basic fixed fin stabilizes the bomb and allows the weapon to travel on a ballistic line of fall as controlled by forward movement imparted by the aircraft and gravity. Laser guided components control the fall of the bomb using movable surfaces and a laser-detecting device to guide the bomb to a location on the ground illuminated by a laser designator.													
There is also funding included in this budget to address a myriad of subcomponents that are used in the assembly of the various weapon configurations, including arming wires, adapters, lugs, nose plugs, aero surfaces, mechanical interfaces, cables and other components required for All Up Round (AUR) configurations. Lastly, this budget funds production engineering, integrated logistics, and product improvement efforts to sustain production and ongoing enhancements to ensure the weapons remain relevant in the environments they are used.

\*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

**Justification:**

This budget supports critical Navy Title 10 war reserve/operational, training and test requirements IAW DoD Instruction 3000.04 (Munitions Requirements Process) and OPNAV INST 8011.9 (Navy Munitions Requirements Process). War reserve requirements support OSD-approved Combatant Commander Operational Plans, Homeland Defense, and other OSD-directed missions. Training requirements support individual and collective training of Active and Reserve Component forces. Test requirements support the verification, fielding, safety and quality assurance of Navy weapons and equipment throughout their life cycle.

FY 2021 baseline funding is required to meet Naval Munitions Requirements Process (NMRP) inventory requirements. This model produces inventory requirements based on fleet operational scenarios and the number of weapons required to engage defined target sets. The budget also procures on-going technology integration to optimize the production and capability of products within the Direct Attack Weapons (DAW) portfolio. Inventory requirements fluctuate year to year based on changes to the model as tactical targets are reassessed and weapons are expended in tactical operations and training. This variable requirement is assessed and a mean average is used buffer out the most extreme changes.

Annual Non-Combat Expenditure Allowance (NCEA) prepares Naval Aviation units for deployment and is the largest cause of current and future General Purpose (GP) bombs procurement. NCEA utilization of GP bombs in support of Fleet readiness continues every year. Procurements are primarily designed to replenish the weapons used each year to achieve required readiness levels. Unlike procurement of capital assets, a large percentage of GP weapons are consumed in annual fleet training expenditures; thereby, reducing the ability to simply adjust procurements a year in response to budget reductions. Barring a reduction in fleet training expenditures and the correlating readiness degradation, any reductions in GP bombs procurements in a given year will have to be addressed with increased procurements in the out years to restore inventory to a level adequate to support NCEA and fleet readiness.

Efforts within this program support JEON PC-0012 Advanced Mining.

**OCO:**

FY 2021 Direct War (OCO) funding request in the amount of \$8.068M is required to replenish bomb components that were expended in direct support of combat operations in theater. These operations are in support of Operation Inherent Resolve.

"A" in the Delivery Schedule indicates the Contract Award Date.

**Note:** Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

<b>Description:</b>													
The Joint Direct Attack Munition (JDAM) program is a joint Air Force/Navy program with the Air Force as the lead service. Designated ACAT 1C, this program upgrades the existing inventory of general purpose bombs (BLU-111, BLU-117, BLU-110, BLU-109, and BLU-126) by integrating the bombs with a field installed guidance kit using a Global Positioning System-aided Inertial Navigation System (GPS/INS). JDAM provides an accurate, adverse weather capability. JDAM is integrated with the B-52H, B-2A, B-1B, F-16 (all variants), F/A-18A+/C/D/E/F, F-15E, AV-8B, A-10C and F-22A aircraft. Integration with the MQ-9 and F-35 are in progress.													
JDAM guides the bomb with movable surfaces that steer the bomb to a target based on a Global Positioning Satellite (GPS) coordinate. There is also a family of weapons which combine GPS and laser capabilities to provide a Dual Mode weapon (procured under 0145 General Purpose Bombs): Laser Joint Direct Attack Munition (LJDAM). The component that is added to the 500 lb. and 2,000 lb. JDAM to provide the Laser capability is the DSU-38 and DSU-42 respectively. The DSU-38 and DSU-42 Precision Laser Guidance Set (PLGS) contains a Semi-Active Laser to engage moving and stationary targets and an adjustable proximity sensor to provide an airburst capability. LJDAM is the material solution for the Direct Attack Moving Target Capability (DAMTC).													
Pursuant to section 2308 of Title 10, U.S. Code, this program will seek cost efficiencies where available through production lot negotiations.

*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.									
Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.									
<b>Justification:</b> FY 2019 does not include the FY 2020 enacted congressional rescission of \$16.574 million to FY 2019 OCO funding									
FY 2021 baseline funding is required to meet Naval Munitions Requirements Process (NMRP) inventory objectives.									
Efforts within this program support JEON PC-0012 Advanced Mining.									
<b>OCO:</b> FY 2021 Direct War Overseas Contingency Operations (OCO) funding is required to replenish JDAM expended in direct support of Operation Inherent Resolve (OIR). Funding may be used to address OCO production related issues.

<b>Exhibit P-5, Cost Analysis:</b> PB 2021 Navy		<b>Date:</b> February 2020
<b>Appropriation / Budget Activity / Budget Sub Activity:</b> 1508N / 01 / 1	<b>P-1 Line Item Number / Title:</b> 0148 / JT Direct Attack Munition (JDAM)	<b>Item Number / Title [DODIC]:</b> 1 / JT Direct Attack Munition (JDAM) Tail Kit
<b>ID Code</b> (A=Service Ready, B=Not Service Ready) :		<b>MDAP/MAIS Code:</b>
(1) Generally, JD500-JDAM Tail Kit Unit prices may vary outside the allowable year to year inflation based on the quantities and combinations of variants being procured each year. There are three tail kit variants that are procured and unit costs are derived from a simple average of the three variants (non-weighted). FY 2019 unit cost updated based on actual contract award. Unit price is lower as over 50% of the USN procurement consisted of the least expensive of the three tail kit variants (KMU-572-500lb). FY 2020 unit cost updated in anticipation of lesser unit cost based on FY19 actuals. FY 2019 does not include FY 2020 enacted rescission of \$16.574M FY 2019 OCO.		
(2) JD850 Miscellaneous Support - Funds activities related to the integration of Global Positioning System (GPS) M-Code per DoD mandate, which impacts overall system to include computer processor. This cost element includes parts obsolescence, associated production acceptance and test, ancillary support cost and product improvement.		
(3) JD870 JDAM QS-ER - Funding supports NAVSEA's JDAM Quick Strike Extended Range mine employment.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

<b>Description:</b> Combat and training inventory requirements of rocket and rocket components establish the Total Munitions Requirement (TMR) in accordance with the Naval Munitions Requirements process (NMRP). Production is for complete units/operationally configured units to satisfy the requirement of applicable specifications of Airborne Rockets, All types.													
The 2.75-inch and 5.00-inch rocket motor variants are employed by both rotary and fixed wing platforms in the Close Air Support (CAS), Military Operations in Urban Terrain (MOUT), and counter-Fast Attack Craft/Fast Inshore Attack Craft (counter-FAC/FIAC) mission areas. The 2.75-inch rocket configured with Advanced Precision Kill Weapon System (APKWS) enables a resilient and precise weapon in support of close combat lethality in complex terrain.													
The variety of warheads enable fleet users to maintain operational flexibility, better target-mission matching for specific applications and effects, and permit logistic agility. Warheads include the Mk-152 Insensitive Munitions (IM) compliant warhead for shipboard operations with APKWS guidance sections, and M282 Multi-Purpose Penetrator (MPP)warhead. Inert warheads are used extensively when range restrictions preclude live applications.													
The Smokey Sam Simulator System is a pyrotechnic visual cueing device primarily utilized in aircrew training to mimic a Surface to Air Missile threat. The system is currently qualified for land and at sea use.													
Rocket Launchers provide guided and unguided rocket launch capability for 2.75 Inch Rockets including the LAU-61 G/A Digital Rocket Launcher (DRL),LAU-61 C/A, and LAU-68 F/A.													
Advanced Precision Kill Weapon System (APKWS) is a low-cost Semi Active Laser (SAL) guidance section to enhance the precision of 2.75-inch unguided rockets. APKWS is a small, lightweight, mid-body guidance section that can be assembled with existing unguided rocket components and can be fired from 2.75-inch rocket launchers. Compared to unguided rockets, APKWS sustains Joint Force military advantage by offering greater precision, increased stored kills per aircraft sortie, reduces collateral damage, improves effectiveness against soft and lightly armored targets, and enhances close combat lethality and crew survivability through increased standoff ranges.													
A variety of containers are required to support shipping, handling and storage of all up round rockets and rocket components. The program re-manufactures existing containers and procures new containers as needed.													
Miscellaneous Items provides for procurement of various rocket components not to exceed a total cost of 500K per year per component.

Product Improvement (PIP) provides for rapid iterative modifications and upgrades to products within Airborne Rockets, All types. Efforts include configuration changes involving production, engineering, manufacturing, installation and testing that increases system or combat effectiveness to extend the useful military life of an item, and/or to improve the item within the current performance envelope.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

**Justification:**

The FY 2021 funding request was reduced by \$3.400 million to account for the availability of prior year execution balances.

FY 2021 baseline funding is required to procure 2.75-inch rocket components - to include rocket motors, warheads, Advanced Precision Kill Weapon System (APKWS) guidance sections, rocket launchers and containers - to enable low-cost area suppression as well as precision engagements from US Marine Corps (USMC) H-1, AV-8B, and F/A-18A-D aircraft in low collateral damage Close Air Support (CAS) operations, and from US Navy (USN) H-60 aircraft to neutralize Fast Attack Craft/Fast Inshore Attack Craft (FAC/FIAC) threats.

In addition, FY 2021 funding is required to address product improvements needed for obsolete components designed and produced over 40 years ago as well as the production engineering and integrated logistics support efforts needed for all 2.75-inch rocket components. Airborne Rockets product improvement efforts are required to reduce production cost, extend component life and to improve Combat effectiveness on pace with platform Combat system improvements.

**OCO:**

FY 2021 Direct War OCO funding is required to replenish munitions and components that were expended in direct support of combat operations in theater. These operations were in support of Operation Inherent Resolve (OIR).

MK-66 rocket motors are required for combat operations and to maintain the rocket motor inventory required levels. The MK-66 motor is used as the component motor in all 2.75-inch rocket configurations. Due to an increase in pre-deployment training as well as combat operations, additional procurements are required to maintain the operational capability of the warfighter and to ensure inventory is maintained.

Rocket Launchers provide unguided rocket launch capability for 2.75 Inch Rockets including the LAU-61 C/A.

Advanced Precision Kill Weapon System (APKWS) OCO is required to replenish combat expenditures in support of OCO operations.

Containers OCO is required to support shipping, handling and storage of all up round rockets and rocket components being procured.

<b>Exhibit P-40a, Budget Item Justification For Aggregated Items:</b> PB 2021 Navy		<b>Date:</b> February 2020
<b>Appropriation / Budget Activity / Budget Sub Activity:</b> 1508N / 01 / 1	<b>P-1 Line Item Number / Title:</b> 0151 / Airborne Rockets, All Types	<b>Aggregated Items Title:</b> Airborne Rockets, All Types
<b>Footnotes:</b>		
(1) (Q5040) MK 66 ROCKET MOTOR (MOD 4): Pricing is provided by the Army and incorporates other customer buys. The unit price fluctuates depending on the total procurement. Increase in FY 2021 OCO is required to replenish decreasing inventory levels because of OCO operations.		
(2) (Q5030) WTU1/B INSERT WARHEAD: Pricing provided by the Army and incorporates other services' buys. Baseline unit cost is dependent on total quantities from the Army. Increase in FY 2021 OCO is required to replenish decreasing inventory levels because of OCO operations.		
(3) (Q5896) APKWS G&C SECTIONS: Pricing is provided by the Navy and depends on other customer buys. The unit price fluctuates depending on the total procurement between other services and FMS customers. FY 2020 and out APKWS unit price updated based on prior year actuals. Funding realigned to additional WTU-1/B (FY 2020) and MK-66 (FY 2021-FY 2025) quantities to support inventory requirements.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

**Footnotes:**

<sup>(5)</sup> (Q5040) MK66 Annual Production Rates are TBD and will be identified once the competitive contract is awarded in FY 2020.

<sup>(9)</sup> (Q5896) APKWS G&C SECTIONS : Minimum Sustaining Rate is satisfied by multi-service procurements.

<sup>(10)</sup> (Q5896) APKWS G&C SECTIONS FY19 Base original order in February 2019 with additional quantities ordered in September 2019. Delivery schedule reflects deliveries across the two orders.

<b>Description:</b> FY 2021 funding totals include \$11.158M for Base and \$22.6M for Overseas Contingency Operations (OCO) to replenish stocks depleted in support of Operation Inherent Resolve.  Provides procurement of 20MM/25MM ammunition that supports various aircraft gun systems for several Type/Model/Series (T/M/S) aircraft. Funding also includes the integrated logistics support, product engineering support and product improvement programs in support of the ammunition procurements.  The ammunition procurements fall into three categories: Target Practice (TP), High Explosive Incendiary (HEI), and inert. The TP and inert rounds are used for training. The HEI rounds are used for warfighting and training and also include Semi Armor Piercing High Explosive Incendiary(SAPHEI) rounds.  All 20MM/25MM ammunition is procured by the Joint Munitions Command, Rock Island, Illinois.  20MM rounds are procured in both linkless and linked configurations. The linkless (or bulk) rounds are used in the M61A1/A2 Gun Systems in the F/A-18 aircraft and the M197 Linkless Feed Gun System on the AH-1W/Z aircraft. The linked rounds are used in the M197 gun on MH60 aircraft for the Fixed Forward Firing Weapon (FFFW).  25MM rounds are procured in the linkless configuration and are used in the GAU-12 Gun System in the AV-8B aircraft and the GAU-22 Gun System in the F-35B&C.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

**Justification:**

FY 2021 baseline funding is required to procure 20MM Linkless TP requirements and inert rounds and associated support. Provides procurement of 20MM ammunition that supports various aircraft gun systems for several Type/Model/Series (T/M/S) aircraft.

**OCO:**

Direct War OCO funding in FY 2021 is required to replenish stocks depleted in support of Operation Inherent Resolve for the 20MM Linkless TP, TP-T, and HEI.

"A" in the Delivery Schedule indicates the Contract Award Date.

**Note:** Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

<b>Description:</b>													
The purpose of the Practice Bombs budget is to procure a variety of low cost alternative practice bombs components to be utilized in place of live, High Explosive bomb components during training in order to improve aircrew proficiency. The practice bombs support training for ground crews and aviators flying various Navy and Marine Corps aircraft. The munitions procured through this PE/BLI are procured by the Joint Munitions Command, the Single Manager for Conventional Ammunition, with the exception of the Laser Guided Training Round, which is procured by NAVAIR.													
The MK-76 is a low cost 25lb tear dropped shaped practice bomb that simulates a MK-82 low drag configuration used by the Navy. The MK-82 is an unguided, low-drag practice bomb. The BLU-109 Inert is a full-scale 2,000lb inert Practice Bomb. Bomb bodies are filled with an inert material and have the same weight, size, center of gravity and ballistics of the live bomb configurations.													
The Laser Guided Training Round (LGTR) simulates Laser Guided Weapons and provides a low cost alternative to the use of full scale munitions. The LGTR is capable of replicating the kinematics of LGBs and is suitable for launch from all Navy and Marine Corps aircraft used to deploy LGBs. The round allows the aviator to exercise the coordination between the aircrew and the laser designator and to emulate delivery options and multi-aircraft tactics. The development and retention of this skill set is extensive and the LGTR provides the capability to exercise the system in a cost effective manner.													
The Miscellaneous Items line includes low cost items such as M70 series cables, MK-89 Adapters, Landyards, Lugs, Nose Plugs, containers, etc.													
The Product Improvement Program (PIP) cost element funds efforts to investigate and incorporate design changes to address manufacturing, production and minor technology insertions to modify and improve practice stores system reliability and producability.

**Justification:**

FY 2021 baseline funding is provided for training munitions requirements that are based on the needs of the Fleet Aviation Training and Tactical Squadrons and are updated with actual expenditures on an annual basis. The munitions are essential in training and retaining weapons delivery proficiency.

This budget supports critical Navy Title 10 war reserve/operational, training, and test requirements as identified within the DoD Instruction 3000.04 (Munitions Requirements Process) and OPNAV INST 8011.9 (Navy Munitions Requirements Process). Practice Bomb procurements provide the Fleet subscale and/or inert stores in lieu of significantly more expensive full scale and/or high explosive stores procured with General Purpose Bombs funding; thereby reducing the overall cost in achieving fleet training readiness levels.

The annual disbursement of training munitions is done via a Non-Combat Expenditure Allocation (NCEA) and provides the individual units with an allocation under which they plan their annual training syllabuses. Additionally, training/inert munitions support the development, fielding, safety, and quality assurance of Navy munitions and equipment throughout their life cycle.

These munitions support the individual and collective training of Active and Reserve Component forces. The annual expenditures of practice stores prepares Naval Aviation units for deployment and is the largest driver of current and future munitions procurement. Procurements are primarily designed to replenish the practice bombs weapons used each year to achieve required readiness levels. Unlike procurement of capital assets, a large percentage of weapons are consumed in annual fleet training expenditures; thereby reducing the ability to simply slide procurements a year in response to budget reductions. Barring a reduction in fleet training expenditures and the correlating readiness degradation, any reductions in practice bomb procurements in a given year will be addressed through increased procurements in the out years to restore inventory to a level adequate to support NCEA and fleet readiness.

"A" in the Delivery Schedule indicates the Contract Award Date.

**Note:** Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

<b>Description:</b>															
FY 2021 funding totals include \$64.694 million for Base and \$3.927 million for Overseas Contingency Operations (OCO).															
Cartridge Actuated Devices/Propellant Actuated Devices (CAD/PAD) program's mission is to procure 676 distinct service life-limited explosive/energetic devices. These devices perform critical safety functions in support of flight operations. Specifically, these devices are in US Navy Naval Aircrew Common Ejection Seat (NACES), Aircraft safety of flight components, aircrew survival equipment and weapon systems release systems. The CAD/PAD yearly requirement is modeled on the total reported active aircraft as per the Office of the Naval Operations' (OPNAV). The quantity for these unique requirements vary due to the distinct energetics of each CAD/PAD service life. Extending service life of CAD/PAD components beyond recommended use due to unavailability can pose a significant safety risk to aircrew.															
Prior year reductions of inventory pipeline and decreased stock levels have taken some individual stock availability down to zero. The reduced levels have significantly increased the need for service life extensions on safety critical components. The budget increase beginning in FY 2021 will help to rebuild pipeline over time which decreases service life extensions to improve aircraft readiness and aircrew safety.															
Hardware-Stores Release: Stores Release cartridges are utilized to release weapons and other stores from aircraft. The CCU-107 is utilized to release "light" weapons/stores from aircraft. The CCU-45 (MD65) is utilized to release "heavy" weapons/stores.															
Hardware-Safety: Items such as safety/arming devices, sequence controls, shielded mild detonating cords, gas generators, initiators, thrusters, fire extinguisher cartridges, thermal batteries, rocket motors, catapults, and more, are used in aircraft emergency escape and safety systems. These explosives/energetics have finite service lives and are replaced during scheduled maintenance. An aircraft may be grounded if a single one of these items does not meet service life recommendations and cannot be extended. Other items procured such as FLU-12/P Deck Crew Life Vest Inflator and the FLU-8B/P automatic life vest inflator are essential to crew survival after ejection or being thrown overboard.															
T-6A (JPATS): Funding provides Under Seat Rocket Motor, Impulse Cartridge, Internal Canopy Mechanical Actuated Initiator, Seat Movement Mechanical Actuated Initiator, External Canopy Mechanical Actuated Initiator, Laser Initiator, Donor Assembly, Manifolds, Shielded Mild Detonating Cord Transfer Line and Holder Assembly.

<b>Line Item MDAP/MAIS Code:</b> N/A  Misc. Devices Under \$500k: Safety CAD/PAD devices typically priced under \$500k are procured yearly under this budget line, not limited to, but include: 1W18 Explosive Separator, JL96 Rocket Catapult, MJ98 Cartridge Actuated Initiator, SU58 Mild Detonating Cord Set, XW53 Explosive Sequence Control. Misc. Devices consist of roughly 608 unique components which range from \$160 to \$20K; the unit cost varies based on Economic Order Quantities, which vary from budget to budget for planned procurements.

\*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications. Title represents the P-40a Title when only the P-40a Summary/Total is shown.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

**Justification:**

FY 2021 baseline funding is required to support fleet requirements that take into account the aircraft inventory, maintenance cycle and aircraft installed Cartridge Actuated Devices/Propellant Actuated Devices (CAD/PAD) service life, on-hand inventory, procurement lead-time, historical costs and projected contract delivery date. Funding is also required for production engineering support and lot acceptance testing. Product Improvement Programs (PIP) are used to address second source qualification, address safety of design and quality manufacturing efforts. Obsolescence identifies and qualifies replacement propellants for CAD/PAD due to obsolescence of ingredients and/or diminishing sources of supply.

The yearly requirements are modeled based upon the active aircraft in the OPNAV A-II Aircraft Inventory Budget, which feeds into the CAD/PAD Requirements Determination Module (RDM). The RDM accounts for the changing number of aircraft, platform availability, and unique component service lives of all procured commodities and respective quantities, which vary from year to year.

**OCO:**

FY 2021 Direct War OCO request funds the safety critical MT29 Parachute Deployment Rocket Motors (PDRMs), the WB15/WB55 cartridge actuated initiators, miscellaneous devices and WB16/MD65/MT95 Impulse Cartridges to replenish projected inventory shortfalls for a total of \$3.927 million.

**Footnotes:**

(1) CADPAD Budget funds numerous small dollar items that are critical for readiness and aircrew safety. Fluctuations in the requirements across the FYDP are based on the Fleet's actual need. Requirements are determined using the number of active aircraft in the OPNAV A-II Aircraft Inventory Budget and then processed in the Requirements Determination Model which calculates the requirements using the unique service life data, on-hand inventory, procurement lead times, historical cost and projected contract delivery dates. This applies to (Q2070) MK 122 Parachute Deployment RCKT Motor (MT29), (Q8071) MK 123 Underseat RCKT Motor (MT30), (Q8081) MK 124 Underseat RCKT Motor (MT31), (Q8160) JAU-74 INIT / CCU-146 CTG (WB15/16), (Q8180) F-18 DIFRS (SR95/WB19), (Q8300) Navy Aircrew Common Ejection Seats, 2.10)(Q8301) F-18/E/F/G and V-22 Fire Suppression Gas, (Q8302) T-6A (JPATS).

<b>Exhibit P-40a, Budget Item Justification For Aggregated Items:</b> PB 2021 Navy		<b>Date:</b> February 2020
<b>Appropriation / Budget Activity / Budget Sub Activity:</b> 1508N / 01 / 1	<b>P-1 Line Item Number / Title:</b> 0180 / Cartridge Actuated Devices/Propellant Act Devices	<b>Aggregated Items Title:</b> Cartridge Actuated Devices/Propellant Act Devices
(2) 2.1) (Q8060) CWDR Thermal Batteries procurement zeroed out by Congressional adjustment in FY 2019 and FY 2020. Inventory levels are projected to fall below minimum levels necessary for aircraft readiness requirements. FY 2021 procurements are critical to avoid impacting future aircraft readiness.		
(3) 2.2) (Q2070) MK122 PDRM cost element was reduced by Congressional adjustment in FY 2019 and zeroed by Congressional adjustment in FY 2020. Inventory levels are projected to fall below minimum levels necessary for aircraft readiness requirements. FY 2021 procurements are critical to avoiding impacting future aircraft readiness.		
(4) 2.6) (Q8140) FLU-8/9/12 Inflators - The FLU-8/9/12 cost element only funds 2 of the 3 items now: the FLU-8 (FW98 - used on the LPU-23 and LPU-36 Life Preservers) and the FLU-12 (JL09 - used on the MK-1 Life Preserver) Automatic Inflation Devices. Fluctuations in the requirements across the FYDP are based on the Fleet's actual need.		
(5) 2.7) (Q8160) JAU-74 INIT / CCU-146 CTG (WB15/16) cost element funds 2 items.		
(6) 2.9) (Q8300) Navy Aircrew Common Ejection Seats - cost element funds 7 items.		
(7) 2.10)(Q8301) F-18/E/F/G and V-22 Fire Suppression Gas - this cost element funds 6 items.		
(8) 2.11) (Q8302) T-6A (JPATS) CAD/PADs cost element funds 28 safety CAD/PAD items that are unique to the T-6 and are awarded over 5 contracts. These devices are within the aircraft's escape and safety systems.		
(9) 3.1) (Q8600) Misc. Devices Under \$500k cost element - Fluctuations to the MISC Devices Under \$500K to support fleet requirements to replenish diminishing inventory as a result of active aircraft, platform availability and component service life. The number of active aircraft reported in the OPNAV A-II Aircraft Inventory Budget that CAD/PAD supports directly correlates to fluctuations in requirements to ensure adequate assets are available for Fleet support and operational readiness.		
(10) 6.1) (Q8330) Stores Release PES exceeds normal inflation from 2020 to 2021 due to Hazards of electromagnetic Radiation Ordnance (HERO) validation and Seat upgrade/testing that will begin in 2021.		
(11) 10) (Q8870) Obsolescence Cost element identifies and qualifies replacement propellants for CAD/PAD due to obsolescence of ingredients and/or diminishing sources of supply.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

<b>Description:</b>																	
The Air Expendable Countermeasures (AECM) line provides funding for procurement of countermeasure self-protection devices for all United States Navy (USN) and United States Marine Corps (USMC) tactical, rotary and other fixed-wing aircraft. AECM supports fleet aircrew training, readiness and operational combat requirements for all USN and USMC aircraft. The AECM Program is divided into the following threat related groupings: (1) Active Jammers (2) Infrared (IR) Decoys (3) associated impulse cartridges (4) Chaff Countermeasures and (5) F-35 Countermeasures.																	
ACTIVE JAMMERS: Current Active Jammer is ALE-55 Fiber Optic Towed Decoy (FOTD). The FOTD, when integrated with the rest of the F/A-18E/F Electronic Warfare (EW) suite (i.e., ALQ-214, ALR-67(V)3, ALE-47, ALE-50) and with the associated cockpit controls, displays and other avionics, significantly improves the survivability of the host aircraft in a Radio Frequency (RF) threat environment. The FOTD is part of the Integrated Defensive Electronic Countermeasure (IDECM) Radio Frequency Countermeasure (RFCM) Block 3 (IB-3) program. FOTD was developed utilizing Research, Development, Test & Evaluation, Navy, Program Element 0604270N, Project Unit 2175. Dual Band Decoy (DBD) is a future active jammer with a development contract that awarded in FY 2019. DBD will replace the ALE-55 FOTD and significantly improve F/A-18E/F survivability against emerging radar guided threats. DBD will utilize Research, Development, Test & Evaluation, Navy, Program Element 0604270N, Project Unit 2175. DBD procurements will begin in FY 2022.																	
IR DECOYS: The MJU-32/38/49 are currently used by all aircraft except the KC130J/T to provide self-protection from surface-to-air/air-to-air IR missiles. The MJU-61/64 are used on the KC-130J/T, UC-35D, UC-12W and F-35B/C aircraft to provide self-protection from surface-to-air/air-to-air IR missiles. The SM875 is a dedicated, low cost training device. The MJU-61 is also a low cost F-35B/C training device. The MJU-57 provides a kinematic IR countermeasure to defeat specific Man-Portable Air Defense Systems (MANPADS) used on the F/A-18, MV-22 and KC-130J. The MJU-66 is an advanced spectral countermeasure in support of KC-130J/T and UC-35D. The MJU-67 Multi-spectral flare provides an enhanced spectral signature required for USN/USMC aircraft self-protection against accelerated proliferation of advanced MANPADS.																	
IMPULSE CARTRIDGES: Used to propel the self-protection devices away from the aircraft. The CCU-136 is used by all airframes except the KC-130J/T, UC-12W and UC-35D. The CCU-145 is used on KC-130J/T, UC-35D, UC-12W and F-35B/C. The CCU-41 is used on F/A-18E/F for deploying ALE-50 Advanced Airborne Expendable Decoy (AAED).																	
CHAFF COUNTERMEASURES: The RR-129 is the operational round used on all USN/USMC aircraft platforms, except the USMC KC-130J/T, UC-12W and UC-35D in a RF threat environment. The RR-144 is a RF dedicated training round that does not interfere with Federal Aviation Administration tracking radars. The RR-170 is the operational round procured in support of the KC-130J/T, UC-12W and UC-35D.

<b>Line Item MDAP/MAIS Code:</b> N/A	F-35 COUNTERMEASURES: PMA272 operating under a PEO(JSF)-PEO(T) Memorandum of Agreement procures F-35 countermeasures for all global participants under a combined contracting strategy to gain unit price efficiencies while meeting global operational requirements. F-35 program includes unique countermeasures that provide self-protection for the Joint Strike Fighter (JSF) aircraft, specifically ALE-70 and MJU-68. In addition to F-35B/C unique countermeasures, MJU-64/66s are used for F-35B/C self-protection. The RR-198/AL is a chaff countermeasure addressing survivability against emerging advanced RF threats on F-35B/C aircraft and may be applied to other platforms in the future. The RR-199/AL is a dedicated, low cost chaff training device.

\*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications. Title represents the P-40a Title when only the P-40a Summary/Total is shown.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

**Justification:**

In accordance with ORD: #512-88-89 dated 28 May 99, Air Expendable Countermeasures program is tasked with maintaining an operationally effective mixture of countermeasures that can degrade and/or neutralize the effectiveness of current and/or projected threats and provide pre-emptive, area and point source devices that must be compatible with Night Vision Goggles (NVG). ORD: #512-88-89 mandates Product Improvement Program (PIP) and Production Engineering Support (PES) to ensure expendables are cost effective, environmentally friendly and Hazards of Electromagnetic Radiation to Ordnance (HERO) safe.

FY 2021 baseline funding is required to procure Active Jammers, IR Decoys, Impulse Cartridges, Chaff Countermeasures, F-35B/C Countermeasures and associated support for USN and USMC tactical, rotary and other fixed-wing aircraft to meet Fleet inventory levels requirements, based on Naval Munitions Requirements Process (NMRP) Combat Requirement. These proven countermeasure devices provide pre-emptive or terminal and reactive self-protection for all Navy and Marine Corps strike, assault, rotary wing, and other fixed wing aircraft from Radio Frequency (RF) or Infrared (IR) guided missile attack and other advanced threats. In FY 2021, \$18.6M realigned from Active Jammers to F-35 Countermeasures and Integrated Logistics Support (IR Decoys) to increase inventories and support F-35C deployments.

**OCO:**

FY 2021 \$15.978M Overseas Contingency Operations (OCO) funding request supports countermeasure replenishment of self-protection devices that have been expended in direct support of combat operations for Operation INHERENT RESOLVE.

Note: Subtotals or Totals in this Exhibit P-40a may not be exact or sum exactly, due to rounding.

(t) indicates the presence of a P-5a

**Footnotes:**

- (1) (a) Unit cost for hardware in FY 2021 reflect either actual contract pricing or inflation of previous year's unit cost. (b) Deliveries funded by different fiscal year appropriations occasionally overlap (P21 Delivery Schedule) to ensure inventory goals are met without exceeding maximum production rates.
- (2) FY 2021 funds transferred from Active Jammers to F-35 Countermeasures to increase inventories to support F-35C deployments.
- (3) ALE-55 (FOTD) FY 2020 unit cost increases from lower quantity buy due to funds moved into F-35 Countermeasures from Active Jammers to support F-35C deployments.
- (4) MJU-32 FY 2019 procurement added to address inventory shortfall based on Navy priorities.
- (5) MJU-57 FY 2019 procurement removed to address inventory shortfall on other countermeasure devices based on Navy priorities.
- (6) MJU-64 FY 2019 procurement added to address inventory shortfall based on Navy priorities.
- (7) MJU-66 FY 2021 unit cost is based on negotiated contract pricing for planned quantity.
- (8) MJU-67 FY 2021 unit cost is comprised of negotiated contract pricing for raw materials and estimated labor rate for organic manufacturer for planned quantity.
- (9) SM875 FY 2020 OCO unit cost increase above inflation based on actual contract step ladder pricing for lower quantity procurement.
- (10) CCU-136 FY 2019 quantities adjusted based on Navy priorities.
- (11) ALE-70 Unit cost decrease based on negotiations for combined procurements for DoD, International Partners and Foreign Military Sales and savings from should cost initiatives, resulting in increased quantities to support inventory requirements. FY 2021 unit cost reflects maximum quantity discount with combined procurements. FY 2021 funds transferred into F-35 Countermeasures from Active Jammers to increase inventories to support F-35C deployments.
- (12) MJU-68 FY 2019 and FY 2020 increase to address existing, known procurement shortfalls to support F-35B deployments. FY 2021 funds transferred into F-35 Countermeasures from Active Jammers to increase inventories to support F-35C deployments. Unit cost updated based on best-known pricing established on undefinitized contract awarded May 2019 and reflects decrease due to contracting directly with manufacturer, thereby eliminating production overhead.
- (13) RR-198 FY 2021 Low Rate Initial Production (LRIP) begins on new F-35 advanced chaff.
- (14) RR-199 FY 2021 Low Rate Initial Production (LRIP) begins on new F-35 advanced training chaff.
- (15) 6.1 (ILS Active Jammers) FY 2021 funds transferred from Active Jammers to support F-35C deployments.
- (16) 7.1 (PES Active Jammers) FY 2021 funds transferred from Active Jammers to support F-35C deployments.
- (17) 7.5 (PES F-35 Countermeasures) FY 2019 increase due to ALE-70 Non-Recurring Engineering (NRE) for diminishing manufacturing sources.

**UNCLASSIFIED**

<b>Exhibit P-40a, Budget Item Justification For Aggregated Items:</b> PB 2021 Navy	<b>Date:</b> February 2020
<b>Appropriation / Budget Activity / Budget Sub Activity:</b> 1508N / 01 / 1	<b>P-1 Line Item Number / Title:</b> 0182 / Air Expendable Countermeasures

(18) Acceptance Test and Evaluation funding varies annually based on countermeasure production deliveries and type of Lot Acceptance Testing required.

(19) 9.4 (ATE F-35 Countermeasures) FY 2020 increase above inflation for lot acceptance test requirements associated with increased quantity for MJU-68 procurement to support F-35B deployments.

**Footnotes:**

- (20) ALE-55 FY 2020 contract award moved from Nov 2019 to Jan 2020 due to an extended evaluation period. No corresponding change to the first delivery date anticipated.
- (21) MJU-32 FY 2020 competitive award will determine vendor and production rates.
- (22) MJU-38 FY 2021 competitive award will determine vendor and production rates.
- (23) MJU-49 FY 2021 competitive award will determine vendor and production rates.
- (24) MJU-57 FY 2017 production interrupted due to higher priority workload. The first article test build to resume production is scheduled for June 2020.
- (25) MJU-61 contract is a multiple award to Armetec Countermeasures Co. and Kilgore Flares Co.
- (26) MJU-61 FY 2021 competitive award will determine vendor and production rates.
- (27) MJU-67 FY 2018 deliveries delayed for Lot acceptance testing (LAT) failure due to improperly installed pressed igniter pellets. Manufacturer successfully completed the engineering evaluation to determine corrective action. Further break in production due to explosive incident on a different device, resulting in plant shutdown during investigation. Production resumed May 2019.
- (28) MJU-67 FY 2018 OCO deliveries delayed for Lot acceptance testing (LAT) failure due to improperly installed pressed igniter pellets. Manufacturer successfully completed the engineering evaluation to determine corrective action. Further break in production due to explosive incident on a different device, resulting in plant shutdown during investigation. Production resumed May 2019.
- (29) SM-875 FY 2016 deliveries delayed for Lot acceptance testing (LAT) failure due to improperly installed igniter pellets. Manufacturer successfully completed the engineering evaluation to determine corrective action. Further break in production due to explosive incident on a different device in Dec 2018, resulting in plant shutdown during investigation. Production resumed October 2019.
- (30) CCU-41 FY 2021 competitive award will determine vendor and production rates.
- (31) RR-129 FY 2021 competitive award will determine vendor and production rates.
- (32) RR-144 FY 2021 competitive award will determine vendor and production rates.
- (33) MJU-68 FY 2018 Undefinitized Contract Action awarded to Chemring, AU to augment existing manufacturing capacity to increase inventory to support F-35B/C deployments.
- (34) MJU-68 FY 2019 Undefinitized Contract Action awarded to Chemring, AU to augment existing manufacturing capacity to increase inventory to support F-35B/C deployments.
- (35) MJU-68 FY 2021 competitive award will determine vendor and production rates.
- (36) RR-198 FY 2021 contract award will determine production rates.
- (37) RR-199 FY 2021 contract award will determine production rates.

(‡) Delivery rows marked with this symbol indicate that they are funded through a separate Line Item. See the respective components' exhibits for details, including the full delivery schedule.

"A" in the Delivery Schedule indicates the Contract Award Date.

**Note:** Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

**Footnotes:**

<sup>(35)</sup> MJU-68 FY 2021 competitive award will determine vendor and production rates.

<b>Description:</b> Jet Assisted Take Off (JATO) / Rocket Assisted Take Off (RATO) are solid propellant rocket motors used in matched pairs to launch subsonic aerial targets in support of fleet training wholeness initiative, and test and evaluation, in support of Acquisition Category (ACAT) programs.													
RATO is needed to support the BQM-177A fleet operational and joint exercise requirements. Funding and quantities are in accordance with the fleet needs/fielding and to maintain inventory levels for fleet training and qualification usage in support of Subsonic Aerial targets.

\*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications. Title represents the P-40a Title when only the P-40a Summary/Total is shown.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

**Justification:**

FY 2021 baseline funding is required to support the procurement of rocket motors in matched pairs to launch subsonic aerial targets. The quantities are in accordance with the fleet needs/fielding and to maintain inventory levels for fleet training and qualification usage in support of the Subsonic Aerial Targets. Additional baseline funding is required for production engineering support, integrated logistics support, safety, product improvement, quality assurance and acceptance testing to support both variants.

**OCO:**

FY 2021 OCO funding is required to procure MK-85 Rocket Motors to replace MK-117 Rocket Motors expended in pre-deployment combat qualification exercises.

**Note:** Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

**Footnotes:**

<sup>(1)</sup> NSWC Indian Head Production rates represent combined Mk-85 and Mk-117 rates.

<b>Justification:</b> FY 2019 does not reflect the FY 2020 enacted congressional rescission of \$22.000 million FY 2019 funds.									
FY 2021 Baseline funding procures new MK 187 Projectiles in sufficient quantity to replace projectiles which have been used in operations and training. The MK 187 provides all fuze modes for Naval Surface Fire Support, as well as superior Fast Attack Craft/Fast In-Shore Attack Craft (FAC/FIAC) capability, Anti Air Warfare (AAW) and Anti Ship Cruise Missile (ASCM) defense. Propelling Charges and training projectiles are procured to sustain training and operational requirements.									
Baseline program also funds Production Engineering and Gauge requirements for all 5"/54 ammunition. FY 2021 Product Improvement Program will address battery obsolescence issues for fuzes.

<b>Remarks:</b>																													
[Hardware] AC100: 5"54 Ammunition Hardware includes costs to procure components, load and assembly of complete rounds, and acceptance tests. Costs associated with Transportation Account Code (TAC) are for first destination of delivery of production items. Unit costs and quantities are adjusted during year of execution.																													
[Hardware] AC850: Product Improvement engineering services and related efforts by government activities, the producing contractor or manufacturing installation, are executed to extend the useful military life of an item or to improve the item within the current performance envelope.																													
[Hardware] AC893: Renovation components upgrade unserviceable rounds into ready-for-issue condition.																													
[Hardware] AC894: Gauge Requirements are for the procurement of gauges, auxiliary and test equipment and support costs necessary for ammunition metrology to check critical dimensions/parameters of ammunition items and their parts.																													
[Hardware] AC850: Non Standard funding procures reusable packaging required for transportation and storage of projectiles and propelling charges.																													
[Support Cost] AC830: Production engineering for engineering services to support new acquisition and in production ammunition.																													
(†) indicates the presence of a P-5a																													
<b>Footnotes:</b>																													
(1) FY 2020 enacted rescission of \$22M FY 2019 funds is not included in FY 2019 total. DA53 FY 2019 and FY 2020 price increase attributed to lower procurement quantity.																													
(2) FY2021 Product Improvement Program will address battery obsolescence issues for fuzes.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

<b>Description:</b> Program procures intermediate caliber family of fixed ammunition for United States Navy and United States Coast Guard (USCG) use. The Navy's primary use for intermediate caliber ammunition is to engage both surface and air targets. USCG primary use is for drug interdiction, homeland defense, and Visit, Board, Search and Seizure (VBSS). Intermediate caliber ammunition is currently employed on the Littoral Combat Ship (LCS) and the USCG National Security Cutter.													
[P40A / CART., 57MM TP MK296 (BA23)]: 57MM ammunition is used in the MK110 Gun to provide Anti Air Warfare, Anti Surface Warfare and Fast Attack Craft/Fast Attack In-Shore Craft (FAC/FAIC) defense on USN LCS and USCG Maritime Security Cutter Large platforms.

<b>Exhibit P-40a, Budget Item Justification For Aggregated Items:</b> PB 2021 Navy		<b>Date:</b> February 2020
<b>Appropriation / Budget Activity / Budget Sub Activity:</b> 1508N / 01 / 1	<b>P-1 Line Item Number / Title:</b> 0266 / Intermediate Caliber Gun Ammo	<b>Aggregated Items Title:</b> Intermediate Caliber Gun Ammo
(1) AL100: Provides for complete rounds and conducts acceptance testing of intermediate caliber ammunition. Procurement includes intermediate caliber ammunition, all types, and includes high explosive service rounds, Target Practice and dummy rounds. Provides for cost associated with Transportation Account Code (TAC) that are for first destination of delivery of production items.		
(2) AL830: Production Engineering - Provides for production engineering services to support new acquisition and in production ammunition.		
(3) AL850: Product Improvement engineering services and related efforts by government activities, the producing contractor or manufacturing installation, are executed to extend the useful military life of an item or to improve the item within the current performance envelope.		
(4) AL894: Gauge Requirements - Provides for procurement of gauges, auxiliary and test equipment and support costs necessary for ammunition metrology to check critical dimensions/parameters of ammunition items and their parts. This is to assure proper mating of parts and subassemblies, assure correct interfacing between the ammunition and guns, and proper ammunition performance.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

<b>Description:</b>													
Program provides for Other Ship Gun Ammunition which consists of medium caliber types (20MM, 25MM, 30MM, 40MM). This supports Navy ships, and active and reserve ashore warfare forces including Naval Expeditionary Combat Command (NECC), Mobile Security Forces (MSF), fleet combat readiness groups, inshore undersea warfare groups and several other types of operational units. Program includes support for emergent anti-terrorism/force protection and homeland defense requirements.													
This program also supports Naval Special Warfare (NSW) service common munitions which are required to provide US Navy SEAL teams, NSW small tactical units and task groups and Special Boat Teams with a fire power advantage, area target engagement, standoff and extended range capability, as well as an anti-armor capability. This includes medium caliber mortars and stand-off weapons systems such as 40MM, 60MM and 81MM and Javelin. These munitions provide NSW an essential force protection capability and increases the combat power of NSW tactical elements.

*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.									
Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.									
<b>Justification:</b> FY 2021 baseline funding procures 20MM ammunition used for ship defense in MK15 Close-In Weapon System, 25MM ammunition used for Fast Attack Craft/Fast Attack In-Shore Craft (FAC/FIAC) defense in MK38 Machine Gun System on all platforms other than LPD and LCS, and 30MM ammunition used for FAC/FIAC defense in MK46 MOD 2 Gun Weapon System on LPD and LCS. Baseline funding also provides Production Engineering and Gauge requirements for 20MM, 25MM, and 30MM ammunition.									
FY 2021 funding also procures Naval Special Warfare (NSW) stand off weapon rounds including 66MM munitions for the M72 Light Anti-armor Weapon. Baseline program funds are also necessary for production engineering as required by DoD and Navy safety and acquisition regulations.									
<b>OCO:</b> FY21 OCO funding will procure the M72 Light Anti-Armor Weapon (LAAW), a 66mm anti-armor weapon frequently used by Naval Special Warfare (NSW) in conflict zones across the world. This funding replaces recent combat expenditures, and will also provide NSW with an upgraded version of the system that has reduced signatures (providing for increased gunner survivability and reduced TBI effects).

<b>Exhibit P-5, Cost Analysis:</b> PB 2021 Navy		<b>Date:</b> February 2020		
<b>Appropriation / Budget Activity / Budget Sub Activity:</b> 1508N / 01 / 1	<b>P-1 Line Item Number / Title:</b> 0270 / Other Ship Gun Ammunition	<b>Item Number / Title [DODIC]:</b> 1 / Integrated Warfare Systems		
<b>ID Code</b> (A=Service Ready, B=Not Service Ready) :  [Hardware] AG100/AG200: INTEGRATED WARFARE SYSTEMS - Provides all up rounds and acceptance testing. Unit costs and quantities are adjusted during year of execution. Provides for Transportation Account Code (TAC) first destination delivery of production items and Single Manager Conventional Ammunition (SMCA) related costs.	<b>MDAP/MAIS Code:</b>  [Hardware] AG894: GAUGE REQUIREMENTS - Provides for procurement of gauges, auxiliary and test equipment, and support costs necessary for ammunition metrology to check critical dimensions/ parameters of ammunition items and their parts. This is to assure proper mating of parts and subassemblies, assure correct interfacing between the ammunition and guns, and proper ammunition performance			
<b>[Support Cost]</b> AG830: PRODUCTION ENGINEERING - Provides for production engineering services to support new acquisition and in production ammunition.				
(†) indicates the presence of a P-5a				

**Footnotes:**

- (1) CART., 30MM APFSDS-T (AB51) is procured to support the 30MM MK38 MOD4 machine gun system which is a Maritime accelerated acquisition program.
- (2) Cart C-UAS 30mm to be procured to support the 30MM MK 38 MOD 4 machine gun system which is a Maritime accelerated acquisition program. Cartridge provides ammunition solution for unmanned aerial system defeat capability.
- (3) FY2021 Product Improvement to support joint service counter unmanned aerial system cartridge qualification.

<sup>(†)</sup> indicates the presence of a P-21

**Footnotes:**

<sup>(4)</sup> Delivery schedule is set by the US Army Single Manager for Conventional Ammunition (SMCA). Date of first delivery on SMCA family buys can vary, depending on other customer's orders.

<sup>(5)</sup> Contract award was delayed due to failures during lot acceptance testing on previous orders. Delaying the contract award ensures that the vendor has resolved production challenges prior to receiving additional orders. The vendor has successfully passed lot acceptance testing and award is planned February 2020.

<sup>(6)</sup> FY16 ORDER IS A DUAL AWARD TO BOTH GD-OTS, MARION, IL AND ORBITAL ATK, LAKE CITY, MO.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

<b>Remarks:</b> [Support Cost] AG830: PRODUCTION ENGINEERING - Provides for production engineering services.																										
(†) indicates the presence of a P-5a																										
<b>Footnotes:</b>																										
(7) Pricing is provided by the Army Single Manager for Conventional Ammunition (SMCA) and incorporates other service buys. The unit cost will fluctuate depending on the total procurement.																										
(8) Naval Special Warfare (NSW) procure 66MM munitions stand off weapon rounds for the M72 Light Anti-armor Weapon.																										
(9) Provides for required reset components including command launch units, battery coolant units and renovation components used to upgrade unserviceable rounds into ready-for-issue condition.

"A" in the Delivery Schedule indicates the Contract Award Date.

**Note:** Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

<b>Description:</b> Program procures ammunition in support of Navy ships and for active and reserve ashore warfare forces. Small Arms (22 -.50 Cal) ammunition and Landing Party ammunition includes hand grenades, riot control agents and defensive land mines for the Military Sea Lift Command, Naval Criminal Investigate Service (NCIS), Marine and Navy Air-wings, Maritime Force Protection Command, and Naval Expeditionary Combat Command.  Additionally, the Naval Special Warfare (NSW) small arms ammunition program includes 5.56mm, 7.62mm, and .50 caliber rounds required for the organic weapon systems carried by US Navy SEALs, while the various hand grenades and mines are employed for force protection, break contact maneuvers, ambushes, and target assaults.

**Justification:**

FY 2021 baseline funding procures ammunition to support shotguns, handguns, rifles, machine guns, grenades and land mines. 12 Gauge, 5.56MM, 7.62MM, 9MM, 38 Caliber, 40 Caliber, 45 Caliber, 50 Caliber, Hand and Smoke Grenades, and Mines are used for all Active Navy Ships and all Active and Reserve Ashore warfare forces, including Navy Expeditionary Combat Command, Maritime Expeditionary Security Forces, Inshore Undersea Warfare Groups, Military Sea Lift Command, Marine and Navy Air-Wing units, and Naval Criminal Investigative Service. Baseline funding also provides production Engineering and Gauge requirements for Small Arms Ammunition, Grenades, and Mines.

FY 2021 funding also procures Naval Special Warfare (NSW) ammunition to support shotguns, handguns, rifles, machine guns, grenades and land mines tactically employed by US Navy SEALs, Special Boat Teams, NSW Task Units/Groups and other NSW support groups. Procurement in FY 2021 includes 12 Gauge, 5.56MM, 7.62MM, 9MM, 45 Caliber, 50 Caliber, Hand and Smoke Grenades, and Mines. Baseline program funds are also necessary for production engineering as required by DoD and Navy safety and acquisition regulations.

**OCO:**

FY 2021 OCO funding will procure 7.62x51mm and .50 caliber ammunition for Naval Special Warfare: these two calibers are the ammunition for all Naval Special Warfare crew-served automatic weapons and are in constant demand in conflict zones across the world, and within the Small Arms and Landing Party (SALP) ammunition inventory they are the calibers that consistently run short. This funding will replace combat expenditures and allow Naval Special Warfare to bring the War Reserve inventory to the required level.

<b>Remarks:</b>																												
[Hardware] [P5 / (AH100) HARDWARE]: Provides for all types of components, load and assemble complete rounds and conduct acceptance tests. Provides for Transportation Account Code (TAC) first destination of delivery of production items and Single Manager Conventional Ammunition (SMCA) related costs.																												
[Hardware] [P5 / (AH850) PRODUCT IMPROVEMENT]: Provides engineering services and related effort by the producing contractor or manufacturing installation to extend the useful military life of an item or to improve the item within the current performance envelope.																												
[Hardware] [P5 / (AH894) GAUGE REQUIREMENTS]: Provides for procurement of gauges, auxiliary and test equipment and support costs necessary for ammunition metrology to check critical dimensions/parameters of ammunition items and their parts. This is to assure proper mating of parts and subassemblies, assure correct interfacing between the ammunition and guns, and proper ammunition performance.																												
[Hardware] [P5 / (AH895) NON-STANDARD ITEMS]: Provides for non-standard items of ammunition. Includes training aids and initial procurements of required non type classified munition items including law enforcement ammunition for NCIS.

<b>ID Code</b> (A=Service Ready, B=Not Service Ready) :	<b>MDAP/MAIS Code:</b>	

[Support Cost] AH830: SALP Production Engineering provides for production engineering services to support new acquisition and in production ammunition.

(†) indicates the presence of a P-5a

**Footnotes:**

- (1) This item is procured via an Army contract that procures ammunition for multiple services. This contract utilizes matrix pricing; therefore, the unit cost is dependent on quantity procured by all services, resulting in unit cost increase beyond standard inflation.
- (2) This item is procured via an Army contract that procures ammunition for multiple services. This contract utilizes matrix pricing; therefore, the unit cost is dependent on quantity procured by all services, resulting in unit cost increase beyond standard inflation.
- (3) This item is procured via an Army contract that procures ammunition for multiple services. This contract utilizes matrix pricing; therefore, the unit cost is dependent on quantity procured by all services, resulting in unit cost increase beyond standard inflation.
- (4) Procuring CTG, 5.56MM, BALL, M855A1 EPR (AB57) instead of CTG, 5.56MM M855 (A059) to maintain commonality with the US Army and USMC.
- (5) Procuring CTG., 9MM, BALL, XM1152 (AC20) instead of CTG, 9MM, BALL (A363) to maintain commonality with US Army and USMC.
- (6) Procuring CTG, 9MM, FX, MARKING, BLUE (AC36) instead of CTG, 9MM, FX, MARKING BLUE (AB13) to reduce personnel exposure to lead during training.
- (7) Procuring CTG, 9MM, FX, MARKING, RED (AC37) instead of CTG, 9MM, FX, MARKING RED (AB14) to reduce personnel exposure to lead during training.

"A" in the Delivery Schedule indicates the Contract Award Date.

**Note:** Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

**Footnotes:**

(8) CTG, 9MM BALL (A363) This item is procured via an Army contract that procures ammunition for multiple services. This contract utilizes matrix pricing; therefore, the unit cost is dependent on quantity procured by all services, resulting in unit cost increase beyond standard inflation.

(9) CTG, 7.62MM BLANK, LINKED (A111) This item is procured via an Army contract that procures ammunition for multiple services. This contract utilizes matrix pricing; therefore, the unit cost is dependent on quantity procured by all services, resulting in unit cost increase beyond standard inflation.

(10) CTG, 7.62MM LNKD, BALL AND TRACER (A131) This item is procured via an Army contract that procures ammunition for multiple services. This contract utilizes matrix pricing; therefore, the unit cost is dependent on quantity procured by all services, resulting in unit cost increase beyond standard inflation.

(11) CTG, CAL .50 LINKED, M8 API/M20 API-T (A576) This item is procured via an Army contract that procures ammunition for multiple services. This contract utilizes matrix pricing; therefore, the unit cost is dependent on quantity procured by all services, resulting in unit cost increase beyond standard inflation.

(12) CTG, CAL .50 LINKED, BLANK, M1A1 (A598) This item is procured via an Army contract that procures ammunition for multiple services. This contract utilizes matrix pricing; therefore, the unit cost is dependent on quantity procured by all services, resulting in unit cost increase beyond standard inflation.

"A" in the Delivery Schedule indicates the Contract Award Date.

**Note:** Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

<b>Description:</b>													
Pyrotechnics and demolition materials consists of smoke and flare signals for safety of life, simulators, remote and time delay firing devices, safe and arming devices, demolition charges, blasting caps, detonating cord, time fuze, cable cutters, Improvised Explosive Device (IED) disrupters, cartridge actuated devices, shape charges, and shock test charges. These materials are used by all Navy platforms and Navy Mobile Construction Battalions, mobile diving and salvage units, cargo handling and port groups, naval security groups, fleet composite operational readiness groups, and Explosive Ordnance Disposal (EOD) groups, mobile units, detachments, and teams.													
Program procures pyrotechnics and demolition materials for all active naval vessels, construction battalions, mobile diving and salvage units, cargo handling and port groups, naval security groups, and explosive ordnance disposal groups/mobile units/detachments/teams. Pyrotechnics are used for training, combat exercises, submarine rescue and personnel search, and rescue operations. These items consist of illumination, signaling, identification, and location devices using flares or smoke as the primary signaling agent. Demolitions consist of explosive devices and accessories and are required for fleet units to perform training functions and operations/requirements. Fleet requirements are based upon CNO approved allowance lists or for special needs on a case by case basis and worldwide fleet expenditure. This program also provides materials to support the ship shock test program.													
Naval Special Warfare pyrotechnics and demolition materials consists of smoke and flare signals for safety of life, combat effects simulators, remote and time delay firing devices, safe and arming devices, blasting machines, demolition charges, blasting caps, detonating cord, time fuse, cable cutters, cartridge actuated devices, shape charges, and shock tube type detonators. The demolition materials are used by the Naval Special Warfare Center for initial demolition training and qualification, by SEAL platoons for constructing breaching charges, for construction of obstacles or barriers, clearance of obstacles or barriers, cable cutting, coral and channel clearance, material and equipment destruction, diversions, combat effects simulation charges, improvised incendiary charges, and defensive anti-vehicle and anti-personnel charges. Pyrotechnics are used by Naval Special Warfare for emergency or distress signaling, combat effects simulation, target marking, de-confliction, escalation of force warning, and distraction.

<b>Justification:</b> FY 2021 baseline funding procures pyrotechnics to support surface, air, ground, and underwater Navy requirements for training, combat exercises, submarine rescue, personnel search and rescue operations, and demolition consisting of explosive devices and accessories to support fleet units performing training and operational exercises.									
Baseline funding also provides Product Improvement Programs to resolve obsolescence issues in demolition items, emergency signaling devices and submarine signals. Baseline program funds renovation of radio firing devices, remote timing device battery replacement, supply components for demolition items, and Production Engineering and Gauge requirements for pyrotechnics and demolition materials.									
FY 2021 baseline funding (81AJ) procures pyrotechnics, demolition devices and accessories to support Naval Special Warfare (NSW) requirements for initial qualification, pre-deployment, and sustainment training, combat exercises, and testing by US Navy SEALs, Special Boat Teams, NSW Task Units/Groups and other NSW support groups. Baseline program funds are also necessary for production engineering as required by DoD and Navy safety and acquisition regulations. Due to funding constraint and contract minimums, FY 2020 procurement is planned for pyrotechnic type hand grenade simulators.									
<b>OCO:</b> FY 2021 OCO funding will procure the MK164 Detonator, which remains a high-demand pyrotechnics and demolitions (PyroDemo) end item and is currently the most critical PyroDemo end item in the Naval Special Warfare inventory. This funding will replace critical combat losses and help restore the War Reserve to the required level.

**Remarks:**

[Hardware] AJ100: HARDWARE - Procures all up rounds and conduct acceptance tests. Costs associated with Transportation Account Code (TAC) are for first destination of delivery of production items. Unit costs and quantities will be adjusted during the year of execution.

[Hardware] AJ850: PRODUCT IMPROVEMENT - Provides engineering services and related efforts by government activities, the producing contractor or manufacturing installation to extend the useful military life of an item or to improve the item within the current performance envelope.

[Hardware] AJ893: RENOVATION COMPONENTS - The items purchased with funds identified for renovation components will be used to upgrade unserviceable rounds to ready-for-issue condition. The rounds to be renovated will be those with the lowest asset readiness positions.

[Hardware] AJ894: GAUGE REQUIREMENTS - Procure the gauges and test equipments necessary to check critical dimensions/parameters of ammunition items and their parts. This is to assure proper mating of parts and sub-assemblies, assure correct interfacing between the ammunition and guns, and proper ammunition performance.

[Hardware] AJ895: NON-STANDARD - The non-standard line is to support procurement of ammunition training aids and initial procurements of required non-type classified munition items.

[Support Cost] AJ830: PRODUCTION ENGINEERING - Provides for production engineering services to support new acquisition and in production ammunition.

(†) indicates the presence of a P-5a

**Footnotes:**

<sup>(1)</sup> FY2021 Product Improvement Program addresses submarine signal obsolescence and manufacturability to decrease manufacturing time and complexity. This will be proven out through qualification and safety testing certifying the safety and reliability of the design for Navy fielding.

<b>Remarks:</b>																													
[Hardware] AJNSW: NAVAL SPECIAL WARFARE - Procures components, load and assemble complete rounds and conduct acceptance tests. Costs associated with Transportation Account Code (TAC) are for first destination of delivery of production items for Naval Special Warfare service common items. Unit costs and quantities will be adjusted during the year of execution.																													
[Support Cost] NS830:PRODUCTION ENGINEERING - Provides for production engineering services.																													
(†) indicates the presence of a P-5a

<b>Description:</b> This program provides funding for ammunition with value less than \$5 million.																
Marine Location Markers include both air-launched and hand-launched pyrotechnic devices. The Mk-25 and Mk-58 units are used in a variety of situations to include Search and Rescue operations, Man Overboard drills and Target Marking in support of Fleet Operations and Readiness.																
The LUU-19 Aircraft Parachute Flares (APFs) are used for near infrared nighttime illumination of surface areas in Search and Combat Operations. No procurements currently planned through the FYDP due to sufficient inventory levels.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

**Justification:**

FY 2021 funding is required to procure Mk-25 and Mk-58 Marine Location Markers (MLMs) to enable day and night Search and Rescue operations and target marking from aircraft and surface combatants.

Funding is required to address production support to include product improvements needed for components designed as well as Production Engineering Support, Integrated Logistics Support, Reliability Life (i.e. Safety and Product Improvement Program, Quality Assurance and Acceptance Testing).

<b>Description:</b> The Family of Mortar Cartridges includes all 60mm mortar cartridges and 81mm mortar cartridges which consist of high explosive, smoke, illumination and full range training practice rounds. The 60mm mortar cartridges are fired from the M224 lightweight mortar system to provide close-in indirect fire support of group troops at ranges of approximately 70 to 3,500 meters. The 81mm mortar cartridges are fired from the M252 medium weight mortar system to provide long-range indirect fire support to infantry units at ranges of approximately 100 to 6,000 meters.																	
FY 2021 funding totals include \$46.781M for Base and \$0.0M for Overseas Contingency Operations (OCO).

\*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

**Justification:**

FY 2021 Baseline Appropriation Request: \$46.781M

FY 2021 baseline funding will support procurement of mortars to include 60mm Full Range Training Practice Cartridges (DODIC BA15), 81mm Full Range Practice Cartridges (FRPC) (DODIC C875), and 81mm High Explosive Mortars (DODIC CA66), in support of baseline training munitions requirements for lightweight and medium mortar systems.

The budget decrease of \$10.692M from FY 2020 to FY 2021 is due to the reduction of the Total Munitions Requirement for DODICs 81mm HE Fuze (CA66), 60mm Target Practice (BA15), and 81mm Practice (C875) ammunition.

(†) indicates the presence of a P-5a

**Footnotes:**

- (1) Increase due to inflation plus the add on of Radford Army Ammunition Plant (RFAAP) Performance Work Statement (PWS) costs. PWS costs for RFAAP are higher for FY 2021 than FY 2020.
- (2) Price decrease due to change in supplier in FY 2021.
- (3) Increase due to inflation plus the add on of Radford Army Ammunition Plant (RFAAP) Performance Work Statement (PWS) costs. PWS costs for RFAAP are higher for FY 2021 than FY 2020.
- (4) Increased price due to new contract. The FY 2020 unit price is an estimate provided by U. S. Army Single Manager Conventional Ammunition, (SMCA).
- (5) Increased price due to new contract. The FY 2020 unit price is an estimate provided by U. S. Army Single Manager Conventional Ammunition, (SMCA).
- (6) Increase based on new contract pricing on the Holston Army Ammunition Plant use with the expectation that the PWS OFF-SET costs for these products at Holston would increase.
- (7) Increase due to inflation plus the add on of Radford Army Ammunition Plant (RFAAP) Performance Work Statement (PWS) costs. PWS costs for RFAAP are higher for FY 2021 than FY 2020.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

<b>Description:</b>													
The Direct Support Munitions budget supports the shoulder launched rocket and 120mm munitions family are included in this budget request. The 120mm tank ammunition is fired from a M1A1 (Abrams) tank with a 120mm main armament smoothbore M256 Cannon. It consists of a suite of Kinetic Energy (KE), Multi-Purpose High Explosive (MPHE), canister and High Explosive Anti-Tank (HEAT) rounds. The 120mm tank ammunition also includes target practice rounds for use with the 120mm smooth bore M256 Cannon.													
This family also includes 120mm smoothbore mortar ammunition to support pre-deployment training for the deploying Marine Expeditionary Units (MEUs). The 120mm smoothbore mortar ammunition suite consists of high explosive, illumination and white phosphorous rounds fired out of the M298 mortar cannon. Previously, the 120mm mortar ammunition procurements were to support the rifled Expeditionary Fire Support System (EFSS), however the EFSS program was cancelled effective 28 Nov 17.													
The Shoulder-Launched Multipurpose Assault Weapon (SMAW), the AT4 Confined Space (AT4 CS) and Lightweight Assault Weapon (LAW) shoulder fired family of rockets provides lightweight weapons mainly employed against and optimized to defeat light armored vehicles and other hard targets at close combat ranges. They can be employed from an enclosure or the open battlefield as assault weapons against bunkers, field fortifications, structures and other hard-point positions. Additionally, training launchers and sub-caliber practice rockets that fully simulate firing are also included.													
The highly versatile Carl-Gustaf system is a true multi-role, man-portable shoulder-fired weapon. The system offers various types of ammunition, ranging from armor penetration and anti-personnel, to ammunition for built-up areas as well as special features like smoke and illumination. Carl-Gustaf system required adjustment in FY 2020 to reflect significant updates to unit price and quantities; DODICs affected: A254, C385, C386, CA10, CA20, CA21, CA27, CA36, CA41, CA51.													
FY 2021 funding totals include \$119.504M for Base and \$0.0M for Overseas Contingency Operations (OCO).

<b>Justification:</b> FY 2021 Baseline Appropriation Request: \$119.504M									
The FY 2021 baseline funding supports the procurement of several direct support munitions to include: the 120mm Advanced Multi-purpose (AMP) tank round (DODIC CZ11), the 120mm M1002 Target Practice Multi-purpose-Tracer (TPMP-T) tank round, the Shoulder Launched Multipurpose Assault Weapon (SMAW) rocket, 83mm Common Practice round (CP)(DODIC HX07), 66MM Anti-Structure Lightweight Assault Weapon (LAW) Fire From Enclosure (FFE)(HB25), 66MM High Explosive Anti-Armor Rocket (DODIC HB26), 84mm HE Rocket (AT4)(DODIC C995) and the 84mm Carl-Gustaf family of ammunition. The 7.62mm TR Cartridge (DODIC A254) will also be procured.									
The increase from FY 2020 to FY 2021 of \$17.426M reflects requirement changes in CZ11 (120mm Multipurpose Round), CA31 (120mm Training Practice), HB25 (Rocket, 66mm Anti-Structure LAW FFE), and other direct support munitions to support the total munitions requirement.									
FY 2021 pricing and unit costs were provided by U. S. Army Single Manager Conventional Ammunition, (SMCA) and incorporates other service buys.

(†) indicates the presence of a P-5a

**Footnotes:**

(1) The CZ11 (120mm Advanced Multi-Purpose, High Explosive with Tracer cartridges) is replacing the CA57 (120mm Multi-Purpose High Explosive) round. PM Maneuvers Ammunition Systems provided a unit cost of \$9,500 for FY 2020 based on the Independent Government Cost Estimate (IGCE). This unit cost was inflated by 2% to obtain FY 2021 unit cost of \$9690.00.

(2) CA31 Complete Round - FY 2021 complete round is an average unit cost between two contractors. The quantity split will be determined between the two contractors in the year of execution.

**Footnotes:**

(5) HB25: FY 2021 pricing and unit costs were provided by U. S. Army Single Manager Conventional Ammunition, (SMCA) and incorporates other service buys. The USMC is also procuring a larger quantity than in FY 2020, however the quantity of the total buy including all services on the Army contract impacts the unit cost as well.

(6) HB26: FY 2021 pricing and unit costs were provided by U. S. Army Single Manager Conventional Ammunition, (SMCA) and incorporates other service buys. The USMC is also procuring a smaller quantity than in FY 2020, however the quantity of the total buy including all services on the Army contract impacts the unit cost as well.

(7) HX07 COMPLETE ROUND - The increase in unit cost is due to an overall lower quantity being procured on the Army's contract in FY 2021 as compared to FY 2020. Thus, increasing the unit cost.

(8) Increase reflects the additional level of support required, due to the increase in quantity being procured in FY21.

(9) CA10 COMPLETE ROUND - Pricing is provided by the Single Manager for Conventional Ammunition (SMCA) and incorporates all service buys.

(10) FY 2021 pricing and unit costs were provided by U. S. Army Single Manager Conventional Ammunition, (SMCA) and incorporates other service buys. The USMC is also procuring a smaller quantity than in FY 2020, however the quantity of the total buy including all services on the Army contract impacts the unit cost as well.

(11) CA21 COMPLETE ROUND - Pricing is provided by the Single Manager for Conventional Ammunition (SMCA). The unit cost decrease is due to economies of scale.

(12) FY 2021 pricing and unit costs were provided by U. S. Army Single Manager Conventional Ammunition, (SMCA) and incorporates other service buys. The USMC is also procuring a smaller quantity than in FY 2020, however the quantity of the total buy including all services on the Army contract impacts the unit cost as well.

(13) FY 2021 pricing and unit costs were provided by U. S. Army Single Manager Conventional Ammunition, (SMCA) and incorporates other service buys. The USMC is also procuring a smaller quantity than in FY 2020, however the quantity of the total buy including all services on the Army contract impacts the unit cost as well.

"A" in the Delivery Schedule indicates the Contract Award Date.

**Note:** Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

<b>Description:</b> The Infantry Weapons Ammunition budget supports small arms ammunition and medium caliber ammunition.																	
Small arms ammunition is a cartridge or a family of cartridges intended to be used in various types of crew-served/mounted weapons, hand-held pistols, or shoulder fired rifles; ranging from .22 caliber to .50 caliber weapons. A small arms cartridge is an assembly consisting of a cartridge case, a primer, a quantity of propellant, and a bullet. Small arms ammunition consists primarily of 9mm ammunition, 5.56mm ammunition, 7.62mm ammunition, 12 gauge shotgun ammunition, .300 Winchester Magnum ammunition, and .50 caliber ammunition. The .50 caliber ammunition includes the Polymer-cased cartridges that provides a 25-30% reduction in overall cartridge weight over the conventional brass-cased rounds.																	
Medium caliber ammunition is a cartridge or family of cartridges larger than .50cal, but smaller than 60mm and supports a variety of crew-served/mounted weapons, hand-held 40mm grenade launchers, and Light Armored Vehicle weapon systems. Medium caliber ammunition consists primarily of 25mm, 30mm, and 40mm cartridges.																	
FY 2021 funding includes \$83.220M for Base and \$0.000M for Overseas Contingency Operations (OCO).

<b>Justification:</b> FY 2021 Baseline Appropriation Request: \$83.220M									
The FY 2021 baseline funds are required to replenish munitions to be expended by Marine Forces during training, preparation and rehearsals for combat engagements. The .50 caliber reduced range ammunition will be procured to address operational requirements in an urban environment and the ability to train on ranges where only ammunition with 7.62mm surface danger zone can be live-fired. Funding will also support the procurement of 5.56mm marking rounds for simulated training in an urban environment, 9mm training ammunition, 9mm blank single rounds. Additionally, funding is required for 30mm Cartridges, as well as 40mm Target Practice, Day/Night Marker rounds. The FY 2020 request also includes funding for 25mm Target Practice rounds in support of Marine Forces training. Funding will procure additional units in support of increased requirements, totaling \$800K. Additionally, funding was added for 30mm HE and Target Practice rounds to procure units in support of emerging requirements, totaling \$500K.									
The FY 2021 funding request was reduced by \$19.749M to account for the availability of prior year execution balances.									
The \$28.974M budget increase from FY 2020 to FY 2021 reflects requirement changes in 5.56mm Rounds (A059, AB57 and AA68), 25mm Cartridge (A940), 40mm Practice Rounds (BA21, BA54, and BA55), 50 Caliber Reduced Range (AC15), 12 Gauge Cartridge (AA54), and 7.62mm Rounds (AB39 and ANS1) supporting the total munitions requirement.

"A" in the Delivery Schedule indicates the Contract Award Date.

**Note:** Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

"A" in the Delivery Schedule indicates the Contract Award Date.

**Note:** Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

<b>Description:</b> The Combat Support Munitions budget includes demolition items, hand held grenades, vehicle launched grenades, pyrotechnic devices, land mines, and non-lethal items.  Demolition items provide high explosives for the purpose of destroying or altering man-made or natural objects or obstacles. Demolition munitions charges include block charges, shaped charges, flexible-linear charges, explosive sheet, cable, canine explosive scent items, chain cutters, and military dynamite. They are used for general demolition, cutting, breaching, cratering, and destruction of abandoned equipment/ammunition.  Also included in this profile are all hand held/vehicle launched grenades, pyrotechnics devices, and land mines used by Marine Corps ground forces. This includes colored smoke grenades, obscuration smoke grenades, various pyrotechnics used in training to simulate battlefield effects, and claymore mines.  Additionally, this budget line item also includes non-lethal munition variants such as; 12 gauge, 40mm grenades, diversionary grenades, and 81mm Non-lethal mortars. These munitions are intended to incapacitate, warn or drive off targeted personnel and/or materiel while minimizing permanent injury to personnel and damage to property in the target area or environment.  FY 2021 funding totals include \$32.650M for Base and \$0.0M for Overseas Contingency Operations (OCO). FY 2021 Base funding for budget requirements are in support of the National Defense Strategy.

*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.									
Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.									
<b>Justification:</b> FY 2021 Baseline Budget Request: \$32.650M									
FY 2021 baseline funding is required for procurement of Hand Grenades (DODIC G881), Linear Charges (DODIC M913), 81mm Non-Lethal / Indirect Fire Munition (NL-IDFM) (DODIC C8NL), Grenade, Hand Diversionary, BTV-1 MK13 MOD0 (DODIC GG20), Military Dog Scent Kit (MDSK) items, M6 Electric Blasting Caps (DODIC M130), Grenade, Hand Smoke, White M83 (DODIC G982), and Mine, Antipersonnel Obstacle Breaching System MK7 MOD1 (APOBS) (DODIC MN79). All procured items will support required annual and pre-deployment training. FY 2021 funding is also required for Engineering Support In Production (ESIP). ESIP costs support engineering functions on produced units which includes configuration management, lot acceptance testing, and support for items currently in production. Additionally, this funding addresses any changes to the design, assuring that the ammunition is of the highest quality, and deals with any manufacturing concerns during these processes.									
The \$2.310M decrease from FY 2020 to FY 2021 reflects a decrease in the munitions requirement for Mine Clearing Line Charge (MCLC), and Demo Linear Charge (DODIC M913).

<b>ID Code</b> (A=Service Ready, B=Not Service Ready) :		<b>MDAP/MAIS Code:</b>
(1) FY 2021 pricing and unit costs were provided by U. S. Army Single Manager Conventional Ammunition, (SMCA) and incorporates other service buys. The USMC is procuring a smaller quantity than in FY 2020, this also impacts the unit cost.		
(2) The increase in unit cost is due to an overall lower quantity being procured on the Army's contract in FY 2021 as compared to FY 2019. The Marine Corps is procuring a larger quantity in FY21. However, when combined with the Army's smaller quantity in FY 2021 the overall quantity drops significantly resulting in an increased unit cost.		
(3) The increase in unit cost is due to an overall lower quantity being procured on the Army's contract in FY 2021 as compared to FY 2019. The Marine Corps is procuring a larger quantity in FY21. However, when combined with the Army's smaller quantity in FY 2021 the overall quantity drops significantly resulting in an increased unit cost.

"A" in the Delivery Schedule indicates the Contract Award Date.

**Note:** Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

**Footnotes:**

<sup>(4)</sup> FY 2021 pricing and unit costs were provided by U. S. Army Single Manager Conventional Ammunition, (SMCA) and incorporates other service buys. The USMC is also procuring a larger quantity than in FY 2020, however the quantity of the total buy including all services on the Army contract impacts the unit cost as well.

"A" in the Delivery Schedule indicates the Contract Award Date.

**Note:** Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

<b>Description:</b> The Ammunition Modernization budget supports the procurement of technical analysis and labor from Naval Surface Warfare Centers (NSWC) Corona, Crane, Indian Head, and Dahlgren Divisions to enable acquisition of modernized ground delivered class V(W) ammunition. This line supports technical efforts in systems assessment, service life analysis, test and evaluation, technical drawing packages (TDPs), and malfunction investigations.  Ammo Modernization is a required on-going level of effort program. This program will exist for as long as the USMC maintains ammunition.  FY 2021 funding totals include \$15.144M for Base and \$0.00M for Overseas Contingency Operations (OCO).  This funding supports life cycle management functions to maintain the USMC ammunition inventory through quality assurance programs which are vital to predicting service life trends and keeping the warfighter safe during training and operational scenarios.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

**Justification:**

FY 2021 Baseline Appropriation Request: \$15.144M

FY 2021 Baseline funding will support the modernization of ground delivered class V(W) ammunition and associated components, as well as quality evaluation and assessment. Funding will support the efforts associated with service life accelerated age testing, malfunctions, and quality assurance. Ammunition Modernization addresses the total life cycle management of ammunitions through cyclic testing, surveillance, and destructive testing to assure safety, reliability, performance and combat readiness of ammunition assets.

The budget request increase of \$.819M from FY 2020 to FY 2021 provides support needed for the linear charge and missile modernization programs.

**Footnotes:**

<sup>(1)</sup> The Ammo Modernization budget supports a level of effort program; this includes unforeseen requirement updates during the year of execution, which can cause P40A budget exhibit discrepancies between President's Budget submissions. The United States Marine Corps (USMC), Program Manager - Ammunition is responsible for the entire life cycle of the ammunition inventory. This is an on-going effort and is required for as long as the USMC maintains ammunition. The Ammo Modernization budget pays for necessary technical and programmatic services.

<b>Description:</b> The Family of Artillery Munitions includes all 155mm artillery ammunition components. The 155mm artillery components are fired from M777 howitzers, and include: primer, propellant, projectile, and fuze. High explosive artillery ammunition is used against personnel, trucks, electronic surveillance and target acquisition devices, supply points, command and control and communications installations, and mechanized and armored forces. Precision-guided artillery provides accurate, first round fire-for-effect capability, and can achieve reduced collateral damage. Illumination cartridges are used to illuminate the battlefield with light either in visual or near Infrared Spectrum. Smoke cartridges are used to provide obscuration on the battlefield and to mark locations. Included are artillery fuzes such as; point detonating, multi-option, electronic time and precision guided.																	
FY 2021 budget request includes \$59.539M for Baseline.																	
[P40A / Artillery, All Types]: Pricing is provided by the Army Single Manager for Conventional Ammunition (SMCA) and incorporates other service buys.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.									

**Justification:**

FY 2021 Baseline Appropriation Request: \$59.539M

FY 2021 baseline funding will support the procurement of 155mm High Explosive (HE) M795 with IMX-101 (DODIC DA54). The DA54 is the prime round for the Light Weight 155mm Cannon/Howitzer/Gun/Artillery piece. The funding will also support the procurement of the prime 155mm HE Training Projectile M1122E1 (DA68).

FY 2021 funds are also required to support the procurement of the Precision Guidance Kit (PGK) fuze (DODIC NA29). The NA29 technology provides a first-of-its-kind "near-precision" capability. PGK contains a Global Positioning System (GPS) guidance kit with fuzing functions and an integrated GPS receiver to correct the inherent errors associated with ballistic firing solutions. The PGK capability is essential to providing commanders the ability to engage assigned targets while minimizing collateral damage and reducing the number of artillery projectiles required to attack targets.

The decrease of \$148.062M from FY 2020 to FY 2021 is attributed to funding being reprioritized while ensuring the Marine Corps continues to evolve toward a force that is aligned with the National Defense Strategy.

**Footnotes:**

(1) Pricing is provided by the Army Single Manager for Conventional Ammunition (SMCA) and incorporates other service buys.

(2) DA68 was intended to replace DA51 as the 155mm training round. However, the DA68 program was cancelled by the Army due to technical issues. DA68 funding has been repurposed to procure D528 ammunition.

(3) Pricing and unit costs were provided by U. S. Army Single Manager Conventional Ammunition, (SMCA) and incorporates other service buys. DA68 was intended to replace DA51 as the 155mm training round. However, the DA68 program was cancelled by the Army due to technical issues. DA68 funding has been repurposed to procure D528 ammunition.

(4) Pricing and unit costs were provided by U. S. Army Single Manager Conventional Ammunition, (SMCA) and incorporates other service buys. DA68 was intended to replace DA51 as the 155mm training round. However, the DA68 program was cancelled by the Army due to technical issues. DA68 funding has been repurposed to procure D528 ammunition.

(5) Pricing and unit costs were provided by U. S. Army Single Manager Conventional Ammunition, (SMCA) and incorporates other service buys. DA68 was intended to replace DA51 as the 155mm training round. However, the DA68 program was cancelled by the Army due to technical issues. DA68 funding has been repurposed to procure D528 ammunition.

(6) The unit cost for DA54 and its ancillary components reflect a combination of inflation and current quantities being procured. Pricing is provided by the Army Single Manager for Conventional Ammunition (SMCA) and incorporates other service buys.

(7) Unit cost increase per pound of IMX-104 from FY 2019 to FY 2020 is a result of new explosive supply contract with BAE Holston, awarded in Aug 19.

(8) Unit cost increase per pound of IMX-101 from FY 2019 to FY 2020 is a result of new explosive supply contract with BAE Holston, awarded in Aug 19.

"A" in the Delivery Schedule indicates the Contract Award Date.

**Note:** Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

"A" in the Delivery Schedule indicates the Contract Award Date.

**Note:** Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

<b>Description:</b> The Items Less Than \$5 Million (LT5M) budget supports Marine Corps Units that have niche ammunition requirements. The LT5M line item includes the Marine Corps (MC) Competition Shooting Team with ammunition loading equipment and unique precision ammunition components through small purchase orders and the small arms small purchase credit card. This line also includes First Destination Transportation Charge (FDTC) funds that are utilized for the distribution of Marine Corps' ammunition end items from manufacturing plants assembly points. The Marine Security Guard Battalion (MSGB) funds the Marine Security Guard Battalion ammunition requirements which are procured through the U.S. State Department. Counter-Drug Interdiction funds are provided by Office of the Secretary of Defense (OSD) to the Marine Corps in the year of execution to support drug interdiction requirements. This line will also be used for the procurement of the Ammunition Inventory Management System consisting of commercially available software solution(s) to fully track, account, audit and manage the supply and distribution of Class V munitions worldwide.																	
FY 2021 funding totals include \$4.142M for Base and \$0.0M for Overseas Contingency Operations (OCO).																	
The FY 2021 funding request was reduced by \$0.736M to account for the availability of prior year execution balances.

*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications. Title represents the P-40a Title when only the P-40a Summary/Total is shown.									
Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.									
<b>Justification:</b> FY 2021 Baseline Appropriation Request: \$4.142M									
FY 2021 baseline funding will procure match ammunition and components for the Marine Corps Rifle Team. Funds will continue to provide First Destination Transportation (FDT) of items delivering in FY 2021 and Marine Security Guard Battalion requirements procured through the U.S. State Department.									
The funding decrease of \$0.379M from FY 2020 to FY 2021 reflects an adjustment to the Marine Security Guard Battalion Ammunition based on current requirements and a decrease to the First Destination Transportation budget to reflect historical expenditures.
