A. Mission Description and Budget Item Justification

The Defense Security Service (DSS) manages the Enterprise Security System (ESS) to provide an effective, real-time, security support capability for the Military Departments, DoD Agencies, the National Industrial Security Program (NISP), and other Federal Agencies. In compliance with the Expanded Electronic Government, President's Management Agenda, and the DoD Enterprise Architecture Framework, ESS is the unified offering of security mission systems which facilitate and automate improved national investigative and adjudicative standards, streamline security processes, and increase DoD community collaboration.

DSS Information Technology (IT) systems provide service critical to the major DSS mission areas: Industrial Security Oversight, and Security Education. DSS performs this critical function through operation of its production systems named the Enterprise Security System (ESS): the Industrial Security Facilities Database (ISFD); the DSS Gateway; and the Security Training Education and Professionalization Portal (STEPP) (formerly ENROL).

A. Mission Description and Budget Item Justification

The Defense Security Service (DSS) manages the Enterprise Security System (ESS) to provide an effective, real-time, security support capability for the Military Departments, DoD Agencies, the National Industrial Security Program (NISP), and other Federal Agencies. In compliance with the Expanded Electronic Government, President's Management Agenda, and the DoD Enterprise Architecture Framework, ESS is the unified offering of security mission systems which facilitate and automate improved national investigative and adjudicative standards, streamline security processes, and increase DoD community collaboration.

DSS Information Technology (IT) systems provide service critical to the major DSS mission areas: Industrial Security Oversight, and Security Education. DSS performs this critical function through operation of its production systems named the Enterprise Security System (ESS): the Industrial Security Facilities Database (ISFD); the DSS Gateway; and the Security Training Education and Professionalization Portal (STEPP) (formerly ENROL).

B. Accomplishments/Planned Programs (\$ in Millions)	FY 2011	FY 2012	FY 2013
Title: Systems Enhancement	0.995	6.206	8.866
Description: RDT&E for ESS primarily includes pre-planned product improvements (P3I) to the ESS applications, researching and improving assured information sharing, better posturing systems and networks against vulnerabilities, ensuring self-defense of systems and networks, and safeguarding data at all stages. These enhancements are necessary for DSS OCIO to increase the efficiency, capabilities, and security of the ESS Applications.			
FY 2011 Accomplishments: 1. Industrial Security Facility Database (ISFD): Accomplished the implementation of the ISFD "Metrics" Release system enhancement, which provides additional metric reporting and processing capability to ISFD for the tracking and reporting of information pertaining to facilities under DSS auspices.			
2. ODAA Business Management System (OBMS): Accomplished the Initial Operational Capability (IOC) for the DSS Office of the Designated Approving Authority (ODAA) Business Management System (OBMS). OBMS supports the DSS national security mission by providing security oversight and protection of classified information and technologies in the hands of the Defense Industrial Base (DIB) under the National Industrial Security Program (NISPOM).			
FY 2012 Plans: 1. ODAA Business Management System (OBMS): Continue the development of the system to achieve Full Operational Capability (FOC) in FY13.

4. DD 254: Deliver the Initial Operational Capability (IOC) toward full automation of the oversight and management of providing classified information access and guidance required for the performance on classified contracts. The DoD Form 254 – Contract Security Classification Specification; required by DoD 5220.22-4, Industrial Security Regulation and the National Industrial Security Program Operating Manual (NISPOM). The DD Form 254, and underlying business processes, is critical to ensure access to our Nation's classified information is properly safeguarded.			
5. Mobile Workforce Applications (MWA): Research technical capabilities to implement mobile technologies to improve the efficacy of the DSS mission. The global DSS industrial security and oversight mission requires field representatives to audit remote contract facilities and information systems that process classified information. By incorporating mobile technologies into daily operations, the workforce has access to relevant and timely information, critical in ensuring security oversight decision-making.
