Department of Defense Fiscal Year (FY) 2021 Budget Estimates

February 2020

Navy

Justification Book Volume 1 of 3
Aircraft Procurement, Navy
Budget Activities 01–04

UNCLASSIFIED

The estimated cost of this report for the Department of the Navy (DON) is \$281,936.

The estimated total cost for supporting the DON budget justification material is approximately \$2,970,459 for the 2020 fiscal year. This includes \$82,977 in supplies and \$2,887,482 in labor.

Description:

The F/A-18E/F Naval Strike Fighter is a twin-engine, mid-wing, multi-mission tactical aircraft. F/A-18E/F can be missionized through selected use of external equipment to accomplish specific fighter or attack missions. This capability allows the Operational Commander more flexibility in employing his tactical aircraft in a dynamic scenario. The primary design mission for the F/A-18E/F is a strike fighter which includes the traditional applications, such as fighter escort and fleet air defense, combined with the attack applications, such as interdiction and close air support. Since the same airframe systems are used on attack missions as well as fighter missions, excellent fighter and self defense capability is retained.

Justification:

The FY2021 budget is for the procurement of 24 F/A-18 E/F aircraft as part of a three-year Multi-year Procurement (MYP), beginning in FY2019, per authority granted in the FY2019 National Defense Authorization Act (NDAA).

Footnotes:

(1) The FY2021 budget is for the procurement of 24 F/A-18E/F aircraft as part of a three-year Multi-year Procurement (MYP), beginning in FY2019, per authority granted in the FY2019 National Defense Authorization Act (NDAA).

(2) Due to aircraft procurement quantity variations, ancillary shortfalls have been realized. Fluctuations in the current ancillary equipment profile support the mitigation plan to eliminate the shortfall.

(3) Production Engineering Support in FYs 2022-2024 funds government production-related engineering operations and support through delivery of the final Lot 45/FY2021 aircraft.

(4) Integrated Logistics Support in FYs 2022-2024 funds government production-related logistics operations and support through delivery of the final Lot 45/FY2021 aircraft.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Footnotes:

(6) FY18/Lot 42 were procured in two separate buys. Eighteen (18) aircraft were procured in June 2018; the remaining six (6) aircraft were procured in March 2019. Breaks in delivery schedule in CY19-CY20 are planned to be mitigated by FMS deliveries. These deliveries will cover the gaps and maintain the production line without additional cost to the US government.

(7) Due to contracting timelines, FY18 engine procurements were executed in two separate contractual actions, and therefore, have two separate delivery schedules. The engine delivery schedule shows delivery of only 36 engines. The additional 12 FY18 engines will be delivered Oct-Dec CY20, at a rate of 4 per month. These deliveries cannot be displayed on the P-21 due to PDOCS system limitations. Breaks in delivery schedule in CY19-CY20 are planed to be mitigated by FMS deliveries. These deliveries will cover gaps and maintain the production line without additional cost to the US government.

Description:

The F/A-18E/F Naval Strike Fighter is a twin-engine, mid-wing, multi-mission tactical aircraft. F/A-18E/F can be missionized through selected use of external equipment to accomplish specific fighter or attack missions. This capability allows the Operational Commander more flexibility in employing his tactical aircraft in a dynamic scenario. The primary design mission for the F/A-18E/F is a strike fighter which includes the traditional applications, such as fighter escort and fleet air defense, combined with the attack applications, such as interdiction and close air support. Since the same airframe systems are used on attack missions as well as fighter missions, excellent fighter and self defense capability is retained.

Description:

Advance Procurement (AP) funding is required for long lead (24 months or greater) procurement time for various items required to be provided as Government Furnished Equipment (GFE) under the F/A-18E/F airframe contract for installation in the aircraft. There are several GFE components that require AP funding to include Navy Common Ejection Seats (NACES) Cartridge Actuated Devices (CADs)/ Propellant Actuated Devices (PADs), non-NACES CADs/PADs components, and numerous other GFE components all of which are procured and delivered to the F/A-18E/F prime aircraft integrator.

Footnotes:

⁽¹⁾ Engine funds long-lead requirements for the F/A-18E/F production program.

⁽²⁾ Other GFE funds long-lead requirements for the F/A-18E/F production program.

Description:

Joint Strike Fighter (JSF) program will enhance and field a family of aircraft that meets the needs of DoD and allies with three air vehicle variants including: the F-35A Conventional Take Off and Landing (CTOL) variant, the F-35B Short Take-Off and Vertical Landing variant, and the F-35C Carrier Variant (CV) delivering commonality among the three variants to minimize life cycle costs. This is a joint program with no executive service. Service Acquisition Executive (SAE) authority alternates between the Department of the Navy (DON) and the Department of the Air Force (DAF) and currently resides with the Navy. The F-35s are the next generation of strike fighters and provide increased aero-performance, stealth signature and countermeasures. Its advanced avionics, data links and adverse weather precision targeting incorporates the latest technology available. The F-35 has increased range with internal fuel and can employ superior weaponry over existing aircraft. The highly supportable, affordable, state of the art aircraft commands and maintains global air superiority. The production cost and quantities are interdependent due to sole source air vehicle and propulsion contracts. DAF regular procurement commenced in FY07, DON regular procurement commenced in FY08.

Notes:

(1) FY10 and prior quantity and funding for F-35B and F-35C were reported under same Budget Line Item (BLI) 0147. Result is 29 F-35B aircraft (6 - FY08; 7 - FY09; and 16 - FY10) and 340 F-35C aircraft are included in the BLI 0147 budget. FY11 is the first year F-35B are reported under BLI 0152. CY Advance Procurement for FY10 F-35B aircraft was included in the FY10 F-35C budget. The Advance Procurement Credit for FY10 F-35B aircraft was included in the FY11 F-35B budget.

(2) The F-35C Carrier Variant (CV) Initial Operational Capability (IOC) occurred in February 2019 and Full Rate Production (FRP) decision will occur after completion of Initial Operational Test and Evaluation (IOT&E) which is scheduled to complete in 2020.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:

The FY 2020 enacted includes congressional rescissions of \$12.481 million to FY 2019 funding. However, these rescissions are not reflected on the P-40.

BASIS FOR FY 2021 BUDGET REQUEST: The FY 2021 budget provides funding for 21 F-35C Aircraft and associated non-recurring and ancillary mission equipment to support delivery of those aircraft. The budget request also supports the lead-time procurement and support requirements required to for squadron standup and associated training and logistical requirements.

FY 2021 Lot 15 (FY 2021 Request) has lower production quantity compared to Lot 14 due to reduction in partner and foreign military sales overall quantity. Lot 15 is also the initial production incorporation of hardware to support Block IV capabilities. As a result of removal of partner from F-35 program, supply chain sources have been transitioned to alternate production sources which will have higher pricing for those particular components. These combined factors may challenge the F-35 Joint Strike Fighter Program Office's ability to achieve lot over lot savings that are comparable to prior years.

Non-recurring flyaway costs for FY 2021 include costs for tooling refurbishment as well as tooling required to support new hardware introduced for Block IV capabilities. Non-recurring also includes funding to address diminishing manufacturing sources (DMS) which include costs to manage DMS issues, procurement of bridge or life-of-type buys, and if cost-benefit analysis supports non-recurring engineering to implement DMS redesigns within the performance envelope to the production line. Other non-recurring costs include but are not limited to chase support for government acceptance flights and production readiness reviews to address program risks and cost reduction initiatives.

Support costs in FY 2021 include costs that are fixed in nature and do not fluctuate with aircraft quantities in particular years. For F-35C, these costs include peculiar ground support equipment to support squadron and site stand-ups. FY 2021 support cost request includes equipment to fill support equipment requirements for test squadron at NAS Fallon, and support equipment to fill all requirements with increased aircraft at VFA-125 located at NAS Lemoore. Support costs also include funding for 1 full mission simulator (FMS) at MCAS Yuma, 2 FMS at MCAS Cherry Point to support USMC F-35C training and 2 FMS at NAS Lemoore for USN F-35C training.

Intermediate Level maintenance capability is also included in peculiar ground support equipment and this capability is specific to the Department of the Navy.

Depot activation efforts continue in FY 2021 increasing repair capacity necessary for long-term sustainment of F-35 aircraft. FY 2021 request includes additional special test and support equipment to expand the number of repair docks and Ogden Air Logistics Center and Fleet Readiness Center East. FY 2021 also includes funding for propulsion depot standup at numerous U.S. depot locations.

(†) indicates the presence of a P-5a

Footnotes:

(1) Airframe Unit Recurring Flyaway (URF) is directly affected by Department of Air Force (DAF), Department of the Navy (DON), and International Partners quantity profile changes year over year. Prior to FY11 STOVL and CV aircraft were combined under BLI 0147, of the prior year aircraft 29 were STOVL.

(2) Engines: Increase in engine unit cost in FY2021 as compared to FY2020 is a result of inflation.

(3) ECO: Lot 14 (FY2020) includes costs to incorporate flight test instrumentation on 1 F-35C aircraft in amount of \$12.5M and is a discrete cost for that aircraft. FY2021 costs will support incorporating any changes for Lot 15 while aircraft are in production flow as a result of Block IV and Tech-Refresh III.

(4) Non-recurring Costs include such items as DON share of Production Non-Recurring Tooling which is necessary to support and maintain planned production ramp. In addition, FY2021 request includes funding for Diminishing Manufacturing Sources ("Life-of-type" part buys, management, and non-recurring redesign engineering), concurrency engineering, acceptance chase support, technical assistance and Cost Reduction Initiatives (CRI). This cost-element includes variable (aircraft qty driven) and fixed costs. Increase in FY2019 non-recurring is a result of efforts associated with establishing second sources to strengthen F-35 supply chain and ensure continued F-35 production.

(5) Year to year changes in Ancillary Equipment costs due to changes in aircraft quantity. Equipment includes Gen III Helmet Mounted Displays, launchers, and Pilot Flight Equipment.

(6) Full Mission Simulators (FMS): This cost element was added to break-out FMS from peculiar training equipment. FY2021 funding will support two FMS at NAS Lemoore for USN F-35C. One FMS at MCAS Yuma and two FMS at MCAS Cherry Point to support USMC F-35C.

(7) Year to year changes in Autonomic Logistics Information System (ALIS) are a result of investments required to support site and squadron stand-ups.

(8) Other ILS: Increase in FY2021 costs is a result of USMC B/C mix shift with USMC procuring 5 additional F-35C in lieu of 5 F-35B in FY2021 which requires shift in ILS support to manage adjust squadron configuration.

(9) Production Engineering Support: Increase in production engineering support is primarily driven by cost-sharing rebalancing across F-35 enterprise with USMC shared across both STOVL and CV budgets. Increase is also a result of adjustments to FY2019 for escalation driven by locality increases.

(10) Depot Standup: Increase in FY2021 as compared to FY2020 is a result of acceleration of depot standup to support depot maintenance of aircraft and repair of aircraft components.		
(11) FY 2020 Enacted Rescissions: The FY 2020 enacted includes congressional rescissions of \$12.481 million to FY 2019 funding. However, these rescission are not reflected on the P-40. The impact of these rescissions are reflected in the other cost elements.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Footnotes:

(12) F-35C production capacity is influenced by F-35B quantities. Maximum combined production including partners for F-35B and F-35C is 60 per year.

(13) 6 FY18 Congressional Add Aircraft will be delivered in calendar year 2021.

(14) Delivery schedule updated to reflect contracted CV engine delivery dates to support installation on aircraft.

Description:

Joint Strike Fighter (JSF) program is developing and fielding a family of aircraft that meets the needs of DoD and allies, with the F-35A Conventional Take Off and Landing (CTOL) variant, F-35B Short Take-Off and Vertical Landing (STOVL) variant and F-35C Carrier Variant (CV). The aircraft will have optimum commonality among three variants to minimize life cycle costs. This is a joint program with no executive service. Service Acquisition Executive (SAE) authority alternates between Department of Navy (DON) and Department of Air Force (DAF) and currently resides with the Navy. The F-35 is next generation of strike fighters to command and maintain global air superiority. Advance procurement funding will support Airframe and Engine Termination Liability, and long-lead parts and materials necessary to protect delivery schedule of FY2022 JSF aircraft buy. Additionally advanced procurement funding will provide funding for economic order quantity procurement in support of FY2021 to FY2023 JSF aircraft buys.

Notes:

(1) Prior to FY2011, F-35B was reported against Budget Line Item 0147. The F-35B now reports under Budget Line Item 0152. CY Advance Procurement for FY2010 F-35B aircraft was included in the FY2010 F-35C budget. The Advance Procurement Credit for FY2010 F-35B aircraft was included in the FY2011 F-35B budget.

(2) Economic Order Quantity funding was adjusted in FY2021 to account for adjusted F-35C quantity profile in FY2021 thru FY2023. FY2020 and FY2021 EOQ combined funding total reflects this adjusted EOQ funding requirement.

*Title represents the P-10 Title for Advance Procurement.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:

The FY2021 budget requests \$330.386M of Advance Procurement for FY2022 long lead materials as well as second portion of funding associated with FY2021 thru FY2023 Economic Order Quantity materials. The Advance Procurement (AP) funding requested in FY2021 will support Airframe and Engine long-lead parts and materials necessary to protect the Lot 16 delivery schedule.

Economic Order Quantity funding was adjusted in FY2021 to account for adjusted F-35C quantity profile in FY2021 thru FY2023. FY2020 and FY2021 EOQ combined funding total reflects this adjusted FY2021 thru FY2023 quantity profile.

Description: Joint Strike Fighter (JSF) program will enhance and field a family of aircraft that meets the needs of DoD and allies with three air vehicle variants including: the F-35A Conventional Take Off and Landing (CTOL) variant, the F-35B Short Take-Off and Vertical Landing variant, and the F-35C Carrier Variant (CV) delivering commonality among the three variants to minimize life cycle costs. This is a joint program with no executive service. Service Acquisition Executive (SAE) authority alternates between the Department of the Navy (DON) and the Department of the Air Force (DAF) and currently resides with the Navy. The F-35s are the next generation of strike fighters and provide increased aero-performance, stealth signature and countermeasures. Its advanced avionics, data links and adverse weather precision targeting incorporates the latest technology available. The F-35 has increased range with internal fuel and can employ superior weaponry over existing aircraft. The highly supportable, affordable, state of the art aircraft commands and maintains global air superiority. The production cost and quantities are interdependent due to sole source air vehicle and propulsion contracts. DAF regular procurement commenced in FY07, DON regular procurement commenced in FY08.													
Notes: (1) FY 2010 and prior quantity and funding for F-35B and F-35C were reported under same Budget Line Item 0147. Result is 29 F-35B aircraft (6 - FY08; 7 - FY09; and 16 - FY10) are included in the BLI 0147 Prior Year Column for a total of 353 F-35B aircraft (29-BLI 0147, 324-BLI 0152). The F-35C budget continues to report under BLI 0147. (2) Initial Operational Capability (IOC) occurred in July 2015 and Full Rate Production (FRP) decision will occur after completion of Initial Operational Test and Evaluation (IOT&E) which is scheduled to complete in 2020. (3) The FY 2021 aircraft procurement is a revised quantity and Net P-1 funding requests is based on and requires fully funded FY 2020 Advanced Procurement (AP) to support the requested aircraft. The reduction in STOVL throughput coupled with transition to alternate source suppliers requires fully funded FY 2020 advanced procurement to maintain the required STOVL manufacturing line and delivery schedule.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:

The FY 2020 enacted includes congressional rescissions of \$16.61 million to FY 2019 funding and \$114.246 to FY 2019 advanced procurement for FY 2020. However, these rescissions are not reflected on the P-40.

BASIS FOR FY 2021 BUDGET REQUEST: The FY 2021 budget provides funding for 10 F-35B Aircraft and associated non-recurring and ancillary mission equipment to support delivery. The budget request also supports the lead-time procurement and support requirements required to for squadron standup and associated training and logistical requirements.

FY 2021 Lot 15 (FY 2021 Request) has lower production quantity compared to Lot 14 due to reduction in partner and foreign military sales overall quantity . Lot 15 F-35B production has a significantly lower production quantity as compared to Lot 14 quantities. Of 10 F-35B aircraft requested for FY 2021, at least 4 of these aircraft will be priced at Lot 14 negotiated unit-recurring flyaway price of \$101.3M per aircraft (this pricing does not include non-recurring, ancillary equipment, support or spares costs which are listed in respective cost elements). Lot 15 is also the initial production incorporation of hardware to support Block IV capabilities. As a result of removal of partner from F-35 program, supply chain sources have been transitioned to alternate production sources which will have higher pricing for those particular components. These combined factors may challenge the F-35 Joint Strike Fighter Program Office's ability to achieve lot over lot savings that are comparable to prior years.

Non-recurring flyaway costs for FY 2021 include costs for tooling refurbishment as well as tooling required to support new hardware introduced for Block IV capabilities. Non-recurring also includes funding to address diminishing manufacturing sources (DMS) which include costs to manage DMS issues, procurement of bridge or life-of-type buys, and if cost-benefit analysis supports non-recurring engineering to implement DMS redesigns within the performance envelope to the production line. Other non-recurring costs include but are not limited to chase support for government acceptance flights and production readiness reviews to address program risks and cost reduction initiatives.

Support costs in FY 2021 include costs that are fixed in nature and do not fluctuate with aircraft quantities in particular years. For F-35B, these costs include peculiar ground support equipment to support squadron and site stand-ups. FY 2021 support cost request includes equipment for a 2nd squadron at MCAS Beaufort, 3rd squadron with detachment capability at MCAS Yuma, and 1st squadron standup with detachment capability at MCAS Cherry Point.

Intermediate Level maintenance capability is also included in peculiar ground support equipment and this capability is specific to the Department of the Navy.

Depot activation efforts continue in FY 2021 increasing repair capacity necessary for long-term sustainment of F-35 aircraft. FY 2021 request includes additional special test and support equipment to expand the number of repair docks and Ogden Air Logistics Center and Fleet Readiness Center East. FY 2021 also includes funding for propulsion depot standup at numerous U.S. depot locations.

(†) indicates the presence of a P-5a

Footnotes:

- (1) Airframe Unit Recurring Flyaway (URF) is directly affected by Department of the Air Force (DAF), Department of the Navy (DON), and International Partners quantity profile changes year over year.
- (2) Engines: Increase in engine unit cost in FY2021 as compared to FY2020 is a result of inflation.
- (3) ECO: Lot 14 (FY2020) includes costs to incorporate flight test instrumentation on 1 F35B aircraft in amount of \$12.4M and is a discrete cost for that aircraft. FY2021 costs will support incorporating any changes for Lot 15 while aircraft are in production flow as a result of Block IV and Tech-Refresh III.
- (4) Non-recurring Costs include such items as DON share of Production Non-Recurring Tooling which is necessary to support and maintain planned production ramp. In addition, FY2021 request includes funding for Diminishing Manufacturing Sources ("Life-of-type" part buys, management, and non-recurring redesign engineering), concurrency engineering, acceptance chase support, technical assistance and Cost Reduction Initiatives (CRI). This cost-element includes variable (aircraft qty driven) and fixed costs. Due to FY2019 advanced procurement rescission impact on FY2020 Net P-1 funding, FY2020 base (Lot 14) non-recurring requirements were procured with prior year funding.
- (5) Year to year changes in Ancillary Equipment costs due to changes in aircraft quantity. Equipment includes Gen III Helmet Mounted Displays, launchers, and Pilot Flight Equipment. Due to FY2019 advanced procurement rescission impact on FY2020 Net P-1 funding, FY2020 base (Lot 14) ancillary mission requirements were procured with prior year funding.
- (6) Year to year changes in Autonomic Logistics Information System (ALIS) are a result of investments required to support site and squadron stand-ups.
- (7) Production Engineering Support: Increase in production engineering support is primarily driven by cost-sharing rebalancing across F-35 enterprise with USMC shared across STOVL and CV budgets. Increase is also a result of adjustments to FY2019 for escalation driven by locality increases. Due to FY2019 advanced procurement rescission impact on FY2020 Net P-1 funding, FY2020 requirements were constrained and/or procured with prior year funding.
- (8) FY 2020 Enacted Rescissions: The FY 2020 enacted includes congressional rescissions of \$16.61 million to FY 2019 funding and \$114.246 to FY 2019 advanced procurement for FY 2020. However, these rescissions are not reflected on the P-40. The impact of these rescissions are reflected in the other cost elements.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Footnotes:

(9) F-35B production capacity is influenced by F-35C quantities. Maximum combined production including partners for F-35B and F-35C is 60 per year.

(10) 4 FY 2018 Congressional Add Aircraft will deliver in CY2021

(11) Delivery schedule updated to reflect contracted CV engine delivery dates to support installation on aircraft.

Description:

Joint Strike Fighter (JSF) program is developing and fielding a family of aircraft that meets the needs of DoD and allies, with the F-35A Conventional Take Off and Landing (CTOL) variant, F-35B Short Take-Off and Vertical Landing (STOVL) variant and F-35C Carrier Variant (CV). The aircraft will have optimum commonality among three variants to minimize life cycle costs. This is a joint program with no executive service. Service Acquisition Executive (SAE) authority alternates between Department of Navy (DON) and Department of Air Force (DAF) and currently resides with the Navy. The F-35 is next generation of strike fighters to command and maintain global air superiority. Advance procurement funding will support Airframe and Engine Termination Liability, and long-lead parts and materials necessary to protect delivery schedule of FY2022 JSF aircraft. Additionally advanced procurement funding will provide funding for economic order quantity procurement in support of FY2021 to FY2023 JSF aircraft buys.

Note:

(1) F-35B USMC variant Budget Line Item 0152 was created in FY11, prior years budgets were reported under Budget Line Item 0147. The F-35C continues to report under Budget Line Item 0147. CY Advance Procurement for FY2010 F-35B aircraft was included in the FY2010 F-35C budget. The Advance Procurement Credit for FY2010 F-35B aircraft was included in the FY2011 F-35B budget.

(2) Economic Order Quantity funding was adjusted in FY2021 to account for adjusted F-35B quantity profile in FY2021 thru FY2023. FY2020 and FY2021 EOQ combined funding total reflects this adjusted EOQ funding requirement.

*Title represents the P-10 Title for Advance Procurement.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:

The FY2021 budget requests \$303.035M of Advance Procurement for FY2022 long lead materials as well as second portion of funding associated with FY2021 thru FY2023 Economic Order Quantity materials. The Advance Procurement (AP) funding requested in FY2021 will support Airframe and Engine long-lead parts and materials necessary to protect the Lot 16 delivery schedule.

Description:													
The CH-53 is the only marinized heavy-lift helicopter in the world and is the Marine Corps only heavy-lift helicopter. The CH-53 mission is the conduct of expeditionary heavy-lift assault transport of armored vehicles, equipment and personnel to support distributed operations deep inland from a sea-based center of operations. The CH-53E "Super Stallion", introduced in 1980, has developed performance degradation, fatigue life, interoperability, maintenance supportability, and other operational concerns.													
The CH-53K "King Stallion" is designed to address these concerns and support Marine Air-Ground Task Force heavy-lift requirements in the 21st century joint environment, and is the only heavy-lift platform that can lift the Marine Air-Ground Task Force ashore. The CH-53K provides significant improvements in range and payload, performance, cargo handling, turn-around times, reliability and maintainability, interoperability and survivability.													
Total aircraft quantities for the CH-53K program are 200 helicopters. Of the 200 aircraft, four are System Demonstration Test Articles (SDTAs) and were incrementally funded using RDT&E funds and 196 aircraft are funded with Aircraft Procurement, Navy (APN).													
The CH-53K System Development and Demonstration program received a successful Milestone C decision on 4 April 2017.

Justification:
The FY 2020 enacted includes congressional rescissions of \$53.693 to FY19 advanced procurement for FY20. However, these rescissions are not reflected on the P-40.

This budget exhibit reflects cost estimate based on Low Rate Initial Production (LRIP) lots 1-3 Airframe, LRIP lots 1-2 Engine, GFE contract awards and the refinement of Depot Capability Establishment.

FY2021 APN funds the procurement of LRIP Lot 5 (seven aircraft), as well as advance procurement in support of LRIP Lot 6 (11 aircraft) long-lead materials.

Engineering Change Order (ECO) requirements are provided to address Contractor Furnished Equipment (CFE)/Government Furnished Equipment (GFE) correction of deficiencies found in flight test and incorporating them into the production configuration during LRIP.

Non-recurring Engineering (NRE) efforts are required for production tooling, obsolescence issues and supplier production line improvements.

Airframe, Engine and Avionics Peculiar Ground Support Equipment (PGSE) requirements are derived by three factors: scheduled stand-up of CONUS Main Operating Base; Initial Operating Capability (IOC) of sea-based deployment of four plane detachment; and establishment of Depot repair capability for the entire weapons system. A phased approach is being utilized to procure the required PGSE to support IOC plus four years as required by 10 US Code 2464/Navy Support Date (NSD). The cost in each year is based on the specific equipment being purchased for that year's capability establishment, not cost growth.

The Training System requirements are directly aligned to the scheduled site stand-up of two CONUS-based and one OCONUS-based Primary Deployment Sites.

Publications / Tech Data requirements are aligned with Intermediate (I) and Depot (D) level stand-up plans and support I and D level repair capabilities to meet IOC and 10 US Code 2464/NSD requirements.

Other ILS requirements are based on the program transition plan from interim to organic support, the contractor support requirement for operational site activations, and the contractor support requirement for I and D level repair capability stand-up.

Production Engineering Support requirements are for Government and contractor annualized support of the production program.

The FY 2021 budget request has been updated to account for a reduction of five aircraft (FY20 request compared to FY21 request). In addition, the request and current program plan accounts for the inclusion of the full \$215 million of FY 2020 advance procurement. The FY 2020 budget was not adjusted since the quantity adjustment occurred after FY 2020 request was submitted to Congress; Congress subsequently enacted the full AP amount for 12 aircraft.

Initial Spares increase from FY20-FY21 is required to build range and depth of stock on hand to support Operational Test and Fleet Operations. The initial spares procured in FY 2021 will enable the program to remain on track to fully support flight operations until material support date.

Footnotes:

- (1) Cost Element 1.1.1: Airframe total increases FY2020 to FY2021 with the increase in aircraft quantity. Additionally, the Prime Contractor's non-touch production support required for aircraft deliveries is captured under this cost element FY2019 and beyond to align with planned contract execution.
- (2) Cost Element 1.1.2: Engine total increases FY2020 to FY2021 with the increase in engine quantities to be procured. Unit Cost estimate is based on actual LRIP lots 1-2 Engine contract award.
- (3) Cost Element 1.1.4: GFE total increases FY2020 to FY2021 to support aircraft quantities being procured.
- (4) Cost Element 1.1.6: Other GFE total increases FY2020 to FY2021 to support the aircraft quantities being procured.
- (5) Cost Element 1.1.7: ECO funding is required to address CFE/GFE correction of deficiencies found in flight test and incorporating them into the production configuration during LRIP.
- (6) Cost Element 1.2.1: Budget supports rate/supplier tooling for airframe and engines to support current production ramp. Tooling is necessary for final assembly, back shops, and supplier base and is inclusive of Non- Recurring Engineering (NRE) to support design, purchase order, fabrication, acceptance and production line improvements.
- (7) Cost Element 2.4: Peculiar Training Equipment requirements align to HQMC's CH-53K squadron stand-up schedule, with the FY2021 procurement of the Helicopter Emulation Maintenance Trainer (HEMT) and Maintainer Instructional Courseware.
- (8) FY 2020 Enacted Rescissions: The FY 2020 enacted includes congressional rescissions of \$53.693 to FY 2019 advanced procurement for FY 2020. However, these rescissions are not reflected on the P-40. The impact of these rescissions are reflected in the other cost elements.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Description:

The CH-53 is the only marinized heavy-lift helicopter in the world and is the Marine Corps only heavy-lift helicopter. The CH-53 mission is the conduct of expeditionary heavy-lift assault transport of armored vehicles, equipment and personnel to support distributed operations deep inland from a sea-based center of operations. The CH-53E "Super Stallion", introduced in 1980, has developed performance degradation, fatigue life, interoperability, maintenance supportability, and other operational concerns.

The CH-53K "King Stallion" is designed to address these concerns and support Marine Air-Ground Task Force heavy-lift requirements in the 21st century joint environment, and is the only heavy-lift platform that can lift the Marine Air-Ground Task Force ashore. The CH-53K provides significant improvements in range and payload, performance, cargo handling, turn-around times, reliability and maintainability, interoperability and survivability.

The CH-53K System Development and Demonstration program received a successful Milestone C decision on 4 April 2017.

*Title represents the P-10 Title for Advance Procurement.								
Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.								
Justification: The FY 2020 enacted includes congressional rescissions of \$53.693 million to FY 2019 funding. However, these rescissions are not reflected on the P-40 and associated detail P-10. FY 2021 Advanced Procurement (AP) is required for long-lead materials associated with the procurement of Low Rate Initial Production (LRIP) Lot 6 (11 aircraft) in FY 2022. AP is used to procure long-lead materials and aircraft components with a production lead time of 12 months or more. These long-lead requirements are essential to establishing and maintaining a production schedule in support of the Marine Aviation Plan and Marine Air-Ground Task Force CH-53E replacement schedule. Procurement of long-lead items is determined based upon need dates for materials/components incorporation into the production line build sequence. The FY 2021 budget request has been updated to account for a reduction of five aircraft (FY 2020 request compared to FY 2021 request). In addition, the request and current program plan accounts for the inclusion of the full \$215 million of FY 2020 advance procurement. The FY 2020 budget was not adjusted since the quantity adjustment occurred after FY 2020 request was submitted to Congress; Congress subsequently enacted the full AP amount for 12 aircraft.

Description:

The AP will be used to procure long lead materials and aircraft components with a production lead time of 12 months or more. These long lead requirements are essential to establishing and maintaining a production schedule in support of the Marine Aviation Plan and Marine Air-Ground Task Force CH-53E replacement schedule.

Procurement of long lead items is determined based upon need dates for materials/components incorporation into the production line build sequence.

CFE procurements include: various airframe components, forgings and castings, and raw materials (Titanium).

GFE procurements include: various communication, navigation and survivability components.

Footnotes:

⁽⁴⁾ GFE - Miscellaneous includes CH-53K Communication, Navigation and Survivability components.

Description:																	
The V-22 is a tilt-rotor vertical takeoff and landing aircraft currently being produced for joint service application. The program provides an aircraft to meet the amphibious/vertical assault needs of the Marine Corps, the Carrier Onboard Delivery needs of the Navy, and supplements United States Special Operations Command (USSOCOM) special mission aircraft. The aircraft is capable of flying 2,100 miles with one refueling, and gives the Services the advantage of a Vertical/Short Takeoff and Landing (V/STOL) aircraft that can rapidly self-deploy to any location in the world.																	
The current procurement objective is 464: 360 MV-22 Marine Corps aircraft, 48 Navy aircraft, and 56 CV-22 aircraft for USSOCOM (funded by USSOCOM and the Air Force). The program successfully completed Milestone III in the 1st Quarter of 2006, and Initial Operational Capability (IOC) in March of 2007.																	
The USMC Program of Record (POR) for MV-22 aircraft quantities remains 360. The USN POR for CMV-22 aircraft quantities remains 48.																	
Initial Spares Prior Years = \$801.644M

Justification:

FY 2021 budget request for procurement of three (3) MV-22 aircraft, six (6) CMV-22 aircraft and associated support. FY 2021 represents the fourth year of the V-22 Multiyear Procurement III contract (FY 2018-FY 2022).

Production Engineering Support and Other ILS are shared support costs between the MV-22 and CMV-22 lines. Funding in these cost elements fluctuate from year to year based upon the funding levels sourced by HQMC and Navy, and in FY 2021, HQMC resources the majority of these support costs.

Remarks:

FY 2019 includes 2 OCO MV-22 aircraft and FY 2020 includes 4 Congressional add MV-22 aircraft.

(†) indicates the presence of a P-5a

Footnotes:

(1) Non-Recurring Cost: FY2021 increase is to commence funding Non-Recurring costs tied to MV-22 engineering changes being incorporated into the production line.

(2) Ancillary Equipment: FY2021 increase due to procurement of Mission Auxiliary Tank Systems (MATS) and MATS containers.

(3) Airframe PGSE: All FY 2019 and FY 2020 support costs were realigned to fully fund the FY 2019 and FY2020 enacted aircraft. FY 2021 increase to commence funding MV-22 PGSE procurement requirements.

(4) Production Engineering Support (PES): All FY 2019 and FY 2020 support costs were realigned to fully fund the FY 2019 and FY2020 enacted aircraft. PES was funded out of the CMV-22 budget in those years. FY 2021 MV-22 PES increases from FY 2020 to commence funding PES support costs out of the MV-22 budget again. Funding in the PES cost element fluctuates from year to year based upon the funding levels sourced by HQMC and Navy. HQMC resources the majority of these support costs in FY2021.

(5) Other Integrated Logistics Support (ILS): All FY 2019 and FY 2020 support costs were realigned to fully fund the FY 2019 and FY2020 enacted aircraft. Other ILS was funded out of the CMV-22 budget in those years. FY 2021 MV-22 Other ILS increases from FY 2020 to commence funding PES support costs out of the MV-22 budget again. Funding in the Other ILS cost element fluctuates from year to year based upon the funding levels sourced by HQMC and Navy. HQMC resources the majority of these support costs in FY2021. Included in this cost element is the Joint Program Based Logistics prime contractor support.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Footnotes:

- (6) FY2019 OCO MV-22 Aircraft procured with Lot 23 CMV-22 contract will deliver with Lot 25.
- (7) FY2020 Congressional Add MV-22 Aircraft procured will deliver with Lot 25.
- (8) FY2020 Congressional Add MV-22 Engines will deliver with Lot 25.

Remarks:

FY 2019 includes Congressional Add of 4 CMV-22 aircraft.

(†) indicates the presence of a P-5a

Footnotes:

- (9) The CMV-22 aircraft is a modification of the MV-22 and will perform the Carrier Onboard Delivery (COD) mission and include: (1) external conformal fuel tanks to provide the capability to meet the range requirements that the COD mission demands, (2) a high frequency radio to transmit/receive beyond line of sight over water, and (3) a public address system for use while transporting passengers. FY 2020 procures 10 CMV-22 aircraft and FY 2021 procures 6 CMV-22 aircraft to support approved Multiyear Procurement III contract. Increase to the Airframe/CFE Unit cost from FY20 to FY21 is due to the decrease in quantity being procured in conjunction with the approved Variation in Quantity (VIQ) Stepladder pricing.
- (10) Ancillary Equipment: FY2020 budget was deferred to fully fund the FY2020 enacted MV-22. FY2021 funds increased to procure Mission Auxiliary Tank Systems (MATS) and MATS Containers.
- (11) Airframe PGSE: FY2020 budget was reduced to fully fund the FY2020 enacted MV-22. FY2021 funds increased to continue stand up for CMV-22 capability.
- (12) Engine PGSE: FY 2021 funding supports the initial standup for CMV-22 capability.
- (13) Avionics PGSE: FY 2021 funding supports the initial standup for CMV-22 capability.
- (14) Peculiar Training Equipment: FY2020 budget was reduced to fully fund the FY2020 enacted MV-22. A total of 4 Flight Training Devices (2 FTD/ 2 CFTD), 1 Interactive Cockpit Learning Environment (ICLE) device, 1 Cockpit Management System Part Task Trainer (CMS-PTT) device and Virtual Maintenance Training (VMT) devices are required. FY 2021 procurement includes 1 Flight Training Device.
- (15) Production Engineering Support (PES): Funding in the PES cost element fluctuates from year to year based upon the funding levels sourced by HQMC and Navy. HQMC resources the majority of these support costs in FY2021.
- (16) Other Integrated Logistics Support (ILS): Funding in the Other ILS cost element fluctuates from year to year based upon the funding levels sourced by HQMC and Navy. HQMC resources the majority of these support costs in FY2021. Included in this cost element is the Joint Program Based Logistics prime contractor support.

(†) Delivery rows marked with this symbol indicate that they are funded through a separate Line Item. See the respective components' exhibits for details, including the full delivery schedule.
 "A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Footnotes:

(18) FY19 Congressional Add Aircraft (qty 2) contracted with Lot 23 will deliver with Lot 25

(19) FY19 Engine Procurement will have deliveries in Lot 24 and Lot 25. The engine contracts will be awarded in separate actions to meet delivery schedule.

Description:

The V-22 is a tilt-rotor vertical takeoff and landing aircraft currently being produced for joint service application. The program provides an aircraft to meet the amphibious/vertical assault needs of the Marine Corps, the Carrier Onboard Delivery needs of the Navy, and supplements USSOCOM special mission aircraft. The aircraft is capable of flying 2,100 miles with one refueling, and gives the Services the advantage of a Vertical/Short Takeoff and Landing (V/STOL) aircraft that can rapidly self-deploy to any location in the world.

The current procurement objective is 464: 360 MV-22 Marine Corps aircraft, 48 Navy aircraft, and 56 CV-22 aircraft for USSOCOM (funded by USSOCOM and the Air Force). The program successfully completed Milestone III in the 1st Quarter of 2006, and Initial Operational Capability (IOC) in March of 2007.

The Advance Procurement (AP) funding will be used to procure long lead Contractor Furnished Equipment (CFE) items (24 months or greater production lead time) such as raw materials (inclusive of steel, titanium, aluminum, composites), forgings, bearings, fittings, panel assemblies, actuators, liners, bracket assemblies, retainer assemblies, bushings, rib assemblies, frame assemblies, pump assemblies, buffers, empennage assemblies, unions, flight control computers, lightweight inertial navigation system, skin assemblies, advanced mission computers, tube assemblies, gearboxes, and airframe structural components. V-22 lead times for components have been as high as 40.6 months (empennage assemblies). Other specific material lead items are 130 degree heavy duty hex drive bolts (39.0 months), remote transmitters (36.6 months), drag strut actuator assemblies (35.8 months), and steering unit supplier pull (35 months). All of these long lead items are essential to maintaining the current schedule.

Any reduction or delay in approval of advance procurement funding for CFE Airframe would result in a significant cost increase and schedule delay to the V-22 program.

The USMC Program of Record (POR) for MV-22 aircraft quantities remains at 360. The USN POR for CMV-22 aircraft quantities remains at 48.

*Title represents the P-10 Title for Advance Procurement.								
Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.								
Justification: FY 2021 Advance Procurement funding is requested for the long-lead requirements associated with the procurement of six (6) MV-22 aircraft and seven (7) CMV-22 in FY 2022. Airframe/CFE requirements are calculated on a termination liability basis, reflecting contractor's funding requirements for procurement of long lead parts and materials necessary to protect the delivery schedule.								
Cost estimates use Multiyear Procurement contract structure for FY 2018 - 2022 for MV-22 and CMV-22.

Description:																	
The mission of the AH-1Z attack helicopter is to provide rotary wing close air support, anti-armor, armed escort, armed/visual reconnaissance, anti-helicopter and point air defense and fire support coordination during day/night conditions. UH-1Y utility helicopter also provides command and control and combat assault support during day/night and reduced weather conditions. The UH-1Y/AH-1Z procurement strategy is to convert 37 AH-1W helicopters into AH-1Zs (complete), build 152 new AH-1Zs, remanufacture ten (10) H-1N helicopters into UH-1Ys (complete), and build 150 new UH-1Y models. The UH-1Y and AH-1Z share an 85 percent common footprint, which includes portions of maintenance planning, technical data, supply support, support equipment, facilities, and resources required at the intermediate and depot level maintenance activities for both structural and avionics items of repair.																	
The UH-1Y and AH-1Z include a new 4-bladed rotor system with semiautomatic blade fold of the new composite rotor blades, performance-matched transmissions, a new 4-bladed tail rotor and drive system, upgraded landing gear, and pylon structural modifications as compared to the legacy aircraft. Both aircraft also incorporate common, modernized, and fully integrated cockpits/avionics that will reduce operator work load and improve situational awareness and safety. The UH-1Y/AH-1Z aircraft have increased maneuverability, speed, and payload capability. Additionally, the AH-1Z upgrades the current AH-1W Night Targeting System (NTS) Forward Looking Infrared (FLIR) system to a 3rd generation, staring, focal plane array FLIR that significantly extends autonomous weapons engagement ranges.

(†) indicates the presence of a P-5a

Footnotes:

(1) FY 2019 includes three years of Prime Contractor Systems Engineering Program Management (SEPM) costs budgeted in the final year of production airframe contract to cover projects as the last lot of airframes deliver through 2022.

(2) FY 2020 funding for production line shutdown will support storage and disposition of UH-1Y tooling and preparation for drawdown of AH-1Z production line through 2022. Specific activities include: line tear down, inspection and classification of equipment inventory, technical data dispositioning, tooling preservation and storage, and associated shipping costs.

(3) The FY21 funding supports program office management and oversight of the incorporation of Engineering Change Proposal and other technical changes into the production line. This includes the engineering, logistics, and GFE efforts associated with ensuring the technical changes planned for aircraft have been fully reviewed and validated prior to incorporation into the production line.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Description:

The MH-60R Multi-Mission helicopter deploys with Carrier Air Wings aboard aircraft carriers and in support of expeditionary detachments aboard cruisers, destroyers, and Littoral Combat Ships in addition to supporting operations ashore. The MH-60R Multi-Mission Helicopter represents a significant avionics improvement to the H-60 series helicopters by enhancing primary mission areas of Surface Warfare (SUW), Anti-Submarine Warfare (ASW), Electronic Warfare (EW), Command and Control (CC), and Non-Combat Operations (NCO). Secondary missions include: Amphibious Warfare (AMW), Air Warfare (AW), Health Services (HS), Fleet Support - Operations (FS-O), Intelligence Operations (INT), Logistics (LOG), and Naval Special Warfare (NSW). Airborne Low Frequency Sonar is added to enhance the existing acoustics suite. An added Multi-Mode Radar includes an Inverse Synthetic Aperture Radar mode (permits stand-off classification of hostile threats). An improved Electronics Surveillance Measures system will enable passive detection and targeting of radar sources not currently detectable. Pre-Planned Product Improvements includes upgrades to communication, navigation, Identification Friend or Foe, Multi-Spectral Targeting System/Forward Looking Infrared, radar, weapons, data link, safety, maintenance, airframe and mission planning systems.

Notes:

1. Prior Years Initial spares should reflect \$300.565 vice \$0.000.

2. Totals may not add due to rounding.

Description:																	
The P-8A Multi-mission Maritime Aircraft (MMA) system is a heavily modified and militarized derivative of Boeing's 737-800 ERX commercial aircraft. The P-8A is the replacement system for the P-3C. The P-8A will sustain and improve the armed maritime and littoral Intelligence, Surveillance, and Reconnaissance capabilities for U.S. Naval Forces in traditional, joint and combined roles to counter changing and emerging threats. The P-8A will have a substantial role in Sea Power 21 and will satisfy several mission requirements in Sea Shield, Sea Strike and FORCEnet. The primary roles of the P-8A are persistent Anti-Submarine Warfare (ASW) and Anti-Surface Warfare (ASuW). The procurement funds the production of the aircraft, trainers and associated support equipment.																	
Note: April 2018 OPNAV P-8A Requirements and Resources Review Board (R3B) decision set P-8A inventory at 138 aircraft. The additional 18 aircraft above the original P-8A program of record included a recapitalization of the Navy Reserve Maritime Patrol and Reconnaissance Forces at NAS Jacksonville, FL (VP-62) and NAS Whidbey Island, WA (VP-69), and would be used to support all Maritime Patrol and Reconnaissance Forces (MPRF) mission areas required by the National Security Plan, National Defense Plan and the Defense Plan. Due to a required balancing of overall Navy fiscal and warfighting capability priorities, only 120 P-8A aircraft are currently funded and FY 2020 is planned as the last year of procurement.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:

FY 2021 procurement funds are required in Cost Element 1.2.3 Non Recurring Cost - Production Line Shutdown and Cost Element 1.2.4 Non Recurring Cost - Acquisition Closure to support acquisition program closeout and production line shutdown of the P-8A program. Based on the final FY 2020 procured P-8A aircraft delivery occurring in 1QFY24, support for acquisition program closeout and production line shutdown is required through 3QFY24.

Footnotes:

(1) Production Line Shutdown include costs associated with contractor AF/CFE, CFE electronics, and GFE planning and administration; and inventory, classification and physical disposition of facilities, tooling, test equipment, information, and other property at P-8A OEM or supplier locations necessary to shutdown and closeout the P-8A Production Line.

(2) Acquisition Closure include costs associated with government disposition of contractor production line shutdown requirements, contract deliverables due after delivery of final aircraft, and closeout of all production line related contracts.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Footnotes:

(3) The last three aircraft did not include any Advanced Procurement funding, the delivery schedules extend beyond the planned 12 month period applicable for the remainder of the FY20 Lot 11 aircraft.

Description:

The P-8A Multi-mission Maritime Aircraft (MMA) system is a heavily modified and militarized derivative of Boeing's 737-800 ERX commercial aircraft. The P-8A is the replacement system for the P-3C. The P-8A will sustain and improve the armed maritime and littoral Intelligence, Surveillance, and Reconnaissance capabilities for U.S. Naval Forces in traditional, joint and combined roles to counter changing and emerging threats. The P-8A will have a substantial role in Sea Power 21 and will satisfy several mission requirements in Sea Shield, Sea Strike and FORCEnet. The primary roles of the P-8A are persistent Anti-Submarine Warfare (ASW) and Anti-Surface Warfare (ASuW). The Advanced Procurement funds the long lead time items required for production of the aircraft.

Description:

The E-2D Advanced Hawkeye (AHE) is an all-weather, twin engine, carrier-based, Airborne Command, Control and Surveillance aircraft designed to extend task force defense perimeters. The AHE mission is to provide advance warning of approaching enemy surface units and aircraft, to vector interceptors or strike aircraft to attack, and to provide area surveillance, intercept, search and rescue, communications relay, and strike/air traffic control. Key AHE objectives include: improved battle space target detection and situational awareness, especially in the littorals; support of Theater Air Missile Defense operations; and improved Operational Availability.

0195 BLI Prior Year includes E-2C Procurement (Qty 44)

Cost To Complete (CTC) added to reflect N9 Decision Memorandum, signed 7/19/19, to increase the E-2D Program of Record of aircraft, to include 11 additional aircraft. The CTC includes costs associated with the quantity (qty) 9 aircraft, since two aircraft were added by Congress in FY20. Currently, the CTC are unfunded; however, the Navy plans to address funding for the additional E-2Ds during the POM processes.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:

FY 2021 funding is requested to procure four E-2D AHE Full Rate Production Lot 9 aircraft and associated support. This budget request includes funding to support a FY 2019 through FY 2023 Multi-Year Procurement (MYP) contract.

(†) indicates the presence of a P-5a

Footnotes:

(1) Recurring Flyaway ECO: ECO costs are based on several engineering changes occurring on the MYP contract. Beginning in FY20 through FY23, ECO costs will increase due to adding additional engineering change proposals (ECPs) to support the Delta System Configuration 4 (DSSC 4) capability. ECPs: Beyond Line of Sight (BLOS), Tactical Targeting Network Technology (TTNT) and Navigation Warfare (NAVWAR).

(2) Non-Recurring Engineering (NRE): The E-2D multi-year procurement II contract settlement assumed that the program would obligate a total of \$260.7M FY19 advanced procurement funding and a total of \$200.2M FY20 advanced procurement funding. The additional funds will allow the program to shift previously planned economic order quantity procurements to the left to achieve greater cost savings across all years of the contract. The Navy completed a below threshold reprogramming (BTR) to realign the FY19 funding from regular APN BLI 0195 to advanced procurement BLI 0195C in March 2019 and plans to do the same to realign the FY20 funding as soon as FY20 appropriations and BTR authority are available. As of the FY 2021 budget submission, the \$9.999M to resource the FY20 BTR resides in the NRE cost element.

(3) Avionics PGSE - FYDP cost increase and/or decrease variances between fiscal years is due to the differences in the quantity and hardware configuration of Test Program Sets (TPS) and support equipment quantity requirements associated with Organic Depot Standup.

(4) Pec Training Equipment: Increase in cost from FY20 to FY21 is due to the procurement of Weapons System Trainer #6.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Footnotes:

(7) Airframe CFE - FY20 P-21 schedule was updated from a quantity (qty) of 4 aircraft, to a qty of 6 aircraft, based on Congress adding FY20 funding for 2 additional aircraft. Due to the production max capacity rate of 8 aircraft in FY20 (Qty 8 includes 3x FMS Japan Acft), 1 of the 2 additional aircraft will be procured in FY21 (Lot 9).

(8) CFE Electronics - FY20 P-21 schedule was updated from a quanity (qty) of 4 aircraft, to a qty of 6 aircraft, based on Congress adding FY20 funding for 2 additional aircraft. Due to the production max capacity rate of 8 aircraft in FY20 (Qty 8 includes 3x FMS Japan Acft), 1 of the 2 additional aircraft will be procured in FY21 (Lot 9).

Description:

The E-2D Advanced Hawkeye (AHE) is an all-weather, twin engine, carrier-based, Airborne Command, Control and Surveillance aircraft designed to extend task force defense perimeters. The AHE mission is to provide advance warning of approaching enemy surface units and aircraft, to vector interceptors or strike aircraft to attack, and to provide area surveillance, intercept, search and rescue, communications relay, and strike/air traffic control. Key AHE objectives include: improved battle space target detection and situational awareness, especially in the littorals; support of Theater Air Missile Defense operations; and improved Operational Availability.

<p>Justification: FY 2021 Advance Procurement funding is requested for the long-lead requirements associated with the procurement of five E-2D aircraft in FY 2022. Airframe requirements are calculated on a supplier's commitment, reflecting contractor's funding requirements for procurement of long lead parts and materials necessary to protect the delivery schedule. This budget request also includes EOQ funding in FY2021 to support a FY 2021 through FY 2023 Multi -Year Procurement (MYP) contract. </p>

Description:							
The Advance Procurement (AP) funding will be used to procure long lead CFE items (14 months or greater production lead time) such as raw materials (inclusive of steel, titanium, aluminum, composites), castings, forgings, bearings, actuators, mission equipment, antenna assemblies, panel assemblies, gearboxes and airframe structural components. E-2D lead times for components have been as high as 42 months. The E-2D program has been actively pursuing lead time reductions and the current longest lead component is 36 months (APY-9 Radar). Some specific material lead items are the ADS-18 antenna assembly (32 months), landing gear including forgings (26 months) and empennage assembly including composite core materials and forged torque tubes for the empennage (31 months). All of these long lead items and special milling for "oversized" sheet stock required for the Fuselage skins at the beginning of aircraft assembly (14 months) are essential to maintaining the current schedule in support of the Fleet Forces transition to the E-2D.

Description:													
The Advanced Helicopter Training System (AHTS) is a system-of-systems that provides the capability to train advanced rotary wing and intermediate tilt-rotor students for designation as Naval Aviators in the Navy, Marine Corps, and Coast Guard. AHTS consists of: 1) the TH-73A air vehicle, 2) the Ground Based Training System (GBTS), including flight training devices, revised curriculum, computer aided instruction, classroom instruction, and the facilities to permanently house them, and 3) the maintenance and logistics infrastructure necessary to ensure defined aircraft availability rates. The TH-73A will meet all requirements under Federal Aviation Regulations to operate under both visual flight rules (VFR) and instrument flight rules (IFR) within the United States national airspace system. The TH-73A and GBTS will continue to train helicopter familiarization, basic and radio instruments, and basic warfighting skills. Basic warfighting skills include: energy management, night vision devices, terrain flight, formation flight, confined area and pinnacle landings, external load and vertical replenishment operations, search and rescue (SAR) including hoist and shipboard operations.													
AHTS addresses capacity and capability gaps for the Chief of Naval Air Training (CNATRA) rotary training pipeline identified in the Naval Aviation Undergraduate Training (C-NAUT) Capabilities Based Assessment (CBA) completed in 2015. The CBA identified a common theme of technological obsolescence and mechanical deficiencies requiring a new acquisition or updates to aircraft and simulators.													
This line item provides funding for procurement of aircraft to replace the TH-57B/C Training System. The current plan includes budgeting and procuring a single, commercially available Type/Model/Series (T/M/S), digital cockpit (glass) air vehicle without development, testing, or modification of existing commercial equipment. This plan will assure continuity of a student naval aviator's training transition from primary training to rotary training to the fleet. The costs and quantities budgeted in this document are based on the award of a Firm Fixed Price contract in the second quarter of FY 2020 with Options planned for FY 2021 - FY 2023. Anticipated aircraft service life of 25-30 years.

Justification:

The FY 2021 budget request includes the a Firm Fixed Price procurement of 36 Advanced Helicopter Training System (AHTS) aircraft and associated support costs.

The AHTS is the replacement to the TH-57B/C Training System. The aging 35+ year old TH-57B/C Training System faces obsolescence, training deficiencies, increasing maintenance issues, sustainment costs, and safety of flight concerns. Rotary training represents Chief of Naval Air Training (CNATRA) highest demand pipeline and is the only CNATRA platform remaining with analog cockpit technology. The Navy completed a Capability Based Assessment for Naval Aviation Undergraduate Training (C-NAUT) that identified a significant number of capability gaps within rotary training, significant reliability and safety of flight deficiencies, as well as an inability to meet pilot production requirements. Additionally, operations and support costs for the legacy TH-57 Aircraft Conditional Inspection (ACI), required every five years, have increased from \$80K per aircraft ten years ago to \$694K per aircraft today. A commercially available air vehicle will be the right solution to meet the needs of the Navy quickly, efficiently, and with the most economical intent. This plan provides ample amount of aircraft to transition to a more modern solution that better prepares pilots for fleet integration. This budget ensures a replacement training helicopter is delivered to the fleet as quickly as possible.

(5) 2.4 Peculiar Training Equipment: Dollar amount in FY 2020 updated to reflect final negotiated Firm Fixed Price contract. Increases in FY 2020 and FY 2021 for eClassrooms and Part Task Trainers supports an acceleration of IOC.		
(6) 2.6 Production Engineering Support: Increase in FY 2021 due to Fleet Support Team (FST) and training command costs to support IOC and increased student throughput.		
(7) 2.7 Other ILS Support budget is an estimate of aircraft specific items, including Operation, Maintenance, Installation, and Training (OMIT) data, Above OMIT data, Health and Usage Monitoring System (HUMS) laptops, Mission Planning System Hardware, Manning Analysis and Curriculum Development. FY 2021 and FY 2022 includes higher Operation, Maintenance, Installation, and Training (OMIT) data costs in support of engineering data for failure analysis and operational questions once flight operations begin.

Description:

The KC-130J aircraft is an all metal, high-wing, long-range, land-based monoplane. It is designed for cargo, tanker and troop carrier operations. For tanker operations, the aircrew will consist of a pilot, co-pilot, augmented crew member and two air refueling observers. Features include wing mounted refueling pods, an internal cargo ramp and door, crew and cargo compartment pressurization, ground and in-flight refueling, thermal deicing systems, and a Heads-Up Display (HUD). It is designed to take off and land on unimproved runways. The KC-130J aircraft is powered by four Allison AE 2100D3 Turbo-Prop Engines with four six-bladed composite propellers. The cockpit includes state-of-the-art electronics with Liquid Crystal Display (LCD) instrumentation. The improved power performance of the KC-130J provides 40 percent greater range, 25 percent higher cruise ceiling, 46 percent decrease in time-to-climb, 21 percent increase in maximum speed and 41 percent decrease in maximum effort take-off run over the existing KC-130F/R/T models.

The mission of the KC-130J is to provide tactical in-flight refueling and assault support transport. As a tactical transport, it is capable of conventional or aerial delivery of personnel or cargo. The aircraft is capable of carrying 92 combat troops or 64 paratroopers with equipment or 64 litters when configured as an ambulance. The aircraft is equipped for in-flight refueling to service two aircraft simultaneously and has a removable 3,600 gallon (13,627 liter) fuel tank in the cargo compartment. The KC-130J has the capability to refuel low-speed helicopters, tilt-rotor aircraft and high-speed jet aircraft. Aerial refueling of helicopters is normally conducted at 6,000 feet or below, at an airspeed of 115 KTS TAS and requires a ground change of the refueling basket.

1. Initial spares Prior Year total = 266,390; Initial spares TC = 214,894; Total Initial Spares = 487,326

2. USMC KC-130J aircraft Block 8.1 and DON LAIRCM Production cut-in will be managed by the USAF as part of the MYP III Procurement contract (FY19-FY23) and is broken out separately from the Airframe/CFE costs.

3. CFE costs and Block 8.1/DON LAIRCM Product Cut-In (FY19-FY23) costs have been updated to reflect MYP III pricing following award of the USAF contract on 12/27/2019. Cost savings from MYP III were realigned to buy GFE for B8.1 & DON LAIRCM production cut-in, to buy down critical Support Equipment (SE) deficits, and to procure necessary training equipment for USMC squadrons.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:

FY 2021 budget request procures KC-130J aircraft, associated support equipment for the USMC/USMCR Squadrons, removable 3,600 gallon fuel tanks to account for the inventory increase, initial reliability centered maintenance, and maintenance planning associated with delivery of new aircraft. Budget request supports FY19-23 Multi-Year Procurement (MYP) with joint participation with the USAF (Lead service).

Footnotes:

- (1) CFE costs and Block 8.1/DON LAIRCM Product Cut-In (FY19-FY23) costs have been updated to reflect MYP III pricing following award of the USAF contract on 12/27/2019. Cost savings from MYP III were realigned to buy GFE for B8.1 & DON LAIRCM production cut-in, to buy down critical Support Equipment (SE) deficits, and to procure necessary training equipment for USMC squadrons.
- (2) Updated pricing for MYP III configuration to include B 8.1 and LAIRCM.
- (3) USMC KC-130J aircraft Block 8.1 and DON LAIRCM Production cut-in will be managed by the USAF as part of the MYP III Procurement contract (FY19-FY23) and is broken out separately from the Airframe/CFE costs.
- (4) The addition of non-recurring costs in FY21 is to support engineering for diminishing manufacturing sources and material shortages in accordance with fair share agreement with USAF. Per agreement with USAF, FY21 estimate reflects appropriate level for non-recurring costs as shown.
- (5) FY21 budget request reflects procurement of Fuselage Training device (FuT), WST in FY22 and the other trainers in FY23.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand). If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Footnotes:

(6) Manufacturer Production Lead Time does not reflect additional 12 - 24 month lead time required for long lead items procured through the Advance Procurement contract.

(8) FY18 QTY 2 baseline aircraft procured via MYP contract with PLT of 24 months; QTY 4 Congressional Add aircraft procured via FYOC contract (no Advance Procurement) with PLT of 36 months. Contractual delivery dates for Congressional Add aircraft #60 is Mar 2021, aircraft #61 is April 2021, aircraft # 62 is June 2021, and aircraft #63 is Oct 2021. The system is not allowing entry of Oct 2021 for aircraft #63 on the P-21 Schedule.

Description:

The KC-130J aircraft is an all metal, high-wing, long-range, land-based monoplane. It is designed for cargo, tanker and troop carrier operations. For tanker operations, the aircrew will consist of a pilot, co-pilot, augmented crew member and two air refueling observers. Features include wing mounted refueling pods, an internal cargo ramp and door, crew and cargo compartment pressurization, ground and in-flight refueling, thermal deicing systems and a Heads-Up Display (HUD). It is designed to take off and land on unimproved runways. The KC-130J is powered by four Allison AE 2100D3 Turbo-Prop Engines with four six-bladed composite propellers. The cockpit includes state-of-the-art electronics with Liquid Crystal Display (LCD) instrumentation. The improved power performance of the KC-130J provides 40 percent greater range, 25 percent higher cruise ceiling, 46 percent decrease in time-to-climb, 21 percent increase in maximum speed and 41 percent decrease in maximum effort take-off run over the existing KC-130F/R/T models.

The mission of the KC-130J is to provide tactical in-flight refueling and assault support transport. As a tactical transport, it is capable of conventional or aerial delivery of personnel or cargo. The aircraft is capable of carrying 92 combat troops or 64 paratroopers with equipment or 64 litters when configured as an ambulance. The aircraft is equipped for in-flight refueling to service two aircraft simultaneously and has a removable 3,600 gallon (13,627 liter) fuel tank in the cargo compartment.

The KC-130J has the capability to refuel low-speed helicopters, tilt-rotor aircraft, and high-speed jet aircraft. Aerial refueling of helicopters is normally conducted at 6,000 feet or below, at an airspeed of 115 KTS TAS and requires a ground change of the refueling basket.

*Title represents the P-10 Title for Advance Procurement.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:

The FY21 Advance Procurement request covers requirements for Airframe Contractor Furnished Equipment (CFE) and Long Lead Government Furnished Equipment (GFE) to support procurement of 5 KC-130J Aircraft for USMC Squadrons under Program Element 0502504M in FY22.

Budget request supports FY19-FY23 Multi-Year Procurement Three (MYPIII) with joint participation with the USAF (Lead service).

Description: The Advance Procurement (AP) funding will be used to procure long lead GFE and CFE items. Material long lead items are CFE (Airframe) (12 months - 24 months), and GFE: SATCOM, AN/ARC210 (12 months), External Tank Reticulated Foam (12 months), TACTERM, ANDVJ (12 months), AN/AAR-47 Missile Approach Warning System (MAWS) (15 months), AN/ALR-56M Radar Warning Receivers (18 months), Wing Reticulated Foam (15 months), KY-75 (16 months), AN/PRC 149 Radio Set (24 months). All of these long lead items are essential to maintaining the KC-130J delivery schedule.							
Footnotes: (5) This budget request supports a FY19-FY23 Multi-Year Procurement (MYP) contract.

Description:												
The F-5N is a single seat, dual engine supersonic land based fighter. It is designed to a service life of 9000 flight hours. The aircraft is powered by dual J85 21C engines. The mission of the F-5N is to provide air-to-air training for strike fighter and electronic warfare advanced readiness programs, large force exercise, unit-level training and fleet replacement squadron training. As a supersonic aircraft, it is capable of multi-threat environment, bringing virtually every potential adversary our Navy and Marine Corps might face. The mission cannot be fulfilled through non-material alternatives.												
The contract for 22 F-5E/F Adversary aircraft from the government of Switzerland is planned for February of 2020.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Description:																	
This budget reflects a production pause in FY 2021 and FY 2022 of MQ-4C Triton Unmanned Air Systems (UAS), deferring further procurement of the Multi-INT configuration until FY 2023. This budget supports preservation of key elements of the Support costs to include trainer/training equipment, peculiar ground support equipment, government and contractor production team, and Interim Contractor Support of the Baseline Early Operational Capability. This budget continues to fund standup of the Identification Friend or Foe (IFF) and Electro-Optical/Infrared (EO/IR) organic depots and intermediate repair and maintenance capabilities but defers the Multi-Function Active Sensor (MFAS) radar and Preventive Maintenance Inspection (PMI)/Structures depot requirements. To provide long-term sustainment of the UAS, the program will address deferred depot actions in a future budget.																	
The MQ-4C Triton Unmanned Air System (UAS) is integral to recapitalizing the Navy's Maritime Patrol and Reconnaissance Force. The MQ-4C Triton UAS provides a persistent maritime and littoral Intelligence, Surveillance, and Reconnaissance (ISR) data collection and dissemination capability to the fleet, serving as a force multiplier for the Joint Force and Fleet Commander, enhancing situational awareness of the battle space and shortening the sensor-to-shooter kill chain. Teamed with its manned-capability counterpart, the P-8A, Triton will be a key component of the Navy's family of systems to achieve maritime domain awareness. The MQ-4C air vehicle, mission control system, specialized sensors, and communications suite will play a significant role in achieving the Navy's strategic vision for the 21st century. The Triton system, as a persistent ISR enabler, provides the supported combatant commander and fleet commander with unparalleled situational awareness of the maritime battle space to develop and sustain the Common Operational Tactical Picture (COTP). The system will also serve as a Fleet response plan enabler with a persistent, global force offering to provide critical trip wire information for intelligence preparation of the environment. Triton will connect to both the Global Information Grid and the Distributed Common Ground System-Navy information backbone to provide the Warfighter with increased levels of battlespace awareness to synchronize actions necessary to maintain maritime Full Spectrum Superiority. Triton's on-station time and range enables unmatched awareness of the maritime battlespace by sustaining the COTP for Surface Warfare and the Overseas Contingency Operation.																	
MQ-4C Triton includes an endurance-class UAS that will operate from land-based sites around the world. Unmanned aircraft at each operating location will provide persistent maritime ISR orbits by being airborne 24 hours a day, 7 days a week out to ranges of 2,000 nautical miles. Worldwide access will be achieved by providing coverage to nearly all the world's high-density sea-lanes, littorals and areas of national interest from its operating locations. Triton will leverage the Maritime Patrol and Reconnaissance Forces community to enhance manpower, training and maintenance efficiencies.																	
MQ-4C Triton UAS sensors will provide detection, classification, tracking and identification of maritime targets. Sensors to fulfill mission requirements include maritime radar, electro-optical/infrared and Electronic Support Measures systems. Additionally, Triton will have a communications relay capability linking dispersed forces in the theater of operation and serving as a node in the Navy's networked strategy. The MQ-4C Triton UAS will support the Fleet Commander's COTP of the battlespace, day and night. The UAS will cue other Navy assets for further situational investigation and/or attack, and will also provide battle damage assessment of the area of interest. Tactical-level data analysis will occur in real-time at shore-based Mission Control Systems via satellite communications. Further intelligence exploitation can be conducted at shore-based sites or aboard Carrier Vessel Nuclear/Landing Helicopter Dock ships.

Justification:

Basis for the FY 2021 Budget Request: FY 2021 includes a pause in production of MQ-4C Triton Unmanned Air Systems (UAS), deferring further procurement of the Multi-INT configuration until FY 2023. FY 2021 supports preservation of key elements of the Support costs to include trainer/training equipment, peculiar ground support equipment, government and contractor production team, and Interim Contractor Support of the Baseline Early Operational Capability. This budget continues to fund standup of the IFF and EO/IR organic depots and intermediate repair and maintenance capabilities.

A reduction of 2 aircraft in FY 2021 (FY20 request compared to FY21 request) has generated an asset of \$15.967M in FY 2019 Advanced Procurement (AP) and \$20.139M in FY 2020 AP. FY 2020 AP budget was not adjusted since the quantity adjustment occurred after FY 2020 request was submitted to Congress; Congress subsequently enacted the full AP amount for 2 aircraft. The program intends to reprogram these funds from Advance Procurement Budget Line Item (BLI) 0442C to Regular Procurement BLI 0442 to fund preservation and storage of production line equipment in order to support production resumption in FY 2023.

Note: Under a U.S./Australia Cooperative Program agreement, Australia has awarded a contract for Long Lead material for FY 2020 procurement of (1) MQ-4C. Australia has agreed to procure 1 additional aircraft and plan to procure further quantities in future.

(†) indicates the presence of a P-5a

Footnotes:

- (1) President's Budget FY 2021 reflects a production pause with no MQ-4C Triton aircraft procured in FY 2021 and FY 2022. Production resumes in FY 2023 with Lot 6.
- (2) Engines will be delivered with airframes.
- (3) Non-recurring Engineering is estimated for resolution of diminishing manufacturing sources and material shortages (DMSMS) and supporting technology refreshment on commercial off the shelf (COTS) based components.
- (4) Other funds Ground Control Station hardware. In FY 2019-2023, the ground stations will be procured in the Multi-INT configuration.
- (5) A reduction of 2 aircraft in FY 2021 (FY20 request compared to FY21 request) has generated an asset of \$36.1M in FY 2019 and FY 2020 Advanced Procurement (AP). FY 2020 AP budget was not adjusted since the quantity adjustment occurred after FY 2020 request was submitted to Congress; Congress subsequently enacted the full AP amount for 2 aircraft. The program intends to reprogram these funds from Advance Procurement Budget Line Item (BLI) 0442C to Regular Procurement BLI 0442 to fund preservation and storage of production line equipment in order to support production resumption in FY 2023.
- (6) FY 2021 and FY 2022 budgeted sums in Airframe PGSE line reflect the minimum investment required to continue the standup of organic depot and intermediate repair and maintenance capability. Organic depot and intermediate level repair and maintenance standup creates the capability for the Navy to support Triton operations at a lower lifecycle cost at required readiness levels. Depot repair capability is required because OEM production and repair capacity is not sufficient to meet demand. Repair capability for major components to include maritime radar, EO/IR sensor, and communications equipment must be in place to meet Orbit readiness levels.
- (7) Funding increase from FY 2020 to FY 2021 is due to the requirement to procure Mission System Trainers and Maintenance Trainers to support stand-up of MQ-4C Orbit. Training equipment is required to field the Multi-INT capability and includes the necessary fidelity for Fleet user familiarization and throughput capacity to align with Orbit standup.
- (8) The yearly funding requirement for the Pub/Tech Equipment cost element varies across the FYDP based on the schedule required to procure and standup Intermediate, Organizational, and Depot level maintenance systems required in support of Initial Operational Capability (IOC), Triton's Material Support Date (MSD) and to establish core depot maintenance capabilities within four (4) years of IOC, supporting Section 2464 of Title 10, United States Code.
- (9) Growth of Production Engineering Support between FY 2020 and FY 2021 is attributable to the production pause and the need to maintain key elements of the government and contractor production team. These costs would normally be reflected as labor costs associated with the purchase of the aircraft.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Footnotes:

(11) FY 2016 funding provides for 3 aircraft in LRIP-1 and 1 aircraft in LRIP-2

(12) The Department provided funding for an in-line production change to deliver FY 2017 funded aircraft B12 in a Multi-INT vice Baseline configuration. Because of this in-line production change, the expected delivery date for aircraft B12 changed from June 2020 to October 2021. The forced retrofit was previously scheduled to commence FY 2024 with an expected delivery of April 2025. Conducting the Multi-INT retrofit as an in-line production change represents a 42-month improvement over the expected delivery date.

Description:																	
The MQ-4C Triton Unmanned Air System (UAS) is integral to recapitalizing the Navy's Maritime Patrol and Reconnaissance Force. The MQ-4C Triton UAS provides a persistent maritime and littoral Intelligence, Surveillance, and Reconnaissance (ISR) data collection and dissemination capability to the fleet, serving as a force multiplier for the Joint Force and Fleet Commander, enhancing situational awareness of the battle space and shortening the sensor-to-shooter kill chain. Teamed with its manned-capability counterpart, the P-8A, Triton will be a key component of the Navy's family of systems to achieve maritime domain awareness. The MQ-4C air vehicle, mission control system, specialized sensors, and communications suite will play a significant role in achieving the Navy's strategic vision for the 21st century. The Triton system, as a persistent ISR enabler, provides the supported combatant commander and fleet commander with unparalleled situational awareness of the maritime battle space to develop and sustain the common operational tactical picture. The system will also serve as a Fleet response plan enabler with a persistent, global force offering to provide critical trip wire information for intelligence preparation of the environment. Triton will connect to both the Global Information Grid and the Distributed Common Ground System-Navy information backbone to provide the Warfighter with unprecedented levels of battlespace awareness to synchronize actions necessary to maintain maritime Full Spectrum Superiority. Triton's on-station time and range enables unmatched awareness of the maritime battlespace by sustaining the Common Operational Tactical Picture (COTP) for Surface Warfare and the Overseas Contingency Operation.																	
MQ-4C Triton includes an endurance-class UAS that will operate from land-based sites around the world. Unmanned aircraft at each operating location will provide persistent maritime ISR orbits by being airborne 24 hours a day, 7 days a week out to ranges of 2,000 nautical miles. Worldwide access will be achieved by providing coverage to nearly all the world's high-density sea-lanes, littorals and areas of national interest from its operating locations. Triton will leverage the Maritime Patrol and Reconnaissance Forces community to enhance manpower, training and maintenance efficiencies.																	
MQ-4C Triton UAS sensors will provide detection, classification, tracking and identification of maritime targets. Sensors to fulfill mission requirements include maritime radar, electro-optical/infrared and Electronic Support Measures systems. Additionally, Triton will have a communications relay capability linking dispersed forces in the theater of operation and serving as a node in the Navy's networked strategy. The MQ-4C Triton UAS will support the Fleet Commander's common operational tactical picture COTP of the battlespace, day and night. The UAS will cue other Navy assets for further situational investigation and/or attack, and will also provide battle damage assessment of the area of interest. Tactical-level data analysis will occur in real-time at shore-based Mission Control Systems via satellite communications. Further intelligence exploitation can be conducted at shore-based sites or aboard Carrier Vessel Nuclear/Landing Helicopter Dock ships.

P-40	Total Gross/Weapon System Cost												

*Title represents the P-10 Title for Advance Procurement.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:

A reduction of 2 aircraft in FY 2021 (FY20 request compared to FY21 request) has generated an asset of \$15.967M in FY2019 Advanced Procurement (AP) and \$20.139M in FY 2020 AP. FY 2020 AP budget was not adjusted since the quantity adjustment occurred after FY 2020 request was submitted to Congress; Congress subsequently enacted the full AP amount for 2 aircraft. The program intends to reprogram these funds from Advance Procurement Budget Line Item (BLI) 0442C to Regular Procurement BLI 0442 to fund preservation and storage of production line equipment in order to support production resumption in FY 2023.

Description:												
The MQ-8 Unmanned Air System ("Fire Scout") provides real-time Intelligence, Surveillance and Reconnaissance (ISR) data to tactical users without the use of manned aircraft or reliance on limited joint theater or national assets. The baseline MQ-8 can accomplish missions including over-the-horizon tactical reconnaissance, classification, targeting and laser designation and battle damage assessment (including voice communications relay). The MQ-8 launches and recovers vertically, and can operate from suitably-equipped air capable ships, as well as confined area land bases. Interoperability is achieved through the use of the Tactical Control System (TCS) software in the mission control system (MCS), also referred to as a Ground Control Station (GCS), and through the use of the Tactical Common Data Link (TCDL). The data from the MQ-8 is provided through standard DoD Command, Control, Communications, Computers and ISR (C4ISR) system architectures and protocols.												
The MQ-8 program includes both MQ-8B (qty 23) and MQ-8C (qty 38) Air Vehicles (AVs) as well as the MCS and other ancillary equipment. The MQ-8 program achieved Milestone C in June 2017.												
A deployed MQ-8 system includes AV(s), payloads (i.e. electro-optical/infrared/laser designator-range finder, Automated Identification System, voice communications relay, Radar, Weapons, and other specialty payloads), MCS (with TCS and TCDL integrated for interoperability), Unmanned Aerial Vehicle Common Automatic Recovery Systems (UCARS) for automatic launch and recovery, and associated spares and support equipment. The quantities and schedules for MCS and UCARS components are based on host ship requirements, while quantities and schedules for air vehicle components, support equipment, and training equipment are based on operational deployment plans. A limited number of land-based MCS supplement the shipboard systems to support shore-based operations, such as pre-deployment or acceptance functional check flights. These land-based MCS will also support depot-level maintenance/post-maintenance activities. The MQ-8C provides additional mission endurance and payload-weight-power, increased reliability, and improved maintainability to the MQ-8 system.												
MQ-8 systems will support missions on Littoral Combat Ship (LCS) and/or suitably-equipped air capable ships and land based MQ-8 requirements. Quantities of air vehicles are derived from LCS and/or suitably-equipped air capable ship deployment requirements for Surface Warfare and Mine Countermeasures mission sets.												
This budget prioritizes system wholeness for MCS, trainers/training equipment, peculiar support equipment, publications and technical data over continued air vehicle procurements. System wholeness is required to field and support procured air vehicles and MCS in support of operations onboard LCS, other suitably equipped air capable ships, and land-based MQ-8 requirements.

Appropriation / Budget Activity / Budget Sub Activity: 1506N: Aircraft Procurement, Navy / BA 04: Other Aircraft / BSA 1: Other Aircraft				P-1 Line Item Number / Title: 0443 / MQ-8 UAV			
ID Code (A=Service Ready, B=Not Service Ready): A		Program Elements for Code B Items: N/A				Other Related Program Elements: N/A	
Line Item MDAP/MAIS Code: 253							
Exhibits Schedule				Prior Years	FY 2019	FY 2020	FY 2021 Base
Exhibit Type	Title*	Subexhibits	ID CD	MDAP/MAIS Code	Quantity / Total Cost (Each) / (\$ M)	Quantity / Total Cost (Each) / (\$ M)	Quantity / Total Cost (Each) / (\$ M)
P-5	1 / MQ-8 UAV	P-5a, P-21			61 / 1,209.237	- / 89.061	- / 44.957
P-40	Total Gross/Weapon System Cost				61 / 1,209.237	- / 89.061	- / 44.957
*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.							
Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.							
Justification: FY 2021 funding supports ship ancillary equipment for FY 2021 LCS production hulls and fleet Mobile Mission Control Stations (MMCS) for training and proficiency which includes MCS, Unmanned Aerial Vehicle Common Automatic Recovery Systems (UCARS), support equipment, Tactical Common Data Link (TCDL) systems and specialty payloads. Quantity and cost can vary by shipboard deployment need date and requirement. Air vehicle procurements have completed; however, MCS production continues.							
This budget continues to procure support elements to include peculiar training equipment, peculiar support equipment for airframe and avionics requirements, publications, and production support requirements. Non-recurring engineering accounts for Frigate Integration/testing and MCS NRE/Tech refresh. Other Integrated Logistics Support includes production reach back, depot standup, and government logistics support requirements necessary to field the MQ-8 system. The Depot stand up will include required support equipment and data rights to include technical data needed to fully support repair and maintenance of the MQ-8C Air Vehicle as per Core analysis for depot capabilities. Technical publication costs are moving from focusing on data from the prime contractor to data specific to depot operations.							
The quantities and schedules for MCS and UCARS components are based on host ship requirements, while quantities and schedules for air vehicle components, support equipment, and training equipment are based on operational deployment plans. These cost elements are required to maintain the planned Initial Operational Capability dates, operational deployment tempo, envisioned readiness posture, and production shutdown activities. The Navy is the lead systems integrator for the MCS.							
Production Engineering support and Other ILS declines between FY20 and FY21 as production air vehicles complete deliveries, which results in costs moving to the sustainment of the MQ-8C Air Vehicle. Airframe PGSE cost increases between FY20 and FY21 based on required numbers of items to support deployment schedule of the MQ-8C A/V. Peculiar Training equipment cost is reduced between FY20-21 based on the completed fielding the training equipment, out year costs for trainers are partly to update/maintain the configuration conformity between the Air Vehicle and the training systems.

Footnotes:

(1) CE 1.1.1 Airframe/CFE: The total quantity reflects 61 which accounts for both MQ-8B (23) and MQ-8C (38) A/Vs.

(2) CE 1.2.1 Non-Recur Cost: Non-recurring engineering accounts for Frigate Integration/testing and MCS NRE/Tech refresh.

(3) CE 1.2.2 Ancillary Equipment: FY21 funding provides for but not limited to increased production and procurement of ancillary equipment components and installation support such as EXCOMMS for LCS, Fast Frigate and MMCS, ARC-210 radios, and UCARS for Shipboard and land based Mission Control Stations (MCS).

(4) CE 2.1 Airframe PGSE: FY21 increase is based on required numbers of items to support deployment schedule of the MQ-8C A/V.

Description:															
In FY 2019, the RQ-21A Blackjack Unmanned Aircraft System (UAS) program was consolidated and transitioned from being funded in Budget Line Items (BLI) 4737 (RQ-21 UAS) and 4787 (UAS Payloads) Procurement, Marine Corps (PMC) to BLI 0444 (STUASLO) Aircraft Procurement, Navy (APN). Current inventory of USN RQ-21 systems has been satisfied and FY 2017 is the last year of USN RQ-21A BLACKJACK system procurements. The USMC, however, continued to fund RQ-21A BLACKJACK system procurements in FY 2018 with Procurement, Marine Corps (PMC), Budget Line Item (BLI) 4737 and 4787. There are no plans to buy more USMC RQ-21 systems at this time, however RQ-21 System Component - Air Vehicles (AV) will be procured.															
The requirement for the RQ-21A BLACKJACK (formerly known as The Small Tactical Unmanned Aircraft System (STUAS)) Unmanned Aircraft System is defined in Capability Development Document, dated 18 November 2008 and further defined in the Capability Production Document, dated 15 February 2013. The RQ-21A BLACKJACK program entered the Engineering and Manufacturing Development (EMD) phase of the acquisition process as an Acquisition Category III program on 26 July 2010. On 19 August 2014, RQ-21A BLACKJACK was designated an Acquisition Category II program.															
The RQ-21A BLACKJACK is a combined United States Navy (USN) and United States Marine Corps (USMC) program that provides persistent maritime and land-based tactical Intelligence, Surveillance, and Reconnaissance/Target Acquisition support. It is capable of providing actionable intelligence and communications relay for 12-hours of continuous operation per day with a short surge capability of 24-hours continuous operation. The system has an operational radius of 50 nautical miles, further extendable through hub and spoke operations. The Air Vehicle (AV) is capable of airspeeds up to 80 nautical miles per hour with a service ceiling of 15,000 feet. This system brings commanders a dedicated and cost effective airborne ISR sensor system capable of providing actionable intelligence in real time. As an organic, tactical UAS, it supports unit-level force defense, force protection for Naval amphibious assault ships (multi-ship classes) as well Navy and Marine Corp land forces. Furthermore, the RQ-21A will support Naval Missions such as development of a Recognized Maritime Picture, Maritime Security Operations, Maritime Interdiction Operations, and provide support for Naval Units operating from sea/shore in Overseas Contingency Operations.															
The RQ-21A BLACKJACK system will continue to evolve and upgrade capabilities to satisfy capabilities shortfalls, new requirements, and reliability, maintainability and safety issues. Upgraded capabilities may include Navy Command and Control integration, Extended Range, Weapons integration, Heavy Fuel Engine, Laser Designator, Frequency Agile Communications Relay, Digital Common Data Link, Vertical Takeoff and Landing (VTOL), launcher and recovery equipment, mobile ground control stations and cyclic refresh of the Electro-Optical/Infrared camera. RQ-21A BLACKJACK will also continue to expand its shipboard capability across new ship classes. An RQ-21A system consists of five air vehicles, two ground control stations, modular multi-mission plug and play payloads, one launcher, one recovery system, and support equipment. Standard payloads include a turret mounted EO/IR camera and a communications relay package with automated identification ship capability, carried in the payload bay. RQ-21 System Component - Air Vehicles (AV) was previously referred to as attrition air vehicles.

Justification:

The FY 2021 budget request will procure 13 USN RQ-21 System Component - Air Vehicle's, Ancillary Equipment (payloads, launcher and recovery equipment) and funds the Production Engineering Support and ILS relevant to the procurement of Air Vehicles.

OCO:

The FY 2021 OCO funding supports Joint Urgent Operational Need (JUON) 0265 and procures 5 USMC RQ-21 System Component - Air Vehicles.

Footnotes:

(1) An RQ-21A system consists of five air vehicles, two ground control stations, multi-mission (plug and play) payloads, one launcher and recovery system, and peculiar support equipment. Air Vehicles (AV) are procured with an Electro Optical / Infrared Turret. Additional payloads are carried within the payload bay and include a communications relay package and automated identification system. Launch and recovery systems are procured with associated peculiar support equipment. Peculiar support equipment includes the AV fueling system, AV starter, battery charging station, transportation assemblies, cooling systems, shore power assemblies, AV scale system, and associated cabling. RQ-21A system unit costs reflect the fully burdened cost of a system.

(2) This cost element was titled "USN Attrition Air Vehicles" in prior budget submissions and is changed to a more appropriate title of "USN RQ-21 System Component - Air Vehicle". Procurements required to replace the air vehicle and components of the RQ-21A system lost during operations. Air vehicle components include turrets (camera) and payloads; a payload is anything the RQ-21A will carry beyond a camera (radio, ViDAR, SplitAces, etc.) The requirement for air vehicles is based on actual attrition rates observed from the first 9,000 flight hours of the RQ-21A system and projected reliability improvements from fixes to root causes of previous air vehicle losses, including differential GPS system, command and control data link logic, and engine reliability.

(3) Ancillary equipment includes all program procured equipment to support a RQ-21A system. This equipment may include, but is not limited to: Tactical Intelligence, Surveillance and Reconnaissance Processing Exploitation and Dissemination System (TIPS), payloads to enable Signals Intelligence (SIGINT)/ Electronic Warfare Support (ES), Synthetic Aperture Radar (SAR) / Moving Target Indicator (MTI), launcher and recovery equipment, peculiar support equipment, and Wide Area and Hyperspectral Imagery collection. FY21 funding supports SPLIT ACES payloads that provide nano-synthetic aperture radar capability including Moving Target Indicator and Coherent Change Detection capability .

(4) Prior Year Inactive Funding: Prior year funding was associated with Naval Special Warfare (NSW) Scan Eagle procurement. No prior year funding was associated with RQ-21A procurement. The Scan Eagle system provides near real-time reconnaissance, surveillance and target detection/identification for Naval Special Warfare (NSW), USN and other coalition forces; providing tactical commanders with Reconnaissance, Surveillance, Target Acquisition (RSTA), Battle Damage Assessment (BDA), and battlefield capabilities. Scan Eagle is not a program of record. A Scan Eagle system consists of twelve (12) air vehicles, Ground Control Station(s) GCSs and associated launch and recovery equipment.

(5) Product Engineering Support includes Information Assurance certifications required for the RQ-21A system to obtain Authority to Operate (ATO).

(†) indicates the presence of a P-5a

Footnotes:

(8) This cost element was titled "Attrition Air Vehicles" in prior budget submissions and is changed to a more appropriate title of "USMC RQ-21 System Component - Air Vehicle". Procurements required to replace the air vehicle and components of the RQ-21A system lost during operations. Air vehicle components include turrets (camera) and payloads; a payload is anything the RQ-21A will carry beyond a camera (radio, ViDAR, SplitAces, etc.) The requirement for air vehicles is based on actual attrition rates observed from the first 9,000 USMC flight hours of the RQ-21A system and projected reliability improvements from fixes to root causes of previous air vehicle losses, including differential GPS system, command and control data link logic, and engine reliability. OCO requirement is tied to JUONS 0265.

Description:												
The MQ-9 Reaper aircraft is a single-engine, turbo-prop Remotely Piloted Aircraft (RPA) designed to operate over-the-horizon at medium-to-high altitude for long endurance sorties. The aircraft is designed primarily to prosecute critical emerging Time-Sensitive-Targets (TST) utilizing radar, Electro-Optical/Infra-Red (EO/IR), and laser designator-based attack sensors while performing Intelligence, Surveillance, Reconnaissance and Target Acquisition (ISR TA). The aircraft employs fused multi-spectral sensor information to find, fix, and track ground targets and assesses post-strike results. The MQ-9 Reaper is capable of carrying multiple mission payloads to include: Electro-optical/Infrared (EO/IR), Lynx Multi-mode Radar, multi-mode maritime surveillance radar, Electronic Support Measures (ESM), laser designators, and various weapons packages.												
The USMC operates the MQ-9 under the Remote Split Operations (RSO) concept using a Dual Control Mobile Ground Control Station (DCMGCS) located at the Mission Control Element (MCE) at MCAS Yuma, AZ to support the OCONUS forward operating unit. A Launch and Recovery Element (LRE) GCS OCONUS allows for servicing, systems check, maintaining, launching, and recovering aircraft under Line-of-Sight (LOS) control. The LRE transfers control of the aircraft to the MCE pilot for mission execution. The Ground Control Station (GCS) functions as the aircraft cockpit and can control the aircraft from either within LOS or Beyond Line-of-Sight (BLOS) via a combination of satellite relay and terrestrial communication architectures.												
General Atomics-Aeronautical Systems Incorporated (GA-ASI) is the sole source vendor for the MQ-9. GA-ASI is responsible for the aircraft and Ground Control Station (GCS). The Raytheon Company manufactures the Multi-Spectral Targeting System-D (MTS-D) EO/IR sensor, and L3 Communications produces the Operator Simulator and various satellite communication (SATCOM) infrastructure components.

ID Code (A=Service Ready, B=Not Service Ready) : (†) indicates the presence of a P-5a	MDAP/MAIS Code:			
Footnotes: (1) CE 1.1.2 Aircraft/CFE (COCO): The cost of the two COCO aircraft in FY20, which are currently being utilized to support USMC ISR services, have been depreciated by an estimated value based on the usage since ISR services commenced in SEP 2018. Due to Congressional Adjustment there is a reduction from a total of 3 air vehicles (1 new and 2 used) to only 2 air vehicles (used). Due to this reduction 1.1.5) Payloads (Skytower Pod) has been reduced from \$10.976M to \$7.379 by \$3.597, and 2.1) Deployment Support Kit from \$7.202 to \$4.800 by \$2.402. (2) CE 1.1.6 Payload (Weapons): Weapons Payload consists of Bomb Racks and Missile/Rocket Launchers. Ordnance is budgeted and procured separately. (3) CE 2.1 Deployment Support Kits: Deployment support kits include peculiar support equipment required to maintain the air vehicle. Deployment support kits are required one per air vehicle.

Description:													
The VH-92A is the replacement helicopter for the VH-3D and the VH-60N, the aircraft currently used by Marine Helicopter Squadron One (HMX-1) for the safe and timely transportation of the President, Vice President, and other distinguished officials as directed by the White House Military Office (WHMO). The global nature of these commitments requires HMX-1 aircraft to deploy worldwide and operate in varying environmental and climactic conditions without mission degradation. This funding supports the procurement of the aircraft, mission equipment, technical data and publications, support equipment, logistics support and production engineering support. The VH-92A program conducted a successful Milestone C review on 30 May 2019. The ADM was signed on 7 June 2019. The Budget has been updated to reflect the validated and approved MS-C Component Cost Position.													
Planned Award Dates of Definitized Contract Options: Low Rate Initial Production (LRIP) LOT II: 2Q FY 2020 Low Rate Initial Production (LRIP) LOT III: 1Q FY 2021

*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:

The FY 2021 Budget Request is based on the validated and approved Milestone C Component Cost Position (7 June 2019) and includes five (5) Low Rate Initial Production LOT III VH-92A aircraft and associated support costs to support the transition of HMX-1 from the VH-3D and VH-60N to the VH-92A aircraft.

FY 2021 increase from FY 2020 in Gross/Weapon System Unit Cost is required for the definitized contract option of Lot III, Production Line shutdown efforts in cost element 1.2.2, and Production Engineering Support in cost element 2.6 to support delivery of LOT III aircraft through FY 2023. LOT III contract award funding is included in the following cost elements as well as other contract actions: 1.1.1, 1.1.2, 2.1 -2.5, and 2.7.

(†) indicates the presence of a P-5a

Footnotes:

- (1) Cost Element 1.1.1: FY 2021 includes Lot III, a definitized option on the base contract, plus other contract awards. The FY 2021 unit cost increase from FY 2020 reflects the definitized option of five aircraft.
- (2) Cost Element 1.1.2: Mission Equipment CFE line is required for all avionics material. FY 2021 increase from FY 2020 reflects the requirement for the Fifth Multifunction Display (Fifth MFD). All production A/C will be outfitted with a Fifth MFD. FY 2019 & FY 2020 cost currently reside in the ECO cost element. The Fifth MFD is identical to the four existing MFD's and will increase pilot situational awareness and to reduce cockpit workload.
- (3) Cost Element 1.1.5: FY 2021 increase from FY 2020 in ECO is funding required to incorporate unplanned aircraft changes that occur during production for Lot III aircraft through FY 2023; such as deficiencies, requirement changes, obsolescence, and other unplanned impacts to the production of the aircraft. Projected ECO costs is estimated as a 5 percent factor of the cost of the Aircraft (Cost Elements 1.1.1 thru 1.1.4) each year due to the low production quantity and short production time.
- (4) Cost Element 1.2.2: FY 2021 funding is required for Production Line Shutdown efforts through delivery of aircraft in FY 2023. These efforts are aligned with the build of the last lot of A/C. The MS C Component Cost Position validated the required funding level. The Production Line Shutdown cost estimate comprises of using multiple data points including square foot of the production facility, amount of tooling, test equipment and management hours.
- (5) Cost Element 2.2: FY 2021 increase from FY 2020 in Engine PGSE is required for additional support equipment for the procurement of LRIP Lot III aircraft.
- (6) Cost Element 2.6: FY 2021 increase from FY 2020 in Production Engineering Support is funding required to support delivery of Aircraft through FY 2023, which is in accordance with DoN Financial Management Policy Manual, Time Phased Procurement, section 03203, paragraph 2.d., page 3-99.

Description: The U.S. Marine Corps (USMC) UC-12W Operational Support Airlift (Light) aircraft is an FAA type-certified modern commercial cargo/passenger transport aircraft that will replace the USMC UC-12B/F aircraft in performing Operational Support Airlift (OSA) missions. The OSA mission provides transportation for high priority passengers and cargo with time, place or mission sensitive requirements. The aircraft will be capable of operating out of short, unimproved airfields; carry a minimum of nine passengers or light cargo; or carry a combination of passengers and cargo. The aircraft will be delivered with the following military unique systems: Ultra High Frequency (UHF) radio, Tactical Air Navigation (TACAN) radio, Identification Friend or Foe/Selective Identification Feature (IFF/SIF), and Aircraft Survivability Equipment (ASE). In "Prior Years", in addition to the six aircraft shown above, two Other Support Aircraft (UC-12W) were procured for the USMC Reserves using FY07 & FY08 National Guard & Reserve Equipment Account (NGREA) funding. These aircraft and their associated costs are not reflected above. The objective for the Other Support Aircraft (UC-12W) program is to replace all 12 USMC UC-12B/F aircraft.

P-5	1 / Other Support Aircraft	P-5a, P-21			6 / 69.925	- / 0.000	1 / 14.300	- / 0.000	- / 0.000
P-40	Total Gross/Weapon System Cost				6 / 69.925	- / 0.000	1 / 14.300	- / 0.000	- / 0.000

*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.

Note: Totals in this Exhibit P-40 set may not be exact or sum exactly due to rounding.

Justification:

There is no FY 2021 budget request.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).
