A. Mission Description and Budget Item Justification													
The DCMA utilizes an agile incremental approach for system development, modernization, and sustainment allowing the DCMA to deploy needed systems and major business process changes. Through major initiatives like the Mechanization of Contract Administration Services (MOCAS) modernization, Integrated Workflow Management System (IWMS), and Talent Management System (TMS) the DCMA will reduce risk, improve performance, and enhance the competency of the acquisition workforce. These systems support the DCMA congressionally-mandated emerging missions focused on mission assurance and commercial item pricing. Furthermore, we are invigorating our efforts to adjust to the changing environment by achieving and sustaining audit readiness, creating an agile and flexible learning organization/culture, and optimizing mission execution to support the acquisition enterprise through agile business practices.

Furthermore, we are invigorating our efforts to adjust to the changing environment by achieving and sustaining audit readiness, creating an agile and flexible learning organization/culture, and optimizing mission execution to support the acquisition enterprise through agile business practices.

B. Accomplishments/Planned Programs (\$ in Millions)

	FY 2017	FY 2018	FY 2019
Title: System Modifications and Development	11.505	12.322	11.988
Description: The DCMA utilizes an agile incremental approach for system development, modernization, and sustainment allowing the DCMA to deploy needed systems and major business process changes. Through major initiatives like the Mechanization of Contract Administration Services (MOCAS) modernization, Integrated Workflow Management System (IWMS), Talent Management System (TMS) and other Business intelligence activities the DCMA will reduce risk, improve performance, and enhance the competency of the acquisition workforce.			
FY 2018 Plans: MOCAS In FY 2018 the Mechanization of Contract Administration Services (MOCAS) Joint Program Management Office (JPMO) will focus on establishing the conceptual design and transition plan for a modernized MOCAS technical architecture based on a transition strategy developed in the end of FY 2017. The JPMO intends to utilize principals of the Federal Segment Architecture Methodology (FSAM) to iteratively modernize the legacy MOCAS core mission, business service, and enterprise service architectures. In parallel, Single Line of Accounting (SLOA) coding and testing will be completed. The Procurement Defense Standards (PDS)/Procurement Instrument Identifiers (PIID) data standards will be finalized and fully implemented as well. Lastly, the JPMO intends to establish a prototyping and testing lab consisting of servers, storage, and networking hardware to evaluate improved MOCAS technical architecture segments in accordance with the approved conceptual design and transition plan.			

UNCLASSIFIED

Exhibit R-2A, RDT&E Project Justification: PB 2019 Defense Contract Management Agency			Date: February 2018		
Appropriation/Budget Activity	R-1 Program Element (Number/Name)	Project (Number/Name)			
0400 / 5	PE 0605013BL / <i>Information Technology Development</i>	01 / <i>Systems Modifications and Development</i>			
B. Accomplishments/Planned Programs (\$ in Millions)			FY 2017	FY 2018	FY 2019
IWMS The Integrated Workload Management System (IWMS) will add development and deployment of automated and semi-automated enterprise-wide functionally-integrated contract review, Financial Improvement and Audit Readiness (FIAR) audit management, and contract administration surveillance planning and execution capabilities throughout DCMA and begin development of contract close-out capabilities by 4th QTR FY 2018.					
TMS In FY 2018, DCMA's Talent Management System (TMS) Increment 2B will be deployed to 12,000 plus DCMA users while simultaneously transitioning all data and content off of the old stove piped All Training Frame Work (ATFW) system into the new TMS system. This Increment addresses needed production updates, simplifies workflows, develops Tag libraries to reduce html clutter, and provides vendor management and travel management capabilities. TMS will be intergraded with the Acquisition Workforce Qualification Initiative (AWQI) focused on on-the-job development for individuals' needs and the ability to view skill gaps at an organization level allowing for development of mitigation planning for systemic gaps. Increment 2B is scheduled to deploy the end of FY 2018 due to the need to bring on a new contract for further development. DCMA IT will also plan to position TMS as stand-alone infrastructure improving accessibility, security, and performance for DCMA's fully integrated training system.					
EVAS Earned Value Analysis System (EVAS) will continue its partnership with industry to maintain standardized Earned Value (EV) metrics and protocols. EVAS plans to execute a Commercial Off The Shelf (COTS) software configuration and deployment utilizing baseline EV metrics while performing and completing Increments 1, 2, 3, & 4 of configuration and testing. Initial Operational Capability (IOC) is scheduled for 2nd QTR FY 2018. IOC consists of the COTS software solution fully configured, tested, and deployed on a DCMA EV Data Analysis laptop with EV automated metrics and protocols available to DCMA Earned Value Management specialists. EVAS will use the remainder of FY18 to deploy to the EV community/field throughout DCMA.					
Asset and Service Management The DCMA is consolidating this cost category item into a new cost category item entitled "Business Intelligence Modernization" which will continue to modernize its Information Technology and Service Management (ITSM) capabilities to fall in line with the NDAA software asset and assurance mandates. In addition, the effort continues to align DCMA's Information Technology Business intelligence processes and capabilites with systems that can execute Information Technology Infrastructure Library (ITIL) best practices .

Exhibit R-2A, RDT&E Project Justification: PB 2019 Defense Contract Management Agency			Date: February 2018
Appropriation/Budget Activity	R-1 Program Element (Number/Name)	Project (Number/Name)	
0400 / 5	PE 0605013BL / <i>Information Technology Development</i>	01 / <i>Systems Modifications and Development</i>	
B. Accomplishments/Planned Programs (\$ in Millions)		FY 2017	FY 2018
Supply Chain Risk Assessment System DCMA is consolidating this cost category item into a new cost category item entitled "Business Intelligence (BI) Modernization" and will continue development and upgrading for the Supply Chain Risk Assessment System's BI and reporting capabilities for better informed acquisition insight and process improvement.			
Modifications & Delivery Orders (MDO) DCMA is consolidating this cost category item into a new cost category item entitled "Business Intelligence (BI) Modernization" MDO and will continue to improve mass modification and related CARs efficiency, further reducing manual contract intervention. Among the planned objectives are Accounting Classification Reference Number (ACRN) functionality improvements, elevated ACO privileges and controls, and Federal Procurement Data System (FPDS) CAR data feed improvements.			
Other Programs DCMA is consolidating this cost category item into a new cost category item entitled "Business Intelligence (BI) Modernization" and will continue to support WAWF modifications for industry and infrastructure backbone modernization efforts in support of all DCMA web capabilities.			
Business Intelligence (BI) Modernization DCMA is modernizing and replacing its ageing critical contracting applications with a Business Intelligence enterprise solution which enables end users to analyze multidimensional data interactively from multiple perspectives and data sources both internal and external to DCMA allowing for complex analytical and ad hoc queries with a rapid execution time. This modernization effort would replace critical applications such as Modifications & Delivery Orders (MDO), Contractor Business Analysis Repository (CBAR) , Messaging & Collaboration Services (MCC), Contract Receipt, Review, and Routing System (CRR), Contract Management Property Administration System (CPAS), Enterprise Integrated BI Toolset (EITS) and other applications. The solution will provide end user self-service customization allowing for the creation and modification of canned and unique dashboards, displays, workspaces, and reporting. Other considerations include online analytical processing (OLAP) which is a broader category of business intelligence which can be used for report writing.			
FY 2019 Plans:	MOCAS In FY 2019 the MOCAS JPMO's focus will transition from modernizing business processes to implementing the modernized conceptual design architectures established in FY 2018. The JPMO anticipates the legacy MOCAS architecture transition will commence through prototyping and analysis of detailed designs of early development focused on three key enterprise service segments; Data Migration and Stabilization, Enhanced Reporting and User Workflow Automation. Additionally, in parallel, the MOCAS JPMO working through the DoD-wide enterprise governance model will continue to study, select, design, develop,

test, and implement critical System Change Requests (SCRs) to further yield efficiency within the DoD's Procure to Pay (P2P) Business Process.					
IWMS IWMS will complete development and deployment of contract close-out and subsequently integrate with The Defense Contract Audit Agency (DCAA) and DCMA's Contract Business Analysis Repository to provide a "one stop shop" for DOD contract integration and close-out capabilities.					
TMS In FY 2019, TMS will plan, develop, test, and deploy Increment 3A to DCMA workforce and begin development of Increment 3B. Increment 3A will be deployed 2nd QTR FY 2019 and will focus on needed production updates, budgeting, and training certification capabilities. Increment 3B will focus on competency assessment, career development maps, Individual Development Plan (eIDP) management, On the Job Training (OJT) management, fulfillment checklist, certification management, and remaining items needed in the Tag library. Increment 3B is scheduled to be deploy 4th QTR FY 2019. In FY 2019, continued support to TMS Training requirements are imperative to the support and growth of DCMA's employees supporting the DCMA's acquisition oversight mission.					
EVAS Due to Cyber Enclave separation security requirements EVAS was required to pushed Phase II to the 4th quarter of FY 2019. EVAS plans to begin the second phase of the EVAS solution specifically the build out of the network infrastructure necessary to support the centralization of EV software and all supplier provided EV cost & schedule data. Centralization is necessary in order to deploy the EV Common Operation Picture allowing for automated real-time visibility across all EV programs, suppliers, and contracts.					
Business Intelligence (BI) Modernization BI Modernization will continue to provide internal DCMA end users self-service customization allowing for the creation and modification of canned and unique dashboards, displays, workspaces, and reporting across a multitude of DCMA functional capabilities. This cost category also includes online analytical processing (OLAP) which is a broader category of business intelligence which can be used for report writing.					
FY 2018 to FY 2019 Increase/Decrease Statement: Decrease related to MOCAS and IWMS movement from requirement and development phases to testing and development refinement for initial capability deployment coupled with inflation adjustment.	Accomplishments/Planned Programs Subtotals		11.505	12.322	11.988

D. Acquisition Strategy											
The DCMA is invigorating efforts to adjust to the changing environment through achieving and sustaining audit readiness, creating an agile and flexible learning organization/culture to support future customer programs, initiating and strengthening acquisition processes and optimizing mission execution to support the acquisition enterprise through agile business practices. In pursuing these business practices, we are continuing to utilize both government full time equivalents and contractors to perform specialized functions such as software development, testing, and process automation.											
E. Performance Metrics											
To deliver on our mission and vision, the Agency is focused on four primary goals: 1) inform and contribute to cost control and affordability decisions; 2) develop agile business practices which optimize mission execution and support to the acquisition enterprise; 3) create and maintain an agile learning organization and culture that strives to exceed customer expectations; and 4) expect of ourselves what we expect of our contractors: good fiscal stewardship. All four of the strategic goals go directly to the heart of the DCMA mission. The Agency helps our partners spend their finite dollars wisely, ultimately ensuring the front line Warfighters get the equipment and services they need when they need them. Adherence to executing and ultimately attaining these goals will posture DCMA to positively support current and future Better Buying Power initiatives and initiatives in Services acquisition, innovative science and technology, and efforts to ensure greater acquisition affordability, and better cost control throughout the acquisition life cycle. Agency focus will not solely rest on qualitative contract administration functions, but will also focus on quantitative factors as well – those factors that will clearly emphasize the Agency's return on investment (ROI) to the Department and to our other customers and the taxpayers at large. The Agency recognizes the obligation to be effective stewards of the funds we receive. In 2016, DCMA's return on investment to the Department and our other customers was \$2 for each \$1 invested by DoD. Additional ROI for the Department is the expanded and expanding DCMA commercial pricing expertise that will continue to improve DoD buying power, the Services' lethality, operational readiness, and sustainment posture.
