[#] The FY 2015 OCO Request will be submitted at a later date.

Description:

Title III of the Defense Production Act (DPA) provides the Department of Defense (DoD) with a powerful tool to ensure the timely creation and availability of domestic production capabilities for technologies that have the potential for wide-ranging impact on the operational capabilities and technological superiority of U.S. defense systems. DPA Title III is unique in that it is the sole DoD program focused on creating, maintaining, protecting, expanding or restoring domestic production capacity to strengthen domestic industry and to establish the industrial base capacity for essential national defense capabilities.

The Defense Production Act is authorized by 50 U.S.C. App. 2061 et seq. This budget includes essential transformational initiatives using the authorities of Title III of the DPA. FY 2015 requested funding will be used for continuation of eight projects. These are multi-year projects that will incentivize domestic sources to establish, strengthen, and expand domestic industrial base capabilities for key technologies that support transformational initiatives and maintain the technological superiority of U.S. defense systems. Brief descriptions of these projects are provided below.

In accordance with the provisions of the Defense Production Act of 1950, as amended, (50 U.S.C. App. 2061 et seq.), notification to Congress of the intent of the DoD to execute any of the projects described in this exhibit to correct domestic industrial base shortfalls for technologies and/or materials essential for the execution of the national security strategy of the United States will be provided via letter notification before the referenced projects are initiated.

Justification:

FY 2015 resources:

Ten projects to be executed within FY 2015 resources are identified below. The multi-year cost phasing of each of these projects is addressed in the P5 exhibit. The first six of these projects, continuing from prior years, are part of the National Security Space (NSS) Industrial & Supply Base (ISB) Risk Mitigation Program described below.

- (1) NSS ISB: Next Generation Star Tracker System \$4.305 million
- (2) NSS ISB: Read Out Integrated Circuit (ROIC) Foundry Improvement and Sustainability \$2.639 million
- (3) NSS ISB: Space Qualified Solar Cell Supply Chain \$1.5 million
- (4) NSS ISB: Complementary Metal Oxide Semiconductor (CMOS) Focal Plane Arrays (FPA) for Visible Sensors for Star Trackers \$1.69 million
- (5) NSS ISB: Cadmium Zinc Telluride Substrates \$1.591 million
- (6) NSS ISB: Additive Manufacturing for Liquid Rocket Engines \$0.7 million
- (7) Modernization of Steel Plate Production \$2 million
- (8) Activated Carbon Capacity Expansion \$4.213 million
- (9) Scale Up of Green Energetics \$2 million
- (10) Transparent Ceramics Initiative \$1 million

The NSS ISB Risk Mitigation Program was developed by the DoD to formulate a systematic process to fund mitigation efforts to rectify shortcomings in the space industrial and supply base. The objective is to ensure access to critical technologies and capabilities in the quality, quantity, and timeframes required to support U.S. Government space programs. Projects in this program are addressing cross-platform, multi-agency/Service requirements using the authorities of DPA Title III. To date, six multi-year project technologies have been identified for funding through FY 2016.

FY 2014 resources:

FY 2014 adjustments (dollars in millions):

- \$ 25.135 FY 2014 request
- + 35.000 Congressional increase
- \$ 60.135 Appropriated

FY 2014 Congressional Add projects:

- (1) Modernization of Steel Plate Production \$18 million
- (2) Activated Carbon Capacity Expansion \$15.5 million (supplemented with \$5.635 from baseline funding for a project total of \$21.135 in FY 2014)
- (3) Advanced Carbon Nanotube Volume Production Facility \$1.5 million

ID Code (A=Service Ready, B=Not Service Ready) :

Program Elements for Code B Items: 0902199D8Z

Other Related Program Elements:

Date: March 2014

FY 2014 Other projects are identified below. The multi-year cost phasing of each of these projects is addressed in the P5 exhibit. Four of these projects, continuing from prior years, are part of the National Security Space Industrial & Supply Base Risk Mitigation Program.

- (1) NSS ISB: Next Generation Star Tracker System \$4.22 million
- (2) NSS ISB: Space Qualified Solar Cell Supply Chain \$0.947 million
- (3) NSS ISB: Cadmium Zinc Telluride Substrates \$4.633 million
- (4) NSS ISB: Additive Manufacturing for Liquid Rocket Engines \$4.7 million
- (5) Scale Up of Green Energetics \$2 million
- (6) Transparent Ceramics Initiative \$3 million

FY 2013 resources:

FY 2013 adjustments (dollars in millions):

\$ 89.189 FY 2013 request

+134.342 Net Congressional adjustments (+\$150 million increase, -\$10 million and -\$5.658 million decreases)

\$223.531 Appropriated

- .295 Rescissions (Sec. 3001 and 3004)
- -\$ 21.096 Sequestration (impact statement provided below)

\$202,140 FY 2013 Revised total

Sequestration reduction was \$21.096 million. The DPA program modified the scope of projects within the program. Much of the reduction will affect ordering of long lead-time capital equipment which will push out program schedules, driving up overall costs and potentially delaying realization of program objectives.

FY 2013 Congressional Add projects:

- (1) Advanced Carbon Nanotube Volume Production Facility \$17 million
- (2) Carbon Foam \$5 million
- (3) Silicon Carbide Fibers for Ceramic Matrix \$25 million (previously titled Ceramic Matrix Composites for Advanced Engines)
- (4) Flexible Solar Cells \$18 million
- (5) Lithium Ion Batteries for Military Applications \$6 million
- (6) Polyhedral Oligomeric Silsesquioxane (POSS) Nanotechnology Engineering Scale-up Initiative \$5 million
- (7) Solid Rocket Motors Production \$11 million
- (8) Submarine Valve-Regulated Lead Acid Batteries \$22 million
- (9) Thermal Battery Industrial Base Infrastructure \$3 million
- (10) Tungsten Rhenium Wire Production Sustainment \$7.609 million
- (11) Activated Carbon Capacity Expansion \$5 million

FY2013 Other projects are identified below. The multi-year cost phasing of each of these projects is addressed in the P5 exhibit. Five of these projects are part of the National Security Space (NSS) Industrial & Supply Base (ISB) Risk Mitigation Program described above.

- (1) NSS ISB: Next Generation Star Tracker System \$0.5 million
- (2) NSS ISB: Read Out Integrated Circuit (ROIC) Foundry Improvement and Sustainability \$3.864 million
- (3) NSS ISB: Space Qualified Solar Cell Supply Chain \$0.6 million
- (4) NSS ISB: Complementary Metal Oxide Semiconductor (CMOS) Focal Plane Arrays (FPA) for Visible Sensors for Star Trackers \$2.236 million
- (5) NSS ISB: Additive Manufacturing for Liquid Rocket Engines \$1.3 million
